Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert *"Provided,* That notwithstanding the foregoing provision of this paragraph and notwithstanding any other provision of this joint resolution, such amounts as may be necessary for projects or activities provided for in the Military Construction Act, 1983 (H.R. 6968),

at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference as filed in the House of Representatives on September 30, 1982, as if such Act had been enacted into law".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 30 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert "moneys deposited into the National Defense Stockpile Transaction Fund under section 9(b) of the strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h (b)) are hereby made available, subject to such limitations as may be provided in appropriation Acts and in section 5(a)(1) of such Act, until expended for the acquisition of strategic and critical materials under section 6(a)(1) of such Act (and for transportation and other incidental expenses related to such acquisition). This paragraph applies without fiscal year limitation to moneys deposited into the fund before, on, or after October 1, 1982: Provided, That during the fiscal year ending on September 30, 1983, not more than $120,000,000 in addition to amounts previously apropriated, of which not to exceed $85,000,000 shall be available only until the termination of this joint resolution for the purchase of domestic copper mined and smelted in the United States after September 30, 1982, may be obligated from amounts in the National Defense Stockpile Transaction Fund for the acquisition of strategic and critical materials under section 6(a)(1) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)(1)) and for transportation and other incidental expenses related to such acquisition."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 33 to the aforesaid resolution, and concur therein with an amendment as follows:

Strike out the matter stricken, and insert:

SEC. 114.(a)(1) Funds provided by this joint resolution for costs to continue the implementation of provisions contained in the District of Columbia Statehood Constitutional Convention Initiative (D.C. Law 3-171) shall be applied first toward ensuring voter education on the proposed constitution by (A) printing, by the Statehood Commission, of the proposed constitution together with objective statements both for and against its provisions as expressed by the Convention delegates taking such positions, (B) mailing of this information to the registered voters of the District of Columbia by October 22, 1982, and (C) preparing for publication as a public document a comprehensive legislative history of the proposed constitution.

(2) None of the funds provided by this joint resolution may be used to pay for the publication of any information or materials by the Statehood Commission which fail to present objective arguments for and against the provisions of the proposed constitution.

(b) Notwithstanding section 102, the paragraph under the heading "LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND" in the District of Columbia Appropriation Act, 1982 (Public Law 97-91; 95 Stat. 1175) is amended—

(1) in the second proviso, by striking out "payments of prizes" and inserting in lieu thereof "payment of fees to ticket agents, fees to contractors supplying gambling paraphernalia or services, and prizes";

(2) in the third proviso, by striking out "payments of prizes" and inserting in lieu thereof "payment of such fees and prizes";

(3) in the fourth proviso, by striking out "prizes and administration of the Board shall not exceed resources available to the Board from appropriated authority or revenues" and inserting in lieu thereof "administration of the Board shall not exceed resources available to the Board from appropriated authority: *Provided further,* That the annual expenses for fees and prizes shall not exceed revenues"; and

(4) in the fifth proviso, by striking out "for prize money" and inserting in lieu thereof "for fees and prize money".

(c) Notwithstanding any other provision of this resolution, the Superior Court of the District of Columbia may continue to operate the Volunteer Attorney Program and the Community Workers Program, and may implement the hearing authority. Upon passage of the fiscal year 1983 appropriation Act, full year program funding will be available to pay, retroactively, for program services performed on or after October 1, 1982.

(d) The Washington Convention Center may proceed at an annual rate of operation which does not exceed $5,275,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 57 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the section number 125 named in said amendment, insert "129".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 59 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 131. Sections 308(g) and 308a(c) of title 35, United States Code, are amended by striking out "September 30, 1982" and inserting in lieu thereof "December 17, 1982".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 69 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the section number "137" named in said amendment, insert: "140"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 73 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the section number "141" named in said amendment, insert: "143"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 75 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 145. Notwithstanding any other provision of this joint resolution, the head of any department or agency of the Federal Government in carrying out any loan guarantee or insurance program shall enter into commitments to guarantee or insure loans pursuant to such program in the full amount provided by law subject only to (1) the availability of qualified applicants for such guarantee or insurance, and (2) limitations contained in appropriation Acts.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 76 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the section number 144 named in said amendment, insert: "146".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 78 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 147. Notwithstanding any other provision of this joint resolution or any other provision of law, appropriations for urban and nonurban formula grants authorized by the Urban Mass Transportation Act of 1964 (49 U.S.C. 1601 et seq.) shall be apportioned and allocated using data from the 1970 decennial census for one-quarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 88 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the section number 156 named in said amendment, insert: "155".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 89 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 156. Notwithstanding any other provision of this joint resolution, there is appropriated $518,000,000, to remain available until expended, for Department of Transportation Interstate Transfer grants—Highways, and $365,000,000, to remain available until expended, for Department of Transportation Interstate Transfer grants—Transit: *Provided,* That allocations of these funds shall be distributed in accordance with House Report 97-783 or Senate Report 97-567, whichever is higher.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 90 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 157-158. Since the United States Congress established the Social Security system in 1935 to provide for the general welfare by establishing a system of Federal old-age benefits; and

Since Medicare was made part of the Social Security system by Act of Congress in 1965 to provide for the general welfare through a system of health benefits for the aged; and

Since Medicare is an insurance program in which working Americans contribute their Social Security payroll taxes and in which the elderly and disabled pay health insurance premiums in order to receive health benefits promised under this insurance plan; and

Since proposals to limit eligibility for Medicare health benefits to lower-income persons would profoundly alter the character of health insurance for the aged and disabled by removing the insurance principle from the Medicare program.

It is the sense of the Senate that the Congress should reject any proposal to impose a "means test" on eligibility for the Medicare program or benefits provided by the Medicare program.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 93 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 161. Section 2 of the International Coffee Agreement Act of 1980 (19 U.S.C.

1356k) is amended by striking out "October 1, 1982" and inserting in lieu thereof "the expiration of this joint resolution".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 100 to the aforesaid resolution, and concur therein with an amendment as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 167. Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"(e) USE OF CERTAIN APPORTIONED FUNDS FOR DISCRETIONARY PURPOSES.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e), or otherwise that any of the amounts apportioned under section 507(a) will not be obligated during a fiscal year, the Secretary may obligate during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"(3) For the purposes of carrying out this subsection—

"(A) None of the funds provided in the joint resolution providing continuing appropriations for the fiscal year 1983 shall be available for the planning or execution of programs the commitments for which are in excess of $1,050,000,000 for the two fiscal years ending prior to October 1, 1983, for grants-in-aid for airport planning, noise compatibility planning and programs, and development; and

"(B) Section 506(e)(4) of this Act shall not in any manner whatsoever impair the limitation established by this paragraph."

Mr. HATFIELD. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendments in disagreement were agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING CORRECTION IN THE ENROLLMENT OF HOUSE JOINT RESOLUTION 599

Mr. HATFIELD. Mr. President, I have one post-measure to handle. I urge the adoption of House Concurrent Resolution 420 instructing the House enrolling clerk to make technical corrections in House Joint Resolution 599.

The PRESIDING OFFICER (Mr. CHAFEE) laid before the Senate, House Concurrent Resolution 420, authorizing that a certain correction be made in the enrollment of House Joint Resolution 599, making continuing appropriations for the fiscal year 1983.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution (H. Con. Res. 420).

The concurrent resolution (H. Con. Res. 420) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. PROXMIRE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, may we have order for a brief moment?

The PRESIDING OFFICER. May we have order in the Chamber? Will those conducting conversations, please retire to the cloakrooms?

EXPRESSION OF APPRECIATION

Mr. BAKER. Mr. President, I am sure I must speak for every Member of the Senate on both sides of the aisle when I express my profound appreciation to the distinguished chairman of the Appropriations Committee and the distinguished ranking minority member of that committee for the most expeditious manner in which they handled this piece of legislation. It was done in a responsible way. It was done in a thorough way. It was done promptly.

Mr. President, there will be no more votes tonight.

Now, Mr. President, there are a number of routine matters that may be dealt with.

AUTHORITY FOR ANNUAL RATES OF COMPENSATION OF EMPLOYEES OF THE SENATE UNDER AUTHORITY OF THE FEDERAL PAY COMPARABILITY ACT OF 1970

Mr. THURMOND. Mr. President, for the record, I am submitting the order of the President pro tempore of the Senate, signed by me on October 1, 1982, effecting the authority for annual rates of compensation of employees of the Senate.

The order follows:

ORDER; U.S. SENATE, OFFICE OF THE PRESIDENT PRO TEMPORE

By virtue of the authority vested in me by section 4 of the Federal Pay Comparability Act of 1970, it is hereby—

Ordered,

DEFINITIONS

SECTION 1. for purposes of this Order—

(1) "employee" includes an officer (other than a United States Senator); and

(2) "annual rate of compensation" does not include longevity compensation authorized by section 106 of the Legislative Branch Appropriation Act, 1963, as amended, or any other additional compensation that may hereafter be authorized by law.

RATE INCREASES FOR SPECIFIED POSITIONS

SEC. 2. (a) The annual rates of compensation of the Secretary of the Senate, the Sergeant at Arms and Doorkeeper, and the Legislative Counsel (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate in excess of either of the following: (1) the annual rate in effect for positions in level III of the Executive Schedule under section 5314 of title 5, United States Code, or (2) an annual rate of compensation which is $1,000 less than the annual rate of compensation of Senators.

(b) The annual rates of compensation of the Secretary for the Majority and the Secretary for the Minority (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00. Nothwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section.

(c) The annual rates of compensation of the five Senior Counsels in the Office of the Legislative Counsel and the maximum annual rates of compensation of the Assistant Secretary of the Senate, the Parliamentarian, the Financial Clerk, the Assistant to the Majority Leader for Floor Operations, and the Assistant to the Minority Leader for Floor Operations (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $1,000 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section. The maximum annual rate of compensation for the non-statutory position known as the "Special Deputy to the Federal Elections Commission" shall be equal to the maximum annual rate of compensation for positions specified in the first sentence of this subsection.

(d) The maximum annual rate of compensation of the Director of the Office of Classified National Security Information in the Office of the Secretary of the Senate (as such rate was increased by prior orders of the President pro tempore) is further increased by 4.0 percent and, as so increased,

adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this paragraph, an individual occupying the position the annual rate of compensation for which is determined under this paragraph shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $2,000 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section.

CHAPLAIN'S OFFICE

SEC. 3. The annual rate of compensation of the Chaplain and the maximum annual rate of compensation for the position of secretary to the Chaplain are increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00. Nothwithstanding the preceding provisions of this section, the Chaplain shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate in excess of the annual rate in effect for positions in level IV of the Executive Schedule under section 5315 of title 5, United States Code.

OFFICES OF THE SENATE

SEC. 4. (a) The following individuals are authorized to increase the annual rates of compensation of the employees specified by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00:

(1) the Vice President, for any employee under his jurisdiction;

(2) the President pro tempore, for any employee under his jurisdiction;

(3) the Majority Leader, the Minority Leader, the Majority Whip, and the Minority Whip, for any employee under their respective jurisdictions;

(4) the Majority Leader and the Minority Leader, for the Assistant to the Majority Leader for Floor Operations and the Assistant to the Minority Leader for Floor Operations, respectively (subject to the provisions of section 2(c) of this Order);

(5) the Secretary of the Conference of the Majority and the Secretary of the Conference of the Minority, for any employee under their respective jurisdictions;

(6) the Secretary of the Senate, for any employee under his jurisdiction (subject to the provisions of section 2 (c) and (d) of this Order);

(7) the Sergeant at Arms and Doorkeeper, for any employee under his jurisdiction;

(8) the Chaplain, for his secretary;

(9) the Legislative Counsel, subject to the approval of the President pro tempore, for any employee under his jurisdiction (other than the five Senior Counsels);

(10) the Senate Legal Counsel, for any employee under his jurisdiction (subject to the provisions of section 701(b) of the Ethics in Government Act of 1978);

(11) the Secretary for the Majority and the Secretary for the Minority, for any employee under their respective jurisdictions; and

(12) the Capitol Guide Board, for the Chief Guide, the Deputy Chief Guide, the Assistant Chief Guide, and the Guides of the Capitol Guide Service.

(b) The limitations on the gross compensation which may be paid during a fiscal year to employees in the Offices of the Vice President, the President pro tempore, the Majority Leader, the Minority Leader, the Majority Whip, the Minority Whip, the Secretary of the Senate, the Sergeant at Arms and Doorkeeper, the Secretary of the Conference of the Majority, the Secretary of the Conference of the Minority, the Secretary for the Majority, the Secretary for the Minority, the Conference of the Majority, and the Conference of the Minority are each increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(c) Except for those officers and employees referred to in section 2 of this Order, no officer or employee within the Office of the Secretary of the Senate and no officer or employee within the Office of the Sergeant at Arms and Doorkeeper shall, for any period of time, be paid gross compensation at an annual rate which is in excess of either of the following: (1) the maximum rate prescribed in section 105(f) of the Legislative Branch Appropriation Act, 1968, as amended (as such rate is adjusted in section 7(b)(1) of this Order and prior orders of the President pro tempore), or (2) an annual rate of compensation which is $2,500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

COMMITTEE STAFFS

SEC. 5. (a) Subject to the provisions of section 105 of the Legislative Branch Appropriation Act, 1968, as amended (as modified by this Order), and the other provisions of this Order, the chairman of any standing, special, or select committee of the Senate (including the majority and minority policy committees and the conference majority and the conference minority of the Senate), and the chairman of any joint committee of the Congress whose funds are disbursed by the Secretary of the Senate, are each authorized to increase the annual rate of compensation of any employee of the committee, or any subcommittee thereof, of which he is chairman, by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(b)(1) The maximum annual rates of "$68,366", "$71,137", and "$75,063" appearing in section 105(e) of the Legislative Branch Appropriation Act, 1968, as amended (as provided in section 5(b)(1) of the Order of the President pro tempore of October 5, 1981) are each further increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00, and shall be deemed to refer to the figures "$71,101", "$73,983", and "$78,066", respectively.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of a standing committee of the Senate or the majority or minority policy committee of the Senate to which such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,600, and $1,000, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(3) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of any special or select committee of the Senate or the conference majority or conference minority of the Senate to which any such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,600, and $2,500, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(4) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of any joint committee of the Congress whose funds are disbursed by the Secretary of the Senate to which any such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,800, and $2,900, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

SENATORS' OFFICES

SEC. 6. (a) Subject to the provisions of section 105 of the Legislative Branch Appropriation Act, 1968, as amended (as modified by this Order), and the other provisions of this Order, each Senator is authorized to increase the annual rate of compensation of any employee in his office by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(b) The table contained in section 105(d)(1) of such Act shall be deemed to read as follows:

"$645,897 if the population of his State is less than 2,000,000;

"$664,631 if such population is 2,000,000 but less than 3,000,000;

"$709,788 if such population is 3,000,000 but less than 4,000,000;

"$767,917 if such population is 4,000,000 but less than 5,000,000;

"$815,476 if such population is 5,000,000 but less than 7,000,000;

"$865,438 if such population is 7,000,000 but less than 8,000,000;

"$891,860 if such population is 8,000,000 but less than 9,000,000;

"$919,722 if such population is 9,000,000 but less than 10,000,000;

"$961,518 if such population is 10,000,000 but less than 11,000,000;

"$1,016,282 if such population is 11,000,000 but less than 12,000,000;

"$1,058,077 if such population is 12,000,000 but less than 13,000,000;

"$1,111,401 if such population is 13,000,000 but less than 15,000,000;

"$1,164,726 if such population is 15,000,000 but less than 17,000,000;

"$1,218,050 if such population is 17,000,000 but less than 19,000,000;

"$1,257,922 if such population is 19,000,000 but less than 21,000,000;

"$1,297,795 if such population is 21,000,000 or more.".

(c)(1) The second sentence of section 105(d)(2) of such Act (as modified by prior orders of the President pro tempore) is further modified to read as follows: "The salary of an employee in a Senator's office shall not be fixed under this paragraph at a rate less than $1,202 per annum or in excess of $39,154 per annum except that (i) the salaries of three employees may be fixed at rates of not more than $71,101 per annum, (ii) the salaries of five employees may be fixed at rates of not more than $68,938 per annum, and (iii) the salary of one employee may be fixed at a rate of not more than $72,061 per annum.".

(2) Notwithstanding the modification made by paragraph (1) of this subsection, any individual occupying a position to which a rate referred to in clause (i), (ii), or (iii) of such modification applies shall not be paid at any time at an annual rate in excess of $5,900, $5,400, and $2,500, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(d) The figures "$192,624" and "$64,208" appearing in subsections (a), (b)(1), and (b)(2) of section 111 of the Legislative Branch Appropriation Act, 1978, as amend-

ed (as provided in section 6(d) of the Order of the President pro tempore of October 5, 1981), shall be deemed to refer to the figures "$200,328" and "$66,776", respectively.

GENERAL LIMITATION

SEC. 7. (a) The figure "$1,155" appearing in section 105(f) of the Legislative Branch Appropriation Act, 1968, as amended (as provided in section 7(a) of the Order of the President pro tempore of October 5, 1981), shall be deemed to refer to the figure "$1,202".

(b)(1) The maximum annual rate of compensation of "$75,063" appearing in such section (as provided in section 7(b)(1) of such Order of October 5, 1981) is further increased by 4.0 percent and, as so increased, adjusted to the next higher multiple of $1.00, and shall be deemed to refer to the figure $78,066".

(2) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position to which such rate applies shall not be paid at any time at an annual rate in excess of $2,500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

NOTIFYING DISBURSING OFFICE OF INCREASE

SEC. 8. In order for an employee to receive the increase in his annual rate of compensation pursuant to section 4, 5, or 6, the individual designated to authorize such increase for that employee shall notify the Disbursing Office of the Senate in writing that he authorizes such increase for that employee and the date on which such increase is to be effective. Such increase shall become effective as provided in section 105(a)(2) of the Legislative Branch Appropriation Act, 1968, except that if the notice required by the preceding sentence is given within five days (not counting Saturdays, Sundays, or holidays) after the date on which this Order is issued, such increase may become effective on or after October 1, 1982.

DUAL COMPENSATION

SEC. 9. The figure "$14,551" contained in section 5533(c)(1) of title 5, United States Code (as provided in section 9 of the Order of the President pro tempore of October 1, 1980) shall be deemed to refer to the figure "$15,860".

LONGEVITY COMPENSATION

SEC. 10. The figure "$463" contained in section 106(b)(1) of the Legislative Branch Appropriation Act, 1963, as amended (2 U.S.C. 60j (b)(1)), shall be deemed to refer to the figure "$482".

OFFICE OF THE SENATE LEGAL COUNSEL

SEC. 11. (a) Notwithstanding any other provision of law—

(1) the Senate Legal Counsel shall not be paid at any time at any annual rate of compensation which is in excess of the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order, and

(2) the Deputy Senate Legal Counsel shall not be paid at any time at an annual rate of compensation which is in excess of $1,000 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(b) The foregoing provisions of this Order, other than subsection (a) of this section, shall not be applicable to the annual rate of compensation of the Senate Legal Counsel or the Deputy Senate Legal Counsel.

EFFECTIVE DATE

SEC. 12. Sections 1 through 11 of this Order are effective October 1, 1982.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, the distinguished majority leader has announced there will be no more rollcall votes tonight. That means there will be no rollcalls until November 29. So there will be no misunderstanding, we are proceeding on a unanimous-consent basis. If anyone wishes to object, that is their prerogative. But they object through the leadership of either side.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quroum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Objection.

What is the request, Mr. President?

The PRESIDING OFFICER. That the order for the quorum call be rescinded.

Mr. METZENBAUM. No objection.

Mr. STEVENS. Mr. President, I do hope the Members will not be gunshy here tonight. It is going to be a long night. We have a long list of items. They are going to keep coming from the House. I do ask that the Chair help us by keeping some order so that we can make sure what we do in a period of time like this. It is a time for real deliberation and Members are not going to be foreclosed in the exercise of their rights to object if they wish to do so. I hope that everyone understands the consequences of an objection and hope that, rather than Members objecting out of hand unless the matter has been discussed and they know absolutely what they are doing, that we can take a quorum call and discuss the matter, if there is any misunderstanding, before we frustrate a whole procedure.

The PRESIDING OFFICER. The Chair is perfectly prepared to keep order but needs the cooperation of the Members. I ask that those Members who are carrying on conversations please do it in the cloakrooms.

Mr. STEVENS. Mr. President, I ask unanimous consent that if I yield to another Member for the purpose of initiating some issue, I not lose my right to the floor to continue this process and that the floor revert to me so we may control the flow of these documents as they come to us from the House.

Mr. METZENBAUM. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. Mr. President, I ask unanimous consent, without losing my right to the floor, that I may yield to the Senator from Colorado for the purpose of addressing a bill he has in his hand.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Colorado.

CONCURRENT REFERRAL—GI BILL

Mr. ARMSTRONG. Mr. President, earlier this evening, I sent to the desk the Armstrong-Cohen-Hollings-Matsunaga GI bill proposal and announced my intention to ask unanimous consent that the bill be concurrently referred to the Committee on Armed Services and the Committee on Veterans' Affairs. I did so because members of the Committee on Armed Services had expressed the desire to have the bill before them so that they may consider it and the staff could look at it so a hearing could be held. I am now prepared to offer that unanimous-consent request. I stress it is only to give concurrent jurisdiction and for no other purpose so that, if, at some point in time, as I expect, this bill is offered as a floor amendment to another bill, there will be no question of the Committee on Armed Services having been denied the opportunity to look at it.

Mr. President, I do ask unanimous consent that the bill in question be concurrently referred to the Committee on Armed Services and the Committee on Veterans' Affairs.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. Mr. President, as a member of both these committees, that would certainly meet my approval. However, I presume the Senator has checked with the chairman of the Committee on Armed Services and the Committee on Veterans' Affairs.

Mr. ARMSTRONG. Mr. President, I can assure the Senator that I have discussed this matter with the chairman of the Armed Services Committee and the chairman of the Veterans' Affairs Committee and it is agreeable to both of them.

The PRESIDING OFFICER. Is there objection?

Mr. CRANSTON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I would now ask unanimous consent that I may yield to the chairman of the Labor Committee to make a motion to discharge his committee from H.R. 5238.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

ORPHAN DRUG ACT

Mr. HATCH. Mr. President, I ask unanimous consent to discharge H.R. 5238 from the Committee on Labor and Human Resources and ask that it be brought up for immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, reserving my right to object, my understanding is this is the so-called shopping center bill?

Mr. HATCH. No, this is the orphan drug bill. The shopping centers will be the next bill. This is the orphan drug bill.

Mr. METZENBAUM. I have no objection.

Mr. ARMSTRONG. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Colorado.

Mr. ARMSTRONG. Mr. President, is the Senator's request to bring the bill up?

Mr. HATCH. Yes.

Mr. ARMSTRONG. I will not object to that, although I would like an opportunity to speak briefly on the bill when it is before us.

Mr. HATCH. I think when I get through the Senator will be happy with the legislation.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object——

Mr. LONG. Mr. President, I have discussed the matter with the Senator, and he is going to offer an amendment which I believe we can accept.

Mr. HATCH. That is correct.

Mr. ROBERT C. BYRD. So there is no objection?

Mr. LONG. No.

Mr. ROBERT C. BYRD. There is no objection.

Mr. HATCH. Is there any objection?

I ask that the bill be brought up for immediate consideration.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 5238) to amend the Federal Food, Drug and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes.

The Senate proceeded to the consideration of the bill.

UP AMENDMENT NO. 1400

(Purpose: To substitute alternative provisions)

Mr. HATCH. Mr. President, I move to strike all after the enacting clause and insert the following amendment in the form of a substitute.

The PRESIDING OFFICER. The Senator will send the amendment to the desk.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 1400.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That (a) This Act may be cited as the "Orphan Drug Act".

(b) the Congress finds that—

(1) there are many diseases and conditions, such as Huntington's disease, myoclonus, ALS (Lou Gehrig's disease), tourette syndrome, and muscular dystrophy which affect such small numbers of individuals residing in the United States that the diseases and conditions are considered rare in the United States;

(2) Adequate drugs for many of such diseases and conditions have not been developed;

(3) drugs for these diseases and conditions are commonly referred to as "orphan drugs";

(4) because so few individuals are affected by any one rare disease or condition, a pharmaceutical company which develops an orphan drug may reasonably expect the drug to generate relatively small sales in comparison to the cost of developing the drug and consequently to incur a financial loss;

(5) there is reason to believe that some promising orphan drugs will not be developed unless changes are made in the applicable Federal laws to reduce the costs of developing such drugs and to provide financial incentives to develop such drugs; and

(6) it is in the public interest to provide such changes and incentives for the development of orphan drugs.

SEC. 2. (a) Chapter V of the Federal Food, Drug, and Cosmetic Act is amended by adding at the end thereof the following:

"SUBCHAPTER B—DRUGS FOR RARE DISEASES OR CONDITIONS

"RECOMMENDATIONS FOR INVESTIGATIONS OF DRUGS FOR RARE DISEASE OR CONDITIONS

"SEC. 525. (a) The sponsor of a drug for a disease or condition which is rare in the States may request the Secretary to provide written recommendations for the nonclinical and clinical investigations which must be conducted with the drug before—

"(1) it may be approved for such disease or condition under section 505, or

"(2) if the drug is a biological product, before it may be licensed for such disease or condition under section 351 or the Public Health Service Act.

If the Secretary has reason to believe that a drug for which a request is made under this section is a drug for a disease or condition which is rare in the States, the Secretary shall provide the person making the request written recommendations for the nonclinical and clinical investigations which the Secretary believes, on the basis of information available to the Secretary at the time of the request under this section, would be necessary for approval of such drug for such disease or condition under section 505 or licensing under section 351 of the Public Health Service Act for such disease or condition.

"(b) The Secretary shall by regulation promulgate procedures for the implementation of subsection (a).

"DESIGNATION OF DRUGS FOR RARE DISEASES OR CONDITIONS

"SEC. 526. (a) The manufacturer or the sponsor of a drug may request the Secretary to designate the drug as a drug for a disease or condition which is rare in the States. If the Secretary finds that a drug for which a request is submitted under this subsection is being or will be investigated for a rare disease or condition and—

"(1) if an application for such drug is approved under section 505, or

"(2) if the drug is a biological product, a license is issued under section 351 of the Public Health Service Act,

the approval or license would be for use for such disease or condition, the Secretary shall designate the drug as a drug for such disease or condition. A request for a designation of a drug under this subsection shall contain the consent of the applicant to notice being given by the Secretary under subsection (b) respecting the designation of the drug.

"(b) Notice respecting the designation of a drug under subsection (a) shall be made available to the public.

"(c) The Secretary shall by regulation promulgate procedures for the implementation of subsection (a).

"PROTECTION FOR UNPATENTED DRUGS FOR RARE DISEASES OR CONDITIONS

"SEC. 527. (a) Except as provided in subsection (b), if the Secretary—

"(1) approves an application filed pursuant to section 525(b), or

"(2) issues a license under section 351 of the Public Health Service Act for a drug designated under section 526 for a rare disease or condition and for which a United States letter of Patent may not be issued,

the Secretary may not approve another application under section 505 (b) or issue another license under section 351 of the Public Health Service Act for such drug for such disease or condition for a person who is not the holder of such approved application or of such license until the expiration of seven years from the date of the approval of the approved application or the issuance of the license. Section 505 (c) (2) does not apply to the refusal to approve an application under the preceding sentence.

"(b) If an application filed pursuant to section 505 (b) is approved for a drug designated under section 526 for a rare disease or condition or a license is issued under section 351 of the Public Health Service Act for such a drug and if a United States Letter of Patent may not be issued for the drug, the Secretary may, during the seven-year period beginning on the date of the application approval or of the issuance of the license, approve another application under section 505 (b), or, if the drug is a biological product, issue a license under section 351 of the Public Health Service Act, for such drug for such disease or condition for a person who is not the holder of such approved application or of such license if—

"(1) the Secretary finds, after providing the holder notice and opportunity for the submission of views, that in such period the holder of the approved application or of the license cannot assure the availability of sufficient quantities of the drug to meet the

needs of persons with the disease or condition for which the drug was designated; or

"(2) such holder provides the Secretary in writing the consent of such holder for the approval of other applications or the issuance of other licenses before the expiration of such seven-year period.

"OPEN PROTOCOLS FOR INVESTIGATIONS OF DRUGS FOR RARE DISEASES OR CONDITIONS

"SEC. 528. If a drug is designated under section 526 as a drug for a rare disease or condition and if notice of a claimed exemption under section 505(i) or regulations issued thereunder is filed for such drug, the Secretary shall encourage the sponsor of such drug to design protocols for clinical investigations of the drug which may be conducted under the exemption to permit the addition to the investigations of persons with the disease or condition who need the drug to treat the disease or condition and who cannot be satisfactorily treated by available alternative drugs.".

(b) Chapter V of the Federal Food, Drug, and Cosmetic Act is amended by inserting before section 501 the following:

"SUBCHAPTER A—DRUGS AND DEVICES.".

SEC. 3. Title II of the Public Health Service Act is amended by adding at the end the following:

"ORPHAN PRODUCTS BOARD

"SEC. 227. (a) There is established in the Department of Health and Human Services a board for the development of drugs (including biologics) and devices (including diagnostic products) for rare diseases of conditions to be known as the Orphan Products Board. The Board shall be comprised of the Assistant Secretary for Health of the Department of Health and Human Services and representative, selected by the Secretary, of the Food and Drug Administration, the National Institutes of Health, the Centers for Disease Control, and any other Federal department or agency which the Secretary determines has activities relating to drugs and devices for rare diseases or conditions. The Assistant Secretary for Health shall chair the Board.

"(b) The function of the Board shall be to promote the development of drugs and devices for rare diseases or conditions and the coordination among Federal, other public, and private agencies in carrying out their respective functions relating to the development of such articles for such diseases or conditions.

"(c) In the case of drugs for rare diseases or conditions the Board shall—

"(1) evaluate—

"(A) the effect of subchapter B of the Federal Food, Drug, and Cosmetic Act on the development of such drugs, and

"(B) the implementation of such subchapter;

"(2) evaluate the activities of the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration for the development of drugs for such diseases or conditions,

"(3) assure appropriate coordination among the Food and Drug Administration, the National Institutes of Health, the Alcohol, Drug Abuse, and Mental Health Administration, and the Centers for Disease Control in the carrying out of their respective functions relating to the development of drugs and such diseases or conditions to assure that the activities of each agency are complementary,

"(4) assure appropriate coordination among all interested Federal agencies, manufacturers, and organizations representing patients, in their activities relating to such drugs,

"(5) with the consent of the sponsor of a drug for a rare disease or condition exempt under section 505 (i) of the Federal Food, Drug, and Cosmetic Act or regulations issued under such section, inform physicians and the public respecting the availability of such drug for such disease or condition and inform physicians and the public respecting the availability of drugs approved under section 505 (c) of such Act or licensed under section 351 of this Act for rare diseases or conditions.

"(6) seek business entities and others to undertake the sponsorship of drugs for rare diseases or conditions, seek investigators to facilitate the development of such drugs, and seek business entities to participate in the distribution of such drugs, and

"(7) recognize the efforts of public and private entities and individuals in seeking the development of drugs for rare diseases or conditions and in developing such drugs.

"(d) The Board shall consult with interested persons respecting the activities of the Board under this section and as part of such consultation shall provide the opportunity for the submission of oral views.

"(e) The Board shall submit to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives an annual report—

"(1) identifying the drugs which have been designated under section 526 of the Federal Food, Drug, and Cosmetic Act for a rare disease or condition,

"(2) describing the activities of the Board, and

"(3) containing the results of the evaluations carried out by the Board.

The Director of the National Institutes of Health and the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration shall submit to the Board for inclusion in the annual report a report on the rare disease or condition research activities of the Institutes of the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration; and the Secretary of the Treasury shall submit to the Board for inclusion in the annual report a report on the use of grants and contracts provided pursuant to this Act. Each annual report shall be submitted by June 1 of each year for the preceding calendar year.".

SEC. 4. (a) There are authorized to be appropriated $14 million in fiscal year 1983, $18 million in fiscal year 1984, $18 million in 1985.

In order to assist eligible entities to defray the costs of qualified experimental expenses, as defined by this section,

(b) The Secretary is authorized to make grants to and enter into contracts with eligible entities in order to carry out the purposes of this section.

(c) an eligible entity is any manufacturer or sponsor which has received from the Secretary a designation for a drug pursuant to § 526(c) of the Food, Drug and Cosmetic Act as amended by this Act.

(d) Qualified Experimental Expenses.—For purposes of this section—

"(1) In general.—The term 'qualified experimental expenses' means any amount paid or incurred for activities carried out—

"(A) in connection with an exemption for a drug for a rare disease of condition under section 525(i) of the Federal Food, Drug, and Cosmetic Act, or regulations issued under such section, and

"(B) after the date the drug is designated under section 526 of such Act.

"(2) Expenses must be related to use for rare disease or condition.—Amounts may be taken into account under paragraph (1) only to the extent they are attributable to activities related to the use of a drug for the disease or condition for which it was designated under sectin 526 of the Federal Food, Drug, and Cosmetic Act.

"(3) Amounts paid for land, etc.—Amounts paid or incurred for land (or improvement to land) or for property of a character subject to the allowance for depreciation shall not be taken into account under paragraph (1); except that allowances under section 167 shall be treated as expenses.

HOME HEALTH SERVICES

SEC. 5. (a) Part D of title III of the Public Health Service Act is amended by inserting after subpart II the following new subpart:

"SUBPART III—HOME HEALTH SERVICES

"HOME HEALTH SERVICES

"SEC. 339. (a)(1) For the purpose of encouraging the establishment and initial operation of home health programs to provide home health services (as defined in section 1861(m) of the Social Security Act) in areas in which such services are not otherwise available, the Secretary may, in accordance with the provisions of this section, make grants to public and nonprofit private entities and loans to proprietary entities to meet initial costs of establishing and operating such home health programs. Such grants and loans may include funds to provide training for paraprofessional personnel to provide home health services (as defined in section 1861(m) of the Social Security Act). The Secretary shall make grants and loans to entities for home health programs only in those areas which do not have adequate home health services, and shall give special consideration to areas with inadequate means of transportation to obtain necessary health services.

"(2) In making grants and loans under this subsection, the Secretary shall—

"(A) consider the relative needs of the several States for home health services; and

"(B) give preference to areas in which a high percentage of the population proposed to be served is composed of individuals who are elderly, medically indigent, or disabled.

"(3)(A) No loan may be made to a proprietary entity under this section unless the application of such entity for such loan contains assurances satisfactory to the Secretary that—

"(i) at the time the application is made the entity is fiscally sound;

"(ii) the entity is unable to secure a loan for the project for which the application is submitted from non-Federal lenders at the rate of interest prevailing in the area in which the entity is located; and

"(iii) during the period of the loan, such entity will remain fiscally sound.

"(B) Loans under this section shall be made at an interest rate comparable to the rate of interest prevailing on such date with respect to the marketable obligations of the United States of comparable maturities, adjusted to provide for administrative costs.

"(4) Applications for grants and loans under this subsection shall be in such form and contain such information as the Secretary shall prescribe.

"(5) Payments under grants and loans under this subsection may be made in advance on the basis of estimates or by way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such

terms and conditions as the Secretary finds necessary to carry out the purposes of such grants and loans.

"(6) There are authorized to be appropriated for grants and loans under this subsection $5,000,000 for each of the fiscal years ending on September 30, 1983, and September 30, 1984.

"(b)(1) The Secretary may make grants to and enter into contracts with public and private entities to assist them in developing appropriate training programs for paraprofessional personnel to provide home health services.

"(2) Any program established with a grant or contract under this subsection to train homemaker health aides shall—

"(A) extend for at least 40 hours, and consist of classroom instruction and at least 20 hours (in the aggregate) of supervised clinical instruction directed towards preparing students to deliver home health services;

"(B) be carried out under appropriate professional supervision and be designed to train students to maintain or enhance the personal care of an individual in his home (but not including any structural changes to the home) in a manner which promotes the functional independence of the individual; and

"(c) include training in—

"(i) personal care services designed to assist an individual in the activities of daily living such as bathing, exercising, personal grooming, and getting in and out bed; and

"(ii) household care services such as maintaining a safe living environment, light housekeeping, and assisting in providing good nutrition (by the purchasing and preparation of food).

"(3) In making grants and entering into contracts under this subsection, special consideration shall be given to entities which establish or will establish programs to provide training for persons fifty years of age and older who wish to become homemaker home health aides.

"(4) Applications for grants and contracts under this subsection shall be in such form and contain such information as the Secretary shall prescribe.

"(5) Payments under grants and contracts under this subsection may be made in advance on the basis of estimates or by way of reimbursement, with necessary adjustments on account of underpayments or overpayments, and in such installments and on such terms and conditions as the Secretary finds necessary to carry out the purposes of such grants and contracts.

"(6) There are authorized to be appropriated for grants and contracts under this subsection $2,000,000 for each of the fiscal years ending September 30, 1983, and September 30, 1984.

"(C) The Secretary shall report to the Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives on or before January 1, 1984, with respect to–

"(1) the impact of grants made and contracts entered into under subsections (a) and (b) (as such subsections were in effect prior to October 1, 1981);

"(2) the need to continue grants and loans under subsections (a) and (b) (as such subsections are in effect on the day after the date of enactment of the Community Home Health Services Act of 1982); and

"(3) the extent to which standards have been applied to the training of personnel who provide home health services.

(b) The Secretary shall report the results of studies currently evaluating home and community based services, and any recommendations for legislative action which might improve the provision of such services, to the Congress prior to January 1, 1985.

(c) The Secretary of Health and Human Services shall compile and analyze the results of significant studies carried out by any public or private entity, group, or individual, relating to current and alternative reimbursement methodologies for home health services. The Secretary shall make recommendations with respect to such reimbursement methodologies as they might be applied in health care programs funded in whole or in part by Federal funds, and report such recommendations to the Congress within 180 days after the date of the enactment of this Act.

(d) the Secretary of Health and Human Services shall undertake a thorough investigation of—

(1) the methods available to stem fraud and abuse in the medicare and medicaid home health programs; and

(2) the extent to which such methods are applied in stemming such fraud and abuse.

The Secretary shall report the results of the investigation to the Congress within 18 months after the date of the enactment of this Act.

(e)(1) The Secretary of Health and Human Services shall develop and carry out demonstration projects commencing no later than January 1, 1983, to test—

(A) methods for identifying patients at risk of institutionalization who could be treated more cost-effectively with home health services; and

(B) alternative reimbursement methodologies for home health agencies in order to determine the most cost-effective and efficient way of providing home health services.

(2) Methods for identifying patients at risk of institutionalization to be tested by the Secretary under paragraph (1)(A) may include, but not be limited to, the identification of hospitalized medicare patients who are candidates for early discharge due to availability of home health services and individuals in the community who could avoid institutionalization with the availability of home health services.

(3) Reimbursement methodologies to be tested by the Secretary under paragraph (1)(B) may include but not be limited to fee schedules, prospective reimbursement, and capitation payments.

(4) The Secretary shall report to Congress his findings with regard to the demonstrations carried out under paragraph (1) no later than January 1, 1984.

ANALYSIS OF THYROID CANCER; ACTIONS BY SECRETARY

SEC. 6. (a) In carrying out section 301 of the Public Health Service Act, the Secretary of Health and Human Services shall—

(1) conduct scientific research and prepare analyses necessary to develop valid and credible assessments of the risks of thyroid cancer that are associated with thyroid doses of Iodine 131;

(2) conduct scientific research and prepare analyses necessary to develop valid and credible methods to estimate the thyroid doses of Iodine 131 that are received by individuals from nuclear bomb fallout;

(3) conduct scientific research and prepare analyses necessary to develop valid and credible assessments of the exposure to Iodine 131 that the American people received from the Nevada atmospheric nuclear bomb tests; and

(4) prepare and transmit to the Congress within one year after the date of enactment of this Act a report with respect to the activities conducted in carrying out paragraphs (1), (2), and (3).

(D)(1) Within one year after the date of enactment of this Act, the Secretary of Health and Human Services shall devise and publish radioepidemiological tables that estimate the likelihood that persons who have or have had any of the radiation related cancer and who have received specific doses prior to the onset of such disease developed cancer as a result of these doses. These tables shall show a probability of causation of developing each radiation related cancer associated with receipt of doses ranging from 1 millirad to 1,022 rads in terms of sex, age at time of exposure, time from exposure to the onset of the cancer in question, and such other categories as the Secretary, after consulting with appropriate scientific experts, determines to be relevant. Each probability of causation shall be calculated and displayed as a single percentage figure.

(2) At the time the Secretary of Health and Human Services publishes the tables pursuant to paragraph (1), such Secretary shall also publish—

(A) for the tables of each radiation related cancer, an evaluation which will assess the credibility, validity, and degree of certainty associated with such tables; and

(B) a compilation of the formulas that yielded the probabilities of causation listed in such tables. Such formulas shall be published in such a manner and together with information necessary to determine the probability of causation of any individual who has or has had a radiation related cancer and has received any given dose.

(3) The tables specified in paragraph (1) and the formulas specifed in paragraph (2) shall be devised from the best available data that are most applicable to the United States, and shall be devised in accordance with the best available scientific procedures and expertise. The Secretary of Health and Human Services shall update these tables and formulas every four years, or whenever he deems it necessary to insure that they continue to represent the best available scientific data and expertise.

TECHNICAL AMENDMENTS TO THE PUBLIC SERVICE ACT

SEC. 7. (a) (1) Section 338F(e) of the Public Health Service Act (42 U.S.C. 254F-(e)) is amended by inserting before the period the following: "or under section 225 as in effect on September 30, 1977".

(2) Section 337(a) of such Act (42 U.S.C. 254j(a)) is amended by striking out "carrying out this subpart" and inserting in lieu thereof "carrying out this subpart (other than section 338C)".

(3) Section 338D(h) of such act (42 U.S.C. 254o(b)) is amended by striking out "section 338D(h)" and inserting in lieu thereof "section 338F(d)".

(4) Section 338F(d)(1) of such Act (42 U.S.C. 254p(d)(1)) is amended by striking out "section 338D(c)" and inserting in lieu thereof "section 338D(b)".

(5) Section 1536 of such Act (42 U.S.C. 300n-5) (as amended by section 935 of the Omnibus Budget Reconciliation Act of 1981) is amended by striking out "this title and" and inserting in lieu thereof "this title and—".

(6) The second sentence of section 1904(a)(1)(F) of such Act (42 U.S.C. 388w-3(a)(1)(F)) is amended by striking out "equipment for the systems" and inserting

in lieu thereof "equipment for the systems (other than systems with respect to which grants were made as prescribed by section 1905(c)(2))".

(7) Effective October 1, 1982, section 1912(b) of such act (42 U.S.C. 388x-1(b)) is amended to read as follows:

"(b)(1) From the remainder of the amount appropriated under section 1911 for any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to such remainder for that fiscal year as the amounts—

"(A) which would have been provided by the Secretary to the State and entities in the State under section 301 of this Act for mental health services demonstrations and under the Community Mental Health Centers Act and the Mental Health Systems Act for mental health services for fiscal year 1981 if the Secretary had obligated all the funds for such purposes available for such Acts under Public Law 96-536, and

"(B) provided by the Secretary to the State and entities in the State under the laws referred to in subparagraphs (D) and (E) of paragraph (2) for fiscal year 1980.

More to the total amount appropriated for mental health services demonstrations and mental health services for fiscal year 1981 under Public Law 96-536 for section 301 of this Act, the Community Mental Health Centers Act and the Mental Health Systems Act and the total amount appropriated for fiscal year 1980 for the provisions of law referred to in subparagraphs (D) and (E) of paragraph (2).

"(2) The provisions of law referred to in paragraph (1) are the following provisions of law as in effect on the day before the date of the enactment of the Omnibus Budget Reconciliation Act of 1981:

"(A) The Community Mental Health Centers Act.

"(B) The Mental Health Systems Act.

"(C) Section 301 of this Act.

"(D) Sections 301 and 312 of the Comprehensive Alcohol Abuse and Alcoholism, Prevention, Treatment, and Rehabilitation Act of 1970.

"(E) Section 409 and 410 of the Drug Abuse Prevention, Treatment, and Rehabilitation Act.

"(3) For purposes of paragraph (1), the total amount appropriated under Public Law 96-536 for mental health services demonstrations under section 301 of this Act shall be deemed not to exceed $20,000,000; and if such total amount did exceed $20,000,000, the amount that would have been provided to each State and entites in each State shall be ratably reduced for purposes of paragraph (1)(A) to conform to the limit prescribed by this paragraph.

"(4) To the extent that all the funds appropriated under section 1911 for a fiscal year and available for allotment in such fiscal year are not otherwise allotted to States because—

"(A) one of more States have not submitted an application or description of activities in accordance with section 1915 for the fiscal year;

"(B) one or more States have notified the Secretary that they do not intend to use the full amount of their allotment; or

"(C) some State allotments are offset or repaid under section 1916(b)(3); such excess shall be allotted among each of the remaining States in proportion to the amount otherwise allotted to such States for the fiscal year without regard to this paragraph.".

(8) Section 1915(c)(5) of such Act (42 U.S.C. 300x-4(c)(5)) is amended (1) by inserting "procedures for" before "procedural", and (2) by striking out "review procedures" and inserting in lieu thereof "review".

(9)(A) Section 1915(c)(6)(A)(i) of such Act (42 U.S.C. 300x-4(c)(A)(i)) is amended—

(A) by striking out "for mental health services";

(B) by inserting "for mental health services" after "fiscal year 1981";

(C) by inserting "for mental health services demonstrations under section 301 of this Act" before "if the Secretary"; and

(D) by striking out "such Acts" each place it occurs and inserting in lieu thereof "such provisions of law".

(2) Section 1915(c)(6)(A)(ii) of such Act (42 U.S.C. 300x-4(c)(6)(A)(ii)) is amended—

(A) by striking out "for mental health services";

(B) by inserting "for mental health services" after "fiscal year 1981";

(C) by inserting "and for mental health services demonstrations under section 301 of this Act" before "if the Secretary"; and

(D) by striking out "such Acts" and inserting in lieu thereof "such provisions of law".

(b) Section 831(b) of such Act (42 U.S.C. 297-1(b)) is amended by inserting before the period a comma and the following: "$400,000 for the fiscal year ending September 30, 1983, and $800,000 for the fiscal year ending September 30, 1984".

(c)(1)(A) Section 737(2) of such Act (42 U.S.C. 294j (2)) is amended by inserting "in a State" after "means a school".

(B) Section 781(a)(2) of such Act (42 U.S.C. 295c-1(a)(2)) is amended by striking out "under area health education center programs".

(C) Section 791A(b)(3)(A) of such Act (42 U.S.C. 295h-1a(b)(3)(A)) is amended by striking out "postbaccalaureate" and inserting in lieu thereof "baccalaurate".

(2) Section 791(c)(2)(A) of such Act (42 U.S.C. 295n(c)(2)(A)) is amended to read as follows:

"(A) such application contains assurances satisfactory to the Secretary that in the school year (as defined in regulations of the Secretary) beginning in the fiscal year for which the applicant receives a grant under subsection (a) that—

"(i) at least 25 individuals will complete the adequate educational programs of the entity for which such application is submitted; and

"(ii) such entity shall expend or obligate at least $100,000 in funds from non-Federal sources to conduct such programs; and".

(3)(A) Section 709(d) of such Act (42 U.S.C. 292i(d)) is amended to read as follows:

"(d) Funds appropriated under this title may be used by the Secretary to provide technical assistance in relation to any of the authorities under this title.".

(B) Title VIII of such Act is amended by adding at the end thereof the following:

"TECHNICAL ASSISTANCE

"SEC. 857. Funds appropriated under this title may be used by the Secretary to provide technical assistance in relation to any of the authorities under this title.".

(4) Section 1602(f)(2) of such Act (42 U.S.C. 300c-2(f)(2)) is amended by inserting after "including" the following: "selling real property pledged as security for such a loan or loan guarantee and".

(5) Section 306(1)(2) of such Act (42 U.S.C. 242k(1)(2)) is amended by striking out subparagraph (D) and redesignating subparagraphs (E), (F), and (G) as subparagraphs (D), (E), and (F), respectively.

(6) Section 308(d) of such Act (42 U.S.C. 242m(d)) is amended (1) by inserting ", if an establishment or person supplying the information or described in it is identifiable," after "No information", and (2) by striking out "authorized by guidelines in effect under section 306(1)(2) or under regulations of the Secretary" and inserting in lieu thereof "such establishment or person has consented (as determined under regulations of the Secretary) to its use for such other purpose".

(7) Section 330(d)(z) of such Act (42 U.S.C. 254g(d)(2)) is amended by inserting before "and the costs" the following: ", the costs of repaying loans made by the Farmers Home Administration for building,".

(8) Section 207(a)(1) of such Act (42 U.S.C. 209(a)(1)) is amended by inserting "psychology," after "pharmacy,".

(9) Section 302 of the Health Planning and Resources Development Amendments of 1979 (Public Law 96-79) is repealed.

(d)(1) The paragraph beginning with "Service and supply fund:" under the heading "PUBLIC HEALTH SERVICE" in the Federal Security Agency Appropriation Act, 1946, (42 U.S.C. 231) is amended by inserting ", or in advance," after "stock furnished".

(2)(A) The matter in section 1706(a) (42 U.S.C. 300u-5(a)) of the Public Health Service Act preceding paragraph (1) is amended by striking out "Health Information, Health Promotion and Physical Fitness and Sports Medicine" and inserting instead "Health promotion".

(B) The section heading for section 1706 of such act (42 U.S.C.300u-5) is amended to read as follows:

"OFFICE OF HEALTH PROMOTION".

(e) The first sentence of section 311(c)(2) of such Act (42 U.S.C. 243(c)(2)) is amended by striking out "forty-five days" and inserting instead "six months".

(f) Section 1932 of such Act is amended by—

(1) inserting "(a)" after "1932." and

(2) adding a new subsection (b) as follows:

"(b) The Secretary shall promulgate separate regulations governing the administration of this part. Such regulations shall take into account the distinctive features of the grant program authorized under this part."

(g) From the funds appropriated under section 419B of such Act or under any other applicable provision of law, the Secretary of Health and Human Services shall provide for the development and support of not less than ten comprehensive centers for sickle cell disease.

SEC. 8. Of the funds available to the Interagency Task Force on Acid Deposition, pursuant to the Energy Security Act of 1980, there shall be made available $800,000 for the purposes of studying the effects of acid deposition on the Quabbin Reservoir, in Massachusetts.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. HATCH. I will be glad to yield.

Mr. LONG. Let me ask the Senator, Does this amendment strike from the proposed bill the tax credit that was within the bill and substitute an authorization of appropriations instead?

Mr. HATCH. The Senator is correct. We have stricken the tax credit from the bill, and we have added an authorization which is acceptable to the Sen-

ator of $50 million over a 3-year period within the bill.

Furthermore, it is our understanding that if this bill goes to conference, before I will agree as chairman of the Labor and Human Resources Committee to any tax credit in the bill, I will confer with the Finance Committee in the Senate and obtain their approval before such agreement.

Mr. LONG. I thank the Senator.

Mr. DOLE. Will the Senator yield just briefly?

Mr. HATCH. I will be happy to yield.

Mr. DOLE. I concur with the remarks made by the distinguished Senator from Louisiana, and I am grateful to the Senator from Utah and my distinguished colleague from Kansas (Mrs. KASSEBAUM) for working out what we viewed as a problem of jurisdiction. Now that problem does not exist. We hope that nobody will try to slip any tax credit in later on.

Mr. HATCH. I thank the distinguished Senator.

Mr. President, I am privileged to support H.R. 5238, the Orphan Drug Act. This legislation owes much to my colleague, Senator NANCY KASSEBAUM, who has championed the cause of orphan drugs in the Senate. This bill, which is cosponsored by 171 members of the House, addresses a national problem: The need to develop drugs to treat relatively rare diseases. The fact that these afflictions affect only a small portion of our population does not diminish the tragedy involved, or our national responsibility for these Americans. Special consideration is necessary because the prospect of small markets has discouraged necessary research which is usually expensive.

Over the last 2 years an increasing amount of attention has focused on this problem. FDA and the pharmaceutical industry are the key players and they are starting to respond.

As my colleagues may know, the Department of Health and Human Services recently established an orphan products board, whose mission is to coordinate, both in the public and private sectors, research and development of therapies for rare diseases. Further, I have been encouraged by the efforts of FDA to streamline the drug approval procedures process, particularly to promote the early utilization of promising drugs under a program known as the compassionate IND process.

In addition, the pharmaceutical manufacturers association has created a Commission on Drugs for Rare Diseases, chaired by former Assistant Secretary for Health, Theodore Cooper, M.D., Ph. D. The commission has as its charge identifying drug products for rare diseases and assuring that a company will produce it. A recent result was Abbott Laboratory's willingness to produce and distribute hematin, a drug to treat rare disturbance of the hemoglobin metabolism known as hepatic porphyrias.

I stongly support these and other efforts which are designed to accomplish the goals of the Orphan Drug Act.

Nonetheless it has become clear to me that Congress must also contribute to these efforts. The Orphan Drug Act is properly supportive of what is being done. It also pushes those involved toward greater effort. In addition, perhaps most importantly, the bill is a powerful and needed symbol of national concern for those afflicted with rare diseases.

The bill before us, H.R. 5238 amends the Federal Food, Drug and Cosmetic Act, the Public Health Services Act, and the Internal Revenue Code so that the development of "orphan drugs" is encouraged.

The Food and Cosmetic Act will be amended to facilitate the development of drugs for rare diseases and conditions. The legislation directs the Secretary of Health and Human Services to promulgate regulations to designate drugs intended solely for "Drug Treatment Investigation." Under this category, the sponsor of a drug may apply to the Secretary for the designation of a drug for a rare disease or condition found in the United States. Also they will learn of the necessary steps needed to be taken in order to gain drug approval. It will allow drugs to be approved on a less costly basis. If the Secretary determines that the drug falls under either of these categories, he is required to designate it as such. This designation will facilitate drug-treatment investigations to include human participation with a rare disease or condition.

The Public Health Service Act will be amended to establish in the Department of Health and Human Services an interagency committee known as the committee on Orphan Drug Development. As I noted, a similar board already exists. The sole function of this committee will be to promote the development of drugs for rare diseases or conditions. In addition, the Director of the National Institutes of Health is required to submit to the committee an annual report on the rare disease and condition research activities, of NIH. The committee is required to report by June 1 of each year to appropriate congressional committees on activities and the results of its evaluation, including the report submitted by NIH.

The lives of millions of Americans are touched by a double tragedy. First, these individuals are victims of rare, debilitating conditions such as Wilson's Disease and ALS (amyotrophic lateral sclerosis). Second, they sometimes find it impossible to obtain treatment for these conditions even in cases where such treatment may be available. H.R. 5238 could be instrumental in improving and saving the lives of Americans afflicted by serious disease.

The substitute contains most of the same orphan drug provisions as the House-passed bill. In addition, it includes three other provisions. Each of these provisions is noncontroversial, yet important to clarify or correct current legislation in the Public Health Service Act, or to facilitate future enactment in the next Congress of legislation the Labor and Human Resources Committee has considered over the past year.

The first provision is a package of PHS technical and small substantive amendments. This includes items in H.R. 6355 and S. 2311 which affect the Department of Health and Human Services' administration of existing programs. The amendments I am offering are beneficial to the functioning of HHS and all of them are noncontroversial: They include sections 2, 5, 6, and 8 of H.R. 6355 (as reported) and section 301 (a) and (b) of S. 2311 (as reported).

The specific items in this first provision are as follows:

Section 2 of H.R. 6355 amends the NHSC by correcting several erroneous cross-references and reinstating status to certain individuals who were first involved in the program prior to 1977 and were accidentally omitted from a provision adopted during 1981 reconciliation. Section 2 also makes certain minor technical changes to the health block grants, as well as one substantive changes which alters the allocation formula for the alcohol, drug abuse, and mental health block grant. S. 2311 contains a provision identical to the latter provision.

Section 5 of H.R. 6322 restores the authorization for training programs for nurse anesthetists. An identical provision is contained in S. 2311.

Section 6 and 8 of H.R. 6344 and section 301 (a) and (b) of S. 2311 contain about 15 additional minor amendments to the PHS Act. All are noncontroversial and primarily correct errors contained in previous legislation or provide statutory justification for existing administrative practices. Only two provisions, both contained in the House legislation, could be described as being of a substantive nature; that is, eliminating enrollment requirements for schools of public health: Extending the time period that the Secretary can provide emergency disease prevention assistance to a State. Neither are controversial. This package also includes three minor amendments sponsored by Senator KENNEDY, which he has asked me to include.

The second provision directs the Department of Health and Human Services to conduct two activities important to gaining a better understanding of the health effects of radioactive

fallout from above-ground testing of nuclear weapons. The first requirement is to develop "radioepidemiological tables" which will catalog for each radiogenic cancer the probability that a given dose of ionizing radiation caused the cancer of a victim who has received such a dose. The second requirement is to investigate the relationship between iodine 131 and thyroid cancer in light of the distribution in the environment of iodine 131 as a product of nuclear testing.

Neither aspect of this amendment requires an appropriation. Both are proper functions under section 301 of the Public Health Service Act. The construction of the radioepidemiological tables has been recommended by representatives of the scientific community and the Departments of Defense, Energy, and Health and Human Services, all of whom stressed that the only practicable method of linking radiation exposure to the later development of cancer is through the science of radioepidemiology. During a March 12 hearing, Assistant Secretary Edward Brandt promised that development of these tables would begin, but I believe a legislative mandate is essential for the work to be accomplished.

Also, the Bureau of Radiological Health is currently focusing on two important iodine 131 thyroid studies. But during the March 12 hearing, we also learned that the greatest uncertainty regarding the health effects of the atomic testing involves the relationship between bomb-produced iodine 131 and the incidence of thyroid cancer. Legislative language requiring these studies be accomplished is essential to provide a proper mandate for this work.

The third provision I would like to add to this legislation concerns improved home health services for our elderly citizens. Early in 1981, I introduced S. 234, the Comprehensive Home Health Services Act of 1981. Since then, we have had two full Labor and Human Resources Committee hearings and, in December of last year, moved this bill from committee for consideration by the Senate. There is strong consensus among health policy experts and our elderly citizens that improved home health services are essential. The 1981 White House Conference on Aging gave a loud and clear mandate for improved home health—in fact, 4 of the top 10 recommendations—and these were considered the most important from among more than 700 recommendations—requested national attention to improving long-term care for older Americans. In spite of the obvious need for these services, many of my colleagues remain skeptical that the Comprehensive Home Health Services Act is the best means of providing home health care. Critics of this legislation have cited concerns that we simply cannot afford home health care. A CBO report indicated the cost of S. 234 would exceed $2 billion in the first year, with increases in subsequent years. I do not believe this analysis considered the cost savings potential of preventing the placement of elderly persons in nursing homes, and enabling earlier discharge from hospitals. But nonetheless, I am sensitive to criticisms that S. 234, as reported, may prove more costly than we intended, and that we need further consideration of how we might legislate cost effective and efficient long-term care, especially in home health services under medicare and medicaid.

These entitlement programs are under the jurisdiction of the Finance Committee, and I realize that Senator DOLE and my colleagues on the Finance Committee have labored long and hard to constrain the increases in these programs. Therefore, I urge Senator DOLE to hold full Finance Committee hearings devoted to the home health care issue at the earliest convenient date in the 98th Congress.

I am now asking for the Senate to accept a very modest program in home health care which will demonstrate that Congress has heard the voice of the people and is prepared to maintain the foundation upon which we can build a compreshensive home health care program in the near future. This third amendment consists of only the PHS aspects of S. 234, which include:

First, grants to nonprofit agnecies, and loans to proprietary entities to establish and operate home health programs in areas which are currently underserved—$5 million is authorized for grants and contracts for the next 2 fiscal years.

Second, grants to assist in training homemaker/home health aides, giving special consideration to persons 50 years of age and older—$2 million is authorized for these training programs during the next 2 fiscal years.

Third, the Secretary of HHS is required to provide for Congress some information critical to defining future national health policy, he must accomplish the following:

Report to Congress by January 1984 regarding the impact of the home health grants and contracts, and efforts to curtail fraud and abuse.

Compile and analyze various proposals to address problems related to reimbursement of home health services.

Test alternative reimbursement methods, recommending methods found most appropriate for different populations, locations and resources. Also, develop and carry out demonstration projects commencing no later than January 1, 1983, to test methods for identifying patients at risk of institutionalization who could be treated more cost effectively with home health services.

In summary, this amendment authorizes a relatively small amount of money for support of home health agencies and mandates the Department of HHS to provide for Congress information necessary to develop what we all know is imperative: A new national health policy which will provide high quality, affordable, and humane health care for our elderly citizens in the comfort and security of their homes.

I want to thank my colleague, Senator ROBERT PACKWOOD, for his strong support for home health care.

In sum, I ask my colleagues to adopt this bill. It is in every respect noncontroversial.

Mrs. KASSEBAUM. Mr. President, I am extremely pleased that the Senate is today considering legislation to address the plight of millions of Americans who suffer from rare diseases and conditions. Drugs for the treatment of these diseases are commonly know as orphan drugs due to the fact that high development and drug approval costs coupled with a small market for their use give these drugs limited commercial value. Thus, even in cases where a promising treatment has been discovered, it is frequently not made generally available because of the substantial financial loss which would be incurred by its manufacturer.

I first became aware of this problem in 1981 when constituents visited my office to discuss the orphan drug problem as it relates to Huntington's Disease. At that time, I introduced S. 1498 as an effort to facilitate the development of drugs for rare diseases. Based on suggestions which resulted from discussion of S. 1498, new orphan drug legislation was developed. I introduced this revised measure, S. 2130, earlier this year as a companion to H.R. 5238.

The response to this legislation has been impressive. A bipartisan group of 27 Senators have joined in cosponsoring S. 2130. Cosponsors include Senators HATFIELD, JACKSON, METZENBAUM, NUNN, PELL, RANDOLPH, CRANSTON, MOYNIHAN, ROTH, COCHRAN, STEVENS, RIEGLE, ZORINSKY, ANDREWS, WEICKER, LEVIN, SARBANES, CANNON, BURDICK, LEAHY, GLENN, HAYAKAWA, DECONCINI, MELCHER, QUAYLE, COHEN, and FORD.

The measure now before the Senate will assist orphan drug development in a number of ways:

First, it provides for the designation of a drug as being one for a rare disease or condition and established a process by which sponsors of designated drugs may receive written recommendations from the Department of Health and Human Services with respect to the clinical and nonclinical investigations required for approval. This provision is made sufficiently flexible to permit revisions in the

original recommendations should conditions warrant. At the same time, it will provide valuable information permitting drug sponsors to make a better assessment of the resources they will need to commit to the development of a drug for a rare disease.

Second, it attempts to address the problems created when a promising drug treatment is not patentable by providing a 7-year exclusive marketing right for the sponsor of the drug.

Third, it makes provision for the encouragement of sponsors of designated drugs to design open protocols for the addition to drug tests of individuals requiring a drug for treatment purposes. This provision would permit easier access to drugs under investigation by individuals who may have no other form of treatment available to them.

Fourth, it provides a statutory basis for the operation of the Orphan Products Board within the Department of Health and Human Services to promote the development of orphan drugs and devices and to coordinate orphan drug activites.

I am pleased by the interest Senator HATCH has shown in this legislation and urge its favorable consideration.

Mr. President, I ask unanimous consent that my testimony on behalf of the Orphan Drug Act before the Subcommittee on Health and the Environment of the House Energy and Commerce Committee be printed in the RECORD following my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR NANCY LANDON KASSEBAUM

Chairman Waxman, I am pleased to have the opportunity to appear today to add my support for your efforts to find a solution to a problem which has plagued us far too long. As you know, I have introduced a companion Senate bill, S. 2130, to the Orphan Drug Act. Thirteen of my colleagues in the Senate have joined in cosponsoring this legislation.

I first became interested in the particular problems faced by individuals with rare diseases and conditions when constituents representing the Committee to Combat Huntington's Disease visited my office last summer. Huntington's Disease, which affects approximately 14,000 persons nationwide, is a genetic disorder which manifests itself in adulthood. It is characterized by jerky movements and mental deterioration. Children of sufferers have a 50/50 chance of contracting the disorder.

As I have become more involved with this issue, I have become aware of a number of what could be called "unpopular diseases". These diseases include ALS (or Lou Gehrig's Disease), which affects 9,000 people, Tourette Syndrome, which affects 100,000, and myoclonus, which affects about 2,000 people. Even though the number of people afflicted with each condition is small, the combined population when all rare diseases are considered runs into the millions. In terms of total impact, the numbers are much higher as one quickly realizes that the tragedy of this situation rests not only with the victims, but also with their families.

The effect on family life was expressed most poignantly in a letter I recently received from a Kansas woman. I would like to read a portion of her letter:

"My husband has been diagnosed as having Huntington's Disease. We have two children that love their father very much; also myself. I have been told of the disastrous effect that it plays on family lives. I have saw my husband that was so full of life with so much to live for withdraw and lose all interest in everything. A very healthy and sports conscious person, slowly retreat to a chair and sit back and not be able to participate because people might think he was drunk or a drug addict because he couldn't respond like you or I could. Severe depression because he cannot sit and read the newspaper because his concentration is so limited. The worst part is to look at his two beautiful children and know that they too might someday go through the same things he is going through. The worst part of all he watches me thinking when will I grow tired of this and leave him or lock him away in an institution. So you see it is very hard to live a normal family life."

In addition to the burden carried by the victims and their families due to the effects of rare diseases and conditions, they carry the painful knowledge that there is little chance that any treatment will be available. During the initial phases of many diseases for which there is no known treatment, individuals often obtain comfort from a faith in medical science—a feeling that "maybe something will come along". This thought offers little solace to victims of rare diseases and conditions who realize that even if something does come along, it will not necessarily be put on the market. To illustrate this point, one need only look at the unrelenting efforts of Dr. Melvin Van Woert who, after nearly a decade of work, is still making L-5 HTP capsules by hand for his myoclonus patients.

The main problem, of course, is that the number of individuals who could make use of any particular orphan drug is too small to generate an adequate financial return on the development and related costs of its production. Most drugs for rare diseases have sales of less than $3 to $5 million annually.

The Orphan Drug Act offers a balanced and effective approach for dealing with impediments to the development of drugs for rare diseases. It provides additional flexibility in drug approval requirements which could reduce regulatory costs. It also recognizes the unique problems involved in testing orphan drugs due to small test populations. At the same time, assurances of safety and efficacy are maintained. The legislation also provides for better coordination among Federal agencies involved in drug research and regulation. Exclusive marketing rights would be granted to companies which produce non-patentable orphan drugs, and other financial incentives for orphan drug development are offered in recognition of cost factors which currently discourage their production.

The multi-faceted approach offered by the Orphan Drug Act meshes well with current public and private sector efforts to deal with the problem. The Pharmaceutical Manufacturers Association and its member companies are to be commended for their establishment of a commission on drugs for rare diseases. I sincerely hope that the commission will be successful in putting more orphan drugs on the market by bringing together the promising ideas of independent investigators and the resources of the pharmaceutical industry. I believe that the regulatory flexibility and financial incentives provided by the Orphan Drug Act would give added force to this private sector effort. I am also aware of various efforts related to rare diseases and conditions which are underway within the Food and Drug Administration, the National Institutes of Health, and the Center for Disease Control. Although I understand that the Department of Health and Human Services is moving toward improved coordination among agencies involved in this work, I continue to believe that a statutory mandate for an integrated approach to orphan drug policy is important.

As awareness of the orphan drug issue has increased, I have been encouraged by the attention which congressional, executive branch, research, health organization, and industry representatives have given to ways in which this problem might be successfully addressed. Although many positive steps have been taken, there is much which remains to be done. Years of dedicated effort have elevated public awareness of orphan drugs as a policy matter. We cannot afford to lose the momentum this interest has generated. It is my sincere desire that we act now to put into place mechanisms which will serve as a lasting response to this tragic problem. I believe that the Orphan Drug Act holds great potential for making this goal a reality and look forward to working with interested parties in achieving its enactment.

Mr. KENNEDY. Mr. President, many debilitating diseases and conditions affect only a small number of people in this country—Huntington's disease with 14,000 victims; amytrophic lateral sclerosis, 9,000 victims; Tourette syndrome, 100,000 persons; and muscular dystrophy, 200,000 persons. Because of the relatively limited market for pharmaceutical products to treat these rare diseases and conditions, drug companies have been unwilling to devote the considerable resources needed to develop effective pharmaceutical products. They argue that the cost of developing these drugs would exceed the small return on sales.

H.R. 5238, the Orphan Drug Act, holds out a promise to those of Americans who suffer from rare diseases and conditions—both the victims and their families. It encourages the development of orphan drugs by establishing a separate review procedure for FDA approval of orphan drug products. It provides for grants to assist in defraying the cost of conducting human clinical investigations of orphan drugs. It offers exclusive marketing rights on nonpatentable orphan drugs for 7 years after the date of approval. Finally, it establishes an Orphan Products Board to coordinate the activities of all Federal agencies involved in drug research and regulation.

The legislation before us today also contains several unrelated but important provisions that merit approval.

First, I am delighted the chairman of the Committee on Labor and Human Resources, Senator HATCH, has finally come around to my way of thinking on the need to provide separate categorical funding for important national priorities. It was little more than a year ago that he insisted we put home health grants into a block grant with a dozen other programs and let the States determine their own priorities. After a year's experience with the block grant approach, the Senator has begun to realize that the Federal Government plays an important role in identifying national needs and establishing priorities in the health and social services area.

I am pleased to support the Senator's amendment to reauthorize separate categorical funding for home health services and training programs. As one of the principal cosponsors of the Home Health Act of 1982, S. 234, I am hopeful that enactment of the home health grant program will serve as a spur to enactment of legislation that would make home health services available and affordable to the millions of elderly and disabled Americans who need them.

Second, the legislation would require the Department of Health and Human Services to conduct studies of the health effects of iodine 131 and low level ionizing radiation. For several years I have worked to enact legislation establishing a compensation system for American citizens exposed to radiation as a result of open air atomic bomb testing during the 1950's at the Nevada Test Site. One of the roadblocks to our moving this important legislation is our lack of complete understanding of the relationship between iodine 131 and thyroid cancer and the causal relationship between exposure to low level ionizing radiation and cancers. The proposed studies are intended to answer these questions.

I have some reservations about how successful these studies will be in responding to these questions; particularly from the perspective of the citizens of Nevada, Utah, and Arizona. The two studies are to be conducted entirely within the Department of Health and Human Services—without the benefit of outside peer review of study design, the conduct of the studies and prepublication review of the study results. While I do not mean to imply that I believe the Department of Health and Human Services would intentionally subvert the conclusions of these studies, I do believe that outside peer review is always essential to high quality research and is critical to public acceptance of the studies' conclusions, particularly by the A-bomb test victims. After all, the Federal Government has lied to them time after time. Why should they trust the Federal Government to do these studies without public involvement; studies that will be used in the courts to determine eligibility for Federal compensation? I regret the amendment cannot be amended to address this oversight.

Third, the legislation includes my amendment to require the Department of Health and Human Services to maintain support for 10 comprehensive sickle cell centers, located in medical schools across the country.

Sickle cell anemia is an inherited blood disease that affects one of every 600 blacks. Sickle cell trait appears in one of every 12 blacks. Other victims of the sickling condition can be found among people of Spanish, Mediterranean, and southern Indian descent. While sickle cell trait is usually an asymptomatic condition, sickle cell disease is an incurable debilitating disease that strikes those affected periodically, dramatically, and often tragically.

The victims of sickle cell disease are typically children. Many die at a young age. In fact, only about 50 percent of those stricken live to the age of 35. In addition to early death, the tragedy of sickly cell disease shows up in periods called "crises."

For many years interest in sickle cell disease suffered from relative neglect by the scientific community and was regarded as an unimportant condition occurring predominantly in black people, according to Dr. Roland B. Scott of Howard University. However, in 1972, Congress passed the National Sickle Cell Anemia Control Act to stimulate research, education, and improved patient care. Ten comprehensive sickle cell centers were established to carry out the congressional mandate.

In 1973, the 10 comprehensive sickle cell centers were increased to 15; however, by 1978, the number of comprehensive centers had fallen to 10. For fiscal year 1983, the National Heart, Lung, and Blood Institute proposes to fund only eight comprehensive centers. Mr. President, this is unacceptable. There is a need for far more than eight comprehensive sickle cell centers in America, today.

I recognize the there are severe stresses in research funding; however, we must maintain at least 10 comprehensive sickle cell centers. A reduction in the number of comprehensive centers sends an ominous message to America's black community, a message which says that a disease which affects primarily blacks is of little interest to the Congress. By maintaining 10 comprehensive sickle cell centers, we will be providing reassurance to the black community that the sickle cell program will not be permitted to atrophy.

Fourth, I am pleased that the legislation includes my amendment to direct the Secretary of Health and Human Resources to promulgate separate regulations for the administration of the primary care block grant.

Last year, during our deliberations on the Omnibus Budget Reconciliation Act of 1981, the Congress established four block grants in the health area: The maternal and child health grant; the preventive health grant; the alcohol, drug abuse, and mental health grant; and the primary care grant. The first three grant programs were written in such a way as to give the States a considerable amount of freedom to establish funding priorities and to rapidly turn over control and authority to the States in administering the grants.

By contrast, the primary care block grant, which consists principally of the community health center program, was designed to be a State-run block grant program only if a State wished to assume responsibility for the program and was willing to make a substantial financial contribution. In addition, if a State took the block grant, it would be required to continue to support the existing CHC's and a statutory range of services. The State could establish new centers only if the proposed centers were to be located in defined medically underserved areas and the statute provided for several procedural safeguards protecting existing centers from capricious State action.

On July 6, 1982, the Department of Health and Human Services published a single set of final rules implementing all four block grants, substantially ignoring the specific differences between the primary care grant and the other grant programs. My amendment will address this serious oversight by directing the Department to publish new regulations implementing the primary care block grant.

Finally, the legislation includes my amendment to require the Environmental Protection Agency to make funding available for a study of the effects of acid deposition on the Quabbin Reservoir, in central Massachusetts. Water from the reservoir serves more than 2 million people. Since 1974, water from the reservoir entering the MDC/Boston distribution system has been chemically treated, at substantial cost, in order to eliminate heavy metal leaching, the suspected cause of which is acid deposition, commonly known as acid rain. This year the rainbow trout harvest is down 50 percent, and again, the suspected culprit is acid rain. More than 60 percent of Massachusetts' reservoirs are poorly buffered and considered vulnerable to acidification.

While I appreciate that the issue of acid deposition is a controversial one, I envision the Quabbin Reservior study as having the potential to provide positive long-term solutions to a criti-

cal problem not only for Massachusetts but for the water supply of the Northeastern United States.

Mr. President, this legislation, taken as a whole, is an important measure that addresses a number of serious concerns. Some of its provisions I would prefer to see modified.

The Orphan Drug Act as amended is a positive piece of legislation and I urge its adoption.

Mr. PACKWOOD. Mr. President, I rise today in support of the Hatch-Packwood long-term care amendment. This is an amendment that the Senator and I have been working on for sometime now, and I am pleased that the Senate finally has a chance to consider the issue today.

The amendment we are offering is a very modest one, in fact, Mr. President, it falls way short of what I had hoped we would be able to do, nontheless, it is a postive step in the right direct.

The amendment we are offering today does six things:

First, it makes available grants and loans under the Public Health Service designed to provide startup funding for home health agencies.

Second, it authorizes the Secretary of Health and Human Services to develop training programs for homemaker-home health aides.

Third, the Secretary of Health and Human Services is required to report to the Congress by no later than January 1, 1984, the impact of grants and contracts for home health services in rural areas, and to also detail in this report how the Department of Health and Human Services has worked to curtail fraud and abuse in the medicare-medicaid home health program.

Fourth, the Secretary of Health and Human Services is further directed to prepare a report for the Congress on alternate methods of reimbursement for home health services.

Fifth, it directs the Secretary to test different reimbursement methodologies for home health services once the above report is completed.

The final provision of the Hatch-Packwood amendment requires the Secretary to collect information regarding the effects of providing home and community based services under certain waivers granted by the Secretary.

Mr. President, I would like to conclude my remarks by thanking the Senator from Utah for all of his strong support for bettering the home health care program for the elderly, and his continued leadership in assisting me in trying to get some kind of long-term care legislation passed during the 97th Congress.

Mr. NUNN. Mr. President, I rise to speak in support of this bill.

Mr. President, millions of Americans suffer from diseases which occur in relatively small numbers and for which there are few, if any, commercial drugs available for treatment. For many of these diseases this situation reflects the limits of our scientific knowledge about the underlying causes. However, there are other factors which have inhibited the pursuit of promising leads and the movement of experimenal drugs into the commercial markets.

Among these are: Our complicated patent laws, the lengthy approval process required by the U.S. Food and Drug Administration for new drugs, the allocation of Federal research and development funds to projects which could benefit the greatest number of individuals, and the targeting of private research and development dollars to projects with the greatest profit potential.

Mr. President, the Orphan Drug Act is designed to reduce some of the economic barriers to the development of drugs for rare diseases and to coordinate the efforts currently underway. Mr. President, this is a problem that needs our immediate attention. The individuals and families affected by these rare diseases cannot afford to wait for years or even months. Mr. President, I urge my colleagues to accept this bill.

Mr. HATCH. Mr. President, I move the adoption of the substitute.

The PRESIDING OFFICER. Is there further debate?

The amendment (UP No. 1400) was agreed to.

Mr. STEVENS. Mr. President, I think we should yield to the distinguished majority leader at this point.

UP AMENDMENT NO. 1401

Mr. ROBERT C. BYRD. Mr. President, I send to the desk an amendment on behalf of Mr. HEFLIN and ask that it be stated by the clerk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD), on behalf of Mr. HEFLIN, proposes an unprinted amendment numbered 1401.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous connsent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add the following new section 155 to Title 35 of the U.S. Code.

"Sec. 155. Patent Term Extension.

"Notwithstanding the provisions of section 154, the term of a patent which encompasses within its scope a composition of matter or a process for using such composition shall be extended if such composition or process has been subjected to a regulatory review by the Federal Food and Drug Administration pursuant to the Federal Food, Drug and Cosmetic Act leading to the publication of regulation permitting the interstate distribution and sale of such composition or process and for which there has thereafter been a stay of regulation of approval imposed pursuant to section 409 of the Federal Food, Drug and Cosmetic Act which stay was in effect on January 1, 1981, by a length of time to be measured from the date such stay of regulation of approval was imposed until such proceedings are finally resolved and commercial marketing permitted. The patentee, his heirs, successors or assigns shall notify the Commissioner of Patents and Trademarks within ninety days of the date of enactment of this section or the date the stay of regulation of approval has been removed, whichever is later, of the number of the patent to be extended and the date the stay was imposed and the date commercial marketing was permitted. On receipt of such notice, the Commissioner shall promptly issue to the owner of record of the patent a certificate of extension, under seal, stating the fact and length of the extension and identifying the composition of matter or process for using such composition to which such extension is applicable. Such certificate shall be recorded in the official file of each patent extended and such certificate shall be considered as part of the original patent, and an appropriate notice shall be published in the Official Gazette of the Patent and Trademark Office.".

Mr. ROBERT C. BYRD. Mr. President, this has been cleared on both sides.

Mr. STEVENS. It is my understanding that this amendment has been cleared at this time.

Mr. HATCH. Mr. President, the amendment has been cleared. We agree. We think it is an excellent amendment. We will accept it.

The amendment (UP No. 1401) was agreed to.

Mr. STEVENS. Mr. President, we are not in order. The Senate is not in order. We cannot hear what is going on.

The PRESIDING OFFICER. The Senator's point is well taken. We cannot proceed with this level of noise.

Will those Senators in the rear of the Chamber and the staff please retire elsewhere to conduct their conversations.

I ask those Senators conversing on the floor to please take their seats or discontinue the conversation so that those bringing up legislation might be heard.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. We have a long evening, and the Chair hopes that we would not have to interrupt too often to bring order.

The Senator from Utah.

Mr. STEVENS. Mr. President, has the Heflin amendment now been adopted?

The PRESIDING OFFICER. The amendment has been agreed to.

Mr. HATCH. Mr. President, I ask that the bill be adopted.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the en-

89-059 O-86-9 (Pt. 20)

grossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 5238), as amended, was passed.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TO AMEND TITLE II, UNITED STATES CODE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Chair lay before the Senate Calendar Order No. 764, S. 2297.

The PRESIDING OFFICER. The bill will be stated by title.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object—Mr. President, there is no objection.

Mr. METZENBAUM. Mr. President, reserving the right to object, I would have no objection to this matter coming to the floor provided that I have a firm commitment from the author of the legislation, from the chairman of the Judiciary Committee, and the chairman of the Subcommittee on Courts of the Judiciary Committee that in conference this bill will not extend into the area of substantive law that is presently covered, I believe, by S. 2000, if my recollection serves me right, the bill having to do with substantive bankruptcy law.

Mr. STEVENS. Mr. President, those conditions are unacceptable to the leadership. I suggest the bill be withdrawn until the members that the Senator from Ohio mentioned are on the floor. I do not think they are all here.

Mr. DOLE. They are all here.

Mr. STEVENS. Are all three Senators here?

Mr. DOLE. We are willing to make that commitment.

Mr. HATCH. We are all three willing to make that commitment. I am as the author of the bill.

Mr. THURMOND. That will be satisfactory.

Mr. DOLE. I am the subcommittee chairman.

Mr. METZENBAUM. Under those circumstances, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 2297) to amend title XI, United States Code, to improve the protection for shopping centers.

The Senate proceeded to the consideration of the bill.

UP AMENDMENT NO. 1402

Mr. HATCH. Mr. President, I ask unanimous consent to amend S. 2297 with a technical change.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 1402.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

1. Beginning on page 9, line 21 of the bill, strike out all through page 10, line 2, and insert in lieu thereof the following:

"(d)(1) In a case under chapter 7 of this title, if the trustee does not assume or reject an executory contract of the debtor within sixty days after the order for relief, or within such additional time as the court, for cause, within such sixty-day period, fixes, then such contract is deemed rejected.

"(2) In a case under chapter 9, 11, or 13 of this title, the trustee may assume or reject an executory contract of the debtor at any time before the confirmation of a plan, but the court, on request of any party to such contract, may order the trustee to determine within a specified period of time whether to assume or reject such contract.

"(3) In all cases under this title, if the trustee does not assume or reject an unexpired lease of the debtor within sixty days after the order for relief, or within such additional time as the court, for cause, within such sixty-day period, fixes, then such lease is deemed rejected, and in the case of a lease of real property, the court shall order the premises to be vacated immediately.".

2. Insert the following language immediately before the material on page 10, line 3:

"SEC. 3. Section 365 is further amended by adding at the end thereof the following section."

3. On page 10, line 3, strike the language "(2)" and replace it with the language "(3)".

4. On page 10, line 8, strike the language "SEC. 3" and replace it with the language "SEC. 4".

Mr. HATCH. Mr. President, this amendment will incorporate into the bill language virtually identical to the provisions of S. 2297, the Shopping Center Protections Improvements Act of 1982. S. 2297 has been overwhelmingly approved by the Judiciary Committee.

This amendment would change the bankruptcy law in three significant ways. First, it would require that the trustee decide whether to assume or reject an unexpired lease within 60 days after filing a bankruptcy petition, unless the court, for cause, extends that time. S. 2297 would have applied this requirement to executory contracts as well; the amendment only relates to unexpired leases.

Second, this amendment would require that until a lease is rejected, the trustee must perform the obligations of the debtor under the lease, including the payment of rent and other charges.

Third, this amendment would require that in order to assume or assign a shopping center lease, the trustee would be required to give assurances that the use clause of the lease would not be breached and the tenant mix would not be disrupted.

These changes in the bankruptcy law are necessary to stop abuses of the bankruptcy system by tenants who use the tactics of delay and lease misassignment to unjustly enrich the debtor at the expense of the other tenants of a shopping center. The small tenants of shopping centers, family owned small businesses hard pressed in these difficult economic times, are the real beneficiaries of this legislation. They need relief from this operation of the bankruptcy code and they need it now.

Among the beneficial provisions of this bill is a provision to correct flaws that have complicated the implementation of our Bankruptcy Code with regard to shopping centers.

Shopping center tenants are inextricably tied together. When one suffers financial failure, others may be placed in jeopardy as well if our Bankruptcy Code does not insure an efficient arrangement to fill the shopping center's vacancy. Prior to 1978 this was accomplished by lease clauses allowing the lessor to regain control of the lease in the event of bankruptcy. The 1978 act made such lease clauses unenforceable. Instead the lease becomes a part of the bankrupt estate. This can create acute problems when the estate's administrator neither assumes or assigns the lease for several months. The surrounding shopping center tenants must bear the extra burden caused by the vacancy—a particularly difficult problem if the shopping center was built around a single major business which has now folded. A single bankruptcy could trigger others. S. 2297 establishes a 60-day time limit for the administrator's decision to assume or reject a lease. This gives an administrator some incentive to either find a new tenant himself or return the lease to the shopping center within a reasonable period of time. The fate of the shopping center will not hang in the balance until the estate is settled.

In addition, the bill addresses a few other problems. In the event the lease is assumed by the administrator, it may be assigned to a business not in compliance with the use limitations of the lease, not of the financial quality required by the center or which does not pay the customary security deposit. For example, a men's shoestore may have entered a shopping center lease on the understanding that all men's shoestores would pay identical rent. Assigning a women's shoestore lease at a lower rent to a fourth men's shoestore would both oversaturate the men's shoestore market and give the

fourth the unfair advantage of a lower overhead. This only illustrates one of the complexities of shopping center bankruptcies. S. 2297 sets reasonable standards to deal with these unique problems.

With more than 22,700 shopping centers in the United States and over 42 percent of all retail trade conducted in shopping centers, this is a small bill with an important goal and effect. Accordingly, I encourage the Senate to join the Judiciary Committee in approving S. 2297.

WHY THIS BILL IS NEEDED

The success of a store in a shopping center depends greatly on the full-time operation of a carefully selected mix of stores. For this reason, shopping center tenants enter into long-term leases containing provisions which specify minimum hours of operation and which require that the premises be used for specified purposes only.

The bankruptcy of a shopping center tenant can seriously disrupt the business of all the other tenants. This disruption can occur if the debtor's store is left vacant for an extended period of time, or if it is assigned to a business not in conformance with the use clause of the lease, thus disrupting the shopping center's tenant mix.

Prior to the enactment of the Bankruptcy Reform Act of 1978, shopping center landlords and tenants were able to protect themselves from such vacancies and misassignments through the use of lease provisions returning the lease to the landlord in the event of a tenant's bankruptcy. The landlord would then release the premises to a business which would contribute to the tenant mix and thus maximize the sales of all the tenants in the shopping center.

In 1978, Congress made such lease clauses unenforceable. However, the unique economic interdependence of shopping center tenants was recognized by Congress and provisions to protect shopping centers and their tenants were also enacted.

Unfortunately, experience under the code shows that these protections have not worked as anticipated. Shopping center space has been vacated for long periods of time with no decision by the trustee of whether to assume or reject the lease. Where the vacated premises was that of a major tenant, especially in a small shopping center, the effect on the sales of the other tenants has been disastrous.

In addition, debtors often do not pay rent or other charges during this time. The debtor's failure to pay common area charges often results in an increase in the charges paid by the other tenants. The debtor's failure to pay rent to the landlord forces the landlord to provide current services without payment, a situation forced upon no other creditor.

Another problem which has arisen under the code is that shopping center leases have been assigned to businesses not in conformance with the use clause of the lease. The consequent disruption of the tenant mix, especially where the lease of a major tenant is involved, can reduce the sales of all the other tenants in the shopping center. The most serious consequences of misassignments, however, are to adjacent stores with uses complementary to the use of the debtor's store and to other tenants competing with the assignee where the assignment oversaturates that market.

MAJOR PROVISIONS

This bill contains three major provisions which would remedy the problems caused shopping centers and their solent tenants under the Code.

First, trustees would be required to decide whether to assume or reject an unexpired shopping center lease within 60 days after the order for relief unless the court grants additional time for cause. Under current laws, this 60 day requirement applies only in chapter 7 proceedings. This bill would extend it to other bankruptcy proceedings.

Second, trustees would be requried to perform all of the obligations of the tenant under the lease, including the payment of rent and other charges specified in the lease, until the lease is assumed or rejected. An exception would be made in the first 60 days after the order for relief for trustees unfamiliar with the business of the debtor who were uncertain about the debtor's obligations to make rental payments.

Third, the trustee would be required to give adequate assurance that shopping center lease provisions would not be breached and that the tenant mix would not be disrupted. Under present law, assurances must be given that lease provisions would not be substantially breached and that the tenant mix would not be substantially disrupted. In practice, the presence of the word "substantially" has permitted trustee to assign shopping center space to businesses not in conformance with the use clause to the detriment of other tenants in the shopping center.

The excessive flexibility which the term substantially has provided trustees is not necessary to protect the interests of debtors. The use clauses of shopping center leases are not written with such specificity that the ability of a trustee to assign a shopping center lease is substantially constrained, because there are a multitude of businesses operating in even the narrowest use classification. In the event that the trustee is unable to find a business conforming with the use clause, it is in the best interests of the other tenants of the shopping center that the lease revert to the landlord. Because a substantial portion of the rent received by shopping center landlords is based on the revenues of the tenants, the landlord has a strong incentive to find a conforming use or another use which would contribute to the tenant mix. The debtor's only interest is maximizing the proceeds of the assignment, regardless of the effect on the other tenants.

Mr. DeCONCINI. Mr. President, I am a cosponsor of S. 2297 and I support this amendment. The provisions of S. 2297, which this amendment would incorporate into the bill under consideration, solve three pressing problems caused shopping center tenants by the operation of the Bankruptcy Code.

The first problem is that bankrupt shopping center tenants frequently cease operation of some of their stores. These abandoned stores depress the sales of all the other tenants of the shopping center by reducing the customer drawing power of the center. These problems are especially acute where the bankrupt store is a major tenant. Under the Bankruptcy Code, bankrupt tenants are able to leave their stores vacant for long periods of time. This amendment would require the trustee to decide whether to assume or reject a lease in 60 days, or the lease would be deemed rejected. This time could be extended for cause in a complicated case.

The second problem is that during the time that a bankrupt tenant is not operating its store, it frequently does not perform its obligations under the lease, such as the payment of rent and other charges. This deprives the landlord of revenues needed to pay mortgage and tax payments and results in increased costs to other tenants for the payment of common area charges payed by all the tenants on a pro rata basis.

This amendment would require the trustee to perform the obligations of the tenant under the lease until the lease is rejected.

The third problem is that large chain stores have sold many of their shopping center leases to businesses not in conformance with the use clause of the lease. Deviations from the use clause can cause disruptions of the tenant mix and harm the business of all the other tenants. The Bankruptcy Code now requires that trustees give assurances that assignment of a shopping center lease will not substantially breach the use clause or substantially disrupt the tenant mix. This amendment would delete the word "substantially." The trustee would be required to find a purchaser for the lease which was within the use clause of the lease. This would insure that when a shopping center lease is sold, only the original lease, and not a new lease without the limitations of the

use clause, would be sold to a purchaser.

These problems are large and growing. The remedies which these amendments would provide are needed by the tenants of shopping centers to prevent the administration of the Bankruptcy Code from adding to the burden of the large numbers of business bankruptcies we are experiencing.

The amendment (UP No. 1402) was agreed to.

Mr. HATCH. Mr. President, I ask that the bill be adopted.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2297

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Shopping Center Protections Improvements Act of 1982."

SEC. 2. Section 365 (a), (b), (c), and (d) of title 11, United States Code, is amended to read as follows:

"§ 365. Executory contracts and unexpired leases

"(a) Except as provided in sections 765 and 766 of this title and in subsections (b), (c), and (d) of this section, the trustee, subject to the court's approval, may assume or reject any executory contract or unexpired lease of the debtor. The trustee shall timely perform all the obligations of the tenant, arising from and after the date of the order for relief, upon an unexpired lease (including payment of the rent and other charges specified in such lease) until such lease is assumed or rejected notwithstanding the provisions of section 503 of this title. For cause shown, the court may extend the time for performance of any obligation of rent or other charges due upon an unexpired lease pursuant to the provisions of section 108(b) of this title. Acceptance of such performance shall not constitute a waiver or relinquishment of the lessor's rights under the lease or under this title.

"(b)(1) If there has been a default in an executory contract or unexpired lease of the debtor, the trustee may not assume such contract or lease unless, at the time of assumption of such contract or lease, the trustee—

"(A) cures, or provides adequate assurance that the trustee will promptly cure, such default;

"(B) compensates, or provides adequate assurance that the trustee will promptly compensate, a party other than the debtor to such contract or lease, for any actual pecuniary loss to such party resulting from such default; and

"(C) provides adequate assurance of future performance under such contract or lease.

"(2) Paragraph (1) of this subsection does not apply to a default that is a breach of a provision relating to—

"(A) the insolvency or financial condition of the debtor at any time before the closing of the case;

"(B) the commencement of a case under this title; or

"(C) the appointment of or taking possession by a trustee in a case under this title or a custodian before such commencement.

"(3) For the purposes of paragraph (1) of this section and paragraph (2)(B) of section (f), adequate assurance of future performance of a lease of real property in a shopping center includes adequate assurance—

"(A) of the source of rent and other consideration due under such lease, and in the case of an assignment, with an operating and financial performance, including guarantors, similar to that of the original tenant when the lease was executed;

"(B) that any percentage rent due under such lease will not decline substantially;

"(C) that assumption or assignment of such lease is subject to all the provisions thereof, including provisions such as a radius, location, use, or exclusivity provision, and will not breach any such provision contained in any other lease, financing agreement, or master agreement relating to such shopping center; and

"(D) that assumption or assignment of such lease will not disrupt any tenant mix or balance in such shopping center.

"(4) Notwithstanding any other provision of this section, if there has been a default in an unexpired lease of the debtor, other than a default of a kind specified in paragraph (2) of this subsection, the trustee may not require a lessor to provide services or supplies incidental to such lease before assumption of such lease unless the lessor is compensated under the terms of such lease for any services and supplies provided under such lease before assumption of such lease.

"(c) The trustee may not assume or assign any executory contract or unexpired lease of the debtor, whether or not such contract or lease prohibits or restricts assignment of rights or delegation of duties, if—

"(1)(A) applicable law excuses a party, other than the debtor, to such contract or lease from accepting performance from or rendering performance to the trustee or an assignee of such contract or lease, whether or not such contract or lease prohibits or restricts assignment of rights or delegation of duties; and

"(B) such party does not consent to such assumption or assignment; or

"(2) such contract is a contract to make a loan, or extend other debt financing or financial accommodations, to or for the benefit of the debtor, or to issue a security of the debtor; or

"(3) such contract or lease has been terminated under State law prior to the order for relief.

"(d)(1) In a case under Chapter 7 of this title, if the trustee does not assume or reject an executory contract of the debtor within 60 days after the order for relief, or within such additional time as the court, for cause, within such 60-day period, fixes, then such contract is deemed rejected.

"(2) In a case under chapter 9, 11, or 13 of this title, the trustee may assume or reject an executory contract of the debtor at any time before the confirmation of a plan, but the court, on request of any party to such contract, may order the trustee to determine within a specified period of time whether to assume or reject such contract.

"(3) In all cases under this title, if the trustee does not assume or reject an unexpired lease of the debtor within 60 days after the order for relief, or within such additional time as the court, for cause, within such 60-day period, fixes, then such lease is deemed rejected, and in the case of a lease of real property, the court shall order the premises to be vacated immediately.".

SEC. 3. Section 365 is further amended by adding at the end thereof the following section.

"(3) If an unexpired lease is assigned pursuant to this section, the lessor of the property may require a deposit or other security for the performance of the obligations under the lease substantially the same as would have been required by the landlord upon the initial leasing to a similar tenant.".

SEC. 4. Section 541 of title 11, United States Code, paragraph (b) thereof, is amended to read as follows:

"(b) Property of the estate does not include—

"(1) any power that the debtor may only exercise solely for the benefit of an entity other than the debtor; and

"(2) any property subject to a lease which has expired by virtue of its own terms without regard to the bankruptcy proceedings. In the case of property subject to a lease which has expired by virtue of its own terms, the lessor shall be entitled to enforce its rights to possession of the property subject to such lease without further order of the court and notwithstanding the provisions of section 362(a) of this title.".

Mr. HATCH. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I move that the Senate insist on its amendments, request the conference with the House, and the Chair be authorized to appoint conferees on the part of the Senate.

Mr. ROBERT C. BYRD. Mr. President, will the Senator withhold that request temporarily?

Mr. STEVENS. I do withhold the request.

Mr. DOLE. Mr. President, as I understand it, the Senator from Kansas is to be recognized following a colloquy of the Senator from Missouri, to bring up the conference report.

Mr. STEVENS. As soon as this item is disposed of. We are awaiting confirmation of the conferees. It was my intention to turn to a matter that has been requested by the Senator from Missouri (Mr. DANFORTH). I understand it has been cleared. Then we will turn to the conference report on H.R. 4717.

Mr. DOLE. And I will call up 1524, which will be objected to. I have cleared the grain elevator bankruptcy bill.

Mr. STEVENS. One at a time, I ask my good friend, because that is not the order in which they are before me. We are prepared to go forward with H.R. 4717 as soon as this item is cleared.

Mr. ROBERT C. BYRD. Will the distinguished acting majority leader proceed with his request?

Mr. STEVENS. Mr. President, I move that the Senate insist on its amendment, request the conference with the House, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM conferees on the part of the Senate.

Mr. STEVENS. Mr. President, I inquire of the Chair if there is any further action of the Senate in order to dispose of the matter Senator HATCH has raised. We have just completed the matter and appointed conferees?

The PRESIDING OFFICER. The Senator is correct.

REDUCTION, SUSPENSION, AND EXTENSION OF CERTAIN DUTIES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 829, H.R. 4566. I understand that this has been cleared.

Mr. METZENBAUM. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. Mr. President, I yield to the Senator from Missouri.

Mr. DANFORTH. Mr. President, this is the so-called trade reciprocity bill. I think that the controversies have been worked out.

I note that the Senator from Ohio is a cosponsor of the bill, and I hope he will withdraw his objection.

Mr. METZENBAUM. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DANFORTH. Mr. President, I ask unanimous consent that a list of the cosponsors of S. 2094, the Reciprocal Trade and Investment Act that is now a part of H.R. 4566 be printed in the RECORD.

There being no objection, the cosponsors were ordered to be printed in the RECORD, as follows:

THE RECIPROCAL TRADE AND INVESTMENT ACT: COSPONSORS

Mr. Danforth, Mr. Dole, Mr. Roth, Mr. Wallop, Mr. Symms, Mr. Grassley, Mr. Cohen, Mr. Pressler, Mr. Simpson, Mr. Andrews, Mr. Schmitt, Mr. D'Amato, Mr. Helms, Mr. Kasten, Mr. Heinz, Mr. Chafee, Mr. Domenici, Mr. Glenn, Mr. Moynihan, Mr. Mitchell, Mr. Boren, Mr. Inouye, Mr. Chiles, Mr. Hollings, Mr. Riegle, Mr. Randolph, Mr. Metzenbaum, Mr. Bentsen, Mr. Tsongas, Mr. Bradley, Mr. Hart, and Mr. Cranston.

Mr. DANFORTH. Mr. President, I ask unanimous consent that a list of the organizations endorsing the enactment of this bill also be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

THE RECIPROCAL TRADE AND INVESTMENT ACT: ENDORSEMENTS

Aerospace Industries Association of America.
American Electronics Association (AEA).
American Farm Bureau (AFB).
American Trucking Associations (ATA).
Business Round Table.
California-Arizona Citrus League.
Chamber of Commerce.
Chemical Manufacturers Association (CMA).
Cling Peach Advisory Board.
Coalition of Service Industries.
Computer and Business Equipment Manufacturers Association (CBEMA).

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, I now yield to the distinguished Senator from Kansas, the chairman of the Finance Committee, to bring up the conference report on H.R. 4717.

For the benefit of all concerned, will the Senator tell us what the next two items are that he wishes to bring up?

Mr. DOLE. I should like to bring up H.R. 1524, to which I understand there will be an objection. That will be disposed of quickly. That is with reference to the California utilities, the artists' exemption, and reducing the holding from 12 to 6 months. That will be disposed of by objection, I understand.

The only matter I have would be acting again on the grain elevator bankruptcy bill, on a separate piece of legislation which has been cleared on all sides, to be introduced on behalf of Senator DANFORTH, Senator HEFLIN, Senator ANDREWS, and myself. It has been cleared by the chairman of the Judiciary Committee, and it has been cleared by the distinguished Senator from Alabama (Mr. HEFLIN). I have cleared it with Senator METZENBAUM on the same condition as the clearance in the other matter.

Mr. METZENBAUM. That it will not be used as a vehicle for additional amendments. Is that correct?

Mr. DOLE. That is correct.

Mr. STEVENS. Mr. President, I ask that the Senators address the Chair and not have direct conversations, so that we can keep this orderly.

The PRESIDING OFFICER. The Senator's point is well taken.

Mr. STEVENS. I ask unanimous consent that I be permitted to yield to the Senator from Kansas for the purpose of presenting the two amendments he has listed and that I then be recognized.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Kansas.

SAFE HARBOR LEASING—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on H.R. 4717 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the amendment of the Senate to the bill (H.R. 4717) to delay for one year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carry-forward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 1, 1982.)

Mr. DOLE. Mr. President, the House and Senate conferees have reached agreement on H.R. 4717, the Miscellaneous Revenue Act of 1982. I rise today to ask the Senate to approve the conference agreement.

TAX PROVISIONS

The most significant provision of the bill would delay the effective date of the LIFO reserve recapture rule enacted in Public Law 96-223 for 1 year. This provision was included in both House and Senate bills. The conferees have agreed that this deferred effective date will apply to the first $1 million of LIFO reserves for liquidations occurring on or before December 31, 1983.

The conference agreement also included the modification of the net operating loss rule for the Federal National Mortgage Association as contained in both House and Senate versions of the bill.

The other provisions of the conference agreement relate to provisions added by the Senate Finance Committee. These include an expansion of oil shale credits for 1981 and 1982 tax years, a reduction in wagering excise and occupational taxes in States where gambling is authorized by State law, a modification of the nonrecognition rules for a certain FCC ordered disposition of broadcast property, and revisions to the procedural rules of the Tax Court judges. Two other minor

and noncontroversial changes to withholding provisions are also included.

NONTAX PROVISIONS

The conference agreement also contains a provision relating to eligibility requirements for trade adjustment assistance and two provisions relating to unemployment benefits and FUTA taxes: First, relating to unemployment benefits paid to ex-service members and second, 1-year extension of existing FUTA exemption for certain fishermen.

BUDGET EFFECTS

The estimated revenue effect of the conference agreement is estimated at −$89 million in fiscal 1982, −$11 million in fiscal 1984, −$22 million in fiscal 1985, and −$23 million in fiscal 1986.

According to preliminary estimates from CBO, the unemployment benefits provision relating to benefits paid to ex-service members will involve budget outlays of $90 million in fiscal 1983, $70 million in fiscal 1984, $60 million in fiscal 1985, $55 million in fiscal 1986. The trade adjustment provision will involve an undeterminate budget effect.

Mr. President, the conference agreement before us represents a good compromise, and I recommend its adoption by the Senate.

Mr. MOYNIHAN. Mr. President, I thank the distinguished chairman of the Finance Committee who has been involved in this conference for almost a year.

There are two particular matters: One is of large interest.

First, we restore unemployment insurance benefits for ex-servicemen in a way that cannot have been intended that they be taken away. They are back, thanks to the Senator from Kansas.

Second, there is a matter of first amendment concern. The Watertown Times of New York State was to have been required by the Federal Communications Commission to divest itself of a television station and prohibited from purchasing a newspaper.

This seemed to us to impair a first amendment right. The law corrects it. We are the better for that having been done.

The PRESIDING OFFICER. If the Senator will withhold 1 minute, we will please have order in the Chamber so that the Senator might be heard. Those carrying on conversations please conduct them elsewhere.

The Senator from New York.

Mr. MOYNIHAN. I thank the distinguished Presiding Officer. The Senator from New York has been heard.

His colleague and friend, Senator D'AMATO is on his feet. I believe he wishes to say a brief word also.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Mr. President, I echo the distinguished senior Senator from New York with respect to the divestiture of the Watertown Times and the equity that this bill treats that matter with. I think it is equity that we seek. It was a divestiture that was forced through the operation of law, and I think the treatment afforded this matter in the tax bill is one that is fair and is one that I certainly feel in the interests of justice is one that is long overdue.

I commend Senator MOYNIHAN for his interest in moving this matter and the distinguished chairman of the Finance Committee for seeing to it that this matter was dealt with in an equitable fashion.

Mr. CANNON. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield to the Senator from Nevada.

Mr. CANNON. Mr. President, I rise in support of the conference report on H.R. 4717, legislation making miscellaneous changes in the tax code.

I am very pleased that the conference on this bill has been completed, and I want to take this opportunity to commend the conferees on their diligence and tireless efforts in coming to an agreement on this important legislation. I want to particularly express my thanks to the distinguished Chairman of the Finance Committee, Senator DOLE, and the ranking member of the Committee, Senator LONG. They both have been very helpful and cooperative in this matter. I am particularly pleased to note that an amendment to H.R. 4717 dealing with the excise and occupational taxes on legal wagering has been included. Mr. President, I am sure that all of my colleagues recall this particular amendment when I offered it to H.R. 4717 last December. This amendment reduces the excise tax on legal wagers from 2 percent to one quarter of 1 percent and reduces the occupational tax from $500 to $50. I introduced S. 483 in February of 1981 which would eliminate these taxes in States where wagering is legal. When hearings on this bill were held by the Subcommittee on Taxation and Debt Management, there was no opposition to its adoption. Furthemore, the Department of Treasury expressed no opposition to the legislation. Indeed, in the Department's testimony, it recommended that the subcommittee repeal the taxes in their entirety. The Department explained that there no longer remained any justification for maintaining these taxes. In sum, Mr. President, there is no opposition to the adoption of this amendment.

I have previously addressed my colleagues about this subject, and why these taxes are unfair, burdensome, and unjustified. I would, however, like to summarize briefly, once again, why this amendment is so important to the economy of my State. First, Mr. President, these taxes were adopted in 1951 as a revenue-raising device, as well as a means of curbing illegal wagering. Clearly, the impact of these taxes over the years has been just the reverse. I think it is worth while to review a statement from the Finance Committee's report:

> The imposition of taxes subject legal wagering to an unnecessary economic burden not borne by illegal wagering, for such liabilities are generally evaded.

So what we see, Mr. President, is legal wagering operatings subjected to these taxes, while their illegal counterparts benefit. It is the small operator in my State who suffers by complying with the law, while the illegal operations avoid the law and reap profits. And, once again, Mr. President, it is not the large casinos who will benefit by the reduction in these taxes. Most legal sports and race book operations are small businesses, struggling to get by on their low margin of profit. The average number of employees in these operations is only 12.

The $500 occupational tax is another penalty that employees of legal operations must pay. This is, to me, Mr. President, a discriminatory tax. I am sure that it was never the intention of the Congress to apply a special tax on the right to work. Originally, this tax was seen as a law enforcement tool to identify bookmakers. However, this purpose is simply duplicative, for the State of Nevada requires that these individuals be licensed, pursuant to a rather demanding inquiry and hearing.

Mr. President, I would like, for a moment, to review the revenue implications of this amendment. It is interesting to note that, in 1951, it was estimated that these taxes would generate some $400 million per year. Revenue from these taxes have never risen above $13 million, Mr. President.

Mr. President, I ask unanimous consent that a report showing the revenue from these taxes for the past 6 years, taken from the IRS Commissioner's annual report, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CANNON. Mr. President, I also review the second justification for the imposition of these taxes, and that is the law enforcement justification. I think that a statement from the Assistant Secretary of the Treasury, John Chapoton, in his testimony to the Subcommittee on Taxation and Debt Management, says it best, Mr. President. Mr. Chapoton stated:

> A final justification for this tax structure may be that it operates as an aid to the fight against illegal gambling activities and the collection of income taxes from persons engaged in such activities. *We do not believe that this justifies retention of these taxes.* . . . We view the commitment of Fed-

eral resources to maintain this taxing structure for such a limited purpose to be wasteful and inefficient.

I could not agree with the Assistant Secretary more, Mr. President.

Nevada is in its 51st year of legalized gambling, Mr. President. Legal gaming in my State is highly regulated and licensed. My State has worked hard to eliminate any illegal gaming activities, and it is a goal that it can share with Federal law enforcement officials. Legal wagering is just one aspect of Nevada's legal gaming industry; and it, too, is highly regulated and licensed.

In conclusion, Mr. President, these taxes are ineffective as revenue raising measures and as tools for the enforcement of gambling laws. They are discriminatory taxes, borne by the small businessperson who complies with the law, while illegal operators reap benefits.

I applaud the conference committee for including this amendment in its report, and I believe that this reduction is a good step in the right direction toward correcting this inequitable situation.

I urge my colleagues to support adoption of the conference report on H.R. 4717.

Thank you.

EXHIBIT 1[1]

Tax	Fiscal year—					
	1976	1977	1978	1979	1980	1981
Wagering tax	$4,962,000	$6,632,000	$6,637,000	$9,124,000	$10,972,000	$12,089,000
Occupational tax	900,065	776,000	1,048,000	908,000	1,079,000	1,074,000
Total	5,862,065	7,408,000	7,685,000	10,032,000	12,051,000	13,163,000
Cumulative yearly totals	5,862,065	13,270,065	20,995,065	30,987,065	43,038,065	56,201,065

[1] Collections nationwide from the 2-percent wagering tax and the $500 occupational tax, as shown in the Internal Revenue Service Commissioner's annual reports for fiscal years 1976, 1977, 1978, 1979, 1980, and 1981.

Mr. LAXALT. Mr. President, I strongly support the conference report on H.R. 4717 which, among other provisions, will reduce the unfair Federal gross income tax on legalized bookmaking operations. The current law imposes a 2-percent tax on the gross income of legal sports books, and a $500 occupational tax on each person employed by these legal businesses to accept wagers. H.R. 4717 would reduce the taxes to one quarter of 1 percent on gross income and $50 for each employee. While I strongly believe both taxes should be totally repealed, and Senator CANNON and I originally introduced S. 483 to accomplish this goal, H.R. 4717 is a great improvement over current law.

The Federal taxes on bookkeeping income were originally enacted as weapons for law enforcement agencies in the fight against illegal bookmaking. Unfortunately, these taxes have instead encouraged the very activity they were designed to control. Legal, honest bookmakers are forced into bankruptcy by the punitive nature of the taxes, while illegal booking operations continue to ignore the tax and flourish. Rather than eliminating illegal operators, the taxes force legal establishments out of business, and encourage the growth of crime.

H.R. 4717 will go a long way toward correcting these problems. It will bring in more revenue through the traditional corporate taxes as the activities of legal bookmaking operators take business away from the illegal bookmakers. It will provide equity for sports wagering with other business. It will allow small businesses to survive and will keep criminal elements from taking their place.

I want to thank the chairman of the Finance Committee, Senator DOLE, and the ranking minority member, Senator LONG, for all their help and assistance in getting this legislation through conference. I urge all my colleagues to support H.R. 4717.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the conference report.

The conference report was agreed to.

PUBLIC UTILITY TAX ACCOUNTING—H.R. 1524

Mr. DOLE. Mr. President, I ask unanimous consent to call up H.R. 1524. As I understand the distinguished Senator from Colorado may interpose an objection.

Mr. METZENBAUM. Mr. President, will the Senator from Kansas be good enough to tell us what that bill is?

Mr. DOLE. I was just ready to do that. It deals with the tax rules relating to the so-called normalization of accounting methods for investment tax credits and accelerated cost recovery deductions attributable to certain utility property.

We also have an amendment in that bill which deals with reducing the capital gains holding period from 12 months to 6 months. And there is also a provision offered by the distinguished Senator from Montana, Senator BAUCUS, for deductions for literary and musical works.

In my own view there should be no objection to passing this legislation. But I understand there is some concern expressed by some Members and I think the distinguished Senator from Colorado objects to consideration at this time.

Is that correct?

Mr. ARMSTRONG. Mr. President, reserving the right to object, I wish to clarify my understanding that this matter has not been out of committee long enough for a printed report to be available to the Members.

Mr. DOLE. That is right.

Mr. ARMSTRONG. Does the Senator confirm that?

Mr. DOLE. That is correct.

Mr. ARMSTRONG. It is also my understanding that in addition to the matters originally addressed in the legislation; that is, the normalizaion of the utilities tax with respect particualrly to certain Califorina utilities, additional legislation relating to tax deductions for artistic and literary contributions have been added to this legislation.

Mr. DOLE. That is correct. That was added as an amendment in the committee.

Mr. ARMSTRONG. It is my understanding that in addition there was a capital gains provision added.

Mr. DOLE. That is correct.

Mr. ARMSTRONG. Mr. President, with great reluctance, I am in a monment going to object. There are at least some provisions of this bill which I strongly favor. I am very much in favor of the capital gains provision as I understand it. I have some doubts about the wisdom of the utility tax changes which are proposed here, although it is my understanding that the Senator from Pennsylvania will offer amendments which I believe would respond to the concerns I have expressed, although I must tell may colleagues this is a very complex matter, and I am not entirely sure that my concerns would be entirely fulfilled by the Senator's amendments.

And then there is the question of the artistic exemptions.

So all in all, without prejudice and reserving the right at the proper moment to support the passage of the legislation, this does not seem to me at this hour of the night, without a full committee report, without a chance to look at it, the time to take it up.

I hope that the chairman will call this up after the recess when we have all have a chance to look at it and perhaps can all support it.

At this moment I am constrained, however, to object.

Mr. DOLE. Mr. President, before interposing the objection, I wish to make a statement describing this bill.

PUBLIC UTILITY TAX ACCOUNTING

Mr. President, the bill, H.R. 1524, deals with the tax rules relating to the so-called normalization accounting methods for investment tax credits and accelerated cost recovery deductions attributable to certain public utility property. In general, the normalization rules require these investment incentive benefits to be taken into account for utility ratemaking purposes over the service life of the asset that generates the benefits.

The bill clarifies the normalization rules and authorizes Treasury regulations concerning the conditions under which ratemaking projections and adjustments are inconsistent with those rules. These provisions would apply to taxable years beginning after December 31, 1979.

In response to a controversy relating to certain rate orders issued by the California Public Utilities Commission, the bill also provides a special transition rule. Under the special rule, a ratemaking projection or adjustment that violated the normalization requirements would not result in a public utility's loss of eligibility for the investment credit or accelerated depreciation if the projection or adjustment (1) applied for a period ending before March 1, 1980, (2) was included in an order entered by a public service or public utility commission before March 13, 1980, and (3) was used to determine the amount of rates which were ordered to be collected or refunds which were ordered to be made.

The transitional rule is designed to benefit Pacific Telephone & Telegraph Co., General Telephone Co. of California, and Southern California Gas Co. These companies were ordered to make refunds or rate adjustments by the California regulatory authority. The Internal Revenue Service has taken the position that the orders do not comply with the existing normalization accounting rules.

If the IRS position is sustained, the bill will result in a revenue loss of approximately $2.2 billion. Of this amount, a revenue loss of $117 million will occur in fiscal year 1983 for refunds of taxes previously paid and the remainder would probably occur after 1987 because of the timing of the audit process and delays of presumed litigation.

CHARITABLE DEDUCTIONS FOR LITERARY AND MUSICAL WORKS

The committee amendment adds a provision dealing with charitable deductions for certain contributions of literary or musical work, or other work of art by authors and artists. In general, this provision permits a charitable deduction for the property's fair market value for purposes of determining the donor's regular income tax liability. A contribution will qualify only if certain appraisal and reporting requirements are satisfied and the donee charitable organization's use of the property is related to its exempt function.

These amendments would apply to contributions made after 1982. It is estimated that the provisions would reduce budget receipts by $5 million in fiscal year 1983 and by $15 million annually for subsequent years.

The committee concluded that the provisions are needed to encourage contributions to museums and libraries by authors and artists.

CAPITAL GAINS HOLDING PERIOD

The committee amendment also shortens the holding period distinguishing between short-term and long-term capital gains from 1 year to 6 months. This amendment passed the Senate in the context of the tax bill earlier this year and was adopted by the Senate a second time on the debt ceiling bill prior to the recommital of that bill to the Finance Committee. This legislation will reduce the effect of the present system in discouraging investors from realizing their gains and thus will improve the liquidity of the securities markets.

The committee provisions differ from the earlier amendments in several respects. Rules are provided to deal with the effect of the shortened holding period on straddles in listed stock options. The holding period for which stock must be held under the incentive stock option provisions is retained at 1 year. Finally, a rule is provided under which gain from the cutting of timber is to be treated as long-term capital gain only if the timber has been held for more than 6 months and was held on the first day of the taxpayer's taxable year.

The 6-month holding period will be effective for sales or exchanges after June 30, 1982, the day the Finance Committee first agreed to this provision. However, if the taxpayer realizes a loss on an asset held on June 30, 1982, the holding period will remain at 1 year.

The revenue loss from the 6-month holding period is expected to be $169 million in 1983, $244 million in 1984, and $244 million in 1985.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Has the Senator from Colorado objected?

Mr. ARMSTRONG. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent to be permitted to speak just for a moment on the matter which we have just put aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. It is my understanding that the Senator from Colorado might be so generous to confirm that he looks forward to considering this matter in the post-election session as we have been describing it.

Mr. ARMSTRONG. Yes.

Mr. MOYNIHAN. And the matter does not die. It simply stays on the calendar.

I shall make two points:

One, is that the holding period to 6 months for capital gains purposes has been adopted by the Senate and with the full concurrence of the Finance Committee and the leadership of the Senator from Kansas.

Second, if I may perhaps have a moment's attention from the Senate, one of the great misdeeds of Congress in an era now almost distant of Lyndon Baines Johnson was an amendment to the Tax Code that forbade any contributions by an author or artist of materials to a museum or library and the deductible amount was to be confined to the value of the paper and ink involved.

This was designed to prevent a tax gain by the former President whom we all loved and revered for gifts to his own library. It was an act that came out of the Texas delegation in the other body and it has wreaked great disservice on our museum and our libraries.

The Library of Congress has not received a single significant manuscript by a living author since that bill was enacted.

The Finance Committee is seeking to change it, simply to restore a perfectly legitimate function of the Tax Code. The Senator from Montana took a great lead in this matter. I hope we will return to it. We owe it to our posterity. It has nothing to do with revenues as such.

I thank the chairman of the Finance Committee who found time to hear this matter out. It is not something which anyone presently involved, save custodians, curators, and librarians are much aware of, but posterity will know of an act of near vandalism in our Tax Code that was inserted for very small petty partisan and passing purposes, but which has enduring harm to our institutions.

I thank the chairman for his patience and perserverance in this matter.

Mr. DOLE. I thank the distinguished Senator.

Mr. ARMSTRONG. Mr. President, if the Senator will yield, I am happy to respond to the inquiry of the Senator from New York. His understanding of the consequences of objecting to consideration of the legislation at this time is the same as my own. It is not my expectation that this constitutes

action final, but merely to delay, until we have had a chance to study the import of the legislation after the post-election session begins.

Mr. MOYNIHAN. When this will be before us. I thank my friend from Colorado.

Mr. ARMSTRONG. At that moment I may well join him in supporting the legislation.

BANKRUPTCY LAW AMENDMENTS—S. 3037

Mr. DOLE. Mr. President, I send a bill to the desk for the distinguished Senator from Missouri, Senator DANFORTH, the distinguished Senator from Alabama, Senator HEFLIN, and myself and the distinguished Senator from North Dakota, Senator ANDREWS, and ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. METZENBAUM. Is this on the grain elevator bankruptcy?

Mr. DOLE. It is the grain elevator bankruptcy bill which passed the Senate three times without objection.

Mr. METZENBAUM. Did we not just pass it previously?

Mr. DOLE. We have not passed it yet.

Mr. STEVENS. We cannot conduct the business of the Senate unless Senators address the Chair.

The PRESIDING OFFICER. The acting majority leader's point is well made.

The Senator from Kansas.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia reserves the right to object.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator from Kansas now repeat his request?

The PRESIDING OFFICER. The Senator from Kansas.

Mr. STEVENS. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I have sent to the desk the grain elevator bankruptcy bill which, I think, I can represent has passed the Senate on three occasions with broad bipartisan support. It expedites the bankruptcy procedure with respect to rural elevators which have gone bankrupt, and it also gives the farmers more protection.

I would say to the distinguished Senator from Ohio that there will be no effort to add any matters of substance to the bill. It is strictly a grain elevator bill. We find more and more bankruptcies taking place in the Midwest. I would just like to indicate again that with respect to the farmers the Senate by broad bipartisan support, I guess it would be 100 to 0, would say that we ought to provide further protection.

Mr. METZENBAUM. Mr. President, I am familiar with the substance of the proposal. It does indeed provide protection for the farmers when the grain elevator goes bankrupt.

With the assurances of the chairman of the appropriate subcommittee of the Judiciary Committee that it will not be used as a vehicle for other amendments to the Bankruptcy Act, I join in supporting this measure.

Mr. DOLE. I thank the distinguished Senator from Ohio.

The PRESIDING OFFICER (Mr. ABDNOR). The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (S. 3037) to amend the bankruptcy laws regarding farm produce storage facilities, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill will be deemed to have been read once by title and once at length.

Are there any amendments? If not, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time. The bill was read the third time and passed, as follows:

S. 3037

SEC. 101. That this Act may be cited as the "Agricultural Produce Bailment Bankruptcy Amendments Act of 1982."

SEC. 102. Section 109 of title 11, United States Code, is amended in subsection (f), as redesignated by section 203(c), by inserting after "commodity broker," the following: "or a person engaged in the business of operating a farm produce storage facility (with respect to the debts of that business),".

SEC. 103. Section 501 of title 11, United States Code, is amended by inserting at the end thereof the following new subsection:

"(e) A valid receipt for the storage of grain (as defined in section 557 of this title), issued by a grain storage facility (as defined in section 557 of this title) as evidence of ownership of grain stored in such facility shall be considered sufficient proof of claim of a right to receive grain, or the proceeds of grain, equal in value to the quantity, quality, and type of grain specified in such receipt. If a claimant surrenders such receipt to another person for the purpose of securing a loan, without assigning to such person any ownership interest in such receipt, then an affidavit made by such person verifying the ownership of such receipt shall be considered prima facie proof of such claim.".

SEC. 104. Section 503(b)(1)(B) of title 11, United States Code, is amended by striking out "507(a)(6)" and inserting in lieu thereof "507(a)(7)".

SEC. 105. Section 507 (a) of title 11, United States Code, is amended—

(1) by adding after paragraph (4) the following:

"(5) Fifth, allowed unsecured claims of farmers or other persons engaged in farming operations arising from the sale or conversion of farm produce to or by a debtor engaged in the business of operating a farm produce storage facility where such sale or conversion occurred within one hundred and eighty days before the date of the filing of the petition or before the cessation of the debtor's business, whichever occurs first, but only to the extent of $2,000 for each such individual.";

(2) by striking out "(5) Fifth" and inserting in lieu thereof "(6) Sixth"; and

(3) by striking out "(6) Sixth" and inserting in lieu thereof "(7) Seventh".

SEC. 106. Section 546 of title 11, United States Code, is amended—

(a) In the first sentence of subsection (c) thereof, by striking out "The" and inserting in lieu thereof "Except as provided in subsection (d) of this section, the"; and

(b) by adding at the end thereof the following new subsection:

"(d) In the case of a seller who is a producer of grain sold to a grain storage facility, owned or operated by the debtor, in the ordinary course of such seller's business (as such terms are defined in section 557 of this title), the rights and powers of the trustee under sections 544(a), 545, 547, and 549 of this title are subject to any statutory or common law right of such seller to reclaim such goods if the debtor has received such goods while insolvent, but—

"(1) such producer may not reclaim any grain unless such producer demands, in writing, reclamation of such grain before twenty days after receipt thereof by the debtor; and

"(2) the court may deny reclamation to such a producer with a right of reclamation that has made such a demand only if the court secures such claim by a lien.".

SEC. 107. (a) Chapter 5 of title 11, United States Code, is amended by adding at the end thereof the following new section:

"§ 557. Expedited determination of interests in, and abandonment or other disposition of grain assets

"(a) This section applies only in a case concerning a debtor that owns or operates a grain storage facility and only with respect to grain and the proceeds of grain. This section does not affect the application of any other section of this title to property other than grain and proceeds of grain.

"(b) For purposes of this section—

"(1) 'grain' means wheat, corn, grain sorghum, barley, oats, rye, soybeans, or rice;

"(2) 'grain storage facility' means a site or physical structure regularly used to store grain for producers, or to store grain acquired from producers for resale;

"(3) 'grain storage facility receipt' means any document of the type routinely issued by a debtor operating a grain storage facility for the purpose of establishing a record of ownership of a quantity of grain which is stored with such facility upon a contract of bailment. Such term shall include a warehouse receipt or a scale ticket, provided identification of the owner of the produce represented thereby and the type, quantity, and quality of the produce represented thereby is clearly noted upon the face of such document; and

"(4) 'producer' means an entity which engages in the production or raising of grain.

"(c)(1) Notwithstanding sections 362, 363, 365, and 554 of this title, on the court's own motion the court may, and on the request of the trustee or an entity that claims an interest in grain or proceeds of grain the court shall, expedite the procedures for the determination of interests in and the abandonment or other disposition of grain and proceeds of grain, by shortening to the greatest extent feasible such time periods as are otherwise applicable for such procedures and by establishing, by order, a timetable for the completion of each applicable procedure specified in subsection (d) of this section. Such time periods and such timetable may be modified by the court for cause, but in no case may the final disposition of grain or

the proceeds of grain under this section occur later than 120 days after the date the petition is filed, except in accordance with subsection (f) of this section.

"(2) The court shall shorten such periods, or establish such timetable, giving due consideration to the following factors—

"(A) any need of an entity claiming an interest in such grain or proceeds of grain for a prompt determination of such interest;

"(B) any need of such entity for a prompt disposition of such grain;

"(C) the market for such grain;

"(D) the conditions under which such grain is stored;

"(E) the costs of continued storage or disposition of such grain;

"(F) the orderly administration of the estate;

"(G) the appropriate opportunity for an entity to assert an interest in such grain; and

"(H) such other considerations as are relevant to the need to expedite such procedures in the case.

"(d) The procedures that may be expedited under subsection (c) of this section include—

"(1) the filing of and response to—

"(A) a claim of ownership;

"(B) a proof of claim;

"(C) a request for abandonment;

"(D) a request for relief from the stay of action against property under section 362(a) of this title;

"(E) a request for determination of secured status;

"(F) a request for determination of whether such grain or proceeds of grain—

"(i) is property of the estate;

"(ii) must be turned over to the estate; or

"(iii) may be used, sold, or leased; and

"(G) any other request for determination of an interest in such grain or proceeds of grain;

"(2) the disposition of such grain or proceeds of grain, before or after determination of interests in such grain or proceeds of grain by way of—

"(A) sale of such grain;

"(B) abandonment;

"(C) distribution; or

"(D) such other method as is equitable in the case;

"(3) subject to sections 701, 702, 703, 1104, and 1302 of this title, the appointment of a trustee or examiner and the retention and compensation of any professional person required to assist with respect to matters relevant to the determination of interests in or disposition of such grain or proceeds of grain; and

"(4) the determination of any dispute concerning a matter specified in paragraph (1), (2), or (3) of this subsection.

"(e)(1) Any governmental unit that has regulatory jurisdiction over the operation or liquidation of the debtor or the debtor's business shall be given notice of any request made or order entered under subsection (c) of this section.

"(2) Any such governmental unit may raise, and may appear and be heard on, any issue relating to grain or the proceeds of grain in a case in which a request is made, or an order is entered, under subsection (c) of this section.

"(3) The trustee shall consult with such governmental unit before taking any action relating to the disposition of grain in the possession, custody, or control of the debtor or the estate.

"(f) The court may extend the period for final disposition of grain, or the proceeds of grain, under this section beyond 120 days where the court finds that—

"(1) the interests of justice so require in light of the complexity of the case; and

"(2) the interests of those claimants entitled to distribution of grain assets or the proceeds of grain assets will not be materially injured by such additional delay.

"(g)(1) Unless an order establishing an expedited procedure under subsection (c) of this section, or determining any interest in or approving any disposition of grain or proceeds of grain, is stayed pending appeal—

"(A) the reversal or modification of such order on appeal does not affect the validity of any procedure, determination, or disposition that occurs before such reversal or modification, whether or not any entity knew of the penalty of the appeal; and

"(B) neither the court nor the trustee may delay, due to the appeal of such order, any proceeding in the case in which such order is issued.

"(2) A stay of orders entered pursuant to this section may be entered by the bankruptcy court under the following circumstances:

"(A) the party filing the request for a stay, except the United States, shall post a bond or other security in an amount equal to the value of grain assets or the proceeds of grain assets, distribution of which is affected by the requested stay, and the grain assets, if unliquidated, shall be liquidated by the trustee; and

"(B) the parties ultimately prevailing upon appeal shall be awarded their pro rata share of the proceeds of the liquidation, plus a sum equal to the difference in value between the awarded share and the highest intermediate value (between the date of the entry of the order of stay and the date of final distribution) of the produce sold which was owned by, or secured to, such parties, plus interest on the amount of any original award at the prevailing rate allowed by law upon judgments, with interest to accrue from the date of the entry of the order of stay. Interest payments and differential payments provided for herein shall be satisfied out of the bond posted by the party requesting the order of stay where that party is unsuccessful upon appeal of the distribution order, and shall be satisfied out of accrued interest on the proceeds held by the trustee in all other cases.

"(h) In effecting the distribution of grain or grain assets under this title in a case involving a grain storage facility, the court shall not diminish the total portion of grain or grain assets available for distribution to claimants who are determined to be owners of grain stored in the facility pursuant to contracts of bailment for the benefit of secured creditors of the debtor.

"(i)In any action brought pursuant to chapter 11 of this title, the provisions of this section shall govern the abandonment of farm produce held by the trustee or debtor in possession of a farm produce storage facility business for which reorganization is sought, which farm produce is not property of the debtor's estate, but is held by the debtor upon a contract of bailment only. The abandonment of any quantity of such produce shall take place upon the request of the owner thereof, and shall be done regardless of its effect upon any existing or proposed plan of reorganization.

"(j)(1) The trustee may recover from grain and proceeds of grain the reasonable and necessary costs and expenses allowable under section 503(b) of this title attributable to preserving or disposing of grain or proceeds of grain, but may not recover from such grain or proceeds of grain any other costs or expenses.

"(2) Notwithstanding section 326(a) of this title, the dollar amounts of money specified in such section include the value, as of the date of disposition, of any grain that the trustee distributes in kind.".

(b) The table of sections of chapter 5 of title 11, United States Code, is amended by adding at the end thereof the following new item:

"557. Expedited determination of interests in, and abandonment or other disposition of grain assets.".

SEC. 308. Section 1123(a)(1) of title 11, United States Code, is amended by striking out "or 507(a)(6)" and inserting in lieu thereof "507(a)(5) or 507(a)(7)".

SEC. 309. Section 1129(a)(9)(B) of title 11, United States Code, is amended by striking out "or 507(a)(5)" and inserting in lieu thereof "507(a)(5), or 507(a)(6)".

SEC. 310. Section 1129(a)(9)(C) of title 11, United States Code, is amended by striking out 507(a)(6)" and inserting in lieu thereof "507(a)(7)".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. It is not a personal matter. I just want to make sure it is cleared.

Mr. President, may I ask the Senator to temporarily withhold his request and let us see if we can make a call and get it cleared.

Mr. DOLE. I may say to the distinguished minority leader that we acted on this matter on three separate occasions, and I have been working on it with Senator HEFLIN and we agreed to try it one more time.

Mr. ROBERT C. BYRD. I thank the Senator.

SLEEPING BEAR DUNES NATIONAL LAKESHORE

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate H.R. 3787, which is an act dealing with the Leasing Bear Dunes National Lakeshore.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3787) an act to amend sections 10 and 11 of the Act of October 21, 1970 (Public Law 91-479; 16 U.S.C. 460x), entitled "An Act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes".

The Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, I send an amendment to the desk in behalf of Senator McCLURE.

UP AMENDMENT NO. 1403

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. MCCLURE, proposes an unprinted amendment numbered 1403.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend the House Bill in the nature of a substitute as follows: Strike all and insert:

"1. In section 3, amend the text of the new section of the Act entitled "An Act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes", approved October 21, 1970 (16 U.S.C. 460x-1) added by section 3 of the bill by making the following deletions:

"(a) In paragraph (e)(2), strike the second sentence, which reads "If the Secretary and such willing seller are unable to agree to a fair purchase price, they may agree to submit to binding arbitration by any party agreeable to both parties for such purpose to fix such a price.".

and insert in lieu thereof:

"If the Secretary and such willing seller are unable to agree to a fair purchase price, that question may, by mutual consent be submitted to the appropriate United States District Court for adjudication.

In subparagraph (c)(4)(B) strike the language which reads: "If the owner does not accept such offer, the owner may elect to submit the purchase price to binding arbitration by any party agreeable to the owner and the Secretary. If the owner does not accept such offer and does not elect binding arbitration, the Secretary may file for condemnation."

and insert in lieu thereof:

"If the owner does not accept such offer, the Secretary may file for condemnation.".

In section 5, strike the new section 17 to be added to the Act identified in paragraph 1 above.

In section 7, strike "(a)" and subsection (b).

Mr. METZENBAUM. Mr. President, will somebody be good enough to explain what the amendment is?

Mr. STEVENS. I yield to the Senator from Idaho, Mr. President.

Mr. McCLURE. Mr. President, the House having enacted the amendments to the Sleeping Bear Dunes Wilderness and have made——

Mr. METZENBAUM. Is this germane?

Mr. McCLURE. Absolutely germane to the provisions of this bill.

Mr. METZENBAUM. I have no objection.

Mr. STEVENS. Mr. President, I again request that the Senators address the Chair so that the RECORD will be preserved in accordance with Senate procedure.

I urge adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska.

The amendment (UP No. 1403) was agreed to.

The PRESIDING OFFICER. If there be no further amendments, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

ENVIRONMENTAL QUALITY IMPROVEMENT ACT AMENDMENTS

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate a message from the House on S. 1210 pertaining to the Environmental Quality Improvement Act of 1970:

Mr. ROBERT C. BYRD. Mr. President, there is no objection to this item.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the amendment of the House to the text of the bill (S. 1210) entitled "An Act amending the Environmental Quality Improvement Act of 1970", with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, insert:

That section 205 of the Environmental Quality Improvement Act of 1970 (42 U.S.C. 4374) is amended—

(1) by striking out "; and" at the end of paragraph (a) and inserting in lieu thereof a period; and

(2) by adding at the end thereof the following: "(c) $44,000 for the fiscal years ending September 30, 1982, 1983, and 1984."

SEC. 2. (a) Subject to valid existing rights, all Federal lands within the area described in subsection (b) are hereby withdrawn from all form of appropriation under the mining laws and from disposition under all laws pertaining to mineral and geothermal leasing and all amendments thereto.

(b) The area referred to in subsection (a) shall comprise those lands which are owned by the United States within the Mount Baker-Snoqualmie National Forest and which lie within the physiographic boundaries of the watersheds of the Cedar River, the Green River, and the North and South Forks of the Tolt River. The boundaries of such areas shall be as depicted on maps entitled "Boundary Map, Mount Baker-Snoqualmie Proposed Withdrawals", dated May 12, 1982. Such maps shall be on file and available for inspection in the offices of the United States Forest Service, Department of Agriculture.

(c) The withdrawal described in subsection (a) shall not apply to any exchange carried out by the Secretary of Agriculture pursuant to the Alpine Lakes Area Management Act of 1976 (P.L. 94-357, 90 Stat. 905) nor shall such withdrawal apply to any Federal land exchange in process. For purposes of this Act an exchange is in process if publication of notice of the contemplated exchange has commenced by the date of enactment of this Act.

(d) Additionally, the Secretary may dispose of land or interests therein within the area described in subsection (b) by exchange if the Secretary determines that the public will be well-served by the exchange; provided that the Secretary determines that the values of the watersheds as sources of drinking water are protected and provided further that such exchanges shall not alter, diminish, or abridge rights and obligations contained in state law and watershed management agreements between local government and landowners inside the watershed existing as of the effective date of this Act.

Resolved, That the House agree to the amendment of the Senate to the amendment of the House to the title of the bill.

● Mr. GORTON. Mr. President, I take great pleasure today in proposing that the Senate accept S. 1210, as amended by the House of Representatives. The major provision in this bill, as amended, provides protection for the drinking water watersheds of the cities of Seattle and Tacoma in the State of Washington. Under the provisions of this bill, the Federal Government will be prohibited from transferring, by contract or deed, the rights to explore or drill for oil or natural gas within those watersheds. Notwithstanding the general prohibitions on transfer created by this legislation, those transfers necessary to consolidate Federal and private lands into wilderness areas, such as the Alpine Lakes Wilderness, will not be impaired.

The cities of Seattle and Tacoma exhibited great foresight when they began protecting those areas in the mountains and foothills of the Cascade Mountains where their drinking water resources are resupplied. Continued protection of those areas is essential to avoid the costly and ill-advised alternative of treating drinking water that has been allowed to become contaminated in some way. This legislation continues and enhances that protection.

I commend Senator JACKSON for his initiative with respect to this legislation and S. 2524, comparable legislation, introduced in the Senate. I also commend those members of the Washington State delegation in the House of Representatives, and also Congressman JOHN BREAUX, for his willingness to actively consider this legislation and amend it constructively.

I urge Members of the Senate to vote for the acceptance of S. 1210, as amended by the House of Representatives.●

● Mr. JACKSON. Mr. President, I rise in support of S. 1210, the CEQ authorization bill.

The bill before us today contains a modified version of a provision that Senator GORTON and I offered on this measure last summer which the Senate adopted regarding certain wa-

tershed lands in the State of Washington. This language before us today is is also very similar to legislation Senator GORTON and I introduced in May.

Like many of my constituents, I was shocked to learn last spring that the Department of the Interior had issued five oil and gas leases on Federal lands in the Mount Baker-Snoqualmie National Forest that are part of the watershed for the water supply systems of the cities of Seattle and Tacoma. These leases were issued over the objections of the U.S. Forest Service. They were issued despite the fact that the Forest Service and the cities have a cooperative agreement calling for management practices on Federal lands designed to protect watershed values. Since they were issued, the entire Washington State congressional delegation has gone on record in opposition to the leases and they have been rescinded.

While the immediate threat to these lands appears resolved, I am deeply concerned at the helter-skelter approach the Department seems to be taking with respect to additional leasing. It appears that there is a policy of leasing whatever land industry asks for, with little or no thought given to the potential impacts of development. Surely, municipal watershed lands should be one of the last places leased. The same can be said for congressionally designated units of the national wilderness preservation system. Of course, the issue of leasing on wilderness lands is being addressed by legislation cosponsored by 54 of our Senate colleagues, S. 2801.

The Department's decision to issue leases in these watershed areas flies in the face of the principles of the Federal Land Policy and Management Act and the National Forest Management Act, both of which I helped to enact in 1976. These laws call for multiple-use decisions on national forest and Bureau of Land Management lands to to be made in accordance with land management plans which consider all resource values and are subject to review and comment by State and local governments and the general public.

The Department's actions on the Seattle and Tacoma watershed leases reverses the process to a "lease first and get comments later" approach. The result is predictable—public outrage and opposition. Furthermore, this "act first and think later" approach is bound to stimulate widespread opposition to development, even in circumstances where development would be appropriate.

The language in the bill before us today is a response to that approach. By withdrawing these lands from all forms of mineral leasing and disposal, these provisions insure that these important watershed lands will not be degraded. The provision makes it clear, however, that land exchanges in the areas which do not have a negative impact on watershed values may be consummated.

Mr. President, I want to commend Congressmen NORM DICKS and MIKE LOWRY for their diligent efforts in getting this language out of the House and back before the Senate today. This language is a product of many hours of negotiations between their offices, personnel of the region 6 Office of the Forest Service, the cities of Seattle and Tacoma, and several affected landowners. They should all be congratulated for their hard work in this regard.●

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendment to the Senate amendment to the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

VOYAGEURS NATIONAL PARK

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 625.

Mr. ROBERT C. BYRD. Mr. President, that matter has been cleared on this side of the aisle.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 625) entitled "An Act to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That the Act entitled "An Act to authorize the establishment of the Voyageurs National Park in the State of Minnesota, and for other purposes", approved January 8, 1971 (84 Stat. 1971), is amended—

(1) in section 102 by striking out "The" after "SEC. 102." and inserting in lieu thereof "(a) Except as provided in subsection (b) of this section, the";

(2) by inserting after section 102(a), as redesignated by paragraph (1), the following new subsection:

"(b)(1) In addition to such revisions as the Secretary may make in the boundaries of the park from time to time pursuant to other provisions of law, the Secretary may, according to the provisions of subsection (a)—

"(A) delete approximately 782 acres in the Neil Point area of the park;

"(B) add approximately 180 acres in the Black Bay Narrows areas of the park;

"(C) add approximately 18.45 acres owned by the State of Minnesota at the Kabetogama Forestry Station;

"(D) add approximately 120 acres owned by the State of Minnesota, being a strip of land through that portion of section 1, township 68 north, range 20 west, fourth principal meridian, which is parallel to and 400 feet on both sides of the unimproved road extending northward from the Ash River Trail as such road crosses each section; and

"(E) subject to the provisions of paragraph (2), delete approximately 1,000 acres at Black Bay and convey such lands to the State of Minnesota.

All of the aforementioned boundary changes if accomplished shall be accomplished such that the boundary of the park shall conform to that generally depicted on the drawing entitled "Boundary, Voyageurs National Park, United States Department of the Interior, National Park Service", numbered 172-80, 008-MWR, and dated November 1981, which shall be on file and available for public inspection in the offices of the National Park Service, Department of the Interior.

"(2) The Secretary may not delete or convey the lands referred to in paragraph (1)(E) unless, prior to or simultaneously with such deletion or conveyance and in consideration of such conveyance, the State of Minnesota—

"(A) transfers to the Secretary all right, title, and interest in the land described in paragraph (1) (C) and (D); and

"(B) enters into a recordable agreement satisfactory to the Secretary which provides that—

"(i) the State has established a wildlife management area in the area authorized to be deleted and conveyed to the State by paragraph (1)(E);

"(ii) the State has prepared a plan acceptable to the Secretary to manage all the waters of and State lands riparian to Black Bay (including all of the State-owned lands and waters of Rainy Lake) to preserve the natural resources of the area so as to complement to the fullest extent possible the purposes for which the park was established;

"(iii) the State shall not transfer any right, title, or interest in, or control over, any land described in paragraph (1)(E) to any person other than the Secretary; and

"(iv) the State shall permit access by the Secretary at reasonable times to the land described in paragraph (1)(E).

"(3) If at any time the State fails to comply with the material requirements of the agreement referred to in paragraph (2)(B), all right, title, and interest in the land described in paragraph (1)(E) shall revert to the United States for administration by the Secretary as part of the park. Such reversion shall take effect upon the delivery by the Secretary of notice to the State respecting such failure to comply without further notice or requirement for physical entry by the Secretary unless an action for judicial review is brought in the United States Court of Appeals for the appropriate circuit within ninety days following such notice. In any such action the court may issue such orders as are appropriate to carry out the requirements of this subsection.";

(3) by adding after the last sentence of section 301(b) the following new sentence: "The President shall, no later than June 1, 1983, advise the United States Senate and House of Representatives of his recommendations with respect to the suitability or nonsuitability as wilderness of any area within the park."; and

(4) in section 401—

(A) by inserting "(a)" after "SEC. 401.";

(B) by striking out "$26,014,000" and inserting in lieu thereof "$38,314,000"; and

(C) by adding at the end of the following new subsections:

"(b) The Secretary shall, in cooperation with other Federal, State, and local governmental entities and private entities experienced in the fields of outdoor recreation and visitor services, develop and implement a comprehensive plan for visitor use and overnight visitor facilities for the park. The plan shall set forth methods of achieving an appropriate level and type of visitation in order that the resources of the park and its environs may be interpreted for, and used and enjoyed by, the public in a manner consistent with the purposes for which the park was established. Such plan may include appropriate informational and educational messages and materials. In the development and implementation of such plan the Secretary may expend funds donated or appropriated for the purposes of this subsection. Effective October 1, 1983, there is authorized to be appropriated for the purposes of this subsection not to exceed $250,000, to remain available until expended.

"(c) The Secretary is directed to study existing road access to the park and to report to Congress on the impact of park-related use of those roads and to report specific recommendations on improvements necessary to insure adequate road access to the park. The Secretary is directed to report, within one year of the date of enactment of the Act which appropriates funds authorized under this subsection, to the Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate. Effective October 1, 1983, there is authorized to be appropriated for the purposes of this subsection not to exceed $75,000.

"(d)(1) For purposes of section 7(a)(3) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601-9(a)(3)), the statutory ceilings on appropriations established by this section shall be deemed to be statutory ceilings contained in a provision of law enacted prior to the convening of the Ninety-fifth Congress.

"(2) In determining amounts authorized to be appropriated pursuant to this section, there shall not be taken into account any appropriations made available under section 7(a)(3) of the Land and Water Conservation Fund Act of 1965 (17 U.S.C. 4601-9(a)(3)) before October 1, 1982.".

Mr. STEVENS. Mr. President, I move that the Senate concur in the amendment of the House with an amendment which I send to the desk in behalf of the Senator from Idaho (Mr. MCCLURE).

UP AMENDMENT NO. 1404

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for Mr. MCCLURE, proposes an unprinted amendment numbered 1404.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the second paragraph of the amendments, in the new subsection 102(b), strike subparagraph 102(b)(2)(A), which reads as follows:

"(A) transfers to the Secretary all right, title, and interest in the land described in paragraph (1)(C) and (D); and"

and insert in lieu thereof,

"(A) makes the tender of a conveyance to the United States, by such instrument and in such manner as are satisfactory to the Secretary, including but not limited to lease or easement, by the State of Minnesota of the lands or interests therein described in paragraph (1)(C) and (D); and

In the third paragraph of the amendments, in the new subsection 401(d), strike "(1)" and paragraph (2) which reads as follows:

"(2) In determining amounts authorized to be appropriated pursuant to this section, there shall not be taken into account any appropriations made available under section 7(a)(3) of the Land and Water Conservation Fund Act of 1965 (17 U.S.C. 4601-9(a)(3)) before October 1, 1982.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. STEVENS. Mr. President, I now ask the Chair to lay before the Senate Calendar Order No. 921, which is Senate Resolution 473, the Budget Act waiver which will accompany S. 675.

Mr. ROBERT C. BYRD. Mr. President, we have no objection.

The resolution (S. Res. 473) waiving section 402(c) of the Congressional Budget Act of 1974 with respect to the consideration of S. 675, was considered, and agreed to, as follows:

S. RES. 473

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 675. Such waiver is necessary because S. 675, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This waiver of section 402(a) is necessary to permit Senate consideration of S. 675, a bill establishing a sixteen-member "Federal Courts Study Commission" to study, analyze, and recommend solutions to present and future problems confronting the Federal Judiciary. S. 675 in its present form represents a compromise between S. 675, as introduced by Senator Thurmond, and S. 1530, introduced by Senator Heflin. A hearing was held on these two predecessor bills on May 12 of this year. Following this hearing, an amendment in the nature of a substitute for S. 675 was drafted and approved by the Committee on the Judiciary on September 14. S. 675, as amended, was reported to the Senate on September 15.

S. 675 authorizes appropriations for the life of the ten year study commission. It authorizes very modest amounts—$700,000 for fiscal years 1983 and 1984 and $800,000 for fiscal years 1985 through 1992. These amounts are based on figures provided to the committee by the Congressional Budget Office.

Consideration S. 675 would not interfere with or delay the appropriations process since the fiscal year 1983 appropriations bill in which this would appear has not yet been addressed by the Senate.

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order. Senators cannot hear. Senators will please return to their seats or the cloakroom.

The Senator from Alaska.

Mr. STEVENS. Mr. President, we have adopted the budget waiver?

The PRESIDING OFFICER. That is correct.

FEDERAL COURTS STUDY ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 796, which is S. 675, a bill to establish a Federal Jurisdiction Review and Revision Commission.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 675) to establish a Federal Jurisdiction Review and Revision Commission.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal Courts Study Act".

ESTABLISHMENT AND PURPOSES OF THE COMMISSION

SEC. 2. (a) There is hereby established a Federal Courts Study Commission on the future of the judiciary (hereafter referred to as the "Commission").

(b) The purposes of the Commission are to—

(1) study the jurisdiction of the courts of the United States, and of the several States and report to the President and the Congress on the revisions, if any, of related provisions of the Constitution and laws of the United States which the Commission, on the basis of such study, deems advisable;

(2) stimulate the evaluation of problems currently facing the courts, and suggest an eventual solution to such problems;

(3) order, receive, and review reports from all dispute resolving bodies, including courts, administrative agencies, and Federal justice centers; and

(4) develop a long-range plan for the future of the judiciary by collecting and re-

viewing all private and public studies concerning the effectiveness of courts of the United States, studying the jurisdiction of the courts and assessing their procedures, personnel, business and administration, including assessments involving—

(A) alternative methods of dispute resolution;

(B) the actual structure and administration of the Federal court system;

(C) the manner in which courts handle cases;

(D) methods of intracircuit and intercircuit court of appeals (conflict resolution); and

(E) the types of disputes resolved by the Federal courts and Federal agencies.

MEMBERSHIP OF THE COMMISSION

SEC. 3. (a) The Commission shall be composed of fourteen members appointed, within ninety days after the effective date of this Act, as follows:

(1) four members appointed by the President of the United States with not more than two members from any major political party;

(2) two members of the Senate appointed by the President pro tempore of the Senate, one of whom shall be appointed upon the recommendation of the majority leader and one of whom shall be appointed upon the recommendation of the minority leader;

(3) two members of the House of Representatives appointed by the Speaker of the House of Representatives, one of whom shall be appointed upon the recommendation of the majority leader and one of whom shall be appointed upon the recommendation of the minority leader;

(4) four members appointed by the Chief Justice of the United States with no more than two of such members from any major political party; and

(5) two members appointed by the Conference of Chief Justices, with no more than one such member being from any major political party.

(b) The membership of the Commission shall be selected in such a manner as to be broadly representative of the various interests, needs, and concerns which may be affected by the jurisdiction of the Federal courts.

(c) The term of office of each Commission member shall be five years. Any member who was appointed pursuant to paragraph (2) or (3) of subsection (a) who vacates such office during his term of office with the Commission shall vacate his position on the Commission also. A member appointed to fill any such vacancy shall be appointed only for the remainder of his predecessor's term. Vacancies in the Commission shall not affect its powers and shall be filled in the same manner in which the original appointment was made.

(d) The Commission shall select a Chairman and a Vice Chairman from among its members.

(e) Eight members of the Commission shall constitute a quorum.

POWERS OF THE COMMISSION

SEC. 4. (a) The Commission or, on the authorization of the Commission, any subcommittee thereof may, for the purpose of carrying out its functions and duties, hold such hearings and sit and act at such times and places, administer such oaths, and request the attendance and testimony of such witnesses, and the production of such books, records, correspondence, memorandums, papers, and documents as the Commission, or any such subcommittee may deem advisable.

(b) Each department, agency, and instrumentality of the executive branch of the Government, including the Administrative Office of Courts, the National Institute of Justice, the Federal Judicial Center, and independent agencies, shall furnish to the Commission, upon request made by the Chairman or Vice Chairman, such information and assistance as the Commission deems necessary to carry out its functions under this Act, consistent with applicable provisions of law.

(c) Subject to such rules and regulations as may be adopted by the Commission, the chairman shall have the power to—

(1) appoint and fix the compensation of an Executive Director, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title, and

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $200 a day for individuals.

(d) To the extent or in such amounts as are provided in appropriation Acts, the Commission is authorized to enter into contracts with the Federal Judicial Center, the National Center for State Courts, other Federal or State agencies, private firms, institutions, and individuals for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

(e) The Commission is authorized to receive financial assistance from sources other than the Federal Government, including assistance from private foundations.

(f) The Commission is authorized, for the purpose of carrying out its functions and duties pursuant to this Act, to establish advisory panels consisting of members either of the Commission or of the public. Such panels shall be established to provide expertise and assistance in specific areas, as the Commission deems necessary.

FUNCTIONS AND DUTIES

SEC. 5. (a) The Commission shall—

(1) make a complete study of the jurisdiction of the courts of the United States and of the several States and report to the President and the Congress on such study within two years after the effective date of this Act;

(2) recommend revisions to be made to the Constitution and laws of the United States as the Commission, on the basis of such study, deems advisable;

(3) collect and review studies on the effectiveness of the courts;

(4) develop a long-range plan for the judicial system;

(5) submit written reports to the President and the Congress on the condition of the judiciary, including a summary of their findings, recommendations, and conclusions annually, submitting the first such report within one year after the study concluded pursuant to paragraph (1); and

(6) make any recommendations and conclusions it deems advisable every year thereafter.

(b) The study of the jurisdiction of the courts conducted by the Commission pursuant to paragraph (1) of subsection (a) shall be completed within two years after the effective date of this Act and prior to the other functions and duties provided for in this section.

COMPENSATION OF MEMBERS

SEC. 6. (a) A member of the Commission who is an officer or full-time employee of the United States shall receive no additional compensation for his or her services, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission, but such amount shall not exceed the maximum amounts authorized under section 456 of title 28, United States Code.

(b) A member of the Commission who is from the private sector shall receive $200 per diem for each day (including traveltime) during which he or she is engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties, but such amounts shall not be in excess of the maximum amounts authorized under section 456 of title 28, United States Code.

REPORTS

SEC. 7. (a)(1) The Commission shall transmit to the President and to the Congress, not later than two years after the effective date of this Act, a study of the jurisdiction of the courts of the United States and of the several States pursuant to section 5(a)(1) of this Act. The Commission shall thereafter, in keeping with its oversight function, annually transmit to the President and the Congress a report on the condition of the judiciary and summarize any findings, and make any recommendations and conclusions it deems advisable on the basis of its previous activities.

(2) Not later than ten years after the effective date of this Act the Commission shall submit a final report containing a detailed statement of the findings and conclusions of the study conducted pursuant to this Act, together with any recommendations it deems advisable.

EXPIRATION OF THE COMMISSION

SEC. 8. The Commission shall cease to exist on the date ninety days after it transmits the final report pursuant to section 7 of this act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 9. To carry out the purposes of this Act there are authorized to be appropriated $700,000 for each of the fiscal years 1983 and 1984, and $800,000 for each of the eight succeeding fiscal years 1985 through 1992.

EFFECTIVE DATE

SEC. 10. This Act shall become effective on October 1, 1982.

Mr. STEVENS. Mr. President, I ask the distinguished minority leader, it is my understanding the committee substitute has been cleared, is that correct?

Mr. ROBERT C. BYRD. Yes.

Mr. STEVENS. Mr. President, I ask that we adopt the committee substitute.

The PRESIDING OFFICER. The question is on agreeing to the committee substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider en bloc the adoption of Senate Resolution 473 and the passage of S. 675.

The PRESIDING OFFICER. Without objection.

Mr. ROBERT C. BYRD. Mr. President, was the request agreed to with request to the en bloc reconsideration?

The PRESIDING OFFICER. It was, without objection.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE SECRETARY OF THE TREASURY TO ESTABLISH ZONES OF PROTECTION FOR CERTAIN PERSONS PROTECTED BY THE U.S. SECRET SERVICE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 4468, which is an act to authorize the Secretary of the Treasury to establish zones of protection for certain persons protected by the U.S. Secret Service.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

To amend chapter 84, section 1752 of title 18, United States Code, to authorize the Secretary of the Treasury to establish zones of protection for certain persons protected by the United States Secret Service.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, I ask for passage of the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4468) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL-AID HIGHWAY ACT OF 1982

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2574.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives.

Resolved, That the bill from the Senate (S. 2574) entitled "An Act to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

That this Act may be cited as the "Federal-Aid Highway Act of 1982".

SEC. 2. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984," and inserting in lieu thereof the following: "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984,".

SEC. 3. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

SEC. 4. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums (multiplied by a factor determined by dividing the maximum number of days in the fiscal year ending September 30, 1983, for which funds are appropriated by a joint resolution making continuing appropriations for such fiscal year, by 365 days) are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $1,500,000,000 for the fiscal year ending September 30, 1983. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $400,000,000 for the fiscal year ending September 30, 1983.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $800,000,000 for the fiscal year ending September 30, 1983.

(3) For the forest highways, out of the Highway Trust Fund, $33,000,000 for the fiscal year ending September 30, 1983.

(4) For public lands highways, out of the Highway Trust Fund, $16,000,000 for the fiscal year ending September 30, 1983.

(5) For economic growth center development highways under section 143 of title 23, United States Code, out of the Highway Trust Fund, $50,000,000 for the fiscal year ending September 30, 1983.

(6) For the Great River Road, out of the Highway Trust Fund, $25,000,000 for the fiscal year ending September 30, 1983, for construction or reconstruction of roads on a Federal-aid highway system.

(b) For fiscal year 1984, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necesary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended and shall also be available for expenditure to carry out section 152 of title 23, United States Code.

(c) In the case of priority primary routes, $125,000,000 (multiplied by the factor determined under subsection (a) of this section) of the sums authorized for the fiscal year ending September 30, 1983, by subsection (a)(1) of this section for such routes, shall not be apportioned. Such $125,000,000 (multiplied by such factor) shall be available for obligation on the date of apportionment of funds for such fiscal year, in the same manner and to the same extent as the sums apportioned on such date, except that such $125,000,000 (multiplied by such factor) shall be available for obligation at the discretion of the Secretary of Transportation only for projects of unusually high cost or which require long periods of time for their construction. Any part of such $125,000,000 (multiplied by such factor) not obligated by such Secretary on or before the last day of such fiscal year shall be immediately apportioned in the same manner as funds apportioned for the next succeeding fiscal year for primary system routes, and available for obligation for the same periods as such apportionment.

SEC. 5. (a) The following sums are hereby authorized to be appropriated:

(1) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, out of the Highway Trust Fund, $900,000,000 (multiplied by such factor determined under secton 4(a) of this Act) for the fiscal year ending September 30, 1983.

(2) For projects for elimination of hazards under section 152 of title 23, United States Code, out of the Highway Trust Fund, $200,000,000 (multiplied by the factor determined under section 4(a) of this Act) for the fiscal year ending September 30, 1983.

(b) Section 203(b) of the Highway Safety Act of 1973, as amended, is amended by striking out "and $190,000,000" and inserting in lieu thereof "$190,000,000" and by inserting after "September 30, 1982" the following: ", and $190,000,000 (multiplied by such factor determined under section 4(a) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983".

(c)(1) Section 144(e) of title 23, United States Code, is amended by striking out "and September 30, 1982" and inserting in lieu thereof "September 30, 1982, and September 30, 1983".

(2) Section 144(g) of title 23, United States Code, is amended by inserting after the third sentence the following new sentences: "Of the amount authorized for the fiscal year ending September 30, 1983, by paragraph (1) of section 5(a) of the Federal-Aid Highway Act of 1982, all but $200,000,000 (multiplied by the factor determined under section 4(a) of such Act) shall be apportioned as provided in subsection (e) of this section. $200,000,000 (multiplied by such factor) of the amount authorized for such fiscal year shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such $200,000,000 (multiplied by such factor) shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the

replacement or rehabilitation cost of each of which is more than $10,000,000, and for any project for a highway bridge the replacement or rehabilitation costs of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge.".

SEC. 6. Section 401(a) of the Surface Transportation Assistance Act of 1978 is amended by inserting after "or by any Act amended by this Act" the following: "or, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, title 23, United States Code, or the Urban Mass Transportation Act of 1964".

The PRESIDING OFFICER. Is there objection to its immediate consideration?

Mr. ROBERT C. BYRD. Mr. President, I reserve the right to object.

Mr. President, I have no objection.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I support the House amendment which extends the authorization for the Federal-aid highway program for the term of the continuing resolution. Under the provisions of the amendment, apportionments for the period will be limited to $5.1 billion which is within the revenue available in the highway trust fund.

I regret that the House was unable to proceed with consideration of the 1-year highway bill which the Senate passed earlier this day. Many important highway categorical assistance programs were extended at the appropriate authorization level in the bill. The House companion measure also contained many constructive provisions to clarify problems arising with respect to ongoing projects.

Mr. President, the failure of the House to extend the highway trust fund is indeed unfortunate. Because of this action, the Congress could not adopt an important provision included by the Senate today. Energy impact roads are a problem in West Virginia as well as many other parts of the Nation. The provision agreed to earlier gave special recognition to this problem by increasing the Federal matching ratio by 10 percent for projects on highways which are designated as energy impacted. The provision is necessary and I hope it can be considered again during the so-called lameduck portion of this session of Congress, beginning on November 29.

Mr. President, it is my expectation that not only this matter but the extension of the full highway program and highway trust fund for the full fiscal year 1983 can be completed when the Senate meets again after the recess.

I commend this amendment to my colleagues even though it does not accomplish all that the members of the Environment and Public Works Committee, and the Senate itself, had hoped as highway legislation was reported and considered.

MAC ARTHUR BRIDGE

Mr. PERCY. Mr. President, earlier this year I had the pleasure of visiting with Henderson County, Ill., residents in Oquawka—the county seat—and in Biggsville. I met with my good friend, State Representative Clarence Neff of Stronghurst, as well as Mr. James O. Grisolano of Burlington, Iowa and members of the MacArthur Bridge promotion committee. The MacArthur Bridge spans the Mississippi River between Gulfport, Ill., and Burlington, Iowa.

The MacArthur Bridge has one of the very lowest Federal sufficiency ratings in the country and a projected life of only 6 to 9 years. In my judgment—and in the judgment of my colleagues, Senators DIXON, JEPSEN, and GRASSLEY—the existing structure over U.S. Route 34 poses a danger to the safety of citizens, as well as to the economy of western Illinois and eastern Iowa. Weight restrictions currently in place for the structure serve as an obstacle to interstate commerce.

The Iowa Department of Transportation has requested funds under the Federal discretionary bridge replacement and rehabilitation program for this project. And, at the request of Representative JIM LEACH of Iowa, the House report accompanying the Surface Transportation Assistance Act assigned priority in the use of these discretary funds for this project.

We certainly appreciate the efforts of the chairman of the Subcommittee on Transportation during the markup of the Surface Transportation Assistance Act, as well as the chairman's willingness to establish legislative history during today's debate and in conference with the House. In line with this, I would ask the Senator from Idaho whether MacArthur Bridge could be designated as a Federal priority under the discretionary bridge program?

Mr. GRASSLEY. Before the Senator from Idaho answers, I would like to join my colleagues from Illinois and Iowa to thank the chairman for his considerable assistance that he has already afforded me this year with regard to the MacArthur Bridge. From our past work, I know that the Senator from Idaho fully appreciates the importance of keeping this vital bridge in good repair and has responded to our needs very well.

Mr. SYMMS. I can assure the Senators from Illinois and Iowa that designation of the MacArthur Bridge as a Federal priority under the discretionary bridge program has my full support. The Senators have made a very good case on behalf of this project. You may be certain that in conference with the House we will make it clear that the MacArthur Bridge is a Federal priority.

Mr. JEPSEN. Mr. President, I, too, join my colleagues from Illinois and Iowa in thanking the distinguished Senator from Idaho for his ready assistance concerning the need to replace the bridge spanning the Mississippi between Burlington and Gulfport. We cannot emphasize enough the need to replace this vital link in our transportation system. The assignment of priority status for this project is greatly appreciated by all concerned.

Mr. DIXON. I am pleased to join my distinguished senior colleague from Illinois and my distinguished colleagues from Iowa in urging that discretionary funds be set-aside for the MacArthur Bridge. The bridge, as has been previously pointed out, is extremely poor shape and desperately needs reconstruction. The bridge is a key link for the nearby Illinois communities of Monmouth and Galesburg, as well as for Henderson County and the surrounding west, central Illinois area. Its poor condition results in the obstruction of commerce on both sides of the river. I urge the managers of the bill to do all they can to see that the greatly needed discretionary bridge money is made available for this vital project.

Mr. PERCY. Mr. President, on behalf of my colleagues from Illinois and Iowa, I thank the chairman of the subcommittee.

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SALE OF CERTAIN DEFENSE ITEMS TO FRIENDLY FOREIGN NATIONS

Mr. STEVENS. Mr. President, with the concurrence of the distinguished minority leader, I ask that the Chair lay before the Senate Calendar Order No. 856, which is H.R. 6758.

Mr. ROBERT C. BYRD. Mr. President, I thought we had cleared this. I want be sure.

Mr. President, there is no objection.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H. R. 6758) to authorize the sale of defense articles, defense services, and unclassified defense service publications to United States companies for incorporation into end items to be sold to friendly foreign countries.

The Senate proceeded to consider the bill which had been reported from the Committee on Foreign Relations with an amendment to strike out all after the enacting clause, and insert the following:

That the Arms Export Control Act is amended by inserting after chapter 2A the following new chapter:

"CHAPTER 2B.—SALES TO UNITED STATES COMPANIES FOR INCORPORATION INTO END ITEMS"

SEC. 30. GENERAL AUTHORITY. (a) Subject to the conditions specified in subsection (b) of this section, the President may, on a negotiated contract basis, under cash terms (1) sell defense articles at not less than their estimated replacement cost (or actual cost in the case of services), or (2) procure or manufacture and sell defense articles at not less than their contract or manufacturing cost to the United States Government, to any United States company for incorporation into end items (and for concurrent or follow-on support) to be sold by such a company on direct commercial basis to a friendly foreign country or international organization pursuant to an export license or approval under section 38 of this Act. The President may also sell defense services in support of such sales of defense articles, subject to the requirements of this chapter: *Provided, however,* That such services may be performed only in the United States. The amount of reimbursement received from such sales shall be credited to the current applicable appropriation, fund, or account of the selling agency of the United States Government.

"(b) Defense articles and defense services may be sold, procured and sold, or manufactured and sold, pursuant to subsection (a) of this section only if (1) the end item to which the article apply is to be procured for the armed forces of a friendly country or international organization, (2) the articles would be supplied to the prime contractor as government-furnished equipment or materials if the end item were being procured for the use of the United States Armed Forces, and (3) the articles and services are available to the prime contractor directly from United States commercial sources at such times as may be required to meet the prime contractor's delivery schedule.

"(c) For the purpose of this section, the terms 'defense articles' and 'defense services' mean defense articles and defense services as defined in sectin 47(3) and 47(4) of this Act.

"(d) Section 42(d) and 42(e) is amended by striking out 'and 29' wherever it appears and inserting in lieu thereof '29 and 30'.

"(e) Section 21(i)(1) is amended by deleting the comma following 'under this section' and inserting in lieu thereof 'or under authority of chapter 2B,'.".

Mr. STEVENS. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from Illinois (Mr. PERCY), and ask for its immediate consideration.

The PRESIDING OFFICER. There is a committee amendment in the nature of a substitute.

Mr. STEVENS. Mr. President, I move adoption of the committee amendment in the nature of a substitute.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not object, can I be informed as to what the amendment is that has been cleared on H.R. 6758?

Mr. STEVENS. Mr. President, I ask that the clerk read the text of the amendment.

Mr. President, I withdraw that request. I yield to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, if the Senator from Ohio will yield, the House bill, of course, was referred to the Foreign Relations Committee. Senator PERCY and Senator GLENN reported a committee amendment. It is the committee amendment that the Senator from Alaska is referring to as the substitute.

Mr. METZENBAUM. I have no objection.

Mr. STEVENS. Mr. President, because of the problem that the clerk has in intepreting the apparent conflict between the committee substitute and the amendment I have sent to the desk in behalf of the Senator from Illinois, I ask that that matter be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

SURPLUS AGRICULTURAL COMMODITIES DISPOSAL ACT OF 1982

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be discharged from the consideration of H.R. 6142, the CCC stocks and alcohol fuels bill, and ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, I join in that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6142) to authorize the Commodity Credit Corporation to process its accumulated stocks of agricultural commodities into liquid fuels and agricultural commodity byproducts, and for disposition thereof, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. EXON. Mr. President, H.R. 6142 is of critical importance and major importance to agriculture.

This Senator has been active for the last 2 hours on the floor, attempting to rescue this bill from near extinction, where it rested at 9:30 p.m.

I appreciate the numerous Senators from both sides of the aisle extending their consideration and assistance in the effort to release several holds and objections.

We are taking an important step forward with this bill for gasohol development, and I urge its passage even at this late hour. I thank all Members for their help.

● Mr. HELMS. Mr. President, this measure will provide specific new authority for utilizing surplus farm commodities now owned by the Federal Government, and I encourage my colleagues to adopt it.

Specifically, the legislation will provide that the Commodity Credit Corporation may convert its stocks of farm commodities into alcohol fuels under terms established by the Secretary of Agriculture. Such fuels would be made available for use by the Federal Government or sold into commercial channels if it can be done without unduly disrupting normal markets.

As my colleagues know, the U.S. Department of Agriculture will typically accumulate stocks of excess commodities during times of high farm production, slack world demand, and low farm prices. That is precisely the situation we face today in the grain and oilseed sector of the farm economy.

These Government-owned surpluses tend to hang over the market, depress farm prices, and cost the taxpayer for storage. The legislation we are now considering will provide for the CCC to utilize these accumulated commodities, without disrupting existing markets.

This is a constructive means of putting our great American Agricultural abundance to work.

Legislation on this topic was first introduced as H.R. 6142 by Mr. BEDELL, Mr. FINDLEY, and others in the House of Representatives. Hearings were held on September 15, 1982. On May 20, a companion bill was introduced by Senators PERCY, DIXON, JEPSEN, ZORINSKY, PRESSLER, and others for consideration by the Senate.

I commend these Members for their initiative. The original version of this legislation was amended into the form before us today, which provides greater flexibility to the Secretary of Agriculture.

I also commend the Department of Agriculture for the initiative they have already taken in implementing a pilot program for converting CCC corn into alcohol fuel.

On April 2 of this year, Secretary Block announced plans for an alcohol demonstration project intended to convert about 4 million bushels of low-quality CCC corn into alcohol over a 2-year period. Through competitive bidding, nine fuel alcohol processors in six States have received contracts to process 2 million bushels of CCC corn in the first year.

As of September 24, 1982, 449,132 bushels of corn had been delivered and 698,000 gallons of denatured alcohol had been produced. The price of the alcohol ranges from $1.53 to $1.60 per gallon.

In addition, the National Corn Growers Association recently provided us a copy of an informative study on

the economic impacts of corn utilization in the sweetener and fuel alcohol industries. The study, prepared by two professors at the University of Illinois, indicates that expanded industrial use of corn will have a beneficial impact on the tax base and the general economy, as well as on farm prices.

Data and experience provided by this study and the pilot projects should help in the implementation of this legislation.

The Department of Agriculture has made clear that the first commodity which they will have converted into fuel and byproducts is the corn now owned by CCC which is deteriorating in quality. About 32 million bushels of CCC corn has been identified as going out of condition. According to USDA, this amount of corn would yield approximately 80 million gallons of fuel ethanol.

I would like to clarify several points with respect to this legislation. First, it is our intent that this authority be used carefully so that sales of byproducts from alcohol fuel processing will not interfere with the marketing of competitive products.

For example, distillers dried grain (DDG) is a byproduct of the alcohol distilling process which has several uses. In some cases, DDG may be an alternative to soybean meal which is already being used. It is our intent that this alcohol processing authority not be used in such a scale or manner as to adversely affect the price of soybeans.

Similarly, the legislation provides that existing markets for alcohol fuels should not be unduly disrupted by use of this authority. However, there is a provision for private sale of the fuel, as long as it is done with care.

Finally, this legislation allows additional flexibility in the disposition of CCC stocks, notwithstanding the provisions of current law. Current law requires that CCC-owned grain may not be sold, except for grain which is spoiling or under certain other limited circumstances, unless market prices rise to certain levels.

The 1981 farm bill included this provision to protect grain markets from the adverse influence of Government "dumping" or selling of grain. Although the proposed legislation will allow expanded use of the CCC grain, it is still our strong intention that it should not be used to undermine or adversely affect normal grain markets. While I am confident that the current Secretary of Agriculture would not do so, I am seeking to establish a record for future years.

Mr. President, although this legislation is not a panacea nor an overnight outlet for large volumes of corn, it is a constructive approach to the problem of surplus commodities.

The tremendous productivity of the American farmer should be a blessing, not a curse. This legislation will allow us to use our excess grain, rather than let it spoil in Government-funded storage at the taxpayer's expense. I hope my colleagues will adopt this legislation.

Mr. President, I ask that an explanation of the bill be printed in the RECORD at the conclusion of my remarks.

The explanation follows:

STAFF EXPLANATION OF H.R. 6142

H.R. 6142 authorizes the Commodity Credit Corporation (CCC) to use agricultural commodities from its accumulated stocks for processing into liquid fuels and agricultural commodity byproducts. Liquid fuel produced from such commodities could be (1) made available to Federal agencies for transportation and industrial fuel uses or stored for emergency uses, or (2) sold in commercial markets. In either case, the liquid fuel must be made available in a manner that does not disrupt the prices in commercial markets for alcohol fuels.

H.R. 6142 also provides that for purposes of determining the feasibility of providing CCC stocks for processing into liquid fuels, the Secretary must consider the costs associated with acquiring and maintaining the stocks of commodities and the prospective value and utility of the stocks after processing into fuel. Within 120 days after enactment of this Act, and each year thereafter, the Secretary must report to Congress on the operation of this alcohol fuels program.●

● Mr. ARMSTRONG. Mr. President, yesterday the House of Representatives passed the Surplus Agricultural Commodities Disposal Act of 1982, H.R. 6142. This action represents a major step toward solving several of the more pressing problems confronting this Nation.

The problem of surplus Government-owned commodities is of paramount importance to our Nation's farmers. These surpluses are choking our farmers to death. The surpluses continually result in depressed market prices, which creates further reliance on the Government, and further additions to the surpluses.

At the same time, we continue to buy fuel from abroad for our strategic reserves, and for domestic fuel consumption. There is a simple and logical solution to these twin problems.

Mr. President, I supported the establishment of a pilot project in the Department of Agriculture several months ago to convert surplus Government grain stocks into alcohol fuels, in order to reduce the size of these surpluses. I continue to support the idea, and I commend the leadership of the Agriculture Committee for bringing this important matter to the attention of the Senate.

One of the key questions in this whole process from the beginning has been how to dispose of the fuel created by this processing of surplus grains. It has been suggested that much of it could be used in Government vehicles, though the distribution system is still somewhat unclear. But from the beginning, the establishment of a strategic alcohol reserve has made a great deal of sense. We continue to pour millions of tax dollars into other nations to stock our strategic petroleum reserves, when we could be using fuel processed here at home.

The technology has existed for some time for the processing of this renewable fuel, and for its use in commercial applications. The only thing missing has been a way to do it cheaply; that is, competitively when compared to the cost of producing gasoline from crude oil. If such fuel can be produced from grain which the Government already owns, though, and which is costing the taxpayers millions of dollars to sit in storage and rot away, it makes little sense not to pursue this course.

I strongly support giving the administration discretionary authority to establish such a reserve. This is an important step toward a meaningful solution to several of our most pressing problems—the energy problem, the agricultural surplus problem, and the balance of trade problem. I thank the committee for its work on this important matter.●

● Mr. JEPSEN. Mr. President, the U.S. Department of Agriculture projects a record corn harvest of 8.32 billion bushels. It is further estimated that the 1982-83 carryover of corn will be approximately 2.8 billion bushels.

Those numbers add up to further downward pressure on farm prices, and additional costs to the Federal Government in removing surpluses off the depressed market.

According to studies, it costs U.S. Department of Agriculture's Commodity Credit Corporation a minimum of 80 cents a bushel to remove corn from the market and into Government storage.

That fact alone should prompt us to explore every avenue to reduce Government-held stocks.

The bill we now have before us, the Surplus Agricultural Commodities Disposal Act of 1982, H.R. 6142, will help in bringing this about.

It provides the Secretary of Agriculture with the needed authority to dispose of Government stocks through conversion into alcohol fuels. It will cost less to convert those CCC stocks into alcohol fuels than to store those stocks as grain.

At the same time, it will help shore up the budding alcohol fuels industry, an industry that could mature into a force to aid in reducing our dependence on OPEC oil.

It makes sense to reduce Government costs—and help relieve pressures on prices—by converting surplus stocks into alcohol fuels.

I urge passage of this vital piece of legislation.●

● Mr. PERCY. Mr. President, I rise in support of the passage of H.R. 6142, the Surplus Agricultural Commodities Disposal Act of 1982. I, together with my esteemed colleague from Illinois, Senator DIXON, introduced its companion here in the Senate (S. 2554) on May 20, 1982, It now has 10 cosponsors. On May 22, 1982, I chaired a hearing of the Governmental Affairs Subcommittee on Energy on the bill.

This legislation has the support of the National Corn Growers Association, the National Association of State Departments of Agriculture, and the Renewable Fuels Association. It has broad local organizational support throughout the Midwest and other grain producing regions of the United States. I have attached, for example, a strong statement in support of S. 2554 by Mr. Larry Werries, director of the Illinois Department of Agriculture.

Dr. William G. Lesher, Assistant Secretary of Economics for the U.S. Department of Agriculture, testified in favor of the legislation on September 15, 1982, provided two minor changes were made in H.R. 6142. Those two changes have now been made.

Shortly, we will be returning home at a time when our farmers should be eagerly anticipating the start of the harvest. The weather has been exceptionally good throughout the Corn Belt this summer and fall. A bumper harvest is predicted.

Instead, many farmers are dreading the economic results of the harvest.

Despite the tireless efforts of Jack Block to correct past governmental mistakes that have driven away our foreign customers, farm income is at its lowest level since the Great Depression.

We have now become the residual supplier to the world for feed grains, instead of the primary supplier. Others such as Brazil, Argentina, the European Community, and Canada are aggressive and effective competitors.

One of the direct offshoots of the Soviet grain embargo of 1980 was the Carter administration decision to purchase 156 million bushels of corn destined for sale to the U.S.S.R.

That corn is still in Commodity Credit Corporation (CCC) storage with little hope that it will be sold. Much of it is in the Panhandle of Texas.

This bill directly addresses the festering problem of what to do with this corn which is costing taxpayers 80 cents per bushel per year in handling, storage, and interest charges. Since the embargo, an additional 115 million bushels of corn have been added to CCC storage because of worsening economic conditions that have resulted in accelerated forfeitures of Government loans.

As of September 24, 1982, there were 271 million bushels of corn in CCC inventories. Next year, the USDA is projecting CCC inventories of 425 million bushels. Some CCC officials are privately predicting even higher inventories.

Just think—in 1977 there was no corn in CCC stocks and now we are running out of storage space for CCC corn. The USDA has authorized the use of barges and hopper cars to store surplus grain, and even that might not be enough. Those barges and hopper cars should be moving this grain to ports for export. Now, they are being prepared to become costly museum relics of a bygone era of booming export sales, an era still fresh in our minds.

I have attached an article by Mr. Lawrence M. Lesser which details the enormous surplus of grain hopper cars. I have also included the United Press International story that was reprinted in the Chicago Tribune entitled: "Jammed Storage Facilities Menace New Grain Harvest."

What a tragedy. Here we have the best farmers in the world, producing the most they can in the face of a tremendous credit squeeze and other major obstacles, and yet much of what they grow will sit in costly storage bins or—worse yet—under plastic sheets in open fields where it will be subject to damage because of insect infestation. I have attached a Wall Steet Journal article that details how Charles Storey of the U.S. Grain Marketing Research Laboratory found that 80 percent of corn stored on farms was infested with insects. The study found that 20 percent of all corn samples were more than half moldy. The study referred to corn in bins, not under plastic sheeting. Mr. Storey also found that one-third of corn samples contained a mold that can produce aflatoxin, a carcinogenic fungus. It should be pointed out that Mr. David Sauer, the report's other author, said few of the samples were poisonous.

I understand that the Secretary of Agriculture initially wants to use the discretionary authority given to him under this legislation along the lines of a promising pilot project approved by the CCC Board of Directors this April. In November 1981, I personally urged Secretary Block to approve such a program.

The pilot project is well underway to convert 4 million bushels of CCC-owned low-quality corn into ethanol over a 2-year period. There are now nine contractors in six States participating in this project.

Under the pilot project, which began in June of this year the CCC contracts with private ethanol processors to convert distressed corn to fuel ethanol for a fee, bid competively. The contractor sells the ethanol on behalf of the CCC and the receipts are turned over to CCC. The processor is permitted to keep the valuable DDG protein coproduct.

The legislation makes it clear that there should be no significant disruption of the market for private processors not participating in this program. Any such significant price disruption would not be in keeping with the intent of the Congress.

I have attached a CCC progress report on the pilot project and an earlier report on it from Alcohol Week.

Eventually, the fuel ethanol could be stored as part of a strategic alcohol fuel reserve (Safure). Both the Congressional Budget Office and the General Accounting Office are now studying the proposal at the request of various Members of Congress.

I had proposed a study of the merits of Safure last year in a letter to Secretary of Energy James B. Edwards.

Both the pilot project and the eventual creation of Safure—if found in the national interest—could create new jobs and economic activity in rural America. A June 1982, University of Illinois study indicated that by 1983, $128 million in new economic activity would be generated by ethanol production in Illinois alone. An additional $31 million in State tax receipts would result from both the production of ethanol and allied products.

This new "value-added" economic activity could not come at a more opportune time. Some experts are predicting that farm prices may even go lower, after the harvest. And no one, up to now, has seriously proposed doing anything else with all this surplus corn—no one, that is, until Representatives BERKLEY BEDELL, PAUL FINDLEY, Senator DIXON, and I introduced this bill.

This bill provides a potential market for at least 100 million bushels of that corn. It is not the only answer we need, but it is a start at helping our distressed farmers, Frankly, as many of us have been hearing of late, farmers are tired of excuses from politicians. They want reassurances that someone, somewhere is actually doing something to help them in their hour of need.

Farmers are not the only ones who stand to suffer. The total cost of storing, handling, and paying interest on this corn has been estimated at about 80 percent per bushel per year. In 1983, that could amount to close to one-half billion taxpayer dollars that would be truly wasted. This money would be better spent to develop new oversea markets for feed grains, to promote value-added agricultural exports, and bring more jobs to rural America.

Let us set the record straight on a number of points. This is not a matter of food versus fuel—it is a matter of food and fuel from surplus products that would go to waste. Recently, I read in Alcohol Week of the successful use of DDG—as a dough and flour conditioner for bakeries and doughnut

shops. This might be an important health breakthrough for proverty-striken elderly, who increasingly subsist on coffee and doughnuts but need fiber for good digestion. The addition of the DDG would give them an important diet supplement for their low-cost diet.

I have attached an Alcohol Week article on the subject.

In a modern, efficient refinery process, the same bushel of corn can be utilized for both food and fuel. During hearings before the U.S. National Alcohol Fuels Commission, Daniel E. Shaughnessy, then Executive Director of the Presidential Commission on World Hunger, testified that:

An examination of near-term world food prospects and the U.S. production potential, indicates that there are immediate opportunities for the concurrent pursuit of both food and energy objectives.

From 1 bushel of corn the modern plant derives 1.7 pounds of corn oil—enough to produce 2 pounds of margarine—3 pounds of 60-percent protein corn gluten meal and 14.5 pounds of 21-percent protein corn gluten feed. The gluten proteins produced from each bushel provide the protein meal requirements for feeding three market weight frying chickens.

From the residual starch, the modern plant produces 2.5 gallons of 200-proof ethanol for blending with gasoline and 15 pounds of carbon dioxide. The carbon dioxide is used in carbonated beverages, flash freezing of prepared food items, and the new and growing application of hydroponic growing of vegetables.

Additionally, the latest studies indicate that the production of ethanol fuels is energy efficient and provides a net energy savings.

Data from the country's largest fuel ethanol producer for the second quarter of 1982 reveals that it took 198,311 Btu's to grow, transport and process 1 bushel of corn into ethanol and coproducts. The Btu value of 2.5 gallons of ethanol and other products resulting from the processing are 344,149. This shows a favorable energy balance of 145,838 Btu's per bushel processed or 58,335 Btu's per gallon of alcohol processed. The above calculations credit ethanol with a Btu value of 84,000 Btu's per gallon. Since alcohol replaces gasoline on at least a gallon-per-gallon basis with comparable performance it can be argued that the gasoline Btu value of 15,000 Btu's per gallon should be used in the calculations. Using this Btu value, the resultant product value is increased to 421,649 Btu's, giving a surplus of 223,335 Btu's per gallon of alcohol produced.

These figures are based on actual operations of an existing ethanol plant using technology now in place. This processing technology continues to improve and a more favorable energy balance will be achieved in the near future.

The alcohol fuels industry will soon produce 600 million gallons of ethanol for the motor fuel market. Sales prospects are excellent: motorists now view it as a valuable octane booster. I have attached a recent statement by Mr. Frederick L. Potter, president, Information Resources, Inc., and an article in the Wall Street Journal.

Worldwide interest in ethanol has increased, despite the global recession. By next year, half of the new car sales in Brazil will be for pure ethanol vehicles, now that some understandable shakedown problems have been resolved. I have attached a progress report on the Brazilian program recently completed by the U.S. Embassy in Brasilia at my request.

The U.S. Postal Service is proceeding at my request with an alcohol-powerd car experiment in Springfield, Ill., and Denver, Colo.

The first results are encouraging, but more work is needed.

Any way you look at it, this legislation makes sense. It solves part of the corn grower's problem. It gives us a strategy to save taxpayer dollars. It offers new employment opportunities in the milling industry. And it provides us with additional, domestically produced and environmentally sound sources of energy.

With close to 150,000 corn farms in Illinois and hundreds of thousands elsewhere in the United States, I urge passage of H.R. 6142.

I would like to personally thank Senator HELMS and his able staff for their assistance in bringing this legislation to the floor. I particularly would like to commend George S. Dunlop, chief counsel of the Agriculture Committee, and Ron Wilson, Jim O'Mara, and Thomas Clark of the Agriculture Committee staff. The bipartisan support for fuel ethanol is very gratifying. I would also like to thank Scott Shearer of Senator DIXON's office for his help.

Again, I would like to point out the strength and resolve of Jack Block and Dr. Bill Lesher of the Agriculture Department in supporting this cost-effective legislation. I am convinced their confidence in the fuel ethanol industry in the United States is well placed.

The attachments referred to are as follows:

EXHIBIT NO. 1

STATEMENT OF SUPPORT FROM THE ILLINOIS DEPARTMENT OF AGRICULTURE—

The Illinois Department of Agriculture and the State of Illinois support the proposed legislation referred to as "Surplus Agricultural Commodities Disposal Act of 1982" (H.B. 6142).

Granted Illinois probably has more to gain than some states because it is a large corn producer and presently produces 70% of the country's fuel ethanol. However, the entire country will share many ways from the benefits of the legislation—a few are listed below.

1. CCC storage and transportation, handling and interest costs could be reduced drastically.

1a. USDA estimates it costs $1.70 per bushel every two years to cover the charges on forfeited price support commodities.

2. Reducing the burden of over supply therefore would tend to improve and stabilize commodity prices.

2a. Dr. Tom A. Hieronymus, noted University of Illinois economist, estimates that for each 1 percent disappearance of corn the price will improve by 2 percent.

3. Any quantity of fuel ethanol produced beyond the immediate federal fleet needs could be utilized in the strategic reserve for national defense.

3a. Properly stored alcohol fuel has almost endless life.

4. Certainly we would reduce our dependence on foreign petroleum fuel.

5. Anytime we can process commodities in the United States employment is increased.

6. Anytime straight or blended alcohol fuels are burned air quality is improved especially in densely populated areas.

7. With less commodities in storage—thus enabling rotation—higher quality of food and feed products would be the result.

EXHIBIT NO. 2

OVERRUN WITH HOPPERS

(By Lawrence M. Lesser)

As recently as two and one half years ago, getting a rail freight car every time you needed one was a feat that even the great Houdini would have found difficult. The economy was strong and grain was moving at record levels. Even boxcars were being pressed into grain-carrying service. In September 1979, the Interstate Commerce Commission pegged the average weekly freight car shortfall as somewhere between 35,000 and 40,000 cars.

Today the problem has flip-flopped: There are a quarter of a million freight cars sitting idle every day. During 1981, there were almost 169,000 more freight cars available each day on the average than were needed. The perennial car shortage has been tranformed into what the railroads are calling a "shipment shortage."

How did this car surplus, or shipment shortage, come about? The surplus can be attributed in part to a national decline in rail traffic because of the depressed economic state of such heavy rail-using industries as agriculture, automobiles, forest products, and steel. However, huge purchases of rail rolling stock in recent years by railroads, private investors, and shippers also have added dramatically to capacity.

Most affected are covered hopper cars, which are the primary equipment used for shipping bulk grain, fertilizer, and other commodities. The number of jumbo covered hoppers (type L-153) owned by railroads over the past eight years has increased by 74 percent (from 50,669 in 1973 to 87,252 in 1981). But non-railroads' ownership has expanded even faster—by a whopping 558 percent (from 9,777 to 64,315)!

The railroads owned 84 percent of all covered hoppers in 1973, the peak of the first giant grain sale to the Soviet Union. But eight years later, the proportion of railroad-owned covered hopper cars had dropped to 58 percent.

Whether the existing problem is characterized as a "freight car surplus" or a "shipment shortage" is a matter of viewpoint, but the fact is that the problem is real and has manifested itself in several ways.

For one, the railroads have had to utilize miles of running track as giant storage areas. In addition, the carriers have come to fear that they are losing control over their own operations as the proportion of cars owned by private interests has swelled.

Carriers have resorted to a varity of measures to control use of non-rail-owned cars on their lines. Some, like Burlington Northern and Conrail, reduced rates on grain carriage to attract business and reduce empty backhauls. Others, like the Chicago & North Western, Illinois Central Gulf, Santa Fe, and Union Pacific, announced that they would restrict the use of privately-owned covered hopper cars on their tracks.

Perhaps the most far-reaching action of any railroad occured last spring when the Santa Fe announced that, effective May 1, 1982, it would revoke authority for shippers to load grain in privately-owned covered hopper cars. Santa Fe explained its new policy this way:

Significant increases in operating costs due to extra switching and lack of classification facilities at Gulf ports jeopardize our ability to continue to provide low cost and expeditious service to grain shippers. For those reason, we feel it is in the best interest of customers for us to no longer permit grain loading in private covered hoppers.

Fifty-six large grain exporters, car manufacturers, and car lessors reacted angrily to the Santa Fe's announcement. They petitioned the ICC last August to review the agreements between railroads and private car owners or lessees (known as "OT-5 agreements") that permit private cars to run on individual rail lines. Organizations representing the chemical fertilizer grain milling, and car building industries joined in support of the petition as did the U.S. Department of Agriculture and agencies of the states of Indiana, Illinois, Missouri, Nebraska, and Texas.

Meanwhile, Santa Fe had second thoughts about its proposed action and, on October 23, withdrew its controversial plan. The railroad also announced that it would continue to accept privately-owned cars on behalf of shippers that held authority from the Santa Fe to use them. But, added Santa Fe, it was still looking for a way to distribute the burden of the surplus more equitably among the railroad and its shippers.

Two months later, on December 23, the ICC denied the petitioners' request to review the OT-5 agreements by ruling that the arguments were not persuasive enough to justify an investigation. The Commission addressed three fundamental transportation policy issues in its decision:

Does a railroad's common carrier obligation require it to utilize equipment it does not own during times of car surpluses?

Does the railroad industry have an obligation to assist private car owners, builders, and lessees in meeting in the economic and financial burdens of car ownership during a surplus since, it is alleged, the railroads "pressured" these interests to acquire rolling stock when there was a car shortage?

In view of the diminishing federal role in regulating rail freight transportation, should the ICC intervene in commercial disputes between railroads and shippers over matters relating to car supply?

FORCED TO BUY

The petition alleged that for more than a decade, policies of the nation's railroads regarding equipment acquisitions resulted in "severe and recurring shortages" of covered hopper cars. Thus shippers were "forced" to acquire their own covered hopper cars in order to move their grain. The petition further alleged that the only way that shippers could obtain the lowest available rail rates (which apply only to grain shipped in privately-owned cars) was to acquire and use their own equipment.

The shippers complained that the eight-year period from 1972 through mid-1980 was marked by "consistent" shortages of covered hopper cars, with the most severe shortages occurring during the massive U.S. grain sales to the Soviet Union in 1973 and 1974, and again in the late '70s.

"What actually happened was that American railroads refused to recognize, or were unwilling to deal with, the fact that permanent change had occurred in the production and disbursement of grain crops—a change which has produced a continuing increased demand for covered hopper cars," the shippers told the ICC. "What were 'peak' demands in the 1950s and 1960s were normal demands by the mid-1970s. It was those normal demands which the railroads refused to recognize or fill."

Shippers also claimed that they were encouraged by the railroads to furnish private cars through a system of mileage allowance payments which were often high enough to defray a large portion of operating costs, although not high enough to cover full costs. In many other cases, the petitioners told the ICC, shippers acquired their own cars "because they were told by carriers short of cash or credit the private cars would be necessary to move grain to market."

The so-called "OT-5 agreements" at issue here actually have their genesis in an Association of American Railroads document entitled, "Circular No. OT-5-E," which is published in the Official Railway Equipment Register. OT-5 provides a mechanism for shippers to obtain "reporting marks" for their cars and for railroads to control the number of privately-owned cars that may be operated. A private car cannot be used unless a reporting mark has been assigned to it. Without a reporting mark, a car is not eligible to receive mileage allowance payments from the railroads over which the car travels.

Over the past decade, most railroads have approved OT-5 agreements during times of car shortages but have denied them during times of surplus. Even when the applications were approved, conditions often were attached, according to the petitioners. These included cancellation upon 30 days' notice, authority to use the cars only in connection with certain rates, terms of only one year, and limits on the time of year when the agreement applied. These conditions often left shippers stuck with expensive equipment on five year lease that they could not use.

Shippers are not the only parties allegedly being harmed. Car manufacturers and car lessors also have felt the economic brunt, according to the petitioners. Since lease and purchase prices for covered hopper cars were depressed and likely would remain so, shippers who leased their equipment would be forced to turn their cars back to the manufacturers and lessors when the leases expired. Not only were the railroads "depriving shippers of the ability to take advantage of the soft car prices," the petitioners argued, "but also were depriving car manufacturers and lessors of competitive market by effectively removing shippers, who in recent years have acquired well over one-half of all new covered hopper cars, for the bidding process."

The petitioners also admitted that efforts to reach an "equitable negotiated resolution" of differences with the railroad industry were unsuccessful. Therefore, the petitioners asked the ICC to "recognize and resolve" what they described as an "economic crisis." The petitioners further asserted that a 1977 ICC decision (Ex Parte No. 334, Car Service Compensation-Basic Per Diem Charges) required the Commission to institute the requested rulemaking.

In conclusion, the petitioners urged the ICC to completely abolish railroad restrictions on the use of private covered hopper cars, except for reasons of not meeting mechanical and safety requirements. Abolishing these agreements "will improve the utilization of existing and future private car fleets, rationalize private car investment, and make private cars more readily accessible to small shippers," they said. As an alternative, the petitioners suggested a "sharing formula" to cover the placement of railroad and privately-owned cars during times of car surpluses.

THE ICC'S DECISION

On December 23, 1981, the ICC handed down a decision in which it announced that it would not investigate the allegations of the shippers, car manufacturers, and lessors, whom the Commission referred to as the "SCOT-5" committee. The ICC said:

"SCOT-5 has not convinced us it would be in the public interest to adopt rules to assist private car owners to bear capital costs associated with their investment during periods of car surplus (either by prohibiting railroads from restricting use of private cars or by establishing some basis for proportional use of carrier and private cars). Indeed, SCOT-5's proposals seemingly conflict with existing statutory and policy considerations."

The ICC questioned the petitioners' contentions that they were "pressured" into obtaining covered hopper cars by the railroads and rejected their argument that the Commission should intervene by requiring the railroads to share the costs associated with the idle private cars.

The agency acknowledged that during past car shortages, some shippers were totally dependent upon railroad-provided covered hopper cars, particularly for the movement of grain from remote producing areas to ports of export. The ICC also acknowledged that various railroad rates and rules, such as preferential rates for covered hopper cars over boxcars, lower rates for private cars than for railroad-owned cars, and mileage allowances, encouraged shippers to acquire covered hopper cars. But these considerations did not establish that shippers were "pressured" into acquiring cars.

"Indeed, other considerations—namely, the inherent volatility and unpredictability of the grain market as well as the business judgment that these cars were good investments—appear to have been a greater factor than any deliberate railroad activity," the Commission concluded.

Because of the inherent unpredictable nature of the grain market, car shortages have to be expected periodically, the ICC explained. During times of car shortages, shipper demand for covered hopper cars intensifies, which in turn makes private equipment acquisition attractive not only to shippers but to car manufacturers and "speculators," who purchase the cars and lease them to shippers and carriers in the expectation of earning a large profit.

In fact, during its consideration of the petition, the ICC found that a substantial ma-

jority of cars owned by the companies that filed the petition actually were registered to the accounts of three such "entrepreneurs." In view of these substantial investments by non-shippers, the Commission concluded that the assertion that the railroad "forced" shippers to acquire cars was greatly overstated, if not misleading.

The agency further pointed out that the railroads never promised that the incentives to encourage private car acquisition always would be offered. Rather, a prudent investor should be aware of the risk that railroad incentives offered during periods of car shortages might be withdrawn during periods of surplus.

If authority to use private cars should be revoked by the railroads, the ICC said that shippers, builders, and lessors would have the option either of holding onto their idle, non-revenue producing cars (in anticipation of renewed demand that would increase the value of the equipment) or negotiate sales or leasing arrangements with railroads or with other shippers. "Investors should expect demand fluctuation and assume the possibility of losses as well as profits," the ICC cautioned.

Perhaps the most important policy issue raised in the case was whether the nation's railroads, in accordance with their obligation to provide service upon reasonable demand, also had a common law or statutory duty to accept cars on their lines that they did not own. The ICC concluded that they did not, and cited a 1934 decision (*Use of Privately-Owned Refrigerator Cars,* 201 I.C.C. 323, 373-4) as a relevant precedent:

"It is well-settled law that it is the duty of common carriers by railroad to furnish such cars as may be reasonably necessary for the transportation of all commodities they hold themselves out to carry . . . It is optional with them whether they exercise that right by furnishing cars owned by them, cars owned by other carriers, or cars leased from independent contractors.

"A private car owner, whether he be a shipper or not, has no right to have his cars used as a vehicle for the transportation of freight over the rails of any carrier without its consent. If the carriers have suitable cars and will furnish them on demand, they may refuse to transport shipments in private cars."

In other words, a railroad is under no obligation to use privately-owned equipment as long as it is able to furnish shippers with railroad-owned cars upon reasonable demand. Only if a railroad defaults in its duty to provide cars does it forfeit its right to exclude private cars.

Since the railroads have not failed to furnish covered hopper cars during this period of car surplus, the Commission concluded that they are entitled to exclude privately-owned cars. If the ICC were to compel the railroads to accept private cars at the expense of idle carrier equipment, overall rail revenues would be reduced and all shippers would have to pay higher freight rates to make up the difference.

FOLLOWING STAGGERS

The ICC also signaled carriers and distribution managers, in its first ruling on the subject since enactment of the Staggers Rail Act of 1980, that it would not be consistent with the new national rail transportation policy for the Commission to intervene at the expense of the railroads and shippers in general to protect investments made by some shippers, car builders, and lessors. Rather than helping the railroads to improve their revenue position, as the Staggers Act requires, this proposal would have the opposite effect.

Moreover, the Staggers Act directs the Commission to encourage carriers and shippers to rely as much as possible on negotiated contracts and market forces rather than on regulatory intervention to resolve economic disputes. Although the petitioners questioned whether contracts could be negotiated to resolve their difficulties, the ICC concluded that contractual solutions might be a feasible way for shippers and railroads to share the costs associated with car ownership during times of equipment surpluses.

THE CAR SUPPLY OUTLOOK

The year 1981 was marked by unprecedented surpluses of virtually all types of rail freight cars. There even were surpluses of open top hopper cars (used for hauling coal) despite a sharp upswing in coal shipped by rail.

Because of a 12-week strike, coal shipments for 1981 increased only by one percent over 1980 levels. A recent study prepared for the Association of American Railroads estimated that coal traffic this year will rise only by five percent. The only other major traffic grouping that rose in 1981 was trailer-on-flatcar and container-on-flatcar, which advanced only by 2.6 percent.

Other important revenue-producing traffic declined. Grain was down 14 percent; food products declined 13 percent; forest products (including lumber and paper) were off 8 percent; automobile and truck shipments were down 5 percent; and chemical shipments dropped 4 percent. Overall, the nation's railroads hauled an estimated 915 billion ton-miles of freight in 1981, a decline of 0.4 percent from 1980's record 919 billion ton-miles.

If traffic patterns continue as they have so far, business is likely to continue at reduced levels, at least for the first half of the year, and the car surplus will remain.

The key to a rebound in rail traffic and a reduction in car surpluses lies with grain. Grain traditionally is one of the top three revenue-producing commodities for the railroads. A hefty boost in export sales would cause the surplus to evaporate.

In 1979, 56 percent of all grain shipped by rail was exported. However, exports dropped considerably in 1980 and 1981 after President Carter embargoed grain sales to the Soviet Union in response to the Soviet invasion of Afghanistan.

Today, the grain market continues in the doldrums, as sluggish demand, bumper crops, and high interest rates have forced farmers to place their crops in storage rather than sell at a loss. Meanwhile, rail sidings throughout the grain belt are lined solidly with expensive empty jumbo hoppers. A major reason is that grain exports to the Soviet Union—our largest foregin buyer—have been far lower this year than anticipated. As this article went to press, the Soviets had purchsed less than half of the 23 million metric tons they are authorized to buy this year.

Political considerations beyond the control of grain shippers, railroads and other car owners cloud the future. President Reagan lifted the 1980 embargo shortly after he took office. But then late last year, he imposed other trade sanctions—but not a grain embargo—in retaliation for Soviet involvement in Poland. The sanctions included: postponement of negotiations over a new long-term U.S.-Soviet grain agreement and suspension of negotiations over a new bilateral maritime accord.

Even if the U.S. economy should rebound during the second half of the year, there is likely to be a continuing surplus of rail freight cars—particularly grain-hauling covered hoppers—for the rest of 1982. In order for the freight car surplus to abate entirely, not only would the nation's economy have to undergo a sustained growth period, but U.S.-Soviet relations would have to improve to the point where a new bilateral grain agreement could be signed, authorizing the Soviets to purchase even greater amounts of American grain. Then grain prices might rise, and grain would begin to move.

JAMMED STORAGE FACILITIES MENACE NEW GRAIN HARVEST

Across the Southwest and Mid-west the story is the same. With the harvest still underway, many elevators are nearly full because of a bumper wheat year, low prices and government-owned crops costing millions to store annually.

The situation has become so critical in some areas there's talk of letting the expected sorghum and record-high corn crops rot in the fields or dumping them on the ground outside the concrete elevators that rise like monoliths from the plains.

Agriculture Secretary John Block two weeks ago approved emergency storage of grain crops—which also include soybeans, oats, barley and rye—in surplus barges, rail cars and other facilities not normally qualified to store harvested crops.

"There will be a bigger problem this fall than there has been for many years," said Herb Cast, associate director of the Kansas City, Mo., field office of the U.S. Commodity Credit Corp. "With the crop coming in, we could be faced with record problems.

"It's partly because of the accumulation of grain owned by the government, partly because of the record volume of grain still owned by the farmers but pledged into the reserve program and, last but not least, the anticipated size of the new crops," he said.

"It's kind of scary in some places whether there is going to be enough storage space."

Farmers say they hope the emergency storage will help ease the crisis but warn it will take expanded export markets, higher prices, new policies or a bad crop year next year to prevent an even worse storage problem.

"This whole darn thing seems to be working against us," said Jerry Schweitzer of Farmer's Co-Op Elevators in Dighton, Kan.

"The thing we need to do is get somebody using our grain rather than storing it. Every bushel in reserve is costing the government. We need to see better prices that would encourage the farmer to sell grain rather than put it in reserve."

Taxpayers are paying a whopping $168.7 million annual bill to store 491 million bushels of government-owned wheat, corn and sorghum in the nation's elevators alone—most of it because farmers are finding it more profitable to default on their government price support loans than sell on the open market.

Millions of bushels were bought by the government from financially strapped farmers after President Jimmy Carter imposed the Russian grain embargo. President Reagan has lifed the embargo for a year but there is a worldwide wheat glut.

Meanwhile, farmers have put 2.1 billion bushels of wheat, corn and sorghum in the three-year price support reserve program

and 499 million bushels of the same crops in the nine-month U.S. Commodity Credit Corp. plan—all crops stored in farm bins or elevators.

The storage problem is most severe in Kansas, Nebraska and the Texas Panhandle because they have several grain crops a year that need to be stored.

FARMERS' BINS HOLD CORN, WHEAT, OATS AND LOTS OF BUGS

(By Terri Minsky)

Farmers' bins and silos are full of corn, wheat, oats—and bugs.

A study to be released next year by the U.S. Grain Marketing Research Laboratory in Manhattan, Kan., shows that 25% of the wheat, 56% of the oats and 80% of the corn stored on farms contain live insects. The study, financed by the Agriculture Department, sampled 8,000 bins in 27 states in 1980. Almost none of the farmers fumigated, cleaned or treated the grain before storage to prevent infestation, and some of the grain in the bins was four years old, the study said.

The problem is likely to get worse. Two-thirds of the nation's grain is stored on the farm, rather than in commercial grain elevators. And with prices so low that farmers can't make a profit on the crops, they aren't ready to sell them any time soon. "The more grain you pile on, the easier you make it for bugs to live and reproduce," Charles Storey, the study's co-author says. The bugs, specifically grain beetles, moths and grain borers, are protected from cold weather by the growing heaps of grain.

The infestation, which in some cases averaged 890 insects per 1,000 grams, or 2.2 pounds, of grain, mostly hurts the farmer. Most of the bugs never are consumed by humans, because much of the grain is fed to livestock. Livestock can eat the buggy grain "because, after all, it is just a little more protein," Mr. Storey says. "Bugs aren't inedible or poisonous, it's just that they consume the grain . . . and make it worthless."

But the farmer finds that grain elevators discount the price of infested grain as much as 20 cents a bushel. It also is expensive for a flour miller, who must remove bugs living inside the kernels, even though the official tolerance level is 50 insect fragments in 50 grams of flour.

The infestation occurs because farmers don't take the time to dry out their crops before storing them, and many don't even spray with insecticide. "During the harvest, it's hurry, hurry, hurry," Mr. Storey says. During troubled times, farmers also cut back on any expenses they can, including insecticide, he adds. As a result, grain that has been in storage for a year is as likely to have bugs as grain that has been stored for four years.

The study also examined mold growth in farm bins and found that 4% of the wheat samples and 20% of the corn samples were more than half moldy.

As many as one-third of the corn samples contained a mold that can produce aflatoxin, a carcinogenic fungus. But David Sauer, the report's other author, said few of the samples were poisonous. The most likely effect of the mold, he says, is that the livestock who eat the grain would gain weight less quickly.

The situation probably hasn't improved since the study. And it may have been exacerbated by the current glut of grain, the authors say. This year's record crops probably won't fit into the available farm storage space, and many farmers say they will simply store their grain on the ground, protecting it only with a plastic cover.

EXHIBIT No. 5

Subject: Status of Alcohol Demonstration Project.

On April 2, 1982, Secretary Block announced plans for an Alcohol Demonstration Project intended to convert about 4 million bushels of Commodity Credit Corporation (CCC)-owned low-quality corn into alcohol over a 2-year period. On May 14, the Kansas City Field Office (KCFO) sent alcohol processors and other interested persons an announcement of the terms and conditions for participation and an invitation to submit competitive bids. The invitation was for approximately 2 million bushels to be processed in 1 year.

On June 10, awards were made for the conversion of 650,000 bushels to the first three firms listed below. Invitation 2, to "fill out" the 2 million bushel first year goal, was issued on June 25. On July 22, awards were made for 1,350,000 bushels to the remaining firms listed. Midwest Solvents Co., received awards under both invitations.

Offers were evaluated using the following considerations:

1. Offer price per gallon.

2. Conversion factor (gallons per bushel guaranteed).

3. Estimated per gallon value of alcohol.

4. Location of available inventory.

5. Estimated transportation cost of applicable inventory to contractor's facility.

The attached chart shows the actual progress of the Demonstration Project as of September 24, 1982.

USDA contacts for information on Alcohol Demonstration Project: Carl Graham, phone 447-4253, or Larry Ackland, phone 382-9105.

CCC CONTRACTORS DOING BOOMING BUSINESS IN ETHANOL, DDG

All the fuel ethanol and distillers dried grains that can be produced—and more—are being sold by producers awarded contracts by the U.S. Commodity Credit Corp. (CCC) for conversion of off-grade corn to ethanol. Markets for ethanol and DDG are expanding rapidly, the producers report, especially in the last weeks and months (and the CCC corn is only just beginning to be delivered to the contractors).

Their experience tallies with that of other producers and also of wholesalers of fuel ethanol, such as Scientific South of Alabama. The consensus is that gasoline jobbers and retailers in several states have found that blending ethanol into gasoline is a sure way of making profit and beating their competition. Gasoline profit margins have become very thin, and the small retailers are being crushed by large companies in many areas, sources say. The situation can be retrieved by blending ethanol and using the state and federal tax incentives.

Some of the CCC contractors contacted by Alcohol Week are experiencing such booming demand that their own production capacity is insufficient and they are buying ethanol from other producers in order to keep their customers. They typically buy 190-proof ethanol from producers without anhydrous capability and upgrade it for use in gasoline blending.

The CCC contract arrangement is that the CCC will deliver the contractors off-grade corn (typically No. 4 and 5 grade) and the ethanol producers will process it for a fee per gallon of ethanol. They can keep the distillers grains byproduct. The ethanol is to be sold for the CCC on the open fuel market.

Ironically, Alvin Jenkins, who played a principal role in starting the idea of converting CCC surplus grains to fuel ethanol, did not get a CCC contract for his Baca Food & Fuel Cooperative of Campo, CO. He intends to follow up the CCC pilot project (2-million bushels) with a much bigger program under which all CCC surplus grains could be converted to fuel ethanol. Two congressional bills have the same aim. The pilot project contracts are "a tremendous good deal for the ones that got them," he said.

The CCC off-grade corn represents salvation for some producers. A source at one of them, Southeast Missouri Distillers Inc. of

Morehouse, MO, said he was down to his last $400. Since he couldn't afford to buy corn, he was about to go out of business when the CCC contract came in. Now he has 135,000 bushels of off-grade corn about to arrive, from which he will be able to make 310,500 gallons of anhydrous ethanol. "We will make a real good profit," he said. His fee to the CCC for processing the corn: 68.5¢ a gallon. The ethanol will be sold for $1.60–$1.62 per gallon f.o.b. The plant has a capicity of 800,000 gallons/year and has been in production, on and off, for some months. The plant was built for less than $200,000, out of used parts.

Midwest Solvents of Atchison, KS will receive a total of 260,000 bushels of corn (making 650,000 gallons of ethanol) under two contracts. The fee under one contract is 80.42¢ a gallon and under the other, 79.53¢ a gallon. The company has ethanol capacity of some 20-million gallons/year.

Midwest sees the CCC corn as a way of reducing its overall grain costs. Its fuel ethanol business "seems to be moving really fast," said a company source. "We moved two loads yesterday, two today, [and will move] three tomorrow, and two for each of the two following days," he said.

A good deal of the off-grade corn is stored in the Texas Panhandle, where it was placed in 1980 when President Carter imposed an embargo on exports of U.S. grains to the USSR. Three of the nine companies with CCC contracts are in that region: Charmec Energy Corp. of Muleshoe, TX; Longhorn Alcohol Fuels of Muleshoe; and Panhandle Ethanol Producers of Groom, TX.

Panhandle Ethanol Producers is currently getting into full production at 600,000 gallons/year anhydrous although it has been selling quite a bit of wet ethanol to stripper gas wells in the area. "They use it mainly as a dehydrator" for the wet natural gas, said a company source. "We are just beginning to open up markets for this area" in ethanol and DDG, he said. "We are not far from refineries, so we have a pretty good potential for developing markets." The company intends to sell more ethanol to the operators of the stripper gas wells at about $1.30 per gallon for 150-proof. Price of its anhydrous will be $1.70–1.75 f.o.b. the plant. DDG will be sold to surrounding feedlots and dairies.

Colorado Gasohol of Walsh, CO is producing an average of some 6,000 gallons/day anhydrous ethanol (about 1.92-million gallons/year), sold at $1.60 per gallon f.o.b. terminals in Pueblo, CO and Denver. Larger customers take the ethanol at the terminal; small customers buy at the plant.

"We are buying low-proof ethanol from wherever we can get it where it is economic," for upgrading to anhydrous, said a company source. The company is also buying anhydrous ethanol from other producers and marketing it for them.

"There is no problem at all in selling [ethanol] as long as you have it priced competitively with gasoline and give the marketer some profit incentive to market ethanol," said the source. "We are looking for additional sources of alcohol all the time to keep our markets going, and we have turned down customers," he said.

DDG sales to local feedlots are going very well, he went on. Customers "take all we can produce. We screen and press the distillers grains and deliver it with 60 percent moisture" twice a day to local feedlots, he said. Stillage water is concentrated and also marketed locally.

The plant has been running on milo, with some low-grade wheat. The CCC off-grade corn represents about a 220-day supply of feedstock. "If we can work it out with the CCC we intend to run to about mid-October on it and then start using locally produced milo until about March and then go back to the CCC corn," said the company official.

The main reason Colorado Gasohol went after the CCC corn is that grain supplies in the area are tight, the source said. The U.S. Department of Agriculture (of which the CCC is part) took much of the local grain off the market in its purchase program. "We are paying considerably above the elevator posted price for milo, and it is awfully hard to get," said the source. Nevertheless, local prices are seen as unlikely to rise to the "release" level at which the USDA will start selling its reserve grains.

DeBoer Bros. Renewable Energy has a 300,000 gallons/year plant at Smithfield, NE and is in process of doubling capacity. It is selling all the ethanol it can produce at $1.72 per gallon directly to some 20 local blenders and through a Williams Pipeline terminal at Hastings, NE. "There's no problem at all marketing" product, said a company source. DDG is all sold to local dairies. Corn and milo are plant feedstocks. The CCC corn will be processed for 55¢ a gallon.

The company went through "a period of pressure with the lowering of gasoline prices, but now we are seeing a recovery," said the source. Gasoline prices have risen and ethanol prices are lower than they have ever been, and ethanol represents an "extremely good decision" for the station owner as he struggles to make a profit.

Charmec Energy of Muleshoe, TX believes it can make a profit on its 69.5¢ a gallon fee (840,000 gallons). The company is determined to make the CCC pilot program work and "go the extra mile to make sure we do our job on time and deliver everything that we said we could," said a company source. "The program keeps a lot of our working capital out of the corn and into our overhead."

He thought the ethanol to be produced would have a positive effect on the ethanol market, rather than harming it, as some in the industry fear. "The Texas market has not taken off like the other states. One of the reasons is that there has not been a guaranteed supply [of ethanol] at reasonable cost," he said.

EXHIBIT No. 7

[From Alcohol Week, Sept. 13, 1982]

DDG is being used as a dough and flour conditioner for bakeries and doughnut shops in southern Idaho, being marketed by Protein Alpha Inc. of Twin Falls, ID. It is moving some 1,200 lb per month of brewers grains (very similar to DDG, said a company source) and DDG which it gets from small-scale ethanol production.

However, Protein Alpha's perception of DDG's great potential for uses in food preparation is being frustrated by lack of financing to build a combined ethanol plant and bakery in Twin Falls. It is still trying to find financing, including foreign funds.

The company source said local bakeries and doughnut shops are finding that Protein Alpha's DDG and brewers grains make dough rise faster and go further. "The doughnut shop gets 13 [doughnuts] out of what it used to get 12," said the source. The baker pays 51¢ a lb for his doughnut mix and extends it with DDG or brewers grains sold by Protein Alpha at 40¢ a lb. "He dilutes his costs and winds up with more product," the source said. Protein Alpha has found good acceptance for its product.

Company plans include a 125 gallons/day ethanol plant which would produce 1,000 lb of DDG per day. The anhydrous ethanol would be the byproduct and be sold at about $1.50 per gallon, the source said. The ethanol's low price would be possible because the main product line would be the DDG. "Most flours don't meet minimum nutritional requirements," said the source. "So you have to buy protein supplements—they are really at a premium—or add some kind of nutritional additive like gluten. Gluten is about 90¢ a lb." Protein Alpha believes it could make protein supplement DDG for 18¢ per lb.

"A lot of people in the food industry are looking at DDG," he went on. "Coors [the brewer] is selling its brewers grains for food." Protein Alpha hopes to offer testing services to large-scale food companies which could try out their recipes at the proposed DDG plant. "It's a good idea but it needs money," said the source.

EXHIBIT No. 8

THE GROWTH AND CAPABILITIES OF THE U.S. ETHANOL INDUSTRY

(By Frederick L. Potter)

Although the general public, the press and even the majority of Congress has probably forgotten about fuel ethanol, or "gasohol" as the ethanol-gasoline blend was termed back in 1979 when the U.S. faced its most recent shortfall in crude oil and petroleum products; the fuel ethanol industry has experienced a rate of growth since 1979 which has been nothing short of remarkable. Over the past two years, a period characterized by less government emphasis on alternative fuels, an economic growth rate which can only be measured as stagnant, and a softening in real crude oil prices (led by a recession-induced reduction in demand), the fuel ethanol industry has increased its sales derived from domestic producers by five-fold. The ethanol industry has also increased its capacity to produce fuel grade product to over 600 million anhydrous gallons per year.

During the spring of this year, sales of ethanol enhanced motor fuels (formerly termed "gasohol"), achieved over 1% of total U.S. gasoline sales. Market penetration levels have increased markedly over the past few months, and I expect that between 1.5 and 2.0 billion gallons of ethanol enhanced product will be sold in the U.S. gasoline market in 1982. Market penetration levels of ethanol blends should equal 2% by early next year—a market penetration which compares to the highly publicized transformation occurring in the long distance telecommunications industry. Ethanol enhanced motor fuels may reach a three percent market penetration level by the last quarter of 1983.

INDUSTRY CAPABILITIES

Responding to the demand from U.S. motorists regarding higher octane-high performance gasolines (See Appendix B), the domestic ethanol industry has increased its capacity to produce fuel grade product by 500% since 1979. According to the results of a six-month-long U.S. fermentation ethanol market survey recently completed by our company, (See Appendix C) the U.S. fermentation ethanol industry will have the capability of producing over 600 million gallons of fuel grade ethanol annually by Janury, 1983.

Accordingly, if the ethanol industry were running at full capacity, it would have the capability of utilizing 255 million bushels of

grain annually (See Appendix C). As of January 1, 1983, the surplus fermentation ethanol production capacity in the U.S. will represent an incremental grain utilization capability of 160 million bushels. Excess operating capacity is expected to diminish during 1983, but certainly a figure of 80 to 100 million bushels of utilization capability can be safely determined as "available" for surplus grain.

The 600 million gallon production capacity figure includes all facilities which have been built in the United States and are capable of processing fuel grade ethanol. At this time, nearly 100 million gallons of production capacity lies idle either for lack of a market or due to financial or technical problems. Given the proper signals, this production capacity could be brought back on line in a short period of time.

Today, there are over 100 fermentation ethanol facilities existing in the United States. These facilities vary in size from facilities having less than 500,000 annual gallons of production capacity to several facilities capable of processing more than 50 million gallons per year. Thirty-one states now are able to claim ethanol processing capabilities. The bulk of the production capacity is located in the midwestern part of the United States—concentrated primarily in the central midwest (Illinois, Iowa, Nebraska, Kansas and Ohio) where the largest production facilities operate. The upper midwest, including Michigan, Wisconsin, Minnesota; and the south west, including Texas, New Mexico and Oklahoma also represent substantial regional production capabilities. Californiia, Colorado and Washington hold the largest production capabilities in the west. Kentucky, Virginia, Maryland and Georgia possess the greatest production capabilities in the east. Information Resources will be willing to provide the subcommittee staff with detailed size and location analysis if it so desires.

NEW PRODUCTION CAPACITY

In 1980, applications to the varying Department of Energy (DOE) and Department of Agriculture (USDA) alcohol fuel feasibility and loan guarantee programs represented well over two billion gallons of fuel grade ethanol production potential. Today, nearly 400 million gallons of conditional loan guarantees commitments still rest at DOE. New Energy Corporation of Indiana, a 52.5 million gallon per year facility, is the closest to completing its financing package and beginning construction. Ethanol production is scheduled to begin in 1985. It is reasonable to assume that several large scale DOE projects might follow New Energy. These facilities would begin production in late 1985 or early 1986 depending on their size and the date they would be able to close financing and begin construction.

A great deal of additional U.S. ethanol production capacity potential also exists through the B & I program at USDA. A few projects have recently been closed and several are now in their final negotiation stages with USDA. By the end of 1983, one could expect between 50 and 100 million additional gallons of conditional production commitments to have been issued by USDA. Production from these facilities would begin in 1984 and 1985.

CONCLUSION

In summary, it is clear that the fermentation ethanol industry has experienced a remarkable rate of growth since its inception in 1979. Sales and production capacity have increased by over 500%. The ethanol industry currently has the capability to meet the commercial demand for its product and also utilize government held surplus grains to meet the fill requirements of a Strategic Alcohol Fuel Reserve. The ability of the ethanol industry to continue to meet each demand simultaneously in the future will depend on the outcome of the government loan guarantees currently under negotiation, the commercial demand for ethanol, and the established fill rate requirements of the Strategic Alcohol Fuel Reserve.

APPENDIX C.—U.S. ETHANOL PRODUCTION CAPACITY, JANUARY 1, 1983

	Number	GPY
Total:		
Anhydrous	81	599,230,000
Fermentation	104	649,815,000
Excess Anhydrous	36	28,000,000
Over 500,000 (GPY)	78	598,110,000
Under 500,000 (GPY)	24	5,605,000
Producing:

[From the Wall Street Journal, Sept. 7, 1982]

NEW APPROACH IS INCREASING GASOHOL SALES

(By Jeffrey H. Birnbaum)

WASHINGTON.—Remember gasohol? A couple of years ago, the grain-alcohol gasoline mixture was hailed as a home-grown way to stretch gas supplies and break U.S. dependence on Arab oil. But when petroleum supplies grew and gasoline prices fell, gasohol was widely dismissed as a failure.

Don't believe it. In the Midwest and West, gasohol has been selling well, partly because it isn't called gasohol anymore. "The word gasohol just got to connote something inferior," says John Livengood, vice president, chemicals, of Publicker Industries Inc., Greenwich, Conn.

Marketers have dropped the patriotic sales pitch and are promoting the 90-percent gasoline-10-percent alcohol concoction as a cheap way to increase fuel octane, or power, without lead. Its new name: Super unleaded with ethanol. "Ethanol sounds like a fuel that will run my car real well," says Tom Pearson, an analyst for the Iowa Development Commission.

SALES DOUBLE

Growing numbers of motorists apparently agree. While gasohol is still a small part of the gasoline market, trade reports show that gasohol sales, under any name, have nearly doubled since last year. "The truth is, the ethanol industry is alive and growing," says Daniel Greer, a divisional vice president of Ashland Oil Co., which markets gasohol. The industry has been revived by a combination of falling prices of corn, from which ethanol is distilled; federal and state tax incentives, and studious avoidance of the blemished name.

Critics doubt the growth will continue. They say gasohol can only compete in the 32 states that exempt it from some taxes. (It also gets a federal tax exemption.) The state exemptions, which range from one cent to nine cents a gallon, are scheduled to expire during the next several years. In addition, many motorists still fear that gasohol might damage their engines.

The early proliferation of scams involving questionable tax shelters and schemes that defrauded investors also scarred the industry's reputation. "I won't say that's entirely over," concedes David Halberg, president of the Renewable Fuels Association, a trade group here. "But, in general, only the most capable and committed people are still in the business. The industry has been the victim of some claims that were blown out of proportion," he says.

REAGAN'S OPPOSITION

One of gasohol's frequent critics is President Reagan, a fact that has repelled several potential investors. The president's effort to rescind gasohol's tax break was rebuffed by Congress this year, but he hasn't given up. Last month, Mr. Reagan said, "you actually use more energy than you get back in the ethanol that you produce"—an accusation industry spokesmen deny.

Federal credits are essential to gasohol's survival. The federal government exempts gasohol from its four-cent-a-gallon tax on gasoline. Because each gallon of gasohol is one-tenth ethanol, the tax break amounts to a 40-cents-a-gallon subsidy on the ethanol. All that and more is needed, however, to place gasohol near parity with unleaded gasoline, which costs about $1 a gallon at the refinery. "The dependence on subsidies clouds any future decision" about building grain-alcohol plants, says Mr. Livengood of Publicker, a major maker of petroleum-based ethanol for industrial uses and part-owner of a corn-ethanol plant.

In the meantime, ethanol producers are riding high in a small but profitable industry. Alcohol Week, a trade publication, says gasohol sales in 26 states rose 111% in the first five months of 1982 from the year-earlier period. The Renewable Fuels Association says fuel-ethanol production capacity will reach 600 million gallons next year, six times the 1981 capacity and one-third more than currently.

One spur to this growth has been the long-depressed price of corn, an important raw material in ethanol. Thanks to a record harvest last year, and the expectation of a second record crop this year, corn prices have fallen about 20% in the last 12 months, reducing the cost of its byproducts as well. In July 1981, ethanol sold for $1.80 a gallon; today it is closer to $1.65 a gallon.

Farmers are eager to sell more corn, and some see gasohol as a promising outlet. So does the U.S. government, which is likely to be gutted with more than 300 million bushels of corn by Oct. 1. Private analysts estimate that the stocks of U.S.-owned corn may grow to 400 million bushels by Oct. 1, 1983.

Farm Belt congressmen are considering several ways to encourage corn sales for ethanol production. This summer Congress ordered the administration to study the need for a strategic Alcohol Fuel Reserve, an ethanol-based brother of the Strategic Petroleum Reserve, which is designed for use if foreign sources of energy are cut off. Some lawmakers also say the U.S. should contract

with private ethanol makers to convert U.S.-owned corn into gasohol to power federal vehicles. The lawmakers reason that this would create jobs and save the U.S. warehousing costs.

Gasohol also will be helped by the Enviromental Protection Agency's plan to continue existing limits on the use of lead in gasoline, despite White House pressure to lower them. Ethanol can be added to gasoline as a substitute for lead, which health experts say is a dangerous pollutant.

In Iowa, the nation's largest corn-growing state, a lot of gasohol is sold, even though a state tax break has been trimmed. Gasohol sales in Iowa grew to 43.9 million gallons in April from 15 million gallons in September 1981. On May 1, gasohol's excise tax exemption was reduced by two cents to a nickel a gallon, but sales in the month declined only slightly to 42 million gallons. "The market isn't expanding at the rate it was, but it will maintain a high market penetration," says the development commission's Mr. Pearson.

Some of the big names in the oil business and on Wall Street continue to bet that ethanol will have a place in gasoline; Texaco Inc. and Ashland own interests in ethanol plants. E.F. Hutton and First Boston Corp. are selling limited partnerships in a South Bend, Ind., ethanol plant called New Energy Co. of Indiana. "The ethanol industry can take a licking and keep on ticking," says, Strud Nash, Hutton's vice president, biomass fuels.

EXHIBIT No. 10

STATE DEPARTMENT TELEGRAM ON BRAZILIAN ETHANOL PROGRAM

From: American Embassy, Brazil.

To: State Department, Washington.

1. Brazil is expected to produce about 5 billion liters of alcohol from the 1982/83 sugar harvest. Production during Calendar Year 1982 should be about 4.6 billion liters vs. 4.3 billion liters last year. The target of producing 10.7 billion liters seems to have been pushed back from 1985 to 1987/88 and officials now talk of 8-9 billion liters as being a realistic production goal for 1985. Existing alcohol stocks were reportedly 1.5 billion liters at mid-year, a figure near Brazil's probable storage capacity. Brazil expects to export about 200 million liters during 1982, compared to 133 million liters last year. This figure may be rather high considering the currently depressed oil market.

2. The popularity of all-alcohol cars and light trucks has been very erratic but incentives introduced earlier this year have boosted sales from about 3800 last January to about 21,000 in August. Sales for the year are expected to reach 200,000, about 30 percent of total domestic sales, compared to 128,000 sold last year. By the end of this year it is estimated that Brazil will have an alcohol vehicle fleet of about one million, including 580,000 with original alcohol engines and a possible 400,000 with often illegally converted engines. The average mix of alcohol with gasoline is about 14 percent with regional variations.●

● Mr. McCLURE. Mr. President, I wish to ask the distinguished chairman of the Agriculture Committee for a clarification of certain words in the House-passed bill (H.R. 6142). Section 423(a)(1) would authorize the Commodity Credit Corporation to make liquid fuels produced from stocks of agriculture commodities available to Federal agencies, and I quote, "to help meet the needs of such agencies for transportation and industrial fuels and to be stored for emergency uses." My question goes to the question of emergency uses. Would these emergency uses be confined to those of Federal agencies?

Mr. HELMS. That is correct. The fuels could be stored by Federal agencies for their emergency uses.

Mr. McCLURE. Am I also correct that there is no intent at this time to authorize the establishment of an alcohol fuel reserve for use by the private sector in the event of an emergency? The Energy Emergency Preparedness Act of 1982 provided for a study of such an alcohol fuel reserve by the administration with recommendations to the Congress early next year.

Mr. HELMS. That is correct. While this provision only addresses storage by Federal agencies for their emergency uses, I am looking forward reviewing the administration's recommendations on this subject next year.●

Mr. DIXON. Mr. President, I rise in support of H.R. 6142, the Surplus Agriculture Commodities Disposal Act of 1982. This is a companion to S. 2554 which my colleague from Illinois, Senator PERCY, and I introduced on May 20.

This proposal would allow the U.S. Department of Agriculture to dispose of surplus stocks of grain at a substantial savings to the Government. This measure will convert Commodity Credit Corporation-owned grain stocks into alcohol fuels to meet Federal and private fuel demand, as long as the process does not unduly disrupt prices in the alcohol fuel market. H.R. 6142 also reaffirms our commitment to the alcohol fuels industry.

This proposal would result in significant savings to the Government. According to the USDA, it now costs the CCC at least $1.72 per bushel in interest, storage, transportation, and handling costs for surplus grain held for 2 years. These figures do not take into consideration the amount of loss associated with the deterioration in the quality of the grain held by the USDA.

The outlook for the agricultural economy is bleak. Estimates for net farm income are at the lowest level since the Great Depression. In 1981, for the first time in a decade, the value of agricultural exports declined. The amount of stock held by the CCC and in the farmer's held reserve continues to increase and with the prospect of an 8.3-billion-bushel corn crop this year, this amount will continue to become larger.

This proposal creates a new demand for these stocks at a savings to the Government.

Mr. HUDDLESTON. Mr. President, I am pleased to support H.R. 6142. A companion bill, S. 2554, the Surplus Agricultural Commodities Disposal Act of 1982, was introduced by a bipartisan group of Senators including myself.

This bill directs the Secretary of Agriculture, to the extent possible, to establish a contract procedure that will result in the processing of certain surplus commodities into liquid fuel. The fuel, under the bill, would be used primarily to meet the needs of Government agencies.

This bill will assist in reducing the record carryover of grain while lessening our dependence on imported oil. In addition, this bill should reduce farm program costs and aid the depressed farm economy.

I urge passage of this bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on third reading and passage of the bill.

The bill (H.R. 6142) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FINANCIAL ASSISTANCE FOR THE WOLF TRAP FOUNDATION

Mr. STEVENS. Mr. President, I would like to inquire of the distinguished minority leader if we can proceed with Calendar Order No. 831, the bill pertaining to Wolf Trap.

Mr. ROBERT C. BYRD. Mr. President, I am having problems right now with that measure.

Mr. STEVENS. I will withhold that request, Mr. President.

UNIFORM SCIENCE AND TECHNOLOGY RESEARCH AND DEVELOPMENT UTILIZATION ACT

Mr. STEVENS. Mr. President, may I inquire of the distinguished minority leader, if it is possible to agree to request that the Senate now turn to the consideration of Calendar Order No. 541, S. 1657, a bill entitled the Uniform Science and Technology Research and Development Utilization Act. This is known as the patent bill.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I believe the Senator from Louisiana wishes to make a comment.

Mr. LONG. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. STEVENS. Mr. President, that request was made in behalf of the distinguished Senator from New Mexico. Perhaps we can pursue that one further this evening also.

Mr. LONG. Mr. President, I would like to be notified in the event that request is made at a later time this evening.

Mr. STEVENS. Mr. President, I assure the Senator from Louisiana of that.

Mr. President, while we are clearing some matters, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SCHMITT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHMITT. Mr. President, although the Senator from Louisiana, my distinguished friend, has objected to the consideration of S. 1657 at this point, I hope that consideration of this important legislation can be scheduled for the necessary debate and amendment in a period soon after we return in November.

This Nation is experiencing a critical economic malaise:

American productivity is increasing at its slowest rate since World War II—more slowly than that of any of the major industrialized countries.

Our leadership in the conduct and commercialization of science and technology is being challenged aggressively and with increasing success by our economic competitors.

Our investment in research and development has failed to increase in constant dollars in the past 10 years.

The percentage of U.S. patents issued to foreign inventors has almost doubled, from 22 percent in 1965 to 40 percent in 1981.

The total number of U.S. patents issued in 1981 is less than the number issued 10 years ago.

There are many reasons for this malaise and they include counterproductive tax policies, inadequate funding of basic research, overburdensome regulations, and shortcomings in scientific and technical training and education. My Subcommittee on Science, Technology, and Space has conducted extensive oversight hearings on Federal policies and programs for research and development and on the Federal Government's role in promoting the development, application and diffusion of new technologies.

One of our major findings has been the inability of this Nation to adequately capitalize on our enormous Federal investment in research and development. This research and development, in turn, is increasingly important as our critical edge in national security, economic competitiveness and general welfare.

Mr. President, the Federal Government invests annually in research and development, almost $40 billion, nearly half of the national total. Our findings reveal that, unfortunately, the new goods and services which result from this Federal investment are far fewer than from the private research and development effort. An important factor we found that inhibits the commercial utilization of federally sponsored research and development is the Federal Government's policy toward patents arising from this work. The policy of Federal agencies has generally been that title to a contractor's invention made under a Federal grant or contract belongs to the Government. Ownership of thousands of inventions has been acquired by the Federal Government in this manner.

The commercialization of an invention is a risk-laden and expensive enterprise. Hearings before our subcommittee revealed that for every dollar spent on research, usually 10 or more dollars are necessary to develop the research result into a product or service, which may or may not prove to be commercially successful. There are many factors which determine this success. Two of the most important though are: A proprietary position to justify the sizable investment of risk capital; and the involvement of the inventor in the development of the invention into a usable product.

Penicillin offers an excellent illustration of the importance of a proprietary position. The inventor of this wonder drug chose to publish his discovery to make it freely available to all humanity. The act of publishing automatically placed that product in the public domain, preventing anyone from obtaining a proprietary position on his discovery. The good intentions of the inventor were thwarted since no one would invest the large sums necessary to develop his discovery into a marketable product without having patent protection on that product. It was not until some 11 years later that the U.S. Government, faced with the compelling medical exigencies of World War II, undertook the development of penicillin itself.

It is with the same good intentions that the Federal Government has been trying through the confusing web of existing policies to aid the citizens of this Nation. These good intentions are being thwarted by our failure to understand how the patent system can best be used to benefit society. The lesson of penicillin's development should not be lost: The public cannot benefit from the discoveries of research and development if there are inadequate incentives to develop these discoveries into useful goods and services.

Perhaps the most thorough study ever conducted on the issue of Government patents was the Harbridge House report, completed in 1968. The report was commissioned by the Federal Council for Science and Technology in the Executive Office of the President. Among the findings included in the report:

> If the results of federally sponsored R & D do not reach the consumer in the form of tangible benefits, the government has not completed its job and has not been a good steward of the taxpayers' money. The right to exclude others conferred by a patent, or an exclusive license under a patent, may be the only incentive great enough to induce the investment needed for development and marketing or products. Such commercialization of the results of government-sponsored research insures that the public receives benefits in the way of more products, more jobs and a better quality of life. Therefore all the members of this subcommittee recommend transferring the patent rights on the results of government-sponsored research to the private sector for commercialization.
>
> A low, overall commercial utilization rate of government-generated inventions has been achieved; that rate doubled, however, when contractors with commercial background positions were allowed to keep exclusive commercial rights to the inventions.

More recently, the Patent Advisory Subcommittee of the Domestic Policy Review on Industrial Innovation studied the implications of vesting title in the contractor. Testifying in 1978, the chairman of that subcommittee observed that:

> Our Committee concluded unanimously that if the government's goal is to increase the government-owned technology that is incorporated in products which actually get to the marketplace, then it must find a way to transfer the rights to this technology to people in the private sector in a sufficiently attractive form that it would induce members of the private sector to make the necessary additional investments required to commercialize the technology.

Mr. President, the American citizens deserve a better return on their investment in research and development. Toward this end, 37 of my colleagues and I have sponsored the Uniform Science and Technology Research and Development Utilization Act, S. 1657, to:

First, establish and maintain a uniform Federal policy applicable to the management and use of the results of federally-sponsored science and technology research and development to stimulate more widespread commercial utilization of those results for the public good;

Second, insure the effective uniform implementation of the provisions of this act, and to monitor on a continuous basis the impact of Federal Science and technology policies on innovation and technology development.

This bill grants contractors limited patent protection on discoveries they make in the course of federally-supported research, if they assume responsibility for commercialization. The contractor is required to: Disclose his invention; file for a patent within a reasonable time; and report his efforts toward commercialization.

At the same time, the Government retains an irrevocable, nonexclusive, paidup license to make, use, and sell the invention for its own use. In addition, the Government has certain march-in rights to license an invention to a third party when the contractor's commercialization efforts are inadequate. March-in rights may also be exercised by the Government to alleviate serious health or safety needs, or to meet public use requirements specified by Federal regulations.

The bill provides further that Federal agencies may take title to an invention on a case-by-case basis if: It is deemed necessary by the agency to protect national security interests; or the contractor is not located in the United States; or it is necessary to implement an international agreement.

We believe that uniform Federal policy established in S. 1657 will go a long way toward significantly increasing the socially responsible transfer of federally sponsored science and technology into more competitive goods and services. This bill will:

Provide the certainty and incentive necessary for the contractor to assume the risks of commercialization of the results of federally sponsored research and development;

Facilitate the participation of the inventor in the development of commercially useful goods and services; and

Assure the safeguards necessary to protect the public interest.

This initiative has been endorsed by the administration, large and small businesses and the universities. Organizations such as the National Association of Manufacturers, Intellectual Property Owners, Society of University Patent Administrators, Licensing Executive Society, and others have endorsed S. 1657. These groups condemn the dismal record of product development generated under past policy and point to the more successful record established when that policy is reversed.

The policy of the Department of Health, Education and Welfare (HEW) since its formation, was to retain exclusive rights within the Department to any invention developed in the course of a Federal contract. In the period 1962–65, more than 600 inventions were reported to HEW and in only one instance were rights assigned to the contractor. As a result, grant-supported investigators experienced great difficulty getting potentially useful drug innovations tested and screened by the pharmaceutical industry. The industry was reluctant to spend money on product testing without having a proprietary position since the Government retained title to the inventions. In 1968, a General Accounting Office report drew attention to this problem and the Department of Health, Education and Welfare subsequently initiated a waiver policy whereby the contractor could assume title to his invention if he also assumed the responsibility for its commercialization. The Government retained a royalty-free license for its own use.

After adoption of that policy, more than 50 federally supported pharmaceutical and life science innovations reached the marketplace in the 1969–74 period. The associated private capital investment has been estimated at more than $80 million.

Another example of the problems which S. 1657 is intended to correct is in the Department of Energy. The policy of the Department is to retain title to inventions which result from the Department's grants and contracts. Contractors are vested with nonexclusive licenses to their inventions but may request title on a case-by-case basis. However, experience shows that approval of such a request can take a year or more while DOE's staff of some 60 patent attorneys decide whether title is best left with the Government.

S. 1657 would allow the contractor to keep title to a subject invention provided he assumes responsibility for its commercialization. The rights would reside, not with the Government which licenses less than 5 percent of the inventions which it owns, but with the contractors, which have a licensing rate in excess of 20 percent.

Mr. President, the debate over Federal patent policy has been carried on for more than 20 years. As we look to the past, we see that the Federal bureaucracy has not been a successful manager of patents. The Government does not have the incentive, the risk captial, or the technical expertise to devote to patent management and development. This responsibility is best left with the contractor, whose record is much more compelling. S. 1657 is a reasonable proposal which will enhance both technological innovation and productivity by assuring Federal policies which encourage commercialization of the results of our $40 billion Federal investment in research and development. I urge your support for this measure.

Mr. STEVENS. Mr. President, while we await other clearances, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SALE OF CERTAIN DEFENSE ITEMS TO FRIENDLY FOREIGN NATIONS

Mr. STEVENS. Mr. President, I now ask unanimous consent that the Senate proceed to the consideration of Calendar No. 856, H.R. 6758, which was set aside earlier.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6758) to authorize the sale of defense articles, defense services, and unclassified defense service publications to United States companies for incorporation into end items to be sold to friendly foreign countries.

The Senate proceeded to consider the bill.

Mr. PERCY. Mr. President, H.R. 6758 as amended provides authority for the U.S. Government to sell defense articles produced in U.S. Government plants to U.S. companies for incorporation into end items to be sold to friendly countries.

At the request of Senator GLENN, the General Accounting Office provided the committee with an analysis of H.R. 6758 as reported by the House and made several recommendations for modifications. These modifications were incorporated in a bill introduced by Senator HEINZ and were subsequently adopted by the committee as an amendment to H.R. 6758. As far as I know, there is no opposition to H.R. 6758 as amended.

There are several small technical amendments to H.R. 6758 as amended that should be adopted on the floor. All of these amendments are included on page 5 of the bill.

UP AMENDMENT NO. 1405

Mr. STEVENS. I renew my motion that the Percy amendment to the committee substitute be adopted.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. PERCY, proposes an unprinted amendment numbered 1405.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 11, strike "supplies" and insert in lieu thereof, "supplied";

On page 4, line 22, strike "(d)", and insert in lieu thereof "Section 2.";

On page 5, line 1, strike "(e)" and insert in lieu thereof, "Section 3.".

The amendment (UP No. 1405) was agreed to.

Mr. STEVENS. Mr. President, I ask that the committee substitute as amended by the Percy amendment be adopted.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read "An Act to authorize the sale of defense articles to United States companies for incorporation into end items to be sold to friendly foreign countries.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. The Senator from Pennsylvania thanks all Senators, Senator METZENBAUM, Senator PROXMIRE, and our distinguished leadership, Senator STEVENS and Senator BYRD, for expediting the passage of this bill.

HOUSE CONCURRENT RESOLUTION 364—RESTORATION OF RECORDS OF JIM THORPE

Mr. STEVENS. Mr. President, I now ask unanimous consent that the Committee on Commerce be discharged from consideration of House Concurrent Resolution 364, a resolution relating to Jim Thorpe, and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. There is no objection.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 364) recognizing Jim Thorpe's achievements.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. LONG. Mr. President, may we have an explanation of that measure?

Mr. STEVENS. Mr. President, this is a concurrent resolution restoring the Olympic records to the late James "Jim" Thorpe.

The Amateur Athletic Union in 1974 restored the amateur status of Jim Thorpe for the years 1909 through 1912, and this resolution pertains to the medals that he was denied.

● Mr. NICKLES. Mr. President, as a member of the Board of the Jim Thorpe Foundation, along with my friends and distinguished colleagues Senators RANDOLPH and BRADLEY, I rise in support of House Concurrent Resolution 364 and urge its immediate adoption.

When Oklahoma Jim Thorpe competed in the 1912 Olympics held in Sweden, the entire world marveled at his athletic prowess and he instantly became a symbol of inspiration to aspiring young athletes around the globle. Jim Thorpe was proclaimed the "greatest athlete in the world" by the King of Sweden after he attained 8,142 of a possible 10,000 points in five Pentathlon events.

Only months later, Jim Thorpe was stripped of his Olympic medals when it was learned that he had played semiprofessional baseball during the summers while he was attending Carlisle Indian School in Carlisle, Pa. This terminated his amateur status and thus disqualified him from his Olympic medals.

In 1975, the U.S. Amateur Athletic Union and the U.S. Olympic Committee ruled incorrect the allegations against Thorpe. Yet Jim Thorpe was never recognized for this subsequently in sports organizations.

Finally, Mr. President, Jim Thorpe may have his Olympic honors reinstated through the enactment of House Concurrent Resolution 364 which is to be considered by the Senate today. The resolution expresses the sense of the Congress that the International Olympic Committee should officially recognize Jim Thorpe's achievements in the 1912 Olympics and that it be requested to present those medals and awards during the 1984 Olypmic in Los Angeles, Calf.

This measure recently passed in the House of Representatives and I urge its expedient enactment by this body so that justice, so long overdue, can be attained for the family, the friends and all those who were inspired by Jim Thorpe.●

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 364) was agreed to.

CONVEYANCE OF CERTAIN LANDS IN ALASKA

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate turn to consideration of Calendar No. 822, which is H.R. 1281, a bill to convey title of land in Alaska to Bob Curtis. It is a bill that has been passed by the House.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object——

Mr. METZENBAUM. Mr. President, I do not intend to object, but I wish to be heard briefly in connection with the matter.

The PRESIDING OFFICER. Is there objection to proceeding with the consideration of the bill?

Mr. STEVENS. Mr. President, I understood the Senator to say he did not wish to object; he wished to be heard.

Mr. METZENBAUM. The Senator is correct.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1281) to provide for the conveyance of certain lands in Alaska comprising trade and trade manufacturing site A-056802 without regard to the 80-rod limitation provided by existing law.

The Senate proceeded to the consideration of the bill.

● Mr. MURKOWSKI. Mr. President, I am pleased to be able to move on H.R. 1231. The bill would convey 6 acres of land in a remote part of Alaska to Bob Curtis. Mr. Curtis applied for the land under the trade and manufacturing provisions of the Homestead Act. He made his application in 1967. Since that time he has been working through the administrative process in an attempt to get this property. However, it was determined that his property exceeded the 80-rod shoreline limitation established in the Homestead Act. His property is located on a narrow peninsula between two huge lakes.

The Department of the Interior and the House of Representatives determined that Mr. Curtis' case had merit and should not be precluded from obtaining his full entitlement. However, the only way to accomplish this is by passing H.R. 1281.

The bill provides that Mr. Curtis will pay the 1967 value of the 6 acres in question. Let me assure my colleagues in the Senate and on the Committee on Energy and Natural Resources that this is a unique case. Rather than charging him the current fair market value the Energy Committee accepted the House language. It is my opinion we should not make an individual pay for trying to work within the system as did Mr. Curtis for 15 years. We should not see this as a precedent for future legislation; rather, a unique bill for a unique problem.●

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I discussed this matter with Senator MURKOWSKI earlier. The matter involves a very modest amount of land and not a significant amount of dollars. There is a precedent, however, where the land sold by the Government to the individual is to be determined on the basis of a time set somewhat approximately 10 years prior to the time that the sale will be made.

It is my strong feeling that when Federal properties are sold, they ought to be sold at fair market value, fair market value being that value at the time the sale is made.

Senator MURKOWSKI has made a strong case that there are unusual circumstances pertaining to this particular situation, and in his statement I

know he has already addressed himself to that very fact. In view of that, I have withdrawn the objection I had indicated I had at an earlier point to this legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1281) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I would like to inquire of my good friend from West Virginia if he would now agree that we might go into executive session.

I should like to make a motion that the Senate go into executive session for the purpose of considering the following nominations: U.S. International Development Cooperation Agency, Peace Corps, Federal Communications Commission, Department of Education on pages 6 and 7, National Council on the Handicapped on pages 8, 9, and 10, Equal Employment Opportunity Commission on page 9, National Mediation Board on page 9, National Commission on Libraries and Information Science on page 10, Export-Import Bank of the United States on page 10, National Corporation for Housing Partnerships on page 10, Commodity Futures Trading Commission on page 11, and National Council on the Humanities on page 11.

Mr. ROBERT C. BYRD. Mr. President, we have no objection, and I hope the Senator will request that the nominations be considered and confirmed en bloc.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar which I have just stated.

The PRESIDING OFFICER. The nominations will be stated.

Mr. NICKLES. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. NICKLES. Did that include the Legal Services Corporation?

Mr. STEVENS. No, it did not.

Mr. NICKLES. I thank the Senator.

The assistant legislative clerk proceeded to read the nominations.

Mr. STEVENS. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

U.S. International Development Cooperation Agency

Jay F. Morris, of Maryland, to be Deputy Administrator of the Agency for International Development, vice Jospeh C. Wheeler, resigned.

Peace Corps

Edward A. Curran, of Maryland, to be Deputy Director of the Peace Corps, vice Everett Alvarez, Jr.

Federal Communications Commission

Stephen A. Sharp, of Virginia, to be a Member of the Federal Communications Commission for a term of 7 years from July 1, 1982, vice Abbott Washburn, term expiring.

Department of Education

Gary L. Jones, of Virginia, to be Under Secretary of Education, vice William C. Clohan, Jr., resigned.

Harry M. Singleton, of the District of Columbia, to be Assistant Secretary for Civil Rights, Department of Education, vice Clarence Thomas.

Elizabeth Helms Adams, of California, to be a Member of the National Museum Service Board for a term expiring December 6, 1984, vice Mamie P. Clark, term expired.

Alice Wright Algood, of Tennessee, to be a Member of the National Museum Services Board for a term expiring December 6, 1984, vice Benjamin W. Hazard, term expired.

Anne Carroll Badham, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1984, vice Nancy Negley, term expired.

Fucheng Ricard Hsu, of New Jersey, to be a Member of the National Museum Service Board for a term expiring December 6, 1985, vice Albert T. Klyberg.

Craig C. Black, of Pennsylvania, to be a Member of the National Museum Services Board for a term expiring December 6, 1986, vice Raul A. Lopez, term expired.

Ann Duncan Haffner, of Virginia, to be a Member of the National Museum Services Board for a term expiring December 6, 1986, vice Lewis Davis, term expired.

Dorothy J. Tyson, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1986, vice E. Leland Webber, term expired.

Lawrence F. Davenport, of Virginia, to be Assistant Secretary for Elementary and Secondary Education, Department of Education, vice Vincent E. Reed, resigned.

Gary L. Bauer, of Virginia, to be Deputy Under Secretary for Planning and Budget, Department of Education, vice Gary L. Jones.

Charles L. Heatherly, of Virginia, to be Deputy Under Secretary for Management, Department of Education, vice Kent Lloyd, resigned.

National Council on the Handicapped

Robert V. Bush, of New Mexico, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982, vice Elizabeth Monroe Boggs.

Joseph Dusenbury, of South Carolina, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982, vice Mary P. Chambers.

Hunt Hamill, of Illinois, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982, vice Jack Genair Duncan.

Henry Viscardi, Jr., of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982, vice Thomas Joe.

H. Latham Breunig, of Virginia, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983, vice J. David Webb.

Miahael Marge, of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983, vice Howard A. Rusk,

Sandra Swift, Parrino, of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983, vice Judith E. Heumann.

Alvis Kent Waldrep, Jr., of Texas, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983, vice Donald E. Galvin.

Marian North Koonce, of California, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984, vice Odessa Komer, resigned.

Justin W. Dart, Jr., of Texas, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984, vice Edwin O. Ophiem.

John S. Erthein, of California, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984, vice Nelba R. Chavez.

Roxanne S. Vierra, of Colorado, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984, vice John P. Hourihan.

Robert V. Bush, of New Mexico, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985, reappointment.

Joseph Dusenbury, of South Carolina, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985, reappointment.

Hunt Hamill, of Illinois, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985, reappointment.

Henry Viscardi, Jr., of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985, reappointment.

Carmine R. Lavieri, of Connecticut, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983, vice Henry Williams.

Equal Employment Opportunity Commission

William Arthur Webb, of Pennsylvania, to be a Member of the Equal Employment Opportunity Commission for the term expiring July 1, 1987, vice J. Clay Smith, Jr., term expired.

National Mediation Board

Walter C. Wallace, of New York, to be a Member of the National Mediation Board for the term expiring July 1, 1984, vice George S. Ives, term expired.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

Elinor M. Hashim, of Connecticut, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1986, vice Robert W. Burns, Jr., term expired.

EXPORT-IMPORT BANK OF THE UNITED STATES

James Ernest Yonge, of Florida, to be a Member of the Board of Directors of the Export-Import Bank of the United States, vice Thibaut de Saint Phalle, resigned.

Rita M. Rodriguez, of Massachusetts, to be a Member of the Board of Directors of the Export-Import Bank of the United States, vice Donald Eugene Stingel, resigned.

NATIONAL CORPORATION FOR HOUSING PARTNERSHIPS

Alfred J. Fleischer, Sr., of Missouri, to be a Member of the Board of Directors of the National Corporation for Housing Partnerships for the term expiring October 27, 1982, vice Kennon V. Rothschild, term expired.

Alfred J. Fleischer, Sr., of Missouri, to be a Member of the board of Directors of the National Corporation for Housing Partnerships for the term expiring October 27, 1985, reappointment.

COMMODITY FUTURES TRADING COMMISSION

Fowler C. West, of Texas, to be Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1987, vice David Gay Gartner, term expired.

NATIONAL COUNCIL ON THE HUMANITIES

Jeffrey Hart, of New Hampshire, to be a Member of the National Council on the Humanities for a term expiring January 26, 1988, vice Jay Gordon Hall, term expired.

Mr. STEVENS. Mr. President, I ask unanimous consent that the vote en bloc by which the nominations were confirmed be reconsidered.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the distinguished Senator from West Virginia has a joint resolution which has been cleared on this side.

Mr. ROBERT C. BYRD. I thank the distinguished acting majority leader.

NATIONAL SPINAL CORD INJURY MONTH

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a joint resolution on behalf of Mr. KENNEDY and ask that it be stated.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 249) to provide for the designation of the month of October, 1982, as "National Spinal Cord Injury Month."

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of the joint resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President. I am pleased that the Senate is considering Senate Joint Resolution 249, designating the month of October 1982, as "National Spinal Cord Injury Month."

Over 500,000 Americans are now paralyzed because of spinal cord injuries. Each year an additional 20,000 Americans fall victim to this condition. The injuries can result from motor vehicle accidents, falls, sports, recreational activities, or from service in our Nation's Armed Forces.

The lifetime costs to sustain a person with a spinal cord injury are between $1 and $5 million. This represents a major and expensive medical problem for this country.

Despite its prevalence, the general public is virtually ignorant of the profond personal consequences and the staggering costs faced by the victims of spinal cord injury. Furthermore, the impact of spinal cord injury paralysis on the families of the victims is not commonly understood.

However, the picture need not be bleak. Research has begun to offer great promise in the area of spinal cord regeneration. Good rehabilitation efforts are demonstrating that early and proper intervention provides a reasonable hope of independence to a victim of spinal cord injury paralysis.

Until a cure for spinal cord injury paralysis can be found, it will continue to strike productive citizens in the prime of their lives. Each day, researchers seeking contributions and support will need to educate the public about the nature of spinal cord injury paralysis and the prospects for a cure. And each day, organizations like the National Spinal Cord Injury Association and the Paralyzed Veterans of America, committed to bringing together research and service will need resources, both economic and technical, to continue the delivery of quality health care to all spinal cord injured persons.

I proposed that we designate October of this year as National Spinal Cord Injury Month, to focus the attention of the public on the need to address this critical health care problem that touches the lives of millions of Americans. It can help to offer hope to the many people whose lives are drastically changed by spinal cord injuries. And it can provide the impetus to keep research going and to increase public support for programs to aid spinal cord injured victims and their families.

When I introduced Senate Joint Resolution 249, designating the month of October as National Spinal Cord Injury Month, I was joined by 26 original cosponsors; they are Senators HATCH, BUMPERS, BURDICK, CANNON, CHILES, CRANSTON, DECONCINI, DOLE, DURENBERGER, EXON, GORTON, HAWKINS, HEINZ, INOUYE, MATHIAS, METZENBAUM, MOYNIHAN, PELL, QUAYLE, RANDOLPH, RIEGLE, SARBANES, STAFFORD, TSONGAS, WEICKER, and LUGAR.

After Senate Joint Resolution 249 was introduced, the list of cosponsors expanded to include Senators BAUCUS, LAXALT, PERCY, THURMOND, NUNN, GLENN, BENTSEN, and HUDDLESTON.

Four of our friends and distinguished colleagues on the House side, Congressmen WALGREN, WAXMAN, and LELAND, and Congresswoman MIKULSKI have sponsored an identical resolution, House Joint Resolution 598, in the House.

Mr. HATCH. Mr. President, I am pleased to be a cosponsor of Senate Joint Resolution 249, designating the month of October 1982 as National Spinal Cord Injury Month. It is largely unknown by our citzens that more than 500,000 Americans are wholely or partly paralyzed from spinal cord injuries. And tragically, 20,000 more individuals fall victim to spinal cord injuries each year. The economic costs are staggering—it is estimated that between $1 and $5 million is required to sustain an individual with a spinal cord injury over the course of his or her lifetime. This obviously represents a significant amount of our Nation's overall health care expenditures. But the cost in dollars is far overshadowed by the emotional and personal costs exacted from the spinal cord injury victims and their families.

Nonetheless, there is now considerable hope through improved rehabilitation methods and ongoing research. I move adoption of this resolution.

The PRESIDING OFFICER. The question is on agreeing to the joint resolution.

The joint resolution was agreed to.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

Whereas spinal cord injuries now paralyze over 500,000 Americans;

Whereas there are 20,000 new spinal cord injuries per year;

Whereas most spinal cord injuries involve young people and are the result of motor vehicle accidents, sports and recreational activities, or of service in our Nation's Armed Forces;

Whereas lifetime costs to sustain a person with a spinal cord injury are between 1 and 5 million dollars, representing a major and expensive medical problem for this country;

Whereas research advances have permitted scientists to predict that we will be able to prevent and cure paralysis for hundreds of thousands of people;

Whereas the general public is unaware of the staggering costs and personal consequences of spinal cord injury; and

Whereas programs of the National Spinal Cord Injury Association, the Paralyzed Veterans of America and other similar organizations are dedicated to funding research and helping all paralyzed persons; and

Whereas an increase in the national awareness of the problem of spinal cord injuries may ease the burden of the victims and families of victims and may stimulate interest in increased research for the cure of spinal cord injury paralysis; Now, therefore be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That the month of October is designated as "National Spinal Cord Injury Month," and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate activities.

Mr. ROBERT C. BYRD. Mr. President, I move to consider the vote by which the joint resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The following proceedings occurred later:

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be considered as having been discharged of further consideration of Senate Joint Resolution 249, that the Senate be considered to have approved the proceeding to its immediate consideration, and that the action previously taken stand.

Mr. STEVENS. Mr. President, reserving the right to object—and I do not think I shall object—this is the resolution we previously cleared and approved, and I understand that this is the proper procedure to see that the committee is discharged.

Mr. THURMOND. We have no objection.

Mr. STEVENS. I thank the Senator from South Carolina.

Mr. ROBERT C. BYRD. I thank the Senator from South Carolina.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMERICAN PUBLIC TRANSIT ASSOCIATION

Mr. STEVENS. Mr. President, I send to the desk a resolution of behalf of the distinguished Senator from New York (Mr. D'AMATO), for himself and Mrs. HAWKINS, Mr. BRADY, Mr. HEINZ, Mr. ANDREWS, and Mr. DIXON.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 268) congratulating the American Public Transit Association.

Mr. STEVENS. I ask unanimous consent that the Senate proceed to the immediate consideration of the resolution.

There being no objection, the Senate proceeded to the consideration of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the joint resolution.

The joint resolution was agreed to.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 268

Whereas, public transit is recognized as a fundamental public service and is a vital component of the nation's transportation infrastructure;

Whereas, public transit service results in productive jobs for the nation's workers, mobility and commerce, and broad support for business and economic growth;

Whereas, the American Public Transit Association has acted to promote and advance knowledge in all matters relating to transit in America for the past 100 years;

Whereas, the American Public Transit Association has provided a Century of Service to America as the professional association representing the transit industry; Now therefore, be it

Resolved That the Congress of the United States congratulates the American Public Transit Association on a Century of Service to the transit industry on behalf of all Americans.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

[The following proceedings occurred after midnight.]

NATO

Mr. STEVENS. Mr. President, last Monday I wrote every Senator to explain my views on the need for specific congressional control over the size of our military forces permanently stationed in Europe. I asked for support of the Appropriations Committee's position as spelled out in the 1983 Defense appropriations bill that has been reported.

With the permission of the Senator from South Dakota (Mr. PRESSLER), I would like to include in the RECORD this response to my letter. Generally, it supports my position and the committee recommendation to limit our European troop level to the 331,700 that were stationed there at the beginning of fiscal year 1982—a level still 30,000 above the force size Congress endorsed during the Mansfield resolution debates in the mid-1970's.

Mr. President, I commend the Senator from South Dakota for his keen interest in national defense issues, and I recommend close attention to his views on the critical questions involving our NATO obligations.

The distinguished Senator from South Dakota goes considerably further in his view of the force level we should maintain—200,000 or a reduction of more than one-third of the current strength. I cannot agree that this is necessary at this time and under the military and political tempo we have today. I take the position that we must stop increasing our forces in Europe while our allies are letting their active military personnel actually decline in Central Europe.

I continue to support our commitments to NATO—but with the continuing insistence that our allies in Europe do more in their own defense. I reject arbitrary levels. I reject a steady, creeping growth in our military contribution without a clear policy guidance and specific approval from Congress. With our changing military commitments elsewhere in the world, we must constantly reassess our participation in NATO—not our commitment but our participation.

Mr. President, while I do not agree in every respect with the Senator from South Dakota, I think the nature of his views and those expressed to me by other Senators is significant. There is a growing sentiment in this body, as I see it, to take a hard look at the size of our military forces stationed in Europe, the need for it and the heavy drain on our economic resources that this commitment involves. The committee limitation, I think, is a good start.

Mr. President, I ask unanimous consent that the letter written to me by the Senator from South Dakota be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., September 28, 1982.
Hon. TED STEVENS,
Russell Senate Office Building,
Washington, D.C.

DEAR TED: Yesterday I received your letter asking for my support of the Appropriations Committee recommendation halting the unnecessary growth of U.S. defense forces stationed in Europe.

I am very pleased that the Committee has taken this important action. Since first entering the Senate in 1979, I have argued that the European NATO allies, and Japan, need to shoulder a larger share of the defense load. We do not have mutual defense when our prosperous allies fail to keep up with the U.S. effort to secure the lives, the territory, and the interests of Europe and Japan. In my view, the Appropriations Committee should be commended for recognizing the limits of U.S. generosity in attending to the needs of the NATO alliance. I especially applaud your own efforts in this regard as Chairman of the Defense Appropriations Subcommittee.

The limitation on U.S. troop strength in Europe as recommended by the Appropriations Committee is an important step in developing greater mutuality of effort in our common defense. I would go even further than the Committee and recommend reductions to the 200,000 troop strength level. A U.S. presence at that diminished level still would represent a major U.S. commitment that could not fail to be interpreted—by both our allies and the Warsaw Pact bloc—as a certain determination on our part to defend our allies from aggression.

The question of Japanese defense contributions also should be examined closely. It is my belief that significantly more effort must be made by our principal Asian ally, Japan, to secure the defense of northeast Asia. I realize that peculiarities of their domestic political environment make rapid changes toward much greater levels of defense spending problematical, but Japan can, and must, do much more. As a start, I would recommend that Japan assume all of the costs of stationing U.S. forces in Japan. Also, the suggestion that Japan construct naval equipment which would be given to the U.S. for our extensive Asian naval operations must be considered seriously.

Thus, I fully share your view that our prosperous allies must realize that, while we remain fully committed to our mutual defense effort, we no longer can absorb such a high proportion of the costs of our common conventional defense programs. Our strategic forces commitment, and the allied expectation that the U.S. will continue to play the role of superpower for the free world in regions beyond the allied territories, require that the allies assume a larger share of the burdens of defense.

I hope to continue to work closely with you during the next two years in advancing the principle of a greater sharing of the defense efforts of the free world.

Sincerely,

LARRY PRESSLER,
U.S. Senator.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, again I ask my distinguished friend if it is possible that we might turn to Calendar Order No. 875, which is H.R. 4001. It has been reported from the Select Committee on Indian Affairs with amendments but with no written report.

I temporarily withhold that.

PERISHABLE AGRICULTURAL COMMODITIES ACT AMENDMENT—H.R. 6865

Mr. STEVENS. Mr. President, may I ask if the Senator from West Virginia is prepared to proceed to the immediate consideration of H.R. 6865, the Perishable Agricultural Commodities Act, and to discharge the Agriculture Committee from that bill. It has been passed by the House of Representatives.

Mr. ROBERT C. BYRD. Yes, Mr. President, this side is ready to proceed.

Mr. STEVENS. Mr. President, I thank the Senator from West Virginia.

At this time I ask unanimous consent that the Agriculture Committee be discharged from further consideration of H.R. 6865, the Perishable Agricultural Commodities Act, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

Mr. LONG. Mr. President, reserving the right to object. Might we have an explanation of what that bill is?

Mr. STEVENS. Mr. President, I have a statement to be put in the RECORD on behalf of the distinguished Senator from Tennessee, the majority leader.

It is a bill that amends the Perishable Commodities Act by adding a proviso that any person who has violated the act may with the consent of the Secretary admit his violation and pay monetary penalties, and it also inserts a reference to a resident of the United States to whom the claim of a nonresident has been assigned.

The statement reads as follows:

STATEMENT OF SENATOR BAKER

H.R. 6865 would amend the PACA enforcement provisions to require the Secretary of Agriculture to permit any commission merchant, dealer, or broker who has violated the Act by misrepresenting by mark, stencil or label, to admit the violations, and if the violations are not repeated or flagrant, pay a monetary penalty. This amendment is intended to confirm existing authority of the Secretary of Agriculture to permit informal satisfaction of liability for any misrepresentation, and to make it clear that the Secretary of Agriculture will permit informal settlement of liability for misrepresentation violations relating to mark, label, and stencil if they are not repeated or flagrant.

Mr. LONG. Could the Senator tell us whether the committee recommended that bill be passed or not?

Mr. STEVENS. I can say that this has been cleared with the Agriculture Committee and has been cleared on both sides through our regular clearance procedures.

Mr. LONG. Does the Department have any objection to it?

Mr. STEVENS. Mr. President, I will have to inquire about that very pertinent question. It has been passed by the House of Representatives, and it has been unanimously brought before us on the basis that the Agriculture Committee has no objection to being discharged and having its consideration at this time so it will pass before the recess.

But I do not have the answer, and I ask that the bill be temporarily set aside until we get the answer to the Senator's question.

I ask that the bill be temporarily set aside until we get an answer to the Senator's question concerning the position of the administration on the passage of H.R. 6865.

The PRESIDING OFFICER. The bill has been discharged?

Mr. STEVENS. The bill has not been discharged. I just asked unanimous consent that it be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECLAMATION SAFETY OF DAMS ACTS OF 1978 AMENDMENT—S. 956

Mr. STEVENS. Mr. President, let me, and I do not wish to press my good friend from West Virginia, but I was requested if at all possible to clear the Wolf Trap bill. It has passed the House. We would like to proceed with it tonight if it is at all possible.

Is it possible that we might proceed with that bill without consideration of any other measure?

Mr. ROBERT C. BYRD. Mr. President, could the assistant majority leader assure me that upon the reconvening of the Senate, Calendar Order No. 771, S. 956, the reclamation dam safety bill will be called up and acted upon, with Mr. DECONCINI having an opportunity to offer an amendment thereto?

Mr. STEVENS. Mr. President, it is my understanding that there is a general agreement to accept an amendment of the type the Senator describes but not necessarily to that bill, and it was also my understanding there was a series of holds on the basic bill that that amendment was offered to concerning the reclamation dam safety bill.

I am not authorized to make a commitment with regard to that bill. I am authorized to make a commitment with regard to the amendment that the Senator had addressed himself to, I believe, to be offered by the distinguished Senator from Arizona.

Mr. LONG. Mr. President, I just suggest that this matter might be resolved by an agreement that on some significant measure we would accord the Senator from Arizona the opportunity to offer his amendment. It seems

to me that Mr. DECONCINI has a right to hold up legislation not relevant to his proposal provided that he wants to be assured his measure will be considered.

If we can be assured that on some measure of significance out of a committee of appropriate jurisdiction, he would have the opportunity to offer his amendment, it seems to me we could assure him that he would have the opportunity to have the Senate decide on his proposal.

Mr. McCLURE. Mr. President, I have indicated that on the issue that Senator DECONCINI was concerned about, we were willing to bring up the Safety of Dams Act and have his amendment offered to that and accepted on that bill tonight. We ran into a problem with getting this Safety of Dams Act cleared for action. That suddenly occurred. We are still trying to get it cleared up.

Just a few minutes ago I was assured I would have a call on that within the next 5 minutes as to whether or not we could clear it up.

I have said that only because I want to indicate we have done everything we can to get that matter cleared, and we have agreed to do precisely what Senator DECONCINI wanted us to do in that instance. I am still committed to getting the Safety of Dams Act passed. I understand Senator DECONCINI's concern and I see no reason why we would take different action later than we are willing to take tonight.

So I have no problem making the assurances to the Senator just as I have made it here this evening. We are ready to act on it.

Mr. ROBERT C. BYRD. Mr. President, if the Senate is ready to act——

Mr. STEVENS. I want to amend it to say the committee chairman is ready to act.

Mr. McCLURE. I am ready to act.

Mr. STEVENS. We understood there were holds on both sides of that bill. Perhaps the hold on the Senator from West Virginia's side has been removed.

Mr. McCLURE. Will the Senator yield, Mr. President? I thank the Senator for yielding. Mr. President, there were holds on this bill in one way or another from one source or another for the last 10 or 12 hours. I felt like I was a cross-eyed marksman in a shooting gallery trying to find something to shoot at.

We may yet be able to clear that this evening, but it is not yet cleared. I am certainly willing to make the assurances just as I have made them here this evening.

Mr. STEVENS. But the point is, Mr. President, if it is cleared tonight, the amendment which has been discussed of the Senator from Arizona would be accepted. If it would not be, there is an understanding on another piece of legislation if that amendment is offered, the distinguished Senator from Idaho has indicated his willingness to have it considered.

Mr. WARNER. Mr. President, I might add that a great number of Senators have released their holds, recognizing the importance of it.

Mr. ROBERT C. BYRD. Mr. President, would it be possible to add the Grand Canyon amendment to the Wolf Trap bill?

Mr. WARNER. Mr. President, the House is at this very moment considering the amendments I hope to submit in connection with this bill in hopes that we can make these two pieces of legislation come up so they can become law. I am just fearful it would not.

Mr. LONG. My understanding of this matter is that the administration does object to the DeConcini amendment. I can say as a former committee chairman that if you want to put that amendment on as a rider on a bill, you had better find a strong enough horse to carry that rider. The Wolf Trap bill is not that strong a horse. the Wolf Trap bill, as the Senator knows, involves Federal assistance of several million dollars to help rebuild something where the local people out there in Virginia and in the Washington area have worked very hard to raise as much as they can raise to help rebuild this building that burned down out there.

Now, that is not a significant, a sufficiently significant, horse to carry the DeConcini rider. All it will do is take them both down.

If you put it on a more significant bill, it might have a chance for the President to sign the bill notwithstanding the DeConcini rider.

Mr. WARNER. The Senator is correct.

Mr. STEVENS. Mr. President, I do think the matter ought to be resolved, and I again ask if it is possible to clear Calendar No. 831, H.R. 6875, without reference to the DeConcini rider.

Mr. ROBERT C. BYRD. Mr President, if any Senator on this side of the aisle wants me to protect him on a matter I will do my utmost to protect him. It is not a matter of my choice but it is a matter that I feel is an obligation upon me, and I just cannot give consent until I get some understanding that would be satisfactory to the Senator I am trying to protect.

Mr. STEVENS. Let me pass that, then.

EXCHANGE OF CERTAIN LANDS HELD IN TRUST BY THE UNITED STATES FOR THE NAVAJO TRIBE

Mr. STEVENS. Mr. President, let me go to H.R. 4001, Calendar No. 875, a bill dealing with the exchange of certain lands held in trust by the United States for the Navajo Tribe.

Mr. SCHMITT. Mr. President, for the edification of my colleagues, this is a land exchange between a private party and the Navajo Tribe. Both parties are willing, it is noncontroversial. It is a House bill which will become law as soon as presented.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I intend to object, it is now a quarter of 12, and if you want to consider cats and dogs, I feel very strongly that you can do it very well in November, just as well in November as in October, and I think it is time for us to clear out of here, and I object.

Mr. SCHMITT. Mr. President, I am sure the people involved in this, including the Navajo Tribe, do not appreciate their legislation being referred to as cats and dogs.

Mr. METZENBAUM. I certainly was not referring to the Indians as being cats and dogs. I referred to the fact that that is not a major matter.

Mr. STEVENS. Mr. President, will Senators please address the Chair?

Mr. SCHMITT. Mr. President, the Senator is referring to a matter that is of great moment to an individual family and to the Navajo people living near that family who wish to have this exchange take place. The Senator's reference that this was somehow or other less than of great moment I think would be resented by them, and it is certainly resented by this Senator.

Mr. METZENBAUM. Mr. President, when the continuing resolution was concluded or prior thereto, I advised the majority leader that I would object to taking up anything other than matters of major moment that had to be taken up this evening. I have sat by patiently while any number of measures have come up, and I have indicated to the staff at an earlier point that I would raise objections to a number of these measures that could very well hold over until November, could be delayed until that time.

I have no objection to the measure itself, and I certainly have no objection to the concerns of that individual or the Navajo Indians, and I would be the last to say that.

Mr. STEVENS. Then the Senator from Alaska is going to accommodate the Senator from Ohio and we will have a whole stack of things for him to object to to demonstrate how we have listened to the objections he has raised privately, and I can assure him we will be here for some period of time.

We have a series of items previously cleared, and I see no reason why we should not give the Senator from Ohio a chance to object if that is what he wants to do.

Mr. METZENBAUM. Mr. President, we have gone down and tried to keep pace with the matters being cleared. It

is my understanding we have finished a list of those matters that have been cleared, with the exception of the dam safety bill which was matter previously discussed.

I am not attempting to tell the leadership of this body how to conduct their affairs, but I do believe that there is a time and place for everything, and it seems to me there is an understanding that there would be no further rollcalls tonight, and if some matters of major moment have to be taken up, I can well understand that.

But if there is not, it seems to me it is time to bring the matter to a conclusion.

Mr. SCHMITT. Mr. President, if the Senator from Ohio is not trying to tell the leadership or the rest of this body what to do, I would like to know what he is trying to do. It sure sounds like it to me.

Mr. STEVENS. Mr. President, when the two bodies return, the House will have a period of time to act on some Senate measures. We had hoped to clear some items. For instance, I have an item here on S. 563, the Tribal-State Compact Act which was reported favorably by the Indian Affairs Committee. That is a Senate bill that could be awaiting the action of the House when we return.

There is another one, Calendar Order No. 863, the safe harbor leasing for certain aircraft. That bill, I understand, previously had been cleared.

We have a motion to discharge the committee on H.R. 7005, the Federal Seed Act, which has passed the House and could become law before the Congress resumes.

We have Calendar Order No. 872, a bill that has been reported and has been indicated to me that the bill must be passed by Congress before it adjourns. Failure to enact the bill prior to the October adjournment would damage relationships of this Government with a number of governments. And, in one case, additional costs of a foreign government which would result from the delay could affect decisions to lease a vessel from the United States.

There are a series of items here that I understand have been put aside because of an indication of objections from the Senator from Ohio. I think we ought to give him the opportunity to object. I see no reason why he should not exercise his rights if that is what he wants to do.

I am still trying to clear some items that we consider to be items of importance, at least that was the indication of the staff and of those Members who had contacted me at the time.

I do wish to proceed, Mr. President, with the House-passed bills in particular, but I also would like to proceed with these calendar items on the Senate Calendar that were cleared.

DEBT COLLECTION ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4613.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 4613) entitled "An Act to increase the efficiency of Government-wide efforts to collect debts owed the United States and to provide additional procedures for the collection of debts owed the United States", with the following amendments:

(1) In lieu of the matter proposed by section 4, insert:

REQUIREMENT THAT APPLICANT FURNISH TAXPAYER IDENTIFYING NUMBER

SEC. 4. (a) IN GENERAL.—Each Federal agency administering an included Federal loan program shall require any person applying for a loan under such program to furnish such person's taxpayer identifying number.

(b) DEFINITIONS.—For purposes of this section—

(1) INCLUDED FEDERAL LOAN PROGRAM.—The term "included Federal loan program" has the meaning given to such term by subparagraph (C) of section 6103 (l)(3) of the Internal Revenue Code of 1954 (as added by section 7 of this Act).

(2) TAXPAYER IDENTIFYING NUMBER.—The term "taxpayer identifying number" has the meaning given to such term by section 6109 of such Code.

(2) In lieu of the matter proposed by section 7, insert:

SCREENING POTENTIAL DEBTORS

SEC. 7. (a) DISCLOSURE TO FEDERAL LENDING AGENCY THAT APPLICANT HAS TAX DELINQUENT ACCOUNT.—Paragraph (3) of section 6103(l) on the Internal Revenue Code of 1954 is amended to read as follows:

"(3) DISCLOSURE THAT APPLICANT FOR FEDERAL LOAN HAS TAX DELINQUENT ACCOUNT.—

"(A) IN GENERAL.—Upon written request, the Secretary may disclose to the head of the Federal agency administering any included Federal loan program whether or not an applicant for a loan under such program has a tax delinquent account.

"(B) RESTRICTION ON DISCLOSURE.—Any disclosure under subparagraph (A) shall be made only for the purpose of, and to the extent necessary in, determining the creditworthiness of the applicant for the loan in question.

"(C) INCLUDED FEDERAL LOAN PROGRAM DEFINED.—For purposes of this paragraph, the term 'included Federal loan program' means any program—

"(i) under which the United States or a Federal agency makes, guarantees, or insures loans, and

"(ii) with respect to which there is in effect a determination by the Director of the Office of Management and Budget (which has been published in the Federal Register) that the application of this paragraph to such program will substantially prevent or reduce future delinquencies under such program."

(b) TECHNICAL AMENDMENTS.—

(1) Clause (i) of section 6103(p)(3)(C) of such Code is amended by striking out "(l)(3) or (6)" and inserting in lieu thereof "(l)(6)".

(2) Paragraph (4) of section 6103(p) of such Code is amended—

(A) by striking out "(l)(1),(2)," in the matter preceding subparagraph (A) and inserting in lieu thereof "(l)(1),(2),(3),",

(B) by striking out "(l)(3),(6)," and inserting in lieu thereof "(l)(6),", and

(C) by striking out "(l)(1),(2), or (5), or (o)(1), the commission described in subsection (l)(3)" in subparagraph (F)(ii) and inserting in lieu thereof "(l)(1),(2),(3), or (5), or (o)(1),",

(d) EFFECTIVE DATE.—The amendments made by this section shall apply in the case of loan applications made after September 30, 1982.

(3) In lieu of the matter proposed by section 8, insert:

DISCLOSURE OF MAILING ADDRESS TO THIRD PARTIES FOR PURPOSES OF COLLECTING FEDERAL CLAIMS

SEC. 8. (a) Paragraph (2) of section 6103(m) of the Internal Revenue Code of 1954 (relating to disclosure of taxpayer identity information) is amended to read as follows:

"(2) FEDERAL CLAIMS.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the Secretary may, upon written request, disclose the mailing address of a taxpayer for use by officers, employees, or agents of a Federal agency for purposes of locating such taxpayer to collect or compromise a Federal claim against the taxpayer in accordance with section 3 of the Federal Claims Collection Act of 1966 (31 U.S.C. 952).

"(B) SPECIAL RULE FOR CONSUMER REPORTING AGENCY.—In the case of an agent of a Federal agency which is a consumer reporting agency (within the meaning of section 603(f) of the Fair Credit Reporting Act (15 U.S.C. 1681a(f))), the mailing address of a taxpayer may be disclosed to such agent under subparagraph (A) only for the purpose of allowing such agent to prepare a commercial credit report on the taxpayer for use by such Federal agency in accordance with section 3 of the Federal Claims Collection Act of 1966 (31 U.S.C. 952)."

(b) SAFEGUARDS.—Paragraph (4) of section 6103(p) of such Code (relating to safeguards) is amended by adding at the end thereof the following new sentence: "In the case of any agency which receives any mailing address under subsection (m) (2) or (4) and which discloses any such mailing address to any agent, this paragraph shall apply to such agency and each such agent (expect that, in the case of an agent, any report to the Secretary or other action with respect to the Secretary shall be made or taken through such agency)."

(c) TECHNICAL AMENDMENTS.—

(1) Paragraph (3) of section 6103(a) of such Code is amended by striking out "subsection (m)(4)(B)" and inserting in lieu thereof "paragraph (2) or (4))(B) of subsection (m)".

(2) Paragraph (2) of section 7213(a) of such Code (relating to unauthorized disclosure of information) is amended by striking out "(m)(4)" and inserting in lieu thereof "(m) (2) or (4)".

(d) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

(e) Except as otherwise provided in section 4 or 7 or the foregoing provisions of this section, nothing in this Act (or in the amendments made by this Act) shall apply to claims or indebtedness arising under, or amounts payable under, the Internal Revenue Code of 1954, the Social Security Act, or the tariff laws of the United States.

Mr. PERCY. Mr. President, this bill was amended and passed by the Senate on Tuesday of this week by a vote of 96-2. The House made several modifications—mostly minor—to the Senate-passed bill. I accept the House bill as passed and urge the Senate to approve final passage of it.

The most important amendment made by the House would exclude claims or indebtedness arising under, or amounts payable under, the Internal Revenue Code of 1954, the Social Security Act, or the tariff laws of the United States from most of the provisions of the debt collection bill.

Mr. President, the amendments made by the House will reduce, to a small extent, the money saving potential of this legislation by making it difficult for the Government to collect approximately $2 billion in overpayments to Federal program beneficiaries. While many of these overpayments are the fault of the Government, many others are caused by program recipients' failure to properly notify the Government of changes in their eligibility for benefits. I agree that extra care should be taken in retrieving benefit overpayments. However, the Government simply cannot afford to write off billions of dollars in benefit overpayments—it must have some tools to enforce its right to be repaid these overpayments. For this reason, I urge the Congress to act on a solution to this problem when we take up the broader issue of Federal entitlements.

For now, however, our first priority must be to pass this amended legislation which will achieve most of our objectives in the debt collection area. Any further delay will be very costly to the taxpayers of this country.

I would like to clarify section 13 of the bill which permits the Federal Government to contract for collection services with private persons or organizations. The section provides that appropriate fees charged by a contractor under this section may be payable from the amount collected by such contractor. It is my intention that such appropriate fees include reasonable contingent fees which may arise.

This section also provides that any such contract shall be effective only to such extent and and in such amounts as are provided in advance appropriation acts. This language was included in recognition that advance budgetary planning and good fiscal management in the agencies is necessary. It was not intended to delay or tie the agencies' hands in their efforts to reimburse private collectors as any bank could. The purpose of this act is to give the Federal Government the tools and flexibility to carry out its collection efforts as an efficient and effective business can. I expect that in planning budgets, authorizations, and appropriations, due consideration be given to reimbursing these contractors with a portion of these collections.

I would like to reiterate that no provision of this bill is intended to affect the study or pilot programs or efforts of the Department of Health and Human Services to increase the efficiency of collecting delinquent Government debts.

Mr. President, there are a few final clarifications I would like to make. In section 10 of the Debt Collection Act, H.R. 4613, subsection (c) provides that prior to collecting any claim through administrative offset, the head of the agency or his designee shall provide the debtor with several due-process protections. I intend that the debtor referred to in this section is a person, as defined in subsection (8) of this section. In subsection (1) the debtor is also intended to be a person as defined in the section.

In section 11 of the bill, subsection (e)(1), in the third sentence of this subsection the intent is that the Secretary of the Treasury may revise such rate for any calender quarter if the average investment rate for the 12-month period ending at the close of the previous calendar quarter, rounded to the nearest whole per centum, is greater or less than the existing published rate by 2 per centum.

Finally, in subsection (3) of section 11, it is intended that interest and charges under paragraphs (1) and (2) shall not apply if an applicable statute, a regulation required by statute, a loan agreement, or a contract either prohibit the charging of interest or such charges, or explicitly fix interest or such charges that apply to claims involved.

Mr. President, I now ask that the Senate act favorably upon H.R. 4613 as amended by the House.

Mr. DOLE. Mr. President, the House made some changes to the Senate-passed tax-related provisions of H.R. 4613, the Debt Collection Act of 1982. The changes made by the House relate to the use of taxpayer identification numbers instead of the taxpayer's social security number and some technical changes in the recordkeeping procedures of the Senate-passed version of H.R. 4613. In addition, the House amendments exempt social security from some of the provisions of the bill which are intended to increase the efficiency of collecting delinquent Government debts.

I understand that Social Security may have a pilot program in progress to study the possibility of collecting delinquent claims. No provisions of this bill are intended to affect the studies or pilot programs or efforts of the Department of Health and Human Services to increase the efficiency of collecting delinquent Government debts.

I will continue to support this bill as amended by the House and I urge my colleagues to pass H.R. 4613, the Debt Collection Act of 1982.

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska (Mr. STEVENS).

The motion was agreed to.

SUSPENSION OF RULE XXXI

Mr. STEVENS. Mr. President, I ask unanimous consent that paragraph 6 or rule XXXI of the Standing Rules of the Senate relating to proceedings on nominations be suspended with respect to the nominations unacted upon during the present session, except for the following: Harry J. Staszewski, Jr., to be a member of the U.S. Metric Board and Frederic V. Malek, to be Governor of the U.S. Postal Service.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, and I will not object provided that the following names can be added to that list: John Van de Water, Chairman of the National Labor Relations Board; William Olson, Board of Directors, Legal Services Corporation; George Paras, Board of Directors, Legal Services Corporation; Wendy Borcherdt, Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education; and Robert A. Destro, Constantine Nicholas Dombalis, and Guadalupe Quintannilla on the Commission on Civil Rights.

Mr. STEVENS. Mr. President, it is my understanding that we find ourselves sort of between a rock and a hard place, because if the Senator from West Virginia objects to the request I have made it is my understanding that all of the nominations that are here will go back and the treaties that are here also.

Mr. ROBERT C. BYRD. No; not the treaties.

Mr. STEVENS. Not the treaties?

Mr. ROBERT C. BYRD. Some treaties have been before this body for years. They do not go back.

Mr. STEVENS. There are some other matters that I was told would go back. But, in any event, if I am in error, I would appreciate the correction.

But I am sort of the opinion that I am compelled to accept the additions suggested by the minority leader because the alternative would impose more work upon the executive branch.

Mr. ARMSTRONG. Mr. President, could we just withhold for just a moment? What was the Senator's request?

Mr. STEVENS. Mr. President, my request was that the provisions of paragraph 6 of rule XXXI of the Standing Rules of the Senate relating to pro-

ceedings on nominations be suspended with respect to nominations unacted upon with the exception of two that we understand the administration has no objection to having them returned at this time.

That provision says:

Nominations neither confirmed nor rejected during the session at which they are made shall not be acted upon at any succeeding session without being again made to the Senate by the President; and if the Senate shall adjourn or take a recess for more than thirty days, all nominations pending and not finally acted upon at the time of taking such adjournment or recess shall be returned by the Secretary to the President, and shall not again be considered unless they shall again be made to the Senate by the President.

Now, if the President wishes us to consider the items that the minority leader wishes to have returned, he can just resubmit them to us as we reconvene. It is my understanding, unless we accept this modification, they would all be returned.

Mr. ROBERT C. BYRD. They would all be returned. I understand there may be thousands or several hundred military nominations that would be returned. What we are doing here is saying all nominations will remain in the status quo during the recess of the Senate with the following exceptions which we have agreed to.

Mr. STEVENS. Mr. President, at the request of the distinguished Senator from Colorado, I ask that that matter be laid aside temporarily while he is able to confer.

The PRESIDING OFFICER. Does the Senator withdraw his request?

Mr. STEVENS. I do withdraw that request.

Mr. ROBERT C. BYRD. Mr. President, may I say to the distinguished Senator that I personally have no objection to keeping the nominations in the status quo, but I could only accede to the request under the conditions set forth.

AMENDMENTS TO THE FEDERAL SEED ACT

Mr. STEVENS. Mr. President, I ask the distinguished Senator from West Virginia if we are now prepared to discharge the Agriculture Committee for the consideration of H.R. 7005. That is a bill to amend the Federal Seed Act which I am led to believe is extremely important to the seed industry of California and this bill could become law if the committee is discharged.

It is my understanding that that cannot be handled at this time. I thank the Senator.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I ask the distinguished Senator from West Virginia if it is possible to take up H.R. 6056.

Mr. President, I withdraw that request because apparently it is not on the calendar with that number.

Mr. McCLURE. Mr. President, I wonder if the acting majority leader can inform me if we are ready to clear Calendar Order No. 841, S. 2118, the Wyoming Wilderness; Calendar No. 815, S. 1964, Missouri Wilderness; Calendar No. 816, S. 1965, Missouri Wilderness, and Calendar No. 819, S. 2710, Indiana Wilderness.

I wonder if we might move those en bloc.

Mr. STEVEN. Mr. President, I might refer the request to the distinguished Senator from West Virginia. I might say that the majority has cleared these items and we are prepared to move them to the House at this time.

It is possible to proceed with those items, I ask my good friend from West Virginia?

Mr. ROBERT C. BYRD. Mr. President, Calendar Order Nos. 815, 816, and 819 are cleared.

Mr. STEVENS. And 841?

Mr. ROBERT C. BYRD. No; the other three are 815, 816, and 819. Those have been cleared.

Mr. McCLURE. Mr. President, we are prepared to move those, if they can be moved en bloc. We had suggested earlier we were going to do them sequentially, taking 841 first and the other three following. If it is impossible to move them en bloc, or if it is impossible to move each one of them individually, it is not going to be possible to move any of them.

Mr. ROBERT C. BYRD. I am sorry, I am only in a position to clear the three I have mentioned.

Mr. McCLURE. I am sorry.

Mr. STEVENS. Mr. President, we will then pass on to other matters.

Mr. McCLURE. Mr. President, might I ask if Calendar Order No. 823, H.R. 6029, the Indiana Dunes, is ready for action?

Mr. ROBERT C. BYRD. I am advised that that is not cleared for action.

Mr. McCLURE. Mr. President, might I inquire if H.R. 2475, which is at the desk, a California bill, is cleared for action?

Mr. ROBERT C. BYRD. I am advised that that is not cleared for action.

Mr. McCLURE. H.R. 5785? I think Mr. JOHNSTON has an interest in that and I suspect Senator LONG also has an interest in that.

Mr. METZENBAUM. What is the calendar number?

Mr. McCLURE. It is a House bill that is at the desk. We have a similar set of bills so it does not have a calendar number.

Is the Senator from Ohio prepared to act on the Senate bill? Is it the House amendment that causes the distress of the Senator from Ohio?

Mr. METZENBAUM. The Senator from Ohio is frank to admit that he does not know what either the House or Senate bill contains and is not prepared to act.

Mr. McCLURE. Is the Senator from Ohio prepared to entertain an explanation of what is in the legislation?

Mr. METZENBAUM. Frankly, no. It is now 20 minutes to 1 in the morning.

Mr. McCLURE. Is S. 1873 cleared for action?

Mr. President, each of these at one time or another today was cleared for action or it was my understanding that it would be if we could clear one other thing that was ready. I was about to ask with repect to S. 187, the Miles City bill, in which the Senator from Montana has a great interest.

Mr. ROBERT C. BYRD. What number is this the Senator is talking about?

Mr. McCLURE. S. 187.

Mr. METZENBAUM. Mr. President, it is not on the calendar.

Mr. McCLURE. It is billed as having been returned to us this evening from the House with an amendment concerning the nature of the title. I am informed that Senator MELCHER and Senator BAUCUS do not object to it. Representative MARLENEE talked to me about it earlier.

Mr. ROBERT C. BYRD. Mr. President, a lot of these we have never had the script on. I think it is getting to be a little ridiculous, if I may say so with due respect.

Mr. McCLURE. May I inquire about H.R. 861, the trails bill?

Mr. President, do I have the floor?

The PRESIDING OFFICER. The Senator has the floor.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, we are still awaiting messages from the House. I guess we did get an answer—Calendar 847. It is my understanding that we did get an answer on the National Trails System bill.

Mr. METZENBAUM. Mr. President

The PRESIDING OFFICER. The Senator from Alaska has the floor.

Mr. STEVENS. I yield to the Senator from Ohio.

Mr. ROBERT C. BYRD. Mr. President, I understand that Mr. DOMENICI had a hold on that.

The PRESIDING OFFICER. Does the Senator from Ohio seek the floor?

Mr. METZENBAUM. Mr. President, am I recognized?

Mr. STEVENS. I have yielded to the Senator from Ohio, Mr. President.

Mr. METZENBAUM. Mr. President, I am not trying to give any particular Member of the Senate a difficult time or just to object for the purpose of objecting. But I do believe that if any of these measures really had such a sense of urgency about them, they should have been taken up earlier. We were here at 8:20 one morning this week. We could have taken them up then. We have been here many hours of the day the last several days. Nobody has seen fit to call the measures up. Now the entire body has left. There are about half a dozen Members still on the floor and we are going through a bunch of bills that undoubtedly have importance and significance to those who are concerned about measures. Most of us do not have any idea what they contain.

We have cleared and passed probably 60 to 100 bills so far this evening. I shall just indicate that until I have some idea what they are and understand what I learn about them, I am objecting for that reason.

Mr. McCLURE. Mr. President, will the Senator from Alaska yield.

Mr. STEVENS. I do yield?

Mr. McCLURE. Mr. President, I can understand if the Senator from Ohio has some concern about some bill about which he knows nothing, but it is really amazing to me to have the Senator from Ohio tell me that he knows nothing about some of these bills which have been considered, which he has voted upon, which he has voted for and then to come out here and say he does not know anything about them and therefore he will object to them.

I say for the RECORD, Mr. President, with respect to H.R. 861, Calendar 847, the trails bill, it is cleared on this side.

Mr. ROBERT C. BYRD. I thank the Senator.

ORDER FOR OFFICIALS OF THE SENATE TO TAKE CERTAIN ACTIONS DURING ADJOURNMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until 12 noon on November 29, messages from the President of the United States and the House of Representatives may be received by the Secretary of the Senate and appropriately referred, and that the Vice President, President pro tempore, and acting President pro tempore may be authorized to sign duly enrolled bills and joint resolutions.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR COMMITTEES TO FILE REPORTS DURING ADJOURNMENT

Mr. STEVENS. Mr. President, I ask unanimous consent that during the adjournment of the Senate over until November 29, committees may be authorized to file reports on October 18 and November 15, between the hours of 9 a.m. and 3 p.m.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR NOVEMBER 29, 1982

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate reconvenes on November 29, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and following the time allocated to the two leaders under the standing order, there be a period for the transaction of routine morning business not to exceed 60 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, we have been informed that the House has not yet passed the Defense Production Act. That means that unless the Senate remains in session to see what the House has returned to us, we shall be without a Defense Production Act, which would be considered to be a very serious situation indeed.

Mr. SCHMITT. Will the Senator yield?

Mr. STEVENS. Yes, I yield.

Mr. SCHMITT. Mr. President, for the clarification of the Senate, the House, as I understand it, has been unable to agree on a termination date for the extension of the Defense Production Act. There will not be an extension of that act passed by the House at this time. They have passed, as a separate bill, the amendment agreed to by the Senate dealing with a productivity conference. That should be on its way to this body for our consideration.

I hope the Senate will consider that as at least a step in the direction of helping this Nation and the Congress understand many of the aspects of productivity and lack of growth of productivity in this country that we all have expressed great concern about.

I also say with great regret that we are entering into uncertain waters now for the next few months without the availability of the Defense Production Act. An extremely important part of the contracting authority of the Department of Defense has now been removed—again, with very uncertain consequences.

I thank the Senator for yielding.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. STEVENS. Mr. President, Senators and staff have been here for a long time. Yet we must await the matters that I have mentioned. It is my intention to ask the Senate to stand in recess for a period of 30 minutes so we might find out the progress that is being made in the other body and what we might be able to do further tonight. I point out again that many members of the staff have not been out of this room for quite some time. Therefore, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair for not to exceed 30 minutes.

There being no objection, the Senate, at 12:49 a.m., recessed awaiting the call of the Chair. The Senate reassembled at 1:15 a.m. when called to order by the Presiding Officer (Mr. ABDNOR).

PERISHABLE AGRICULTURAL COMMODITIES ACT AMENDMENT—H.R. 6865

Mr. STEVENS. Mr. President, the distinguished Senator from Louisiana indicated in his gracious way that I could forget about answering his question concerning H.R. 6865 but now I am able to tell him that the administration and the Department of Agriculture fully support the bill that we seek to pass.

Mr. LONG. I thank the Senator.

As I told the Senator if he could not get the answer to the question I was going to let it pass anyway.

Mr. STEVENS. The Senator from Louisiana has always been quite gracious and helpful, and it is a pleasure to work with him.

I do now ask that the Senate return to the consideration of H.R. 6865.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6865) to amend the Perishable Agricultural Commodities Act, 1930, to require the Secretary of Agriculture to accept the payment of monetary penalties for certain admitted and infrequent violations involving misrepresentation under such Act, and for other purposes.

The Senate proceeded to consider the bill.

(By request of Mr. STEVENS, the following statement was ordered to be printed in the RECORD:)

● Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be discharged from further consideration of H.R. 6865, and that the

Senate proceed to its immediate consideration.

Mr. President, H.R. 6865 is an act to amend the Perishable Agricultural Commodities Act, 1930 (PACA). It passed the House of Representatives on September 28, 1982, under suspension of the rules.

The purpose of the PACA is to suppress unfair and fraudulent practices in the marketing of fresh and frozen fruits and vegetables in interstate and foreign commerce. To accomplish this purpose, the PACA established a code of fair trading in the marketplace and provides for the enforcement of contracts for marketing these commodities.

In the produce industry, large amounts of commodities are purchased on a good faith basis. In general, there is no written contract and the buyer does not see the product. It is a verbal business which can easily slide into misunderstanding, deception, and fraud.

Under the PACA, commission merchants, brokers, and dealers, including certain retailers and processors, must be licensed. The license system plays a very important role in the fresh fruit and vegetable marketplace, providing a means of establishing the legitimacy of the merchants and serving as a mechanism for enforcement of the PACA requirements. The ultimate sanction for engaging in unfair trading practices is, of course, revocation of the license, with lesser sanction such as fines and license suspensions completing the enforcement system.

H.R. 6865 would amend the PACA enforcement provisions to require the Secretary of Agriculture to permit any commission merchant, dealer, or broker, who has violated the act by misrepresenting by mark, stencil or label, to admit the violations, and if the violations are not repeated or flagrant, pay a monetary penalty. This amendment is intended to confirm existing authority of the Secretary of Agriculture to permit informal satisfaction of liability for any misrepresentation, and to make it clear that the Secretarty of Agriculture will permit informal settlement of liability for misrepresentation violations relating to mark, label, and stencil if they are not repeated or flagrant.

In addition to amending the enforcement provisions, H.R. 6865 would also require a U.S. resident to furnish a bond before pursuing a claim for the recovery of damages before the Secretary of Agriculture where the claim asserted has been assigned to the U.S. resident by a nonresident of the United States. This amendment would eliminate a statutory loophole, which currently permits a nonresident who files a reparations complaint under PACA to avoid the present requirement that nonresidents post a bond, by assigning his or her claim to a U.S. resident. The purpose of the bond is to discourage frivolous claims and to provide for payment of attorney fees, court costs, and any award on a counterclaim if a respondent U.S. resident prevails in a reparation proceeding. In the absence of this provision, the U.S. respondent has no means to recover costs and damages if he or she prevails in the proceeding. The amendment merely places the resident assignee of the claim of a nonresident in the shoes of the nonresident in proceeding before the Secretary of Agriculture.

Let me point out one other thing. Under current law the bonding requirement for nonresident claimants can be waived by the Secretary in a case where the nonresident claimant is a resident of a country that permits U.S. residents to file a similar claim in that country without posting a bond. I want to clarify that in adopting H.R. 6865, it is intended that this waiver authority will continue, and that it will also apply in cases where the nonresident's claim has been assigned to a U.S. resident.

Mr. President, I ask that H.R. 6865 be adopted by the Senate without amendment.●

Mr. STEVENS. Mr. President, I renew my request and ask unanimous consent be given to discharge the Agriculture Committee from further consideration of H.R. 6865.

I apologize to the distinguished minority leader for proceeding. I thought it would be proper since we already brought this matter before the Senate before.

This is the matter that we put into abeyance awaiting the answer concerning the administration's point of view.

I do ask unanimous consent that the Committee on Agriculture be discharged from consideration of H.R. 6865.

The PRESIDING OFFICER. Without objection, it is so ordered.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6865) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I have conferred with the distinguished Speaker of the House of Representatives. We are awaiting two messages from the House of Representatives pertaining to the Defense Production Act and Wolf Trap, and when they are received we will proceed to clear the final items that are before us.

I yield to the Senator from Virginia who wishes to make a statement at this time.

WOLF TRAP

Mr. WARNER. Mr. President, with the expectation that Wolf Trap legislation will be adopted, I wish to express my appreciation to the majority leadership, the minority leadership, the distinguished chairman of the Energy Committee, our distinguished colleague from Louisiana (Mr. LONG), who I believe is representing tonight Mrs. Long as a member of the board, and to my colleague FRANK WOLF who has traveled back and forth between the Chambers many times this evening.

The procedure that we agreed to adopt was that the amendments I was prepared to submit to the House bill (H.R. 6875) were given to Mr. WOLF and he took them to the House of Representatives, and the House of Representatives has now passed these amendments designated by myself.

The purpose of these amendments was to clarify the language of the House bill with respect to the Dulles Airport access toll road. The toll road hopefully will be constructed by the Commonwealth of Virginia and financed by the sale of bonds.

The language in the House bill, in my judgment and that of Governor Robb and chairman of the Fairfax County Board of Supervisors, Mr. Haggerty, required some amendments, and with the cooperation of the House of Representatives and others we were able to reach an understanding on the needed amendments and, as I said, it would be not necessary for me to submit the amendments tonight that I have drafted since Mr. WOLF has now obtained concurrence of the House of Representatives and they are attached to the bill which hopefully will soon be coming over from the House of Representatives.

A great many persons have worked tonight to effect this compromise. The distinguished Senator from Ohio has given his blessing to this piece of legislation, and I express my appreciation to him.

The distinguished Senator from Oklahoma, who was here earlier, had concern, and he likewise has given his blessing to this legislation going forward.

Indeed, the distinguished Senator from South Carolina has participated in it, and I express my appreciation to him.

Mr. LONG. Mr. President, may I say to the Senator from Virginia that he

has been tireless, devoted, and indefatigable in handling this measure, and it is proof that the State of Virginia has a Senator who never gives up regardless of how late at night or how early in the morning he has to work to take care of a matter which is of significance to his State, and I am pleased to support him in this matter.

I have attended a benefit at Wolf Trap recently where a number of people, people such as Mrs. Lyndon Johnson and other outstanding Democrats, as well as outstanding people on the other side of the aisle, helped to raise money to assist in rebuilding the auditorium burned down by fire some time ago.

I am pleased to see that this matter can be resolved and the Federal Government can cooperate in the rebuilding, with the dedicated efforts of those people in Virginia and the people in the District of Columbia who have been working together to raise money for a very worthy project. It will continue to be a priceless asset to the metropolitan area.

Mr. WARNER. I appreciate the gracious sentiments of the distinguished Senator from Louisiana. Indeed, Mr. SEIBERLING worked on this, as did Mr. UDALL, so it is a bipartisan piece of legislation with respect to funds. They are coming in from all over the United States.

Mr. President, I would also like to include a reference to the staff members, if I might finish, and then I will be glad to yield, Mr. Roger Sindelar, Mr. Lee Califf, and Mr. Tony Bevinito who have worked on this.

I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I just want to commend the able Senator from Virginia for his deep interest in this important matter and for the great finese with which he has handled it.

I have attended many performances at Wolf Trap, and it is one of the outstanding recreation centers in the whole country. The public was very much interested in this, and thousands of dollars have been raised in this part of the country as well as in other parts to restore this property which was burned out there, and I am very pleased with the action being taken here for the Federal Government to cooperate in this important project.

If it had not been for the work the able Senator from Virginia did, I am not too sure that this project would have been successful. So I just want to extend to him my hearty congratulations for the splendid manner in which he has handled this matter, and the great success he has attained.

Mr. WARNER. I thank the distinguished Senator from South Carolina for his very gracious remarks.

I yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator from Virginia. I do want to commend the Senator from Virginia for his good humor during his attention to this, as well as his dogged determination to see that it was going to be done tonight. I do not suppose anyone can really understand what it is like to spend hour after hour after hour trying to clear away the underbrush, as the Senator from Virginia has successfully been doing, in getting this matter resolved tonight in the form of a bill which will go to the President.

For those who do not understand the urgency of timing on this, let me just indicate that if the bill was not passed tonight so it could go to the President, it would very likely be impossible to let contracts in time to start proceeding so they could have a full season next year. Even though it might be considered in the lameduck session, that simply would not get it done in order to have the excellent performances in time, so the Senator from Virginia and the others who have spoken here tonight and others who have gotten it done are owed a very great debt of gratitude by those who are very much interested in the future of Wolf Trap.

I wish to commend the Senator and to thank him for his help.

Mr. WARNER. I thank my distinguished chairman of the Energy Committee. The Senator has been a full partner throughout this proceeding as well as in the preparation of this legislation and the hearings, and I know of his interest in Wolf Trap and his concern that this be reconstructed in a manner that will make it harmonious with the proposed expansion of the highway system in that corridor.

It was through the Senator's diligence, in my judgment, that we were able to forge this compromise to protect the quality of Wolf Trap and, at the same time, go through with this highway construction.

EXECUTIVE NOMINATIONS TO BE RETURNED TO THE WHITE HOUSE

Mr. STEVENS. Mr. President, I would now like to resume the effort to resolve the problem of the executive nominations under paragraph 6 of rule XXXI. After conferring with the distinguished minority leader, what I propose that rather than have all the nominations returned because we failed to act, I have reached an understanding with the distinguished minority leader which I state as follows: I ask unanimous consent that paragraph 6 of rule XXXI of the Standing Rules of the Senate relating to proceedings on nominations be suspended with respect to nominations not acted upon during the present session, except for the following:

Harry J. Staszewski, Jr., to be a member of the U.S. Metric Board.

Frederic V. Malek, to be Governor, U.S. Postal Service.

John Van de Water, to be Chairman of the National Labor Relations Board.

William Olson, Board of Directors, Legal Services Corporation.

George Paras, Board of Directors, Legal Services Corporation.

Wendy Borcherdt, Deputy Undersecretary for Intergovernmental and Interagency Affairs, Department of Education.

Those that I have read, Mr. President, would be returned to the President. The balance would remain here under a suspension of the rules.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object——

Mr. STEVENS. Mr. President, I ask unanimous consent to add to that list the nominees under the U.S. Arms Control and Disarmament Agency, and calendar order numbered 1013, the nominee to be Assistant Secretary of State.

Mr. President, I withdraw my request again. The list must be revised further.

Mr. President, it is my understanding that, without a unanimous-consent agreement, all nominations before us will go back. I have been trying to work the matter out and we cannot get an agreement for a unanimous-consent request. Again, I withdraw the request and we will try once again to resolve the issue.

May I inquire of the Chair if we have received the message from the House yet on DPA or on the Wolf Trap bill?

The PRESIDING OFFICER. They have not arrived.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair pending the arrival of those two matters which are keys to our proceeding further.

There being no objection, at 1:31 a.m., the Senate took a recess subject to the call of the Chair.

The Senate reassembled at 1:40 a.m. when called to order by the Presiding Officer (Mr. ABDNOR).

Mr. STEVENS. Mr. President, I thank the Chair for his indulgence.

I would now like to propound a unanimous-consent request that upon receipt of these items from the House, we will proceed; and, we will proceed on the basis that we will do these 10 items and there will be nothing else done prior to the recess.

Mr. President, I ask unanimous consent that the Senate, before it recesses this morning, consider H.R. 7293, the Wolf Trap bill which is coming from the House. That will be without amendment as it comes from the House.

Second, an original bill to be offered on behalf of the Senators from Arizona (Mr. DECONCINI and Mr. GOLDWATER), without amendment.

Third, calendar No. 815, S. 1964, and calendar No. 816, S. 1965, the Missouri wilderness bills, without amendment.

Calendar No. 819, S. 2710, the Indiana wilderness bill, with an amendment in the nature of a substitute and an amendment to the title, as reported by the committee.

Calendar No. 823, H.R. 6029, the Indiana Dunes, without an amendment.

The Defense Production Act extension for 6 months as it will be received from the House, assuming we agree with that version, and the productivity bill which accompanies it, H.R. 7292.

The motion that I will make in order to suspend the provisions of paragraph 6 of rule XXXI, those nominations to be excepted from that suspension to be a list that will be agreed upon between the minority leader and myself as acting majority leader.

The last matter to be the recess resolution, which we have received from the House.

It would be the understanding that we would proceed with the consideration of those bills that are here first. We are not going to do them in any particular order. Those that are here now we will do and as soon as we get the bills from the House we will do them as they are received.

When we complete that list, we will send the recess resolution to the House.

I would ask the indulgence, if we get this agreement, that we adopt the recess resolution and send it to the House so they may go home. They have finished their work.

I will accede to the desires of the membership in that regard.

That is my request. That would limit the actions for the remainder of this session prior to our recess to those 10 matters that I have mentioned.

Mr. ROBERT C BYRD. It is a good program. I am ready to proceed.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. I do not know whether the request has been made or not.

Mr. STEVENS. That is the unanimous-consent request and there will be nothing else brought up here tonight.

Mr. ROBERT C. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

MARK TWAIN NATIONAL FOREST

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar No. 815, which is S. 1964.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1964) to designate certain lands in the Mark Twain National Forest, Missouri, which comprise about 17,562 acres, and known as the Irish Wilderness, as a component of the National Wilderness Preservation System.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

● Mr. DANFORTH. Mr. President, I am extremely pleased and gratified to reach the point of Senate passage of S. 1964 and 1965—bills bringing Missouri's Irish Wilderness and Paddy Creek areas within the National Wilderness Preservation System.

When I ran for the Senate 6 years ago, I pledged to fight for Missouri wilderness areas. The Missouri Wilderness Coalition developed a list of six suggested candidates, and in 1980 we were able to take care of four of them—Bill Mountain, Piney Creek, Devil's Backbone, and Rockpile Mountain. Inclusion of these two additional areas would complete the job.

I believe strongly in the preservation of these special places. As David Brower warned some time ago:

This generation is speedily using up, beyond recall, a very important right that belongs to future generations—the right to have wilderness in their civilization, even as we have it in ours; the right to find solitude, somewhere; the right to see, enjoy, and be inspired and renewed, somewhere, by those places where the hand of God has not been obscured by the industry of man.

I was heartened on September 13 by the President's recommendation that Paddy Creek be designated as a wilderness area. The Irish has been somewhat more controversial, but has generated far more statewide support than any other area in Missouri. As the wilderness coalition put it:

It is, without question, the clearest, strongest, expression of Ozark landscape, geology, ecology, and natural beauty. The Irish is the best of its kind, and the last of its kind.

Senate passage of this legislation is an important step toward preservation of these prized areas for future generations. I want to express my appreciation to the Senator from Wyoming (Mr. WALLOP), who is chairman of the Public Lands Subcommittee, and the chairman of the Energy Committee (Mr. MCCLURE) for their great assistance in moving this legislation to this point. It is my hope that the House will quickly follow suit.●

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1964

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be known as the Irish Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map approximately referenced, dated December 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System, certain lands in the Mark Twain National Forest, Missouri, which comprise about seventeen thousand five hundred and sixty-two acres, are generally depicted on a map entitled "Irish Wilderness", dated December 1981, and shall be known as the Irish Wilderness.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and a legal description of the Irish Wilderness area with the Energy and Natural Resources Committee of the Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PADDY CREEK WILDERNESS AREA

Mr. STEVENS, Mr. President, I ask that the Chair lay before the Senate Calendar No. 816, S. 1965.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area", as a component of the National Wilderness Preservation System.

The PRESIDING OFFICER. The Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1965

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated Decem-

ber 1981, is hereby designated as wilderness and, therefore, as a component of the National Wilderness Preservation System; certain lands in the Mark Twain National Forest, Missouri, which comprise about six thousand eight hundred and eighty-eight acres, are generally depicted on a map entitled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

SEC. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Interior and Insular Affairs Committee of the House of Representatives, and such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this Act.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HOOSIER NATIONAL FOREST

Mr. STEVENS. Mr. President, I now ask the Chair to lay before the Senate Calendar No. 819, S. 2710.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2710) to establish a wilderness area in the Hoosier National Forest Area, Indiana.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause and insert the following:

That in furtherance of the purposes of the Wilderness Act (78 Stat. 890; 16 U.S.C. 1131), certain lands within the Hoosier National Forest, Indiana which comprise approximately twelve thousand nine hundred and fifty-three acres as generally depicted on a map entitled "Charles C. Deam Wilderness—Proposed", dated April 30, 1982, are hereby designated as wilderness, and therefore as a component of the national wilderness system, and shall be known as the Charles C. Deam Wilderness.

SEC. 2. Subject to valid existing rights, the Charles C. Deam Wilderness as designated by this Act shall be administered by the Secretary of Agriculture in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness, except that any reference in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act.

SEC. 3. Nothing in this Act shall affect the right of public access to cemeteries located within the Charles C. Deam Wilderness, including the Terril Cemetery. The right of access to privately-owned land completely surrounded by national forest lands within the area, designated by this Act as wilderness and to valid occupancies wholly within the area designated by this Act as wilderness shall be protected in accordance with the provisions of section 5 of the Wilderness Act.

SEC. 4. (a) The Congress finds that—

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of national forest roadless areas in Indiana and the environmental impacts associated with alternative allocations of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that—

(1) without passing on the question of the legal and factual sufficiency of the RARE II final environmental statement (dated January 1979) with respect to national forest lands in States other than Indiana, such statement shall not be subject to judicial review with respect to national forest system lands in the State of Indiana;

(2) with respect to the national forest lands in the State of Indiana which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II), that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94-588) to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of Indiana reviewed in such final environmental statement and not designated as wilderness by this Act shall be managed for multiple use pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of Indiana for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

SEC. 5. As soon as practicable after enactment of this Act, maps and legal descriptions of the Wilderness Area shall be filed with the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, and such maps and legal descriptions shall have the same force and effect as if included in this Act: Provided, however, That corrections of clerical and typographical errors in such legal descriptions and maps may be made.

Mr. QUAYLE. Mr. President, I am very pleased that the Senate is considering S. 2710, which would designate 12,953 acres in the Hoosier National Forest as the Charles C. Deam Wilderness area.

Two areas in Indiana recommended as wilderness during the RARE II evaluations are included in this area: The 6,420-acre Grubb Ridge area and the 3,611-acre Cope Hollow area. Also included are approximately 2,900 acres of adjoining land in the Terril Ridge area. Gov. Robert Orr made this recommendation in November 1981. The Governor's endorsement of this area provided an impetus in finalizing a settlement on Indiana wilderness which has resulted in this legislation. Tower Ridge Road is not included in the wilderness designation and nothing in the legislation affects the right of public access to the six cemeteries located in the wilderness.

The National Wilderness Preservation Act stipulates that all timber located in the wilderness area be removed from the timber base of the national forest in which it is located. The Congressional Budget Office states that:

Because the annual cut in the Hoosier National Forest does not approach the maximum timber harvest allowed, no Federal timber receipts are expected to be foregone as a result of enactment of this legislation.

Residing in this wilderness area are impressive stands of oak and hickory, with a good percentage of tulip poplar, and planted pine. Regenerating fields along some ridges provide a natural break in the forest cover. The area contains some of the best populations of whitetail deer, ruffled grouse, and wild turkey to be found in Indiana. This area will be the home of red and gray fox, mink, weasel, and the endangered Indiana bat. The Mount Carmel fault, the only faultline in Indiana, passes through the area.

The wilderness area is named for Charles C. Deam, the first State forester in Indiana. His writings, "Trees in Indiana" and "Flora of Indiana" are still in use today.

I am in agreement with the other supporters of this legislation, Senator LUGAR, and Congressmen HAMILTON and DECKARD, that this legislation represents a final compromise settlement of issues which have been surrounding the wilderness question, that the number of acres of wilderness is sufficient to permit a wide variety of recreational, educational, and scientific opportunities. All remaining lands in the Hoosier National Forest would be released for multiple use management by the U.S. Forest Service. Any further wilderness designations in Indiana would require an act of Congress.

I am especially grateful to all those citizens in Indiana who have worked so hard and with great diligence to develop plans for a wilderness designation. This is a proposal that comes from the citizens of Indiana and it is not a mandate being handed down by the Federal Government. I also appreciate the efforts of Senator MCCLURE

and the other members of the Energy and Natural Resources Committee in responding to the urgings of Senator LUGAR and myself on the need to pass this legislation during the 97th Congress.

Indiana is one of the six States east of the Mississippi that does not have a wilderness area. I believe that the Deam Wilderness can be a proud addition to the wilderness preservation system.

Mr. LUGAR. Mr. President, S. 2710 designates a 12,953-acre Charles C. Deam Wilderness in the Hoosier National Forest, Ind. This includes the Grubb Ridge, Cope Hollow, and Terril Ridge areas.

The proposed wilderness is one of great diversity. It is a mosaic of hardwood forests of oak-hickory and beech-maple types. This upland hill country with ravines, hollows and streams will be dedicated to the quiet emjoyment of nature.

The proposed wilderness is named after Charles C. Deam, a pioneer in forest conservation in Indiana and the author of "Trees of Indiana" and "Flora of Indiana."

S. 2710 has been very thoroughly discussed in consultation with a wide variety of organizations and individuals in Indiana. It is based upon a proposal which Governor Orr made in November 1981. In February 1982, I convened a meeting in Indiana at which the Governor's proposal was discussed by organizations of differing viewpoints. All of the organizations represented at that meeting now support S. 2710. S. 2710 and an identical House bill were sponsored by the entire Indiana congressional delegation. Every witness who testified before the Senate Committee on Energy and Natural Resources on August 12, 1982, supported the bill. The committee by a vote of 17 to 0 ordered S. 2710 reported with only technical and clarifying amendments. The administration has no objection to the passage of this legislation.

What was once a hotly debated question in Indiana has now been settled by the hard work and good will of a great many individuals. I am deeply grateful to them for their efforts.

Mr. President, I urge passage of S. 2710.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 2710), as amended, was passed.

The title was amended so as to read: "A bill to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Indiana."

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXCHANGE OF CERTAIN FEDERAL LANDS

Mr. STEVENS. Mr. President, I now ask unanimous consent that the Chair lay before the Senate Calendar No. 823, H.R. 6029.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6029) to authorize the Secretary of the Interior to acquire by exchange certain lands within the Indiana Dunes National Lakeshore in the State of Indiana.

Mr. STEVENS. Mr. President, I ask for the immediate consideration of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PROVIDING FOR THE USE OF CERTAIN FEES COLLECTED FROM VISITORS TO GRAND CANYON NATIONAL PARK

Mr. STEVENS. Mr. President, there is an original bill to be sent to the desk in behalf of the Senators from Arizona (Mr. DECONCINI and Mr. GOLDWATER).

Mr. ROBERT C. BYRD. Mr. President, I send a bill to the desk on behalf of Mr. DECONCINI and Mr GOLDWATER and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3039) to provide for the use of certain fees collected from visitors to Grand Canyon National Park, and for other purposes.

The PRESIDING OFFICER. Without objection, the bill will be considered to have been read twice and the Senate will proceed to its immediate consideration.

Mr. DECONCINI. Mr. President, this bill, which is cosponsored by my distinguished senior colleague, Senator BARRY GOLDWATER, amends Public Law 95-244, as amended by section 3 of Public Law 96-581.

All it does, Mr. President, is modify existing law and establish a "special fund" to provide some needed additional support to the Grand Canyon Unified School District—which is within the Grand Canyon National Park. This educational support has already been authorized by the acts of Congress previously mentioned. The revenues for the fund would come entirely from revenues received by the United States from visitors to the Grand Canyon National Park. This is money received at the gate—$2 a car, 50 cents per person on buses.

Pursuant to terms prescribed by the Secretary of the Interior, payments from this fund would be made to the Grand Canyon School District for the education of the children who actually reside on Federal land. Because Federal property is not subject to taxation by State or local agencies, this amendment will assure that the Federal Government pays its fair share of the cost of the health, safety, and education of the children of its employees.

If this support were not necessary on a continuing basis, we would not suggest that a special fund be established. But the district simply does not have the tax base to support the yearly costs of operating the school. Establishing a fund under the control of the Secretary is a much more effective way of dealing with the problem than asking the Congress for a line item appropriation year after year.

Mr. President, I ask unanimous consent that a copy of a letter from the district's school board to the Park Service be entered into the RECORD at this time.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BOARD OF EDUCATION,
GRAND CANYON UNIFIED SCHOOLS,
Grand Canyon, Ariz., August 16, 1982.

Mr. RICHARD MARKS,
Superintendent, Grand Canyon National Park, Grand Canyon, Ariz.

DEAR MR. MARKS: Pursuant to 20 USC 238 section entitled "Payments to School Districts through September 30, 1985, for Educational Expenses for Pupils Living At or Near Grand Canyon National Park on Tax Exempt Realty Owned by United States; Cooperative Agreements; Funding", the Board of Education of the Grand Canyon Unified School District No. 4 requests Eight Hundred Forty Thousand Dollars ($840,000) in order to bring the Federally owned school facilities to compliance with Arizona State Fire Code, Life Safety Codes and other governing codes.

This emergency request is being made in view of the recent Arizona State Fire Marshal's inspection and follow up inspections by the National Park Service Safety Officer.

The dollar amount requested is based on the estimates of Rossman & Partners, AIA Architects, 4601 East McDowell Road, Phoe-

nix, Arizona 85008 who were commissioned by the Board of Education to develop a Master Plan for the district (copies enclosed). Please direct your attention to pages 4 through 17 and pages 64 and 66. These estimates are based on 1980 construction costs. To further document the emergency need for these improvements a copy of the State Fire Marshal's report is attached.

It must be pointed out that since August 2, 1982 the District hired a new Superintendent, a new Director of Maintenance and as a result the minor code violations have already been addressed.

Enclosed are six (6) copies of the emergency request and supporting documentation to be reviewed by the appropriate offices in the Department of the Interior.

If we may be of any further assistance regarding this emergency request please contact John L. Vest, Superintendent at 638-2461. It is imperative that we protect the safety of the students at the Grand Canyon National Park. The assistance of your staff and your own personal efforts in helping our students are deeply appreciated.

Sincerely,

RONALD MELCHER, *President.*
C. MICHAEL VERKAMP, *Clerk.*
CAROL NAILLE, *Member.*
ARDEN KESSEL, *Member.*
JOHN L. VEST, *Superintendent.*

Mr. DECONCINI. Mr. President, I asked for this letter to be included because it indicates the kind of basic problems facing the school district. The facilities are not presently in compliance with Arizona State Fire Codes, Life Safety Codes, and other governing codes. We are not talking about swimming pools, or plush surroundings, or even new buildings. What we are talking about is health and safety and the right to receive an adequate education.

These children, for the most part, are the children of Federal employees—the people who operate and maintain the facilities at the Grand Canyon. The Grand Canyon is not an Arizona monument Mr. President, it is a national monument. It is one of America's greatest tourist attractions. It brings a lot of tourists, and tourist money into this country. All we are asking for is that a very small amount of these Federal revenues, of which millions are collected at the park, be set aside to cover some of the costs of operating and maintaining the school facilities. The Secretary of the Interior simply estimates how much money will be necessary—in addition to the moneys received from the general tax levies, State equalization aid, and the various Federal programs—and expends the funds when they are needed for operation and maintenance. There is no authorization to use the funds for construction.

Mr. President, as I said, all but a small portion of the land within the boundary of the school district is owned by the Federal Government. Less than 2 percent of the property in the district is privately owned. About 10 to 15 percent is held by the State; and 85 percent of the land is managed by the National Park Service and the U.S. Forset Service.

Because so little land is privately owned, the assessed valuation for tax purposes for the district during the 1981-82 school year was $6.7 million. This results in a tax rate of $5.78 per $100. And this rate is projected to increase by at least $1 per $100 for the coming school year. The tax base, such as it is, is eroding. When the Santa Fe Railroad removes its tracks, as planned, it will no longer pay taxes to the district. Last year it paid over $44,000.00.

In the 1981-82 school year, the district had an enrollment of 216 students and 186 of these students lived within the Grand Canyon National Park boundary and were classified as category A for Federal impact aid purposes. The district received $276,000 in impact aid funding and approximately $47,000 in other Federal education funds, for a total of $323,000 in Federal assistance.

Thus, even though over 80 percent of the district's students are dependents of Federal employees who reside on Federal nontaxable land, only 36 percent of the district's total budget was financed by Federal funds. Next year the Federal share will be even less, about 29 percent, because of less impact aid and lower Federal education funding levels. Also, one major misconception should be clarified: The district does not receive payment in lieu of tax assistance. It has not received such assistance since the program's enactment.

It is quite clear the Federal Government is not providing its share of assistance to this school district which has, as its primary purpose, the education of dependents of Federal employees. It should be remembered that if this district did not exist, the children would have to be bused to either Flagstaff, Ariz., 89 miles one way, or Williams, Ariz., 60 miles one way. This, of course, assumes one of those districts would be able to accept them. Busing 4 hours a day simply is not practical and I seriously doubt it would be acceptable to the parents of these children.

Another important point to remember also is that having an adequate school system within the park makes it much easier for the National Park Service to attract quality personnel.

Mr. President, as I have stated, current law authorizes additional Federal; support to the district. In fact these statutes, over a 7-year period, have authorized up to $6 million to supplement the other sources of the district's moneys. However, the only funds which have been appropriated under this authorization have been added by the Senate, at my request. The amounts $500,000 in fiscal year 1979 and $250,000 fiscal year 1980. In fiscal year 1982, the Senate, again at my request, added $1 million to the bill but the amendment was rejected by the House of Representatives. The administration has never requested funding under this authorization and has requested none for fiscal year 1983.

This is a small bill, Mr. President, but it is not small or trifling to this school district. It leaves it to the Secretary to control the fund and to estimate how much will be required to meet the minimum standards of the act. It is roughly estimated that it would take $1 to $2 million over 1 to 2 years to bring the facilities up to the required health and safety standards.

I would ask my colleagues to act on this legislation as expeditiously as possible.●

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3039

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. (a) The first section of the Act entitled, "An Act to authorize the Secretary of the Interior to make payments to appropriate school districts to assist in providing educational facilities and services for persons living within or near the Grand Canyon National Park on nontaxable Federal lands, and for other purposes," approved March 14, 1978 (92 Stat. 154), as amended (20 U.S.C. note following sec. 238), is amended by striking out the matter after the enacting clause through the word "payments" the first time it appears and inserting in lieu thereof the following: "That (a) notwithstanding any other provision of law providing for the disposition of revenues described in this subsection, and under such terms and conditions as may be prescribed by the Secretary of the Interior, payments may be made, in advance or otherwise, from any revenues received by the United States from visitors to Grand Canyon National Park,".

(b) Subsection (c) of the first section of such Act is amended to read as follows:

"(c) For the purpose of this Act, the Secretary of the Treasury is authorized and directed to maintain in a special fund a portion of the park revenues, sufficient for the maintenance and operation of Federally owned buildings, facilities, equipment, real property, and grounds used for school purposes, and for all applicable current Federal, State, and local fire life safety, and building codes, based upon estimates to be submitted by the Secretary of the Interior, and to expend amounts deposited in the special funds under this subsection upon certification by the Secretary of the Interior.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE NOMINATIONS TO BE RETURNED TO THE WHITE HOUSE

Mr. STEVENS. Mr. President, I renew my request for unanimous consent that paragraph 6 of rule XXXI of the Standing Rules of the Senate relating to proceedings on nominations be suspended with respect to nominations unacted upon during the present session, except for the following:

Harry J. Staszewski, Jr. To be a member of the U.S. Metric Board; Frederic V. Malek, to be Governor, U.S. Postal Service; John Van de Water to be Chairman of the National Labor Relations Board; Wendy Borcherdt, to be Deputy Undersecretary for Intergovernmental and Interagency Affairs, Department of Education; and all the following nominations:

COMMISSION ON CIVIL RIGHTS

Robert A. Destro, of Wisconsin, to be a Member of the Commission on Civil Rights; Constantine Nicholas Dombalis, of Virginia, to be a Member of the Commission on Civil Rights; and Guadalupe Quintanilla, of Texas, to be a Member of the Commission on Civil Rights.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, have we received yet the Defense Production Act extension or the productivity bill?

The PRESIDING OFFICER. They have not been received yet.

Mr. STEVENS. Or the Wolf Trap bill?

The PRESIDING OFFICER. They have not been received.

RECESS SUBJECT TO CALL OF THE CHAIR

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

The PRESIDING OFFICER. There being no objection, the Senate, at 1:50 a.m., recessed awaiting the call of the Chair; whereupon, at 2:02 a.m., the Senate reassembled when called to order by the Presiding Officer (Mr. WARNER).

WOLF TRAP FOUNDATION FOR THE PERFORMING ARTS

Mr. STEVENS. Mr. President, with respect for the current occupant of the Chair, I ask unanimous consent that the Chair lay before the Senate H.R. 7293, the Wolf Trap bill.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7293) to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes.

Mr. STEVENS. Mr. President, pursuant to the previous unanimous-consent request, I ask that this bill be passed without amendment.

There being no objection, the Senate proceeded to consider the bill.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WHITE HOUSE CONFERENCE ON PRODUCTIVITY

Mr. STEVENS. Mr. President, I now ask unanimous consent that the Chair lay before the Senate the productivity bill, which is H.R. 7292.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7292) to establish a White House conference on productivity.

Mr. STEVENS. Mr. President, I ask for the immediate consideration of the bill pursuant to the previous agreement.

There being no objection, the Senate proceeded to consider the bill.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEFENSE PRODUCTION ACT EXTENSION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2375.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2375) entitled "An Act to extend the Defense Production Act of 1950; to amend section 719 of such Act to transfer the authorities and functions of the Cost Accounting Standards Board; to establish a Commission on Strategic and Critical Materials Stock Piling Needs; and to establish a White House Conference on Productivity", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "March 31, 1983."

Amend the title so as to read: "An Act to extend the expiration date of the Defense Production Act of 1950."

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. Without objection, the motion is agreed to.

A MINORITY VIEW OF THE 97TH CONGRESS

Mr. ROBERT C. BYRD. Mr. President, this is the last day of the Senate's business before the election recess during this, the 2d session of the 97th Congress. It is appropriate at this time for us to review the progress we have made this term in advancing the public agenda, and look forward to the days ahead to see how we might do better.

In my opinion, Mr. President there has been a dramatic change in the policies and operation of the U.S. Senate in the last 2 years. New party cohesiveness, an unprecedented use of the reconciliation process, and a legislative agenda that had only one primary focus—the budget—have been the tools used to fashion a radically new legislative agenda, one that I believe has contained many misguided policies and employed many misguided procedures.

Although this administration has set an agenda focused almost exclusively on the budget, it is in terrible shape, the worst ever. The economic situation is not much better, and it would be difficult to imagine a gloomier economic prognosis. The recession brought about by current policies has boosted unemployment 38 percent and thrown 3 million people out of work. Housing starts are down 37 percent, auto sales have declined 23 percent in the last 12 months, and the farm economy is in the worst depression since the 1930's. Output of goods and services has declined 1.5 percent since the recession began. The industrial production index has declined 10.33 percent, capacity utilization is the lowest since 1975, and if business failures continue at their current rate, more will fail than in any single year since 1932.

In short, Mr. President, a very limited legislative focus—on the budget—has led, ironically, to a very serious budgetary crisis. Let me review how I think this came about.

For one thing, bipartisanship has taken a back seat in 1981 and 1982,

with the opposition prefering to shape policy in conjunction with David Stockman, not their Democratic colleagues. In the process of creating a party government, the Senate has been polarized, Democrats have been frozen out, and the traditional consultation between parties has been precluded. I am deeply concerned, Mr. President, that in the 98th Congress, the difficult issues facing the country be adequately addressed without the same narrow focus and lock-step partisanship which has dominated this Congress.

Democrats, whether they are the majority party or the minority party in the 98th Congress, reject the level of partisanship which has characterized this Congress, and will work for more centrist, bipartisan congressional policy. From an historical perspective, radical changes in our country's course do invite "party government." But when the radical change offers the country only worse conditions, bipartisan balance can, and must, pull the country onto a sounder course. Policy developed through consensus building is always preferable to that which goes undebated, for the single reason that more people have a stake in its success.

In this Congress, we have witnessed the development of revolutionary new budget procedures. The reconciliation process was used as it had never been used before. In the last 2 years, reconciliation instructions have been multiyear, have included requests for both entitlement cuts and authorization cuts, and have been directed at almost all of the standing committees. In effect, reconciliation used in this manner forces the Senate to consider the whole budget under strict limitations on time and amendments without the traditional committee review or input. The result is a budget defined by David Stockman—not the Congress. At the same time, under the germaneness rule, an amendment dealing with a matter not specifically in the reconciliation bill can be ruled out of order. The overall 20-hour time limitation on reconciliation bills placed another restriction on consideration of authorizations, which in the past were debated separately.

In spite of these limitations, more than 200 program changes were crammed into the 1981 bill, including major reauthorizations for housing and community development, rural housing, Amtrak, Conrail, and other transportation programs, highway safety, TVA, Appalachian Regional Commission, Energy Policy Conservation Act, export administration, and other programs. Reconciliation, which was conceived as a tool to recover funds from appropriations bills after they had been passed, was turned into a process for omnibus, multiyear authorizations.

Ironically, although discussion of substantive issues has been severely restricted by this use of the budgetary process, at the same time our entire legislative process has become much more vast and complex, "fiscalizing" nearly the entire Senate debate with "crosswalks," "targets," and "ceilings." This really represents a kind of reversal of the historic legislative process, as we have known it, with the entire Senate instructing the committees on the general direction they should take. This, in effect, weakens committees and the committee system. It is a process, though, ideally suited to a cohesive policy juggernaut with a limited goal and little regard for debate, hearings, or discussion by interested parties. In 1981, the Senate took approximately 200 rollcall votes on budget issues. More than two-thirds of the recorded votes in the Senate were on budget-related matters.

This singlemindednesss of purpose reflects the administration's agenda, and its singleminded dedication to redesigning America's economic policy with a new ideology. American's have been addressed more often on budget matters than on all other issues combined. To say that the administration—and to a slightly lesser degree Senate Republicans—has staked its political fortunes on the performance of the budget and the economy, would be an understatement.

I am afraid, however, that the "riverboat gamble" has failed, and Democratic efforts to correct the excesses that have been pushed through, have been ignored, vetoed, frustrated, and opposed. When suitable corrective legislation has been suggested by Democrats, it inevitably has been preemptorily rejected, and, in some cases where the majority could not maintain its cohesiveness, reintroduced and passed as a Republican measure. This has happened on issues ranging from unemployment insurance, social security, and Libyan terrorism, to providing a tough Inspector General for the Department of Defense.

A simple look at the Senate agenda illustrates how the partisanship has greatly limited our progress. The percentage of nonsubstantive laws which have passed has doubled. More appropriations bills have been folded into continuing resolutions in the last 2 years (66) than in the previous 5 years (50). The percentage of pages in the CONGRESSIONAL RECORD devoted to debate on budget and reconciliation matters has at least tripled from the average levels between 1975 and 1980. In the cases of the first budget resolution, fiscal year 1983; the 1981 farm bill; and the DOD authorization, fiscal year 1983, the entire bill was either modified or recommitted after Senate Republicans met privately to address the concerns of David Stockman, bypassing the normal committee process, the budget process, and Senate Democrats.

The record is clear, the pattern obvious. The Senate agenda has been primarily a debate on budget numbers. It is an agenda set by an administration that has been extremely reluctant to discuss any other aspects of economic policy, like monetary policy, trade policy, foreign exchange policy, reindustrialization, or international economics. In spite of the shabby use of the process and the intensely limited focus, the program that has been steamrolled through Congress has put this administration, after 20 months, in far worse budgetary shape than we have ever been in.

The national debt has been increased $355 billion in the last 2 years, an increase of 38 percent. It took this country from the beginning of the Republic to 1969 to reach the $355 billion level. It took this administration and its congressional allies only 2 years to reach the same figure.

This "riverboat gamble," the Kemp/Roth tax cut, plus the enormous defense increase, has made a fiasco of the budget.

My interest today, however Mr. President, is not merely to look back; it is to look to the future as well. I am certain my friends on the Republican side are as anxious as I am to use the Senate as it once was used, as a forum for full and open debate on the great issues facing the country. I am certain that they, as well as we, would like to fashion an agenda that truly addresses our major issues, regardless of partisanship or ideology.

I am developing a package of initiatives for the future. Most of these matters are ones Democrats have already worked hard to develop, ones that go right to the heart of the major economic issues facing the country. Among the legislative initiatives under consideration are: The Balanced Monetary Policy Act which I introduced in August with 33 cosponsors. It is the only proposal I know of that would really do something to lower interest rates; a housing stimulus packaged like the Lugar proposal, to help rescue this industry from disaster while promoting tens of thousands of new jobs; and a program to fund energy conservation and development activities such as coal ports.

Any Democratic legislative package should also include a proposal for a National Investment Corporation. It would make affordable credit available to our hard-pressed basic industries for retooling, so that they can once again be competitive in the world market, and offer subsidized loans and other forms of assistance to the so-called sunrise industries which are so essential to the economy's future. Let me emphasize that I am not talking about providing bailouts for unprofit-

able industries, but rather a program which would combine financial help with aid in restructuring industries to make them more productive. The Germans, Japanese, and Swedes have all used national investment corporations to provide their basic industries with affordable credit. I believe this kind of corporation would work well for us, too.

We could pay for this program the same way we did in the Bradley "fairness amendment" to this summer's tax and reconciliation bill. In that amendment, you may recall, we would have deferred a portion of the third year of the tax cut for those with incomes between $46,500 and $78,600. Those with incomes below $46,500 would be unaffected; those with incomes above $78,600 would have had the entire amount of their tax cut deferred. This approach has the added advantage of correcting some of the unfairness of the Kemp/Roth program while helping America regain her predominant economic position.

Mr. President, let me conclude by saying that we Democrats look forward to a less divided Senate, a more bipartisan Senate, a Senate more dedicated to the nuts-and-bolts committee work and floor debate that leads toward consensus and agreement, and away from ideology and partisanship. We need everyone's cooperation to help do the job that needs to be done for America. I can assure all my colleagues that we Democrats intend to play a vital role in the days ahead, joining our Republican colleagues in meeting the challenges before us.

CONCERN FOR FISH AND WILDLIFE RESOURCES

Mr. CHAFEE. Mr. President, The International Association of Fish and Wildlife Agencies is a voluntary organization committed to furthering the cause of resource conservation and management and has been in operation under a succession of titles since 1907. Its present membership includes the fish and wildlife agencies in each of the 50 States as well as Federal and provincial organizations involved in related activities in the United States, Canada, and Mexico.

As a result of its concern for our fish and wildlife resources it has been involved in the continuing controversy generated by the recommendations of the Department of the Army and the President's task force for regulatory relief for changes in the regulation which implement section 404 of the Clean Water Act. This important section of the Clean Water Act regulated the discharge of dredge and fill material in the Nation's waters and is the chief Federal presence in a continuing effort to maintain our ecologically vital system of coastal and inland wetlands.

The attached resolution on the subject was adopted September 21 at the international association's annual meeting at Hilton Head Island, S.C., as further evidence of the nature and depth of that concern and of the association's conviction of the need for action to prevent irrevocable damage to our wetland resources while there is yet time to do so.

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

RESOLUTION NO. 3: THREAT TO WETLANDS PRESERVATION

Whereas, wetlands are critical to the survival of many fish and wildlife species, the maintenance of water quality, groundwater recharge, and flood control;

Whereas, about one-half of the original 150 million acres of wetlands in the coterminous United States have already been destroyed;

Whereas, continued protection of wetlands is critical to meeting obligations of the United States under migratory bird treaties;

Whereas, interim final regulations for the Section 404 program published in the Federal Register on July 22, 1982, and made final on August 23, 1982, authorized nationwide permits allowing discharge of dredged and fill material into nontidal rivers, streams, lakes and adjacent wetland areas above the headwaters and into isolated nontidal waters;

Whereas, these nationwide permits would provide virtually no protection to millions of acres of prime aquatic habitats, including prairie systems;

Whereas, on August 23, 1982, the Environmental Protection Agency requested comment on its Section 404(b)(1) guidelines, and asked whether the jurisdictional scope of Section 404 should be changed or the existing presumption against discharges into wetlands, "retained, revised or eliminated"; Now, therefore, be it

Resolved, That the International Association of Fish and Wildlife Agencies requests the Administration and Congress to retain application of the Section 404 permitting process to all waters of the United States, including wetlands, as currently defined in the Section 404(b)(1) guidelines, and to retain and apply rigorously the existing presumption against discharges into wetlands; and be it further

Resolved, That the nationwide permits for discharges into nontidal rivers, streams, lakes and adjacent wetlands above the headwaters and into isolated waters should be revoked and that permit applications for discharge of dredged or fill material into these areas be considered on an individual basis to insure needed protection of these critical natural resources and associated values.

BILINGUAL EDUCATION

Mr. HAYAKAWA. Mr. President, today I introduce the fifth and final part of a study of bilingual education by Dr. Robert E. Rossier.

If there has been one theme that has run through my legislative efforts in the U.S. Senate, it has been language; more specifically, the English language and its importance to our country and people.

I have introduced legislation to make our bilingual education laws more reasonable and effective. I have attempted to do away with the costly and confusing Federal bilingual ballot. I have sought to amend the Constitution to make English the official language of the United States. And I have prodded the Congress to acknowledge—for the sake of our bewildered non-English-speaking citizens and immigrants—that English is the preeminent language of our land.

Why have I spent so much time speaking about the importance of our common language? Why have I attempted to make the Congress and the public aware of the failure of our current methods of bilingual education? Just what do my efforts mean to the average non-English-speaking American?

Mr. Kenneth M. Smith, Chairman of the National Commission for Employment Policy answered these questions in part when he introduced the Commission's recent report, "Hispanics and Jobs: Barriers to Progress," Mr. Smith said:

> The Commission found that the reasons for the various groups' problems in the job market are largely the same: difficulties with English, low levels of education, and discrimination. Of these, a lack of proficiency in English is the most important. It reduces their prospects for a good-paying job, impedes their educational attainment, and operates as a vehicle for discrimination in the job market.

So, Mr. President, I may be hurt because I cannot communicate with my neighbors who do not speak English and our Nation will certainly suffer as it loses a segment of its population to linguistic ghettos. But the most immediate and painful effect of language inability will always be on the linguistically handicapped person himself—the kid fresh from a bilingual education program, ready to take on the world, who suddenly discovers his opportunities are limited to taco stands or Japanese restaurants. He is the one who will pay the immediate price for our failure in bilingual education.

In conclusion, I earnestly hope that when I leave this distinguished body one of my colleagues will pick up the ball and run with it. Bilingual education is too important an issue to let go unnoticed down the path of hypocrisy and mediocrity.

You can teach a new dog old tricks, but can you teach an old dog new ones? That is the key question with which we must examine bilingual education programs now and in the future. The American bilingual education system must have options left open to it for the future—my bill, S. 2412, provides those options. I urge my colleagues to think about the ramifica-

tions for the future, our future as a nation of immigrants.

I ask unanimous consent that the fifth and final part of Dr. Rossier's paper be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

PROGRAM EXPANSION IN LOS ANGELES

I have suggested previously that the motivating force for the bilingual education movement has not been so much a concern for educational opportunity for students—an objective which is based squarely on their ability to function well in English—but rather on opportunity for bilingual educators (and others) to build empires which will yield lucrative and satisfying power bases within the educational bureaucracy. In Los Angeles the transition from English emphasis special programs for immigrants to bilingual education programs produced explosive growth at the non-teaching, supervisory and administrative levels.

The district had two consultant positions (on teacher salary schedule), one at the elementary and one at the secondary level, during the middle 60's, but the picture changed drastically with the advent of bilingual education in 1968. By the school year 1976-77, a district report showed almost a half million dollars a year ($460,882) being spent for Central Office bilingual management costs alone. Budgeted for that year were a Director (Bilingual/ESL Services Section) at $37,739; two Assistant Directors at $32,899; and eleven Advisors at $20,899, a salary slightly higher than that of the district's highest paid teacher. In addition to the costs listed for Central Office management, $288,362 was budgeted for area bilingual support and $204,968 for Central Office costs for the Chacon Program, a bilingual program funded by the State of California. In all, more than $1,200,000 (out of district bilingual funding of $15,000,000) was budgeted for administrative costs at the area or central office level.

And this was five years ago. Since that time, the position of Director has been elevated to that of Assistant Superintendent at a salary of close to $50,000 a year and salaries for administrative and supervisory posts below this level have been increased substantially, too.

ALTERNATIVE LANGUAGE PROGRAMS

If the bilingual education record is examined carefully, then, little evidence can be found that it has lived up to the extravagant promise claimed for it by its boosters. Instead, as I have attempted to demonstrate, there is considerable information available to convince one that the purported success of bilingual programs has been fictional—pure puffery by bilingual partisans who wish to protect the benefits they receive or hope to receive from the establishment and expansion of these programs.

An important part of this promotional campaign has been the constant effort to stifle the idea that there are valid educational alternatives to bilingual education. The movement has consistently ridiculed and even suppressed any studies of or planning for alternative programs that would even hint that there might be other methods of teaching English to immigrant children. This paper has also presented examples of this suppression in one school district, a very large and important one, and has tried to advance the idea that the only real hope for maximum educational opportunity for immigrant students would come from special programs that emphasize English rather than bilingual instruction.

NEW EVIDENCE

At the time that I was writing this article, unknown to me, a large-scale, extremely thorough review of the literature on the effectiveness of bilingual education was being carried out. The review, published in final draft report form in September of 1981, was written by two staff members in the Office of Planning, Budget, and Evaluation (a section of the United States Department of Education) and provides great support for the key ideas expressed in this paper and especially for the belief that school districts should have the freedom to establish alternatives to bilingual education.

Rather than attempting to address a number of peripheral issues, the principal investigators for the review limited it to answering two central questions: whether transitional bilingual education leads to better performance in English, and whether it leads to better performance in non-language subject areas.

After examing more than 300 documents relating to bilingual education, Baker and de Kanter, the investigators and authors of the published report, rejected the majority of the studies and program evaluations as not being methodologically applicable to the two research questions and based their conclusions on 28 studies that did meet these requirements. Of the large number of studies that were eliminated, the authors stated that this was because "most of the bilingual studies, especially Title VII program evaluations, are of poor quality—." This criticism of Title VII program evaluations echoes that of Troike cited earlier.

While bilingual partisans will attempt to discredit the Baker-de Kanter review as being methodologically defective (as they did with the AIR Study), its conclusions will be difficult to discount and will eventually, I predict, have great influence in changing immigrant education into a more positive force than it is now in the bilingual era.

In brief, Baker and de Kanter concluded that bilingual education had not proven its case: "These findings do not add up to a very impressive case for the effectiveness of transitional bilingual education." They went on to say that there was "—no firm empirical evidence that TBE (transitional bilingual education) is uniquely effective in raising language-minority students' performance in English or in non-language subject areas."

Their most significant conclusion, though, followed logically from their finding that bilingual education could not be considered to be "uniquely effective." This meant, they argued, that there was a need to try other methods—alternatives to bilingual education. They recommended that each school district be given the freedom to decide what kind of special program would be "most appropriate for its own unique setting" because they felt that the prescription of a single remedy at the federal level was not realistic when so little was known about educating language-minority children. Significantly, in March of this year, the Department of Education withdrew its guidelines which had imposed bilingual education on more than 500 school districts throughout the nation. Schools are now permitted to use "any effective approach including total immersion in English, another of the Baker and de Kanter recommendations. The policy change applies only to the federal level, though, and does not affect states such as California which have more stringent bilingual education laws.

While Baker and de Kanter are correct in not recommending a single, specific alternative to bilingual education, this does not mean that there should not be a sense of field and direction in future immigrant education programs. These programs should be organized in consonance with the unique linguistic, social, and educational situation found in each school district but at the same time should be built solidly on principles of language learning which are universal.

LANGUAGE LEARNING PRINCIPLES

There are three language learning principles which I believe should receive prime consideration in the organization of any educational program for teaching English to immigrant students:

1. English (or any other language) can be mastered only by means of a great amount of linguistic interaction in English, not through translation. Although all proficient bilinguals find themselves translating unfamiliar words or phrases at times, oral comprehension and production are seriously impaired if the learner interrupts the normal flow of speech and thought to translate. Accordingly, effective teachers of immigrant students do not have to be bilinguals. What is important is that they understand how language is learned and are good models of English for their students. If teachers are bilingual, they must be very disciplined in their use of translation so that their students do not become habituated to translating from one language to another.

2. While almost all immigrant students can profit from initial language instruction, this will provide only a small fraction of the total language they need to learn in order to reach a satisfactory level of proficiency. For the most part, language teaching provides the learner with information, some of it invaluable, about the language. But information about the language is not the same as speaking and understanding the language. What language is learned from the structured lessons given in the artificial environment of the classroom is usually rudimentary in nature and makes up a very small part of what the student must learn to be able to feel comfortable in the give and take of normal conversation in an infinity of real life situations. For this reason it is imperative that from the beginning immigrant students not be segregated from their English speaking schoolmates for the total school day. Every opportunity should be used to integrate these English language learners into activities, both academic and non-academic, with English speaking students. In all schools that have even a few immigrant students, the total staff, administrators as well as teachers, should understand that they can be an important part of the language learning effort of these students; they need to know that the learning of English is a long term effort which takes place anywhere and everywhere, not just in a room designated as the English language class.

3. As is true with the learning of any body of knowledge or skill, some students learn more rapidly and efficiently than others. Language learning is an individual matter, not a group effort even though students are grouped together in levels and receive common instruction. For this reason, students in a special language program should be integrated into regular classrooms on an individual rather than a group basis. At the elementary school level, certain gifted

learners should spend very little time in the special language program while others, for a variety of reasons, will take longer to reach a level of proficiency that permits them to function in a regular English classroom. At the secondary level, almost all beginning students are able to function in certain basic classes in which language does not play a large part in the instruction; physical education, certain art and music classes, and elementary classes in industrial education and home economics are examples of classes in which students can usually function adequately with a minimum of English. In other subjects, placement should be on an individual basis, taking into account not only each student's English proficiency at that point, but also other factors such as the amount of education in his first language, opportunity for exposure to English outside of school, relative motivation, and various other factors. Above all, teachers of regular subjects should understand that their classes provide these students with the opportunity to improve their English in contrast to the all too common belief that they should remain in their special language program because "language is only learned in special classes labeled English or Spanish."

In sum, immigrant students should be given the opportunity to learn English in the only way that it (or any other language) can be learned—through multiplicity of English language experiences, both in a special language program with special language instruction at first and, as rapidly as each individual can, in a regular class or classes in which English would be learned through subject matter instruction and meaningful but unstructured English language interaction with teachers and classmates. In such a language program, the total school would be seen as a language learning resource to supplement what is taught in the special language program and later, when the learner leaves the program, as a warm, friendly environment in which the learner can receive encouragement and support in his efforts to master the new language.

Because the United States has received great benefit over the years from its immigrants of all kinds and races, it should not now close the door to opportunity to this modern wave of young people from other countries who enter her schools seeking to learn the language that binds us all together in our common pursuit of social and economic wellbeing. Bilingual education has been given more than an adequate chance to prove itself and has failed miserably to help these young people in any demonstrable way. It is time now that other ideas and methods be tried—methods and ideas that put the welfare of the students ahead of that of the adults from whom the ideas come.

DR. ROBERT E. ROSSIER

Robert Rossier has just completed his 30th year in the Los Angeles Unified School District. For almost 25 years of this period he has served as a teacher, counselor, program coordinator, and consultant in programs for teaching English to immigrant students. He has also been a consultant to the Santa Ana Unified School District and in 1978-79 helped in the planning for that district of an alternative program to bilingual education.

The head of a bilingual family consisting of wife Rosa Maria (a native of Mexico and a teacher) and three children, Dr. Rossier has been intimately involved over the years by both choice and necessity with second language learning with family at home, friends in the community, and students in the schools.

Because of his interest in immigrant English language learning in American schools, Dr. Rossier did his advanced university work in the psychology of second language learning, receiving a Ph. D. in Psychology of Education from the University of Southern California in 1975. His dissertation dealt with psychological variables affecting the immigrant student's learning of English. Previously he had carried out a study for his master's degree which produced statistical information about the relative academic performance and scholastic aspirations of immigrant students in Los Angeles schools.

COMMENCEMENT ADDRESS MADE BY CHIEF OF NAVAL OPERATIONS ADM. JAMES D. WATKINS AT MARYMOUNT COLLEGE

Mr. THURMOND. Mr. President, in recent years, America's military strength has become one of our most important concerns. There are two views of a strong national defense: That military strength is a necessity for preserving that which we believe is good—peace and freedom; or that military strength is a terrible instrument of destruction.

Mr. President, my convictions about a strong national defense are well known, and stem from the fundamental principle that peace can best be attained through strength. It is my firm belief that, in a world where good and evil exist, America must have the leadership and resources necessary to insure that our freedoms are preserved.

One of the finest discussions about military strength as a moral question was delivered by the Chief of Naval Operations, Adm. James D. Watkins, at the commencement ceremony of Marymount College in Arlington, Va., on August 22, 1982. Admiral Watkins presents a unique and compelling analysis of the necessity for military strength.

Mr. President, Admiral Watkins is both an exceptional military leader and a dedicated Christian whose desire for peace and freedom for America is unsurpassed. Our country can take comfort in knowing that a man of this caliber is ably leading our Navy.

Mr. President, I ask unanimous consent that Admiral Watkins' commencement address be printed in the RECORD at the conclusion of my remarks so that others may better understand that military strength is in the best interest of the United States.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF ADMIRAL JAMES D. WATKINS

For some 1,600 years the church has taught that war and participation in war can be justified under certain circumstances. That treatment falls generally under the heading of "just war."

I do not propose to involve the "just war" arguments here today but rather I want to share with you some of what a Christian military leader considers as he approaches God and obligations to his country—as a moral man tries to apply the doctrine of what is just and proper in his everyday life.

All of you know, as difficult as the study of ethics may be, it is far easier to study ethics than apply it. So too, it is far faster to read about microchips than to build one. It is easier to read about aviation than to fly a plane. And as many of you know, or soon will know, it is easier to dream of a loving relationship than to make a marriage work. All these things require that we have a useful set of principles and then, once equipped, we can apply them to the particular case at hand. This is difficult stuff, indeed.

Let me begin with a fundamental statement: I am a moral man. I am constantly making choices every day of my life—choices between good and evil. It is a constant battery of choices. Sometimes I must also choose between one "good" and another "good," or between a greater good and a lesser good or even perhaps between two apparent evils. That is a part of life. We do that every day—everyone of us is obliged to make those choices.

What separates the moral person from the rest is that the moral person makes those decisions based on his/her conscience. Let's consider that a bit further.

To understand morality we must acknowledge existence of good and evil in the world. Often it is difficult to recognize the one from the other. I happen to see the new Trident submarine, U.S.S. *Ohio*, as a relative "good" under today's superpower confrontation because it deters ideological adverturism and helps guarantee the religious and other freedoms we enjoy. Its captain and its crew are peace-loving men and consider their mission accomplished if they never execute it, and, as a result, future generations never know war. Others see U.S.S. *Ohio* as an "evil." They see it as an instrument of destruction quite apart from its deterrent role in our national strategy. Here we see David Berlo's classic "meanings are in people." The stimulus is the same, the response is quite different. So who is right?

Fundamentally, at the personal level we are both right. Meanings are subjective—we own them, for better or worse, right or wrong, useful or disfunctional.

Fortunately, there is help when we begin to move outside ourselves into a social context. Because we know that people may not agree on what is good and what is evil, we make laws.

But laws and legal ethics constitute but one side of our coin. A person may be legally guilty of an offense, but morally may be either guilty or innocent. Traveling at 65 miles per hour on the beltway is a violation of the law: I am morally wrong too if I am joyriding, or have a heavy foot because of intoxication, but I may be morally right if I am speeding to the closest hospital because a member of my family, in the seat next to me, has just had an apparent heart attack. Legal ethics and moral ethics are not necessarily the same: They are often very different. And while we are called upon to obey the laws, in order to do so I as a moral person must be grounded fundamentally in the ethics of morality.

But, you say, there is no equivalent code for morality. Where do we turn for answers? We make choice with the best guidance at hand, the guidance of our faith. I must ask:

What do I believe about the meaning of life? What values do I hold? What is important in life? What have I been taught in school, at home and church, and from my peers? Ultimately the choice is mine—and I must arrive at my decision alone. I must live with the consequences of that choice and not be afraid of it.

At that point, for me as Chief of Naval Operations, I put myself humbly before God. Then, I do the best I can with the choices at hand.

So far we have looked at a moral person operating in a world containing both good and evil. Let's look closer at the environment containing those choices of good and evil.

I have to deal with the reality of a threat which would deprive either us or others of peace and freedom. That goes with the territory. Pope John the 23d wrote: "We must remember that, of its very nature, civil authority exists . . . to protect, above all else, the common good of that particular civil society, which certainly cannot be divorced form the common good of the entire human family." It would be unrealistic for me to believe that all people believe as I do, value the same things I do, or share my faith. I happen to be a Roman Catholic Christian and I am under no illusion that my beliefs, values, and faith are universally shared. There are other ways to look at the world, other realities, other competing ways of life. I would like to believe that we would all want to coexist, but that is unrealistic. And if I am to be a guardian of the common good, I must deal with reality as I know it.

And what does the moral person do when confronted with a threat to the common good, especially when he/she has the responsibility to preserve the common good? Choices must be made which, in his/her view, are in the best interest of the common good. For our Nation, we have chosen deterrence over war. We have chosen strength over weakness.

The church does not require pacifism. While we hope, pray, and work for such a world, we do not now ask the lamb to lie down with the lion, nor that we beat our swords into plowshares, when others are doing precisely the opposite.

That would not serve the common good; that would be a failing of wisdom and an abdication of my responsibility as a civil leader. Pope Paul the 6th, speaking to the United Nations in 1965 acknowledged: "As long as man remains that weak, changeable and even wicked being he often shows himself to be, defensive armaments will, alas, be necessary."

But it must be said that when considering the threat and the common good, decisions do not come easy. There are so many questions to consider and so many sides of those questions—it is too simple to say "either/or." None of the answers are clear. The questions arise from that vast middle gray area and consequently the answers are found there as well. I wish it were more clear—the making of these decisions, but it isn't. For that reason I have gathered around me the best minds available; we get the best research, the best intelligence, the best possible planning—and some prayer too.

It may surprise you to learn that there is a senior officer prayer group in the Pentagon. It doesn't surprise me because I know and work with these people. They also have to wrestle with the threat and recommend proper responses to the threat. We take our responsibilities very seriously.

The Vatican II Council observed: "All those who enter the military service in loyalty to their country should look upon themselves as custodians of the security and freedom of their fellow countrymen; and when they carry out their duty properly, they are contributing to the maintenance of peace."

That leads me to my final point. The responsibility of the Chief of Naval Operations is awesome. Few have more responsibility. As a God-fearing man, who believes and has the responsibility of a great many decisions, I find that very humbling, indeed. I think about it every day.

I think about the half million active duty men and women who wear the Navy uniform in the service of our country. I think about their families and loved ones, and the many people who are touched by their lives. I think about our reservists, the people who selflessly give so much of themselves and their personal time. I think about the safety of our ships and aircraft—for their safety is tied directly to that of our sailors and airmen. I think about our arsenal of weapons and I think about what the world would be like if we did not have them.

But we do—they do exist—and that is the reality with which I must deal. And it is my responsibility to deal with it—in a world containing good and evil—in a world where my options are anything but clear. But I have the responsibility and I am a moral man.

Each of you in your own lives face similar decisions. That is part of living. God has given you intelligence and entrusted a particular part of his world to your care. Where will you go for answers to the ethical questions you face? Just as important, what kind of example will you set when others around you look for special guidance in sorting out their own ethical problems?

I submit that like Dorothy's shoes in "The Wizard of Oz," you already have the answers. They are rooted in your faith and in a well-developed conscience. They were annealed and burnished here at this fine college. Look there often for help—and pray.

Thank you and God bless.

COMMENDATIONS TO SENATORS ON CRIME FIGHTING LEGISLATION

Mr. HEFLIN. Mr. President, I would like to commend the great efforts of Senator STROM THURMOND, the chairman of the Senate Judiciary Committee, and Senator JOE BIDEN, the ranking minority Democrat on the Judiciary Committee for their tireless efforts to fight crime. I was privileged to work with them at the committee level and on the floor of the Senate in the successful crime fighting package that has now passed the U.S. Senate. These two great leaders have put together the most significant crime fighting package in modern times.

I would like to pay tribute, also, to two great crime fighters who are not members of the Senate Judiciary Committee, namely, Senators LAWTON CHILES of Florida and SAM NUNN of Georgia.

LAWTON CHILES has stood on the floor of the U.S. Senate almost every day for the past 3 months decrying crime and the need for tough laws to deal with criminals. He has been a superb crime fighter. No Member of the Senate has fought harder to solve the criminal drug problem of the United States than Senator CHILES of Florida. He knows first-hand about the problems of crime and drugs in the State of Florida and has warned the rest of the Nation that these evils will beset the rest of the Nation in the same way that Florida has suffered unless the Congress toughens our drug and crime laws. Every law enforcement officer in the United States should give LAWTON CHILES a salute for his untiring efforts to curb crime.

My neighbor, SAM NUNN, has been the stalwart of Congress in fighting crime. No one in the U.S. Senate has devoted the time and thought to fighting crime like SAM NUNN has. As a crime fighter Senator NUNN has no peer. The U.S. Senate should give him a standing ovation for his knowledgeable efforts to curb two ills of modern day society—violent crime and drug abuse.

When the history of Congress is written, the names of CHILES and NUNN must head the list of crime fighters.

EXECUTIVE COMPENSATION

Mr. PRESSLER. Mr. President, the recent takeover battle between Bendix, Martin Marietta, and United Technologies has increased the attention directed toward what should be a major corporate embarrassment, the compensation of corporate executives.

Bendix announced during the takeover struggle that the corporation had entered into employment agreements with 16 of its top officials. These agreements commonly termed "golden parachutes," provide that the executives will be guaranteed their current salary and other compensation at a cost of some $15.7 million for 3 years after any change in control of the company. Of this amount $4,025,000 will go to Bendix Chairman William Agee over 5 years, even if he does not work a single day of that time.

The whole issue of executive compensation is a controversial one in these difficult economic times. Workers all over America, both in the private and public sectors, have had their salaries frozen or reduced. Yet despite unprecedented concession by union and nonunion workers, most top executives of the largest American corporations, have continued to receive substantial pay raises. In face, average executive compensation in the private sector increased by more than 10 percent last year.

Among the worst offenders have been corporate officials in the struggling automobile industry. Although the auto industry is facing its most serious crisis since the invention of the

car, top executives of these companies are, for the most part, receiving raises on their already exorbitant salaries. The chairman of Ford Motor Co., Phillip Caldwell, received a 10-percent raise last year at the same time the company was asking the United Auto Workers to make major bargaining concessions. Another automobile company, General Motors, was forced to abandon implementation of its rewritten incentive plan after complaints from outraged union officials. Little wonder that many Americans are skeptical about claims of "corporate responsibility."

There is no question that "golden parachute" agreements and hefty salary increases are examples of self-interest—those who make corporate compensation policy are also the ones who benefit from that policy. But the problem is not merely a moral one. These lavish arrangements should make Congress more cautious whenever it is asked to consider granting new tax incentives to big business.

Many of the same corporate officials who fought the hardest for special tax breaks and other advantages arragantly are increasing their salaries at the expense of their companies and stockholders. They have argued vigorously that without such tax advantages their companies cannot survive. Congress might need to look instead at how to tax the outrageous compensation that corporate officials receive.

I would not argue that the people who run America's large corporations are not deserving of competitive salaries. Their jobs are demanding and difficult. I should also point out that some corporate executives have taken cuts in pay and should be commended. However, the majority of large corporations cannot continue to expect concessions from their lower-paid workers and from the Federal Government while making no sacrifices of their own. I am afraid that if big business does not acknowledge the realities of our troubled economy, it is in danger of losing the patience and support of the American people. I would prefer that big business policed itself in this matter, but the large corporations are in danger of having the American people demand that Congress assume that role.

THE UNEMPLOYMENT CRISIS

Mr. CANNON. Mr. President, I am compelled to speak out today on an issue that is perhaps the most serious issue this country has faced in all my years in the U.S. Senate.

Today, we have estimates that the unemployment rate in this country will soar to 10 percent by the end of this month, leaving more Americans out of work now than at any time since the Great Depression. In the week ending September 8th, more than 703,000 Americans filed claims for unemployment compensation, and there is every indication that the unemployment rate will rise even further before the current recession bottoms out.

For the last year and a half, there has been an increasing feeling of disquiet and concern in the minds of many Americans about the social and economic system in which we live—a system that maintains us as a people, provides us with a life that is satisfying, and gives meaning to our lives. As long as Americans know that the opportunity for employment is available for everyone who wants to try, the American dream is real and true for them.

Unfortunately, the present administration has been unable to address the issue of unemployment with any sense of real commitment. It prefers to blame the problems of domestic policy on another party, or another decade, without providing any workable alternatives of its own. We are told on evening television commercials that the solution to the unemployment problem is as simplistic as the question: "Should we go back, or stay the course? Go back or stay the course?" We are told by administration officials with a collective wringing of hands and with fingers pointed at previous administrations that the problems we face today are the result of "Spend, spend, spend, and tax, tax, tax."

Ironically, for an administration coming to office vowing to cut Government spending and taxes, the Reagan administration has turned out to be the biggest deficit spender of all. In fact, between calendar years 1947 and 1981, Congress appropriated more than the President requested only twice, and Democratic Congresses normally appropriate less than Republican Presidents ask for. Ironic, too, that this administration has pressed so hard for a constitutional amendment to balance the budget, yet has offered a most imbalanced budget—with not only the biggest deficit but also the biggest tax increase in American history.

The following tables, which were recently prepared by the House Democratic Study Group presents this point quite clearly:

I ask unanimous consent that they be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

FEDERAL SURPLUS AND DEFICITS SINCE WORLD WAR II

[Dollars in billions]

1981	339.0	340.0	+1.0	+.3
Total	5,159.4	4,988.9	170.6	−3.3

Note: These figures are compiled on a calendar-year basis, and compare the total amounts requested by the President during each session of Congress with the total amounts appropriated by Congress during that session. The totals include all appropriations—regular annual, supplemental, and deficiency.

Mr. CANNON. The administration would have us believe that the only way to cure inflation is to tolerate high levels of unemployment. But full employment is not inflationary as the administration would have us believe. It is just the opposite. A healthy economy helps everybody. A sick economy, that is, one of low growth, high unemployment, and idle factories, is inflationary because goods and services, within limited productivity, drop during such periods. Per unit costs rise. Incomes, such as those on welfare and unemployment compensation, are maintained with zero output.

Revenues fall during these periods of time. Deficits and national debt increase. Investment in business slackens and so we have a sick economy. Full employment, however, would help taxpayers because taxpayers today are paying over $50 billion for welfare and unemployment programs. This is an unnecessary waste, so taxpayers are not benefited from unemployment. They are benefited when persons have to work for what they earn. It certainly helps all of us in the reduction of crime, disease, and social instability, which affect all of us.

Too much emphasis is being placed on financial and monetary phenomena and not enough on real factors such as jobs and output. By the middle of this year, national officially counted employment had reached 9.8 percent—the highest unemployment rate since 1941. Unemployment in the construction industry was 20.3 percent., For agricultural workers, it was 13.8 percent. The manufacturing industry has been particularly hard hit, with major job losses recorded in every single U.S. manufacturing industry from mid-1981 to mid-1982. Since the last good year in the auto industry—1978—34.9 percent of its total employment has been lost. The steel industry, now operating at a feeble rate of well below 50 percent of capacity, has lost 24 percent of its jobs in the same period. Overall, the current blue-collar unemployment rate reached 14.4 percent. For minorities, the unemployment rate at midyear hit a record 18.5 percent for blacks and 13.9 percent for Hispanics, while overall teenage unemployment levels at midyear rose to 24.1 percent.

The impacts of the administration's economic policies are even more clearly demonstrated by the impact it has had on my own State of Nevada, where unemployment rates continue to rise and where the recession has yet to bottom out.

I ask unanimous consent that a table showing unemployment in the State of Nevada be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

UNEMPLOYMENT, STATE OF NEVADA

	March	April	May	June	July	August
Statewide:						
Number	40,100	41,900	42,300	45,400	48,400	50,100
Percent	8.3	9.0	9.2	9.0	9.8	10.6
Clark County:						
Number	23,700	25,600	26,500	28,800	30,200	31,300
Percent	9.2	9.9	10.1	10.0	10.7	11.5
Washoe County:						
Number	9,200	9,100	9,000	9,300	10,400	10,700
Percent	6.1	7.0	7.2	7.5	8.4	9.3
Balance of State:						
Number	7,200	7,200	6,800	7,300	7,800	8,200
Percent	9.3	9.5	9.6	8.0	8.9	9.6

Mr. CANNON. Fortunately, the Senate yesterday took important steps to pass the Training for Jobs Act, which will serve as a substitute to the CETA program. It is a telling illustration of this administration's lack of commitment to full employment that it first cut back on the CETA program, and then originally opposed the Training for Jobs Act.

A dynamic, modern economy must constantly be adapting to changes in technology, consumer tastes, prices, and other aspects of the economic environment. Effective and well-designed employment and training programs can help reallocate human resources to regions, occupations, and industries where they will be most productive. Employment and training programs offer the hope of displaced workers becoming productive.

So the question should not be the simplistic "go back or stay the course?" Rather, the questions posed should be: "When is this administration going to put Americans back to work? When is this administration going to submit a balanced budget? When is this administration going to offer tax equity for all Americans and not just for the superrich? How much longer will average Americans have to wait before the recession ends and economic justice is available to everyone?"

It goes without saying that until the administration starts providing some very real answers, instead of raising irrelevant questions, the unemployment problems in the country will continue and will likely increase.

BALANCED BUDGET AMENDMENT

Mr. HATCH. Mr. President, with the balanced budget amendment scheduled for a vote today in the House of Representatives, I ask unanimous consent that certain articles from the Daily Herald, Provo, Utah, be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Provo (Utah) Daily Herald, Feb. 24, 1982]

FORCING U.S. TO BALANCE BUDGET

The sense of frustration over the soaring federal debt is building pressure in the country for adoption of a constitutional amendment requiring a balanced budget.

When a President as dedicated to economy as Ronald Reagan is obliged to project a $91.5 billion deficit in his first budget, the situation obviously is crucial.

The Consitution provides two routes to amendment and both are being employed to bring the issue to a head:

1. Two-thirds of both houses of Congress may propose amendments. Via this approach, Senate Joint Resolution 58 for a balanced budget/tax limitation amendment has passed the Senate Judiciary Committee 11 to 1 and awaits debate on the Senate Floor. An identical proposal has been introduced in the House.

2. Two-thirds of the states can apply for a convention to propose amendments. Just last month Alaska became the 31st state to call for a constitutional convention to mandate a balanced budget. Action by only three more states would set this machinery in motion for the first time in history.

In either route the proposed amendment must be ratified by three-fourths of the states (38) to become part of the Constitution.

Only eight times in the past 52 years has the budget been balanced—four under President Harry Truman, three under Dwight Eisenhower, and in Richard Nixon's first year in the White House, 1969.

In that period, the national debt has risen from $16.2 billion ($312 per capita) in 1930 to more than $1 trillion (over $4,400 per capita) in 1982, having surged from the half-billion mark in the past seven years.

It took 173 years—from the founding of the Republic to 1962—for federal spending to reach a yearly total of $100 billion. Not even in World War II did we spend that much in a single year. Since then the stops have been pulled . . . and spending has skyrocketed all the way to the $757 billion Reagan proposes for fiscal 1983.

With good intentions, Congress passed the Budget Act of 1974, but as Utah Republican Sen. Orrin Hatch said, this "has done absolutely nothing to control the debt."

Congress next tried a statute—Public Law 95-435 of 1978 requiring that "beginning with fiscal year 1981, total budget outlays of the federal government shall not exceed receipts." That didn't supply the necessary discipline either.

Fifty-one senators (16 more are needed) have indicated support of S.J. Resolution 58 of which Hatch is the prime author. Forty-eight senators are co-sponsors. The next step is passage by both houses of Congress by a two-thirds majority.

Sponsors hope to bring the issue to the Senate floor in the weeks ahead. Approval

by that body would put double pressure on the House in view of the state move for a convention.

S.J. Res. 58 requires an annual budget with receipts greater than outlays and prohibits Congress and the president from spending more than budgeted unless a specific dollar amount of deficit be approved by 60 of 100 senators and 261 of the 435 representatives.

Further, it limits tax receipt increases within national income growth for the previous year, allows Congress to waive requirements during a declared war, and bars shift of the burden of government spending to the states.

Polls have shown a substantial majority of Americans support a balanced budget/tax limitation amendment. President Reagan has favored the concept.

If it takes a constitutional amendment to enforce fiscal responsibility, then it's time to accelerate action in that direction.

[From the Provo (Utah) Daily Herald, July 5, 1982]

LET'S "OK" BUDGET AMENDMENT

Were it not for interest payments on the trillion-dollar-plus national debt, the federal budget could be in balance rather than running large deficits.

This often-overlooked fact stands in bold relief as debate proceeds in Congress on a proposed constitutional amendment to require a balanced budget.

In fiscal 1983 projections, it is estimated that interest on the debt may be close to $134 billion. The '83 deficit is budgeted at $104 billion, but the Congressional Budget Office says it might be closer to $116 billion.

Interest payments represent 17.5 percent of the '83 budget, a jump from 13 percent in 1980 and approaching twice the 9.9 percent in 1970.

Sen. Ted Stevens, R-Alaska, told the Senate recently the debt now stands at $1.08 trillion.

How much is a trillion dollars? That much money, Stevens said, would buy more than 75 percent of the nation's single family homes; or, if given away at the rate of $4 million a day since the birth of Christ, it wouldn't yet be depleted.

What the awesome debt is doing to the economy is of prime current concern. For example:

The heavy interest outlay, already mentioned.

The debt and deficits as a major factor in keeping interest rates high, hampering economic recovery and discouraging companies from investing in new plant and equipment.

Its tendency to crowd out other borrowers from the money market.

The Wall Street Journal recently surveyed leading economists and found most predict little if any, drop in the interest rates this year.

Stevens cited an article by U.S. News & World Report which claimed the mounting competition from Uncle Sam for available credit means that only better-quality corporations and other borrowers will be able to get funds.

The cost of the national debt has become a highly-significant item in the federal budget. Twenty years ago the government paid only $8.3 billion for interest. This had climbed to nearly $19 billion in 1970 and reached $74.8 billion in 1980 on the way to the $134 billion projected for 1983.

And as the deficits grow so does momentum for a balanced budget constitutional amendment. President Reagan has recommended it. The measure, with Sen. Orrin G. Hatch, R-Utah as main sponsor, is getting its first test in the Senate.

To become part of the Constitution an amendment must be passed by two-thirds of each chamber and subsequently ratified by 38 states.

If Congress doesn't initiate the action, it could come from the states. Since 1975, 31 legislatures have passed resolutions calling on Congress to convene a constitutional convention to write a balanced budget amendment. Only 34 states are needed to force such action.

This puts extra pressure on Congress to act on its own. So does red ink spending, with only one balanced budget in 22 years and only eight in the 52 years since 1930—mighty convincing evidence that something needs to be done.

The Herald believes the balanced-budget amendment should be passed.

[From the Provo (Utah) Daily Herald, Aug. 17, 1982]

WE MUST HAVE A BALANCED BUDGET SOON

America's preoccupation with a balanced budget amendment to the Constitution has gained intensity in recent weeks, leading toward a possible autumn showdown in the House of Representatives.

Although giving high priority to a balanced federal budget at their just-concluded Oklahoma convention the nation's governors declined by a single vote to support a constitutional amendment to enforce it.

Yet their test vote—on a simplified alternative to the U.S. Senate-passed amendment—was 26 to 10 in favor, barely under the three-fourths majority requirement of the National Governors Conference.

The Senate passed its measure 69-31 Aug. 4 with two votes more than the necessary two-thirds margin. The proposal would require Congress to adopt balanced yearly federal budgets, allowing deficits only in wartime or when both houses give three-fifths majority approval. To raise the national debt also would need a three-fifths majority vote.

Momentum for an amendment has been building in recent years in the face of soaring deficit spending which has doubled the national debt in the past seven years to beyond the $1 trillion mark. The budget has been balanced only eight times in half century and only once in the past 22 years.

The government was debt-free in 1835 and owed only $16.2 billion ($312 per capita) in 1930, whereas today's massive debt pro-rates to about $18,000 per family according to administration figures.

As for spending, it took 173 years—from 1789 to 1962—for federal outlays to reach a yearly total of $100 billion. In the 20 years since, expenditures have skyrocketed all the way to the $761.5 billion budgeted for fiscal 1983 which begins Oct. 1.

The awesome '83 deficit is figured at $104 billion by the White House, largest in history. Congressional experts say it will go much higher.

Equally appealing, fiscal '83 interest of the national debt is estimated at $134 billion, says U.S. News & World Report. Annual interest has soared all the way from $8.3 billion in two decades.

The enormous interest outlay currently makes the difference between a balanced budget and huge deficits. Massive federal borrowing is hampering economic recovery and helping to keep interest rates high.

Surveys consistently indicate three of four Americans want a constitutioal restraint on federal spending. President Reagan supports an amendment saying only "a thin wall of wavering willpower stands between us and ruin by red ink."

Meanwhile, via another amendment route provided by the Constitution, 31 state legislatures have launched a separate balanced budget initiative. Only 34 are needed to set "constitutional convention" machinery in motion for the first time on record.

By either path the amendment must be ratified by three-fourths of the states (38) to become part of the Constitution. Congressional action presumably would take precedence over the states' initiative.

The Senate having passed a balanced budget proposal the scene shifts to the House where an uphill fight is forecast. The House version is bottled up in the Judiciary Committee but observers believe political pressures will spur a floor vote before the Nov. 2 election.

Arguments advanced against the amendment are varied. Though economic strength is at the very heart of the American system, some say inserting "economic theory" would "trivialize the Constitution."

The Senate vote, some claim was an election year cop-out by lawmakers unwilling to say "no" to excessive spending. Be that as it may the sad red ink record cries out for some form of imposed discipline.

Some argue a statute would be sufficient to force a balanced budget. But in 1978 Congress passed Public Law 95-435 requiring that spending not exceed revenues as of 1981. The law has been ignored.

Skeptics say we shouldn't tinker with formulas of the Founding Fathers. Yet 26 constitutional amendments are in effect. Moreover Washington Jefferson and Madison among other, spoke out forcefully against public debt.

Notwithstanding the various arguments, what better choice exists in the continuing budget crisis than a constitutional mandate? Fiscal responsibility must be restored.

The Herald believes the House of Representatives by all means should pass the amendment to start the ratification process in the states. The amendment-conscious, heavily taxed public is entitled to a chance to support or reject the idea through their state representatives. The ratification process takes years. Supporters say it could be adopted by the 1986-87 budget process at the earliest.

If Congress meantime proves it can balance the budget without a constitutional amendment perhaps states may have no need to act. But if the budget makers continue to add deficit to deficit, than the amendment machinery will be available to force them into line.

[From the Provo (Utah) Daily Herald, Apr. 6, 1981]

NATIONAL DEBT'S APPROACHING $1 TRILLION MARK

(By N. LaVerl Christensen)

First of a series

The United States national debt is projected to reach $1 trillion before the end of the year. That's a thousand billion dollars!

At that figure, the government will owe about $4,415 for every man, woman and child in the country—all 226,500,000 of them.

If the amounts seem incredible to today's generations accustomed to astronomical figures, they'd shock the frugal Founding Fathers! George Washington and Thomas Jefferson, among others, counseled strongly

against burdening posterity with major debt accumulations.

The whopping national (federal) debt—most of it incurred in the past half century—is the amount owed by the government from borrowing to cover deficit spending.

It does not include obligations of states, counties, cities, individuals and corporations; nor interest on the national debt.

Fed by enormous budget deficits, the debt has more than doubled in the inflation-ridden peacetime years since the Vietnam War.

It is projected by the Reagan Administration to reach $958 billion in April 1987 .4 billion by Sept. 30 (end of fiscal year 1981), and $1 trillion sometime in November or December.

A burdensome byproduct is the strain interest on the debt places on the federal budget. Interest now constitutes the third largest outlay—behind retirement—benefit programs and national defense.

It is projected at $94.1 billion for the current fiscal year, up from $74.8 billion for fiscal 1980— and will soar to $106.5 billion in 1982 although this could be sliced to some extent by Reagan budget cuts.

The interest figures, quoted in the Congressional Record, are from projections made by the former Carter Administration in submitting its tentative '82 budget last January.

You get a realistic idea of the size of the interest bill when you realize the figure for the current year amounts to about $300 million for every weekday of the year (Sundays excluded) . . . and note that as recent a 1960 the entire federal budget was only $92.2 billion.

Many have argued in Congress that deficit financing is a key cause of high interest rates and the inflation level which may hit double digits in 1981 for the third straight year.

The inflation rate, at 9 percent in 1978, rose to 13.3 in 1979 and settled slightly to 12.4 percent last year—the worst inflation since 1916-19 during World War I when the rate exceeded 10 percent four consecutive years.

President Reagan's supply side economics and his drive to balance the budget by 1983 or 1984 depart from policies generally practiced in the past few decades.

To be sure stout defenders of the red ink rationate and Keynesian spending theories widely embraced in the past half century remain.

Many lawmakers also equate appropriate debt levels with the Gross National Product. Sen. Robert C. Byrd, D-W. Va. reminded senators recently that "the public debt has been falling in terms of the GNP." In 1960 the public debt stood at 56.9 percent of the GNP, he said. "Twenty years later it stands at about 35 percent."

During the February congressional debate over raising the debt ceiling from $935 to $985 billion, Sen. Russell B. Long, D-La. noted that in 1946 total public and private debt was 189 percent of the GNP. But by 1979, the percentage had declined to 178 percent though the figures had climbed dramatically.

(The debt limit—raised 31 times in the past two decades—was elevated to $985 billion to accommodate spending commitments of the Carter Administration for the current fiscal year. It's a foregone conclusion the limit will have to be raised above the trillion-dollar mark early in fiscal '82 which begins Oct. 1.)

Senator Long quoted Treasury Department figures as showing the private debt increased from 73 to 138 percent of the Gross National Product in the 1946-79 period—almost double. "But the federal debt has declined from 110 percent of the GNP to 28 percent."

While deploring high interest rates and conceding "It would be good to retire the federal debt . . . pay it off completely," Long said that in the over-all perspective, the trend has been toward a "lesser debt as a percentage of wages and salaries and the GNP."

Congress, with the constitutional responsibility for the budget, currently is debating spending cuts proposed by President Reagan and Budget Director David Stockman to slice $48.6 billion from the Carter '82 budget and $6.4 billion from current year outlays.

The new regime has set a budget ceiling of $695.3 billion for fiscal '82. But even this figure projects a $45 billion deficit.

[From the Provo (Utah) Daily Herald, Apr. 7, 1981]

U.S. "DEBT" PAYMENTS NEARING $100 BILLION

(By N. La Verl Cherstensen)

Second of a series

America was 200 years accumulating a national debt of a half-trillion dollars. Now, just six years later, the debt is approaching $1 trillion—albeit today's inflation-devaluated dollars "aren't what they used to be."

The colonial government issued $2 million in paper money in 1775, an initial step toward financing the Revolutionary War.

That and further war obligations eventually were paid off. But new generations brought new debts, with the curve sweeping sharply upward in recent decades.

In 1975, Treasury records show, the federal debt moved from $475 to $534 billion, breaking the half-trillion-dollar barrier. Next November or December it is projected to reach $1 trillion despite the new Reagan regime's commitment to reverse the deficit spending tide.

How does a well-resourced nation like the U.S. find itself with so awesome a debt, now requiring annual interest payments approaching $100 billion?

Obviously the Founding Fathers didn't intend debt as a "business as usual" pattern. In 1970 the first Congress under the Constitution charted a program for repaying the $76 million incurred by the central government and the colonies during the Revolution.

That same year, James Madison wrote in a letter to Henry Lee: ". . . a public debt is a public curse . . ."

And in 1796, George Washington counseled in his farewell address:

". . . Cherish public credit . . . use it as sparingly as possible . . . avoiding like wise the accumulation of debt . . . in time of peace to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear."

By 1835, under President Andrew Jackson, all obligations had been paid—the government was debt-free! Indeed tariffs and proceeds from sale of public lands had built a small surplus.

The Civil War (1861-65) changed the picture for the nation of 33 million people. Spending in four years exceeded federal outlays for the entire previous period of national independence.

Yet with the revenues generated, including an income tax, the debt was held to $2.7 billion—a huge sum in those days.

Successive administrations cut the debt to $1.12 billion by 1890. The level was at $1.23 billion in 1916, but World War I involvement boomed it to $25.5 billion in 1919.

Eleven years of budget surpluses whittled the national obligation to $16.2 billion ($312 per capita) by 1930. Until that time, a conscientious effort evidently was made toward retiring the debt.

Then a turning point: The economic depression of the thirties followed by World War II started the nation on a red ink spending course which has seen only eight balanced budgets in 51 years.

It was in 1929 that British economist John Maynard Keynes advanced his concepts of broad government spending to promote jobs and high level national income. Keynesian economics apparently were put to work in this country in President Franklin D. Roosevelt's "New Deal" to counter the depression. The national debt went to $43 billion by 1940.

World War II accelerated spending and pushed the federal debt to $269 billion in 1946 ($1911 per capita). Twenty years later the U.S. was well into the Vietnam War with a debt level of $316 billion that climbed to $458 billion in 1973, the year that war ended.

It had taken 173 years—from the founding of the Republic in 1789 to 1962—for federal spending to reach a yearly total of $100 billion. Not even in World War II did we spend that much in a single year.

The spending base was broadening now, however. Commitments expanded for social welfare programs, grants to states and localities by a generous Congress, defense, and interest on the debt.

Government outlays soared past $200 billion in 1971, $300 billion in 1975, $400 billion in 1977, and $500 billion in 1980. Spending of $662 billion is projected for fiscal year 1981 and the Reagan Administration is hoping to reduce the Carter regime's budget of $739 billion for fiscal year 1982 to a ceiling of $695.3 billion.

Annual deficits, meanwhile have pushed the debt all the way to $935 billion as of Jan. 30, 1981, according to Treasury figures quoted in the Congressional Record. That amounted to about $4,125 per capita.

Inflation, which has shrunken the dollar's value, has accounted in part for the astronomical figures. The Consumer Index of November 1980 showed the 1967 dollar was worth only 39.7 cents at that time.

The budget last was balanced in 1969 in the Richard Nixon presidency. The seven other balanced budgets in the half century included three under Dwight Eisenhower and four under Harry S. Truman.

[From the Provo (Utah) Daily Herald, Apr. 8, 1981]

CAN U.S. DEBT BE BRIDLED?

(By N. La Verl Christensen)

Third in a series

President Reagan is committed firmly to halting deficit spending and balancing the federal budget, he hopes by 1983.

Ironically though, he had to ask Congress to raise the borrowing limit to $985 billion to cover spending commitments by the previous Carter Administration through Sept. 30, the end of fiscal '81.

Most of the 31 debt limit increases of the past two decades have been voted perfunctorily, with conservative lawmakers, mostly from the Republican minority, registering protest votes.

Not so this year with a GOP majority in the Senate. Democrats who had controlled both houses of Congress for a quarter century, forced a lengthy debate before yielding to the Republicans. The vote was 73-18 in the Senate; 304-104 in the House.

They accomplished the spending authorization—raising the debt limit by $50 billion so the government could pay its bills. But debate also provided insights on deficit financing under which the budget has been balanced only twice in the past 24 years—1960 and 1969.

Sen. William Roth, R-Del. summarized: "The plain fact is that we now must pay the bill for the extravagance of the past."

Registering his continuing opposition to raising the debt ceiling, Sen. William Proxmire, D-Wis. declared massive borrowing results in "higher interest, more inflation, and bigger spending and deficits."

"Just in the last four years," said Sen. Orrin G. Hatch, R-Utah, "the federal budget has jumped from a little over $400 billion to $739 billion (Carter budget for fiscal 1983); the national debt from a little over $650 billion to almost a trillion dollars; and interest on the debt from $42 to $100 billion in just four or five years.

(The national debt is projected to reach $1 trillion in November or December, about $4,415 per capita.)

Sen. Strom Thurmond, R-SC, said a balanced budget "is a goal we absolutely must move toward . . . with unwavering discipline. The future economic survival of our nation depends on it."

Thurmond told of Reagan's desire to end red ink spending and quoted the President as saying: "I intend to be the first president in history to come to Congress and ask a reduction in the debt ceiling."

The veteran senator said inflation is caused "by monetization of the debts—excessive creation of money—through the Federal Reserve System purchase and handling of federal debt instruments."

Sen. William Armstrong, R-Colo., said the $50 billion debt limit increase amounts to "half of everything Americans will save this year." To dramatize the interest burden on the debt. Armstrong said it would require all taxes paid this year by 26 states (which he named) to meet the interest obligation.

Democratic Sen. Robert C. Byrd of West Virginia, in a subsequent statement, explained that the public debt has declined in terms of the country's gross national product.

"In 1960, with the national debt at 56.9 percent of the GNP, the entire productive capacity of our economy would have had to work more than six months to retire the debt." Byrd said. "In 1980 the debt stood at about 35 percent of the GNP and theoretically it could be retired in just over four months.

Sen. David L. Boren, D-Okla. expressed concern at the heavy outlay for interest on the debt and said if interest rates go higher the burden could reach levels beyond the government's reasonable ability to pay.

He quoted economist Richard Russell as saying: "If the U.S. government were a corporation it would be bankrupt."

In the House, Rep. William Dannemeyer R-Calif., observed that some trivialize longstanding conservative concern with the debt, suggesting, "We only owe it to ourselves." This type of thinking ignores "the rising cost of servicing the debt and the profound economic consequences of federal borrowing," he said.

(Interest on the debt is projected at $94.1 billion for the present fiscal year and at $106.5 billion for fiscal 1982. Figures from Carter Administration estimates of Last January.)

Rep. Clarence Brown, R-Ohio applauded "rediscovery" of supply side economics and said: "To fight inflation, unemployment and rising debt we need a program that casts aside old-school Keynesian economics and puts in its place incentives to work, save, invest, and produce. . ."

Rep. Elliott Levitas, D-Ga., opposed debt ceiling increases and commented: "We are indeed charging fur coats to our grandchildren." Levitas added: "The time has come to say 'enough is enough'."

[From the Provo (Utah) Daily Herald, Apr. 9, 1981]

WE MUST ATTACK BUDGET PROBLEMS WITH DILIGENCE

(By N. La Verl Christensen)

Last of a series

Two attitudes obviously must change if the United States government is to end deficit spending and control the national debt, now approaching a trillion dollars.

First, Congress must reverse excessive-spending notions and recognize that the fount of federal funds has its limitations.

And secondly, Americans in general and special interest groups in particular must ease their demands on the public largesse.

Recently a coalition of 157 national organizations—ranging from consumer to labor groups—joined in opposition to many of President Reagan's proposed budget cuts.

Whatever justice their position has, the case illustrates the problem Washington faces in balancing the budget—something achieved only eight times in the past 51 years. Reagan's goal is to eliminate deficit spending, he hopes by 1983.

Jim Brady, his press secretary, defined the situation realistically in a March statement: "Everybody is for smaller government and less spending. Show anybody a list of 20 programs and they'll tell you to cut 19—all except the one dear to each of them."

November's election results have been interpreted widely as a mandate to control inflation, end deficit spending, and spur the economy. The suggestions and proposals to accomplish that goal vary among members of Congress.

Sen. Jake Garn, R-Utah, noting that Congress doesn't respect its own debt ceilings, favors eliminating "meaningless debt limits" and focusing seriously on balancing the federal budgets.

The "permanent" debt ceiling of $400 billion was decreed March 17, 1971. Since then, Congress has raised the "temporary" limit at least twice a year, bringing the over-all ceiling to $985 billion.

Garn considers this hypocritical—"a ruse to convince taxpayers Congress is concerned about holding the line, even while it authorizes spending programs that force increases in the debt limit."

Sen. William Proxmire, D-Wis. advocates a tight lid on the debt limit and a responsible "pay-as-you-go" program. "We should have refused to increase the debt ceiling during this entire period of runaway inflation, double digit interest rates, and hemorrhaging of the federal budget . . ."

How about budget control by statute? Congress tried this with a 1978 law requiring a balanced budget starting with fiscal 1981. It didn't work because Congress and President Carter didn't honor their own law. Massive deficits are programmed both for fiscal 1981 and 1982.

Such lack of discipline feeds the mood evident in many states for a constitutional amendment mandating a balanced budget. Congress has before it a number of amendment proposals, including a fairly-flexible version that would require a two-thirds vote of each house to adopt any budget that calls for red-ink spending.

Sen. William Armstrong, R-Colo. claimed Congress weakened budget control by restricting presidential powers for rescission of spending in a provision of the Congressional Budget and Impoundment Control Act of 1974. He said the provision was passed as a retaliation to a move by then President Richard Nixon in 1972 imposing a moratorium on funding a housing program Congress had authorized.

Voters mandate the President to get federal spending under control: yet Congress has tied his hands said Armstrong. "Our chief executive presides over the largest budget in the world and yet he has little actual management control over it."

Sen. Orrin G. Hatch. R-Utah backed that view during February congressional debate on the debt limit. He proposed strengthening the president's budgetary authority and right of impoundment as one of several reforms he presented.

Other reforms would make debt and budget ceilings more effective, tighten borrowing regulations, require consideration of an amendment for a balanced budget, improve relationships between executive and legislative branches on budgetary matters, and place off-budget items on-budget "so the public will know exactly what the deficits are."

Hatch said off-budget items have jumped from $9 billion in fiscal 1976 to $23 billion in fiscal 1981.

Over-all, the key words seem to be "fiscal discipline." Republicans, with considerable Democratic help, are pressing for early approval of the basic Reagan economic program, but many demands for changes and refinements are being debated.

Sen. William Roth. R-Del. cautioned it will take time to reverse long-time spending practices and commented: "The federal budget is like a runaway locomotive—it cannot be stopped on a dime."

In his day, Thomas Jefferson warned against the servitude heavy taxation can bring and said no generation has a right "to bind the succeeding generation" with a vast debt.

Modern-day American has been slow to heed that counsel—but in the light of the experience of recent decades, Jefferson's wisdom comes through loud and clear.

DON RUMSFELD SPEAKS OUT ON THE GOVERNMENT-BUSINESS RELATIONSHIP

Mr. PERCY. Mr. President, the United States is the only major country in the industrialized world where business is at times viewed as an enemy by some segments of government. Our laws and even some of our institutions are designed to harness and restrict business. Only too infrequently can we find outstanding examples of genuine cooperation.

Recently my good friend and former colleague in the Congress, Donald Rumsfeld—president and chief executive officer of G. D. Searle & Co.—

spoke to the editors of U.S. News & World Report about Americans views toward business. Having also served in the White House as Chief of Staff to the President and also as Secretary of Defense, he knows Government.

At one point in the interview, Mr. Rumsfeld says:

The simple story is that in Japan and Germany the governments and the people want their companies to succeed; they wish them well. They recognize their jobs, their taxes, their economic circumstance, their technological and scientific progress depend on the success of business institutions.

In the United States, by contrast, the attitude between government and private enterprise vacillates somewhere between hostility and neutrality. There is not the desire to have companies succeed. Business executives take that into account when they sit down to decide where to put a plant or where to invest. Business is voting with its feet. So the dominant negative attitude winds up having a notably adverse effect on America and on Americans.

Don Rumsfeld has certainly hit the nail on the head with his remarks. We are unique in our Government-business relationships and I feel I have a fairly good perspective on this, since I have been a part of the business community and the Federal Government.

This is an unfortunate state of affairs because it does retard our economic growth and the creation of jobs. The interruption of contracts by the present administration is another case of where our future business dealings are being jeopardized. Still, there are ways we can act to mitigate this adversarial relationship.

We can, for starters, organize the Government more efficiently and charge it with a more cooperative spirit. We have started on this path already. Several years ago I introduced legislation that led to the creation of the position of Under Secretary of State for Economic Affairs. That position has been extremely helpful to businesses with overseas operations. We have also reorganized the Commerce Department's international business operations in recent years and moved the Foreign Commercial Service into the Commerce Department where it is taking a strong lead in boosting exports. I have strongly supported these developments.

Legislatively we have also moved in a number of directions to reduce the tension between business and Government. Just in this Congress we have passed export trading company legislation. When signed into law, this act will allow the government to drop restrictive antitrust laws in the case of businesses that export. This is a sensible approach that puts us on the same plane as our trading partners. I was an original cosponsor of that legislation and I have also supported changes in the Foreign Corrupt Practices Act. Under those amendments, we will reduce much of the recordkeeping that has plagued business and hampered the conduct of business overseas.

Outside of the official legislative areas, we can take actions as individual legislators that help business. I have held a number of procurement and export conferences in Illinois to show businesses—especially small- and medium-sized businesses—how to do business with the Federal Government or get into exporting. In these ways, we can show business that at least some of us in Government want them to succeed and that we will do all we can to help them succeed and grow.

There is, obviously, more we can do to move toward more of a partnership with business. I am always exploring new ways to help in this regard and thereby create jobs here at home. I was very pleased when the Commerce Department earlier this year established, at my suggestion, a bonus system for United States and foreign commercial officers. I made the suggestion to them in February and by June the program was in place. It was one of the fastest turn-arounds I have ever seen in Government and I have commended Secretary Baldrige, Assistant Secretary Morris and FCS Director General Rick McElheny for this initiative. The bonus awards make clear that those officials who go the extra mile to help—rather than hinder—business will be rewarded. This is the spirit we need in Government and I hope we can continue to foster this as we move into the 1980's.

I ask unanimous consent to have Mr. Rumsfeld's remarks printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report]

BEHIND THE PUBLIC'S "NEGATIVE ATTITUDE TOWARD BUSINESS"

(By Donald Rumsfeld)

"TEARING DOWN LEADERSHIP AND INSTITUTIONS"

There has been a process at work in the United States of tearing down leadership and institutions. We are in a period in which many people are visibly antileader and antiinstitution.

The House of Representatives today reflects this. It has a horizontal leadership structure. That's very different from the 1960s. In those days, a cabinet official could get a handful of key people in a room and work out a legislative agreement—and it would stick. But today I don't know anyone who can deliver anything. It's a mess, and that isn't an accident. House members represent a reasonably accurate reflection of the attitudes of the American people. To the extent that the public attitude is antileader, many House members tend to be antileader. To the extent it's attractive to be antibusiness, many tend to be antibusiness.

A LEGACY OF THE 1950'S AND 1960'S

At the present time, a negative attitude toward business is prevalent in the media, in academic institutions and in the political world. I don't know that I can explain how this came about, but my guess is that it happened sometime in the late 1950s and early 1960s. It didn't change fast. There was no major catalytic event. It was an incremental process that occurred over time.

It's crazy for the society to be unfriendly to enterprise. It's damaging to the country and has contributed in a major way to today's economic difficulties. Yet the fundamental truth is that the relationship betweem enterprise and major segments of the society is not a constructive one.

BUSINESS IS VOTING WITH ITS FEET

The negative attitude helps explain why American business lost its premier role. When you look at a list of the world's leading companies in the late 1940s, '50s and '60s, America dominated. U.S. firms were *the* companies of the world in terms of their weight and momentum. Not so today. The Japanese and German companies have walked right past the U.S. firms. You see articles by business-school professors to the effect that Japanese management techniques are so superior.

The simple story is that in Japan and Germany the governments and the people want their companies to succeed; they wish them well. They recognize that their jobs, their taxes, their economic circumstance, their technological and scientific progress depend on the success of business institutions.

In the United States, by contrast, the attitude between government and private enterprise vacillates somewhere between hostility and neutrality. There is not the desire to have companies succeed. Business executives take that into account when they sit down to decide where to put a plant or where to invest. Business is voting with its feet. So the dominant negative attitude winds up having a notably adverse effect on America and on Americans.

At some point, we will realize what is happening and decide that this negativism is unhelpful to us as a people. But I don't know when that will occur.

"AMAZING RECORD OF GIVING" TO SOCIAL CAUSES

There's no question that the negativism, in part, is tied to the impression some people have that business is indifferent to social needs. But I have been amazed at the incredible amount of time people in business spend on nonbusiness charitable activities. I can't believe the number of letters I get in a single day or the phone calls from top people in companies all across America asking me to help with one charitable project or another. They are giving away their money and their company's money in sizable amounts. There is an amazing record of giving.

SOVIET ACTION AGAINST JEWISH SCIENTISTS

Mr. PERCY. Mr. President, for some time now the free world has watched with growing dismay the rise in recent years of Soviet official harassment and outright persecution of Soviet Jews.

The numbers of Soviet Jews who are successful in their quest to emigrate under the guarantees of the Helsinki Final Act and other international agreements has dwindled to a pathetic trickle. Even those Soviet Jews who wish only to live in peace in the Soviet Union and be allowed to practice their

religion and preserve their language and cultural traditions have confronted increasingly troublesome official obstacles.

Recently a most serious violation of fundamental human rights has come to my attention. A number of distinguished Soviet Jewish scientists seeking to emigrate have been informed that their advanced degrees have been or will be arbitrarily revoked. As a recent Wall Street Journal article reporting the situation notes:

Not since the imposition by the Kremlin of the scandalous diploma tax in August 1972 has the Soviet Jewish intellectual been confronted by such a serious threat to his fundamental academic rights as well as his livelihood.

The Soviet Union must understand that the world will not remain silent in the face of this kind of outrage. Soviet officials and diplomats wonder why there is so much hostility in the world toward the Soviet Government. They have only to look to their own outrageous behavior for the answer.

Mr. President, I ask unanimous consent that the text of the Wall Street Journal article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Aug. 8, 1982]

THE SOVIETS ARE REVOKING DEGREES HELD BY JEWS

(By William Korey)

An extraordinary assault upon the autonomy and integrity of academia has been launched in the U.S.S.R. It warrants the attention and concern of the international scholarly community. A number of distinguished Jewish scientists who have sought to emigrate are advised that their higher academic degrees have been or will be revoked.

Not since the imposition by the Kremlin of the scandalous "diploma tax" in August 1972 has the Soviet Jewish intellectual been confronted by such a serious threat to his fundamental academic rights as well as to his livelihood. Higher academic degrees everywhere are granted in recognition of scholarly achievement. In the international community, a veritable sanctity envelops the awarding of advanced degrees. Only in Hitler's Germany were academic degrees of Jews revoked. That action foreshadowed more intense persecution.

The unprecedented Soviet revocation practice was initiated in a systematic way about a year ago, though several cases occurred somewhat earlier. In 1978, a Jew holding the very advanced degree of doctor of biological sciences was deprived of the title. In 1980, revocations took place for two Jews holding advanced degrees in economic science and physical science. Since then, the scope has broadened and intensified, embracing a wide number of academic disciplines from geography to cancer research, from history to mathematics. A total of 65 Jewish scientists, according to available information, have lost or are in process of losing their advanced degrees.

The final stage in the revocation process stuns the degree-holder. He is suddenly advised, in a letter, without any previous indication, that the Soviet Higher Attestation Commission (VHK), on the basis of a "request" of some scientific council, "deprives you of the academic degree of Candidate of Agricultural Sciences" (as in one typical case; the "Candidate" degree is approximately equivalent to a Ph.D. degree here).

VAK is the special, all-union body that confers academic degrees in the U.S.S.R. Individual Soviet universities, unlike those in the West, don't award them. Originally, VAK operated under the authority of the ministry of higher and specialized secondary education. However in 1974, VAK was transferred to the jurisdiction of the Council of Ministers. Its chairman explained that applicants for higher degrees would be required to "combine a profound professional knowledge with a mastery of Marxist-Leninist theory and with the convictions of an active builder of communist society."

Apparently, under the current interpretation, Jews seeking to exercise the fundational human right to leave a country do not display the required "convictions." Even worse, several scientists were told that they were deprived of their degrees for "unpatriotic behavior," that is, applying to emigrate.

The personal ramifications of degree revocation are profoundly burdensome and humiliating. Soviet Jewish scientists say that it can mean salary cuts, demotion, denial of access to libraries and laboratories and even job dismissal. Further, those deprived of degrees can be kept from seminars, scientific meetings and professional publications. As non-persons in academia, they can have their research findings pirated or mutilated.

A public letter written by 13 prominent Jewish scientists in February spelled out the trauma: "We are being destroyed as scholars and as breadwinners . . . Our knowledge is locked away to decay." The writers interpret their torment to be "a deterrent for all potential new applicants for emigration to Israel."

They are no doubt correct. The Kremlin has reduced emigration to a trickle. Only a half-dozen Jews with advanced degrees were allowed to emigrate last year. About 500 emigration applicants holding advanced degrees were refused permission. Of these 45 percent have been fired from their jobs.

The revocation of degrees constitutes a new twist of the Soviet bureaucratic screw. The technique is only beginning. One of those affected, Yuri Medvedkov, a geographer associated with the Soviet Academy of Sciences, warns: "This poisonous process is not yet in full swing. We are trying to stop it early." But the burden of responsibility for halting the subversion of intellectual integrity rests with the international academic community. It was the outcry of Western academics in every discipline that helped end the notorious "diploma tax." A renewed outcry could produce a similar result.

NATIONAL FOREIGN TRADE COUNCIL QUESTIONS SOVIET TRADE SANCTIONS

Mr. PERCY. Mr. President, the National Foreign Trade Council in New York has registered its views on the regulations enforcing the trade sanctions against the Soviet Union.

The council has raised a number of important questions about the impact of sanctions on our long-term commercial relations with other countries. In his letter, William Baldwin, the senior vice president and secretary of the council, notes that "trade in technology is growing rapidly and is for many American companies an increasingly important source of revenue. By retroactively limiting technology licenses, the U.S. Government is telling the international business community that it is safer to purchase its technology form non-U.S. sources."

The council ends it letter to the Commerce Department by asking that long-term economic costs of the rule be weighed against its intended foreign policy benefits.

Mr. President, I ask unanimous consent that the council's letter be printed in the RECORD at this point, and I commend it to my colleagues.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL FOREIGN TRADE COUNCIL, INC.,
New York, N.Y., August 19, 1982.

MR. RICHARD ISADORE,
Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C.

DEAR MR. ISADORE: The National Foreign Trade Council, a private, non-profit organization of more than 600 U.S. companies engaged in foreign trade and investment, appreciates the opportunity to submit comments on the interim rule, "Amendment of Oil and Gas Controls to the U.S.S.R.," promulgated on June 22, 1982 by the Department of Commerce at the direction of the President, under Section 6 of the Export Administration Act and published in the Federal Register (Vol. 47, No. 122, Thursday, June 24, 1982, page 27250).

The rule as published has a substantial effect both on the current operations of U.S.-based multinational corporations and their longer-term trading prospects. It has already resulted in deteriorating relationships with the European Community. We, therefore, recommend that the interim rule be significantly revised before any final regulations are issued.

These regulations virtually without precedent, seek to control trade engaged in by U.S. owned or controlled foreign subsidiaries, even where non-U.S. origin goods or technical data are involved.

Under this rule, a U.S. foreign subsidiary may not export to the U.S.S.R. certain products (and related technology) designed for oil and gas exploration, production, transmission and refinement without prior written authorization from the U.S. Department of Commerce, even though (a) such products and technology are of non-U.S. origin and (b) the exports are made by legal entities operating abroad and subject to the laws of other sovereign governments.

It seems self-evident under international law that, if the United States claims jurisdiction over foreign companies controlled by U.S. persons, it has a reciprocal obligation to recognize the jurisdiction of foreign countries over U.S. corporations controlled by foreigners—yet we doubt that the United States would yield jurisdiction in the latter instance.

And in fact the U.S. Supreme Court, in a recent case, *Avagliano v. Sumitomo Shoji America*, held that the American subsidiary of a Japanese company is subject to U.S. law. It should be further noted that the

anti-boycott provisions of Section 8 of the Export Administration Act are intended to prevent U.S. companies from being used as instruments of the foreign policy of other nations. Against this background, the present rule under Section 6 of the Act would require companies incorporated in the European Community to carry out U.S. trade policy toward the Soviet Union. Such unilateral measures cannot be helpful in our efforts to seek modification of proposed EC directives which would have an adverse extraterritorial effect on U.S. companies operating in Europe.

Another provision restricts the exports of foreign-produced products directly derived from U.S. technical data where, among other things, the right to the use of data is subject to a licensing agreement whereby the recipient of the technical data has agreed to abide by U.S. export control regulations. We understand that most U.S. licensing agreements contain such a clause. However, this clause will operate with retroactive effect so as to change U.S. law and regulations regarding at least some of the contracts intended to be covered. Thus the regulation will necessitate a change adverse to the foreign company of contracts concluded in good faith in reliance on existing regulations, between a foreign company, not U.S. owned or controlled, and its foreign customers.

This attempted extension of the application of U.S. laws and regulations will, of course, be strongly resisted by the host governments of the affected companies. Its legal basis is tenuous at best, and its potential for worsening the overall position of U.S. companies in foreign trade is great.

Trade in technology is growing rapidly and is for many American companies an increasingly important source of revenue. By retroactively limiting technology licenses, the U.S. Government is telling the international business community that it is safe to purchase its technology from non-U.S. sources.

Echoing this thought, the Delegation of the Commission of the European Communities, in a communication to the United States Government on August 12, 1982, stated that European suppliers which have long since committed resources to the Soviet gas pipeline project, will suffer severe loss of business if the European contribution to the pipeline is blocked. The EC said, in part:

"One inevitable consequence would be to call in question the usefulness of technological links between European and American firms, if contracts could be nullified at any time by decision of the U.S. Administration."

The EC memorandum also speaks of "the grave doubts that are bound to arise in future about the U.S. as a reliable supplier of equipment under contract, or as a reliable partner in technology-licensing arrangements."

The Council is sympathetic with these arguments, and they are clearly the sentiments of many of our substantial trading partners.

We are troubled by the growing tendency of the United States to extend the reach of its laws into matters and as to persons under the jurisdiction of foreign countries. Certain aspects of the rule constitute, we believe, an undesirable extension of existing regulations and a further exercise of jurisdiction extraterritorially. The long-term economic costs of the rule should be weighed against its intended foreign policy benefits before final regulations are issued.

Sincerely,

WILLIAM BALDWIN,
Senior Vice President and Secretary.

END OF AN ERA IN CHICAGO

Mr. PERCY. Mr. President, exporting is becoming more and more important to our economy. Nowhere is that axiom more true than in Illinois where one of every two farm jobs and one of every nine manufacturing jobs is dependent on exports.

Illinois has for many years been one of the top exporting States in the country and we have worked hard to get to that spot.

One of the ablest export promoters in Illinois has been Gerry Marks, who served for 12 years as the director of the U.S. Commerce Department in Chicago. I have known Gerry for over two decades and know from a first-hand basis how dedicated and creative he is when it comes to export promotion. Under his guidance, Illinois has grown with the international economy and our businesses have learned how to compete in the international marketplace.

Gerry Marks is now in London serving the Commerce Department as commercial counselor. I am proud to say that he will be the first Commerce Department regional director named to a U.S. Embassy since the Foreign Commercial Service was transferred to the Commerce Department several years ago.

I know Gerry will do a magnificent job for American business in London. We will certainly miss him in Chicago where he has been an institution for well over a decade. All of us wish him well in his new position and know that he will continue to lend distinction to our commercial relations.

Mr. President, I ask unanimous consent that a Chicago Sun-Times article on Gerry Marks, August 30, 1982, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, Aug. 30, 1982]

END OF AN ERA FOR LOCAL COMMERCE DEPARTMENT CHIEF

(By Jerome Idaszak)

When Gerald M. Marks flies to London this week, it signals a new beginning for him, and the end of an era for Chicago.

"This is your Commerce Department, Gerry Marks speaking," became a well-known phrase in the international business community here during the last decade. A couple of hundred people from that community attended a dinner in July to bid Marks off.

Marks is scheduled to leave the city Wednesday after serving almost 12 years as director of the U.S. Commerce Department office here. He'll be commercial counselor at the U.S. Embassy in London.

A 30-year veteran of the State Department replaces Marks here—Joseph Christiano. His most recent appointment covered four years in Tokyo as commercial counselor.

"It's a feather in the cap of Chicago," Marks said about Christiano's background and appointment here.

The move by Marks, along with the typical hassles of finding a place to live and getting used to new routines, poses the added challenge of being a pioneer of sorts. He'll be the first Commerce Department regional director named to a U.S. embassy under a program change begun during the Carter administration. That program placed the foreign commercial service under Commerce rather than the State Department.

Marks, in an interview shortly before leaving Chicago, said he will supervise 16 British nationals and four Americans. The staff contacts British companies asking what merchandise or products they use and whether they'd allow U.S. suppliers to bid.

"I'll try to connect people with the right person," he said.

He noted that U.S. companies are selling more clothing to the United Kingdom, and the do-it-yourself business is also a growing one.

But he conceded some hurdles, too. He'll arrive in the UK during a time when the United States is experiencing its first trade deficit with that country.

"Right now we're having a great deal of problems with British government procurement," he added.

Three cases are pending including one in which IBM was low bidder but a British company was awarded the contract. Marks said that IBM in the UK employs 14,000 British residents.

"If IBM or Sperry Rand decides they need me, I'll be available. I become the principal contact for business with the British government," he said.

Marks said his territory will include visiting Dusseldorf for trade shows and stopping in Paris for contacts.

"This really is an experiment," he said about his two-year assignment to London.

Marks, 54, brings a varied background to the London post. He was a professional engineer and ran his own business for a while before being elected to the Metropolitan Sanitary District in 1966. He ran unsuccessfully for the Republican nomination for Congress in 1968 for the 13th congressional district. He holds an MBA from the University of Chicago.

Reflecting on his dozen years promoting trade in Chicago, Marks said his biggest disappointment during his time with the Chicago office has been the lack of follow through by many U.S. businesses.

"They turn the international faucet on and off," he said. "I've been through three business cycles now. Companies get very interested in exports when their domestic business is slow. Then their domestic business picks up, and orders for foreign customers get pushed back."

Marks said Chicago-area companies—if they're serious about exporting—need patience, must communicate the sense of commitment throughout the company and get involved with groups that promote trade such as the Chicago Association of Commerce and Industry and the International Business Council MidAmerica.

"No company should walk away from the potential for exports," he added.

An example of patience, Marks said, is shown by an Indiana company that went on a trade mission to Singapore in 1973. The president of the company told Marks last

year that he finally won the first order, for 1,300 hospital beds.

While that is longer than usual, Marks said it shows that the long view is required.

Among accomplishments Marks said his office aided are the opening of a Commerce department office in Palatine, programs with Chicago-area community colleges on exporting and the formation of a trade club in central Illinois.

Marks said Chicago's banks and futures exchanges have helped elevate the city's position in international business in the last decade. On the debit side, he said the area doesn't make sufficient use of Argonne and the University of Illinois research facilities to further stimulate the economy and the community.

"Our industry probably hasn't been as innovative as our service sector has," he said.

THE VICTIM AND WITNESS PROTECTION ACT OF 1982

Mr. LEAHY. Mr. President, today we are conferring long-overdue benefits on a fast-growing class of Americans who wish they were not in the class at all—the victims of crime. The Victim and Witness Protection Act of 1982 is a good beginning. It protects the rights of the victims of crime and the witnesses who are important to its prosecution from threats, harassment, and retaliation. It provides for victims to be considered in the sentencing of criminals and for restitution to be paid by convicted criminals. The Attorney General is empowered to initiate proceedings to restrain the intimidation of a witness or a victim. And there are other provisions that are aimed at making the lives of victims and witnesses more bearable, to lessen the pain, to ease the burden, to remove the stigma that the victim often feels after the commission of a crime.

The original Senate version of this bill might have been construed to create Federal jurisdicition over a wide range of State crimes. Like other bills in the Senate to fight crime, at least part of the answer was to federalize criminal conduct that traditionally had been within the authority of State police power. At a Judiciary Committee rural crime hearing I conducted in Vermont late in August, it was very clear that neither prosecutors nor members of the general public think we can or should try to end the crime epidemic by turning it over to Federal authorities. I am very pleased that the version of the bill acted on today by the Senate leaves the authority of local prosecutors unaffected. I argued for this result in earlier versions of the bill, and I am really pleased that it has prevailed.

I had expressed one other concern about S. 2420; namely, that the prohibition against tampering in section 1512 might apply to conduct that was clearly advocacy, and not tampering. An example of this problem is stated on page 17 of the Judiciary Committee report on S. 2420. I am pleased that the final language of the bill makes it harder for this confusion to occur, and in light of the explanation in the report I doubt it ever will.

I want to conclude by commending Senators HEINZ, BIDEN, LAXALT, THURMOND, and MATHIAS for all of their dedicated work on this bill. Our work together was ever so much more successful because of the true bipartisan effort that went into this bill. The victims of crime will continue to have the problems that crime brings. But I hope that we have all made those problems a little more bearable.

EMERGENCY BENEFITS FOR THE DISABLED

Mr. ARMSTRONG. Mr. President, I regret the Senate has been prevented from considering the emergency benefits for the disabled legislation that was reported out of the Senate Finance Committee by a unanimous vote 3 days ago.

Any Senator has the ability to block consideration of any bill now that we are in the final day of the regular session of the 97th Congress. That right was exercised by at least one Senator, so the emergency benefits for the disabled legislation will not be brought up before adjournment.

I regret this development. This legislation is needed. The legislation—if it had been enacted—would have helped solve a serious bureacratic snafu responsible for denying benefits to those who are truly and legally entitled to benefits from the social security disability program.

I hope this legislation will be quickly enacted in the special congressional session to be convened November 29. So that Senators will be thoroughly acquainted with the issues presented by the bill—and the need for prompt action—I insert in the RECORD at this point a statement I prepared on the legislation. During the next 2 months I hope those Senators who have reservations about the bill will carefully read the legislation, its committee report, and my statement explaining the reasons why the legislation should be enacted. I would be happy to answer any questions that Senators may have about this important legislation.

STATEMENT OF SENATOR ARMSTRONG

Mr. President, I urge immediate passage of the pending bill providing emergency benefits for the disabled. Once passed this bill will correct a tragic and terrible flaw responsible for terminating benefits to the nation's disabled.

Here is the situation we face: Social Security Disability Insurance is the nation's largest disability-connected cash benefit program. About 4.2 million Americans receive benefits, at a current annual cost of $17 billion. Just 10 years ago, three million Americans received $4 billion in benefits. Obviously, there has been explosive program growth.

In response to concerns about rapid increases in costs, poor administration and work disincentives, President Carter in 1980 signed a law that requires federal and state officials to review disability rolls, and to end benefits for those no longer eligible. This law required a dramatic increase in the amount of management review and oversight of the program. It was badly needed. Both the General Accounting Office and the Social Security Administration found lax administration, gross inconsistency in awarding benefits and horrendous fraud. In fact, GAO estimate that as many as 20% of those now receiving benefits are clearly ineligible, at an annual taxpayer cost of $2 billion.

Prior to 1980, there were no legislative requirements for periodic determination of disability for or even most persons receiving disability benefits. This oversight was corrected by the 1980 law. Congress required disability beneficiaries to be re-examined at least once every three years, unless their conditions were expected to be permanent. The law also required disability determinations to be made according to federal written regulations. States failing to comply would have their authority to make disability determinations pre-empted by the Secretary of Health and Human Services.

As a result of the 1980 law, the Social Security Administration has sent 1.6 million disability determinations cases to states for review. Of these, 46 percent have had benefits terminated at the initial decision level. In other words, half of those now receiving assistance are being denied further benefits. Colorado is a classic example. In Colorado, 17,106 persons receive Social Security disability. About half of the cases have been reviewed, and state officials have terminated 40 percent of those cases.

Here is the problem: Both in Colorado and nationwide, many cases are being appealed to administrative law judges. Of cases appealed, more than 60 percent have had their benefits restored. There are a number of reasons for this high reversal rate . . . shoddy staff work at the time of initial decision; beneficiaries can be represented by legal counsel before administrative law judges; the law judges use a different set of standards in determining disability; and other factors.

In any event, reversals are high, and benefits are being restored to a large number of disabled. Here is the problem: Once a state terminates benefits, benefits and even though the case is appealed to an administrative law judges . . . and there is a better than 60 percent chance benefits will be restored, and retroactively.

What does all this mean to a person who is initially declared ineligible for benefits, only to have the benefits restored under appeal?

It means havoc through an unnecessary disruption of their life and income. Think about it. Imagine you received disability benefits for eight years, then receive a notice that your case is being reviewed, then a notice that your benefits are being terminated. Benefits end, you appeal the decision, it takes six months for the case to be heard . . . then the benefits lost during appeal are paid back retroactively. In the meantime, you are behind on mortgage payments, rent, utilities . . . and the necessities of life.

Hence this legislation now before the Senate. The bill has two major provisions. It pays full benefits while cases are appealed; second, it gives the Secretary authority to

slow down case review by states unable to give full and careful review to each and every case.

These reforms—coupled with a number of administrative changes now underway—will make more responsible the continuing disability review program. I urge immediate passage of this bill providing emergency benefits for the disabled.

Let me conclude with a word of thanks to a number of people responsible for this legislation. Senators COHEN and LEVIN spearheaded the efforts, with the assistance of Senator HEINZ, and others. Senator DOLE ably shepherded the bill through quick Senate Finance Committee passage. In drafting the final bill, I received helpful legislative guidance from the Disabled American Worker Security, a Colorado organization representing the state's disabled.

RADIO MARTI

Mr. PRESSLER. Mr. President, I appreciate this opportunity to speak in support of the Radio Broadcasting to Cuba Act. This bill authorizes economic and material support to Radio Broadcasting to Cuba Incorporated, better known as Radio Marti.

I believe Marti is an appropriate name because of the expanded opportunity for Cuban freedom that would be encouraged by this legislation. Jose Marti was a great Cuban liberator, dedicated to democracy, freedom, and to Cuban independence.

Radio Marti will provide the U.S. Government with an important tool to use against Fidel Castro's propaganda machine. It would allow the U.S. Government to provide accurate, uncensored news and information to the people of Cuba regarding Cuban activities at home and abroad.

As American citizens, we enjoy the privilege of living in a free and democratic society where the individual is considered most important. Radio Marti would provide the Cuban people with the information needed to make more informed judgments about their government's policies and actions. This is a first step in trying to establish a political system which is accountable to the Cuban people. Radio Marti would fill an important void created by more than 20 years of censorship and totalitarian control of the Cuban media by the Castro government.

I believe the communication of accurate information to the Cuban people would be carried out well through the medium of radio. For decades the United States has used radio broadcasting as a most effective means of providing truth to the peoples of the Soviet Union and Eastern Europe. Radio Free Europe and Radio Liberty have proven their worth in this effort. Yet, in Cuba, there is no similar competition for Castro's Communist propaganda. Radio broadcasting aimed specifically at Cuba would provide its people with alternative views.

The proposed implementation of Radio Marti has triggered threats of retaliation by the Castro government. In an Associated Press interview, Castro responded to the Radio Marti proposal by stating, "We are not going to interfere, but we are going to broadcast back."

There is some concern that the Cuban Government's retaliation will greatly increase interference directed at our domestic radio stations. This has already occurred for some U.S. broadcasters. This legislation provides compensation to domestic broadcasters who already have been harmed by Cuban radio interference and provides a permissive compensation remedy for such injury.

Cuban radio interference with AM broadcasting in the United States has been going on for nearly 15 years. Thus, I believe that the existence of Radio Marti will neither produce nor prevent Cuban interference with U.S. broadcasting in the future. Failure to authorize Radio Marti out of fear of possible Cuban interference would appear to allow Castro to dictate U.S. foreign policy and could result in greater interference. We must not knuckle under to Castro's threats.

Communist leaders understand the power of ideas and devote enormous resources to propagating their totalitarian ideology and distorted view of events through radio broadcasting aimed at specific countries. In the Caribbean Basin and Latin America, the Soviet Union and Cuba outbroadcast the United States by a ratio of 5 to 1 in terms of hours on the air. Cuba alone broadcasts 280 hours a week to Latin America and the Caribbean. This bombardment of the Caribbean region with Communist propaganda, along with the very real threat of Cuban military intervention in Central America and elsewhere, illustrates the importance of a more active U.S. communication effort.

This bill recognizes the need to promote the right of the Cuban people to seek and receive information and ideas through the medium of radio. I urge my Senate colleagues to support this legislation so that we may better contribute to the cause of Cuban freedom from Communist domination.

CONTRACT SANCTITY

Mr. MATTINGLY. Mr. President, I am happy to cosponsor Senator DANFORTH's amendment which will help reassure our world trading partners of American reliability as a supplier of food and fiber. The fact that the Government has acted in the past to cancel export contracts either because of rising prices or for foreign policy reasons has caused foreign buyers to turn increasingly to other nations for their source of food and grain products. With American farmers in the midst of an economic crisis, with interest rates still too high and low market prices, with bumper crops of grain and soybeans, it is especially important that we act promptly to encourage world buyers to contract for delivery of U.S. farm products. By passing this amendment today, we can send the clear signal that other nations can be assured of an uninterrrupted supply of much-needed commodities and agricultural products.

U.S. products are generally highly desired by consumers in foreign countries—even when our prices are somtimes slightly higher, the foreign buyer knows that American products are of consistently higher quality than the same products supplied by other competitors. But the mere history of past food suspensions has cast a shadow over the ability of our farmers to recapture and expand lost markets. Moreover, some foreign purchasers have used this history as a bargaining tool with which they negotiate for even lower prices. Our action here today in passing this "contract sanctity" measure will indeed benefit not only our hard-pressed farm community, but the rippling effect of a resurgent agricultural sector will help speed our path toward economic recovery.

EXPORT TRADING COMPANY ACT

Mr. DIXON. Mr. President, I am pleased to support the conference report on S. 734, the Export Trading Company Act. It is a good bill, one that represents a real step forward in our efforts to encourage the growth of U.S. exports.

I want to commend my distinguished colleague, Senator HEINZ, the chairman of the International Finance and Monetary Policy Subcommittee of the Senate Banking Committee, for his leadership on this issue. He has worked extremely hard on this measure, and his hard work and persistence are in no small part responsible for the fact that a conference report is before the Senate today.

I also want to commend Senator DANFORTH, for his leadership on the antitrust sections of the bill. His negotiating skill was a major factor in resolving the difficult issues that arose in this section of the bill.

Finally, I want to commend someone who is not here today, my predecessor in the Senate, Adlai Stevenson. He, and Senators HEINZ and DANFORTH, are the principal authors of the Export Trading Company Act. As chairman of the International Finance Subcommittee, before Senator HEINZ succeeded him, he was, and remains, the father of the bill before the Senate today.

I am pleased to be a cosponsor of S. 734, and to have been a conferee. I am grateful for the opportunity to be able to complete action on this important

new measure, action that Senator Stevenson was so instrumental in initiating.

Exports are increasingly important to our economy and can help stimulate the economic growth we so badly need. It has become fashionable in some places to criticize the quality of American products, but the Department of Commerce reports that up to 20,000 U.S. firms offer goods and services which could be highly competitive abroad.

Unfortunately, small size, inexperience, and the risks involved, combined to deter these companies from exporting. Currently, only 10 percent of American companies export, and 1 percent account for 80 percent of all U.S. exports.

Enactment of Export Trading Company legislation can change these statistics by encouraging the formation of trading companies that can link potential exporters with overseas markets. The result of this link is simple and direct: more sales for U.S. firms and more jobs for Americans looking for work.

Mr. President, this bill has changed substantially since it passed the Senate last year. Compromises had to be made. However, the bill remains a strong one. It will be able to achieve its objectives of encouraging the formation of export trading companies and of fostering the growth of U.S. exports. I commend it to my colleagues in the Senate and in the House. It deserves, and the Nation needs, its quick enactment.

THE FUTURES TRADING ACT OF 1982

Mr. STEVENS. Mr. President, I support my distinguished friends, Senators ROTH and RUDMAN, for their exemplary efforts and amendment to combat fraud in commodities trading.

The amendment provides the States with the authority to enforce their own general or common law antifraud statutes, while at the same time avoiding the problem of usurping the regulatory power of the Commodities Future Trading Commission.

Both Senators ROTH and RUDMAN have ably pointed out why this amendment is so necessary for protection of this country's citizens from unscrupulous brokers and traders who would take advantage of small and mostly unsophisticated investors.

This Senator is very pleased to see that the differences separating the CFTC from those who support this amendment have been resolved. Mr. President, when it comes to eradicating criminally fraudulent schemes that have literally wiped out many individuals' life savings, it is only proper that the States and our National Government work together on this problem.

I am reminded on this occasion of the quote by Thomas Jefferson:

The care of human life and happiness and not their destruction, is the first and only legitimate object of good government.

The State and Federal governments can and must put aside their individual territorial imperatives and trust one another in cooperative enforcement efforts that can advance the welfare of all those Americans who wish to legitimately pursue investment opportunities.

Alaska has in recent years been besieged by those whom I cannot call commodity brokers or traders without committing a dishonor to legitimate brokers and traders in futures.

Under current Federal law, my State has been powerless to protect our residents from this criminal element because of the limited resources and exclusive enforcement jurisdiction exercise by the CFTC.

As an example of one scheme that defrauded Alaskans and which the CFTC did happen to investigate, I ask unanimous consent that an article entitled "Out in the Cold" from the November 16, 1981, issue of Barron's be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUT IN THE COLD—HOW A PAIR OF ALASKANS LOST THEIR SHIRTS IN A COMMODITY SCAM

(By Daniel D. Nossiter)

Simple geography should shield the residents of Shemya Island from investment fraud. Shemya is a sullen dab of tundra and scrub in the Bering Sea at the tail of the Aleutian chain, a tiny punctuation mark fittingly situated between the Rat Islands and Siberia. The island is so far west that the international dateline zigzags to bypass the place so it can officially share the same day with the rest of the United States. Tokyo is a mere 2,000 miles away, and the Air Force base on Shemya was once an important refueling stop on the northern route to the Orient. Now, in the era of long-range planes, the base presumably is used to spy on the Russians who, presumably, spy right back on the base.

It's possible, with difficulty, to telephone Shemya. Frank Messer and Kenneth Iddins, who together lost $30,000 to a collection of villains touting commodity futures, report that the subpolar winter is cold and clear and bright, although an occasional 135-m.p.h. wind sometimes forces them to crawl the 300 yards from barracks to work.

What attracted Iddins, who works in its appliance shop, and Messer, who has the crucial job of looking after the power plant, are the high, hardship-post wages. Messer makes $23 an hour, Iddins, a similar amount. Iddins echoes the sentiments of many refugees from the Lower 48 when he says: "It's better than being a shoe clerk in Iowa and retiring with nothing in the bank."

The mails are a twice-weekly event on Shemya. Mail addressed to "resident" or other unknowns gets tossed in a heap for anyone, that is, everyone, with time to riffle through the pile. Late last year, the mail brought a card from Republic Advisory Corp. promising "big money fast" in futures trading.

That card and the promise somehow caught Messer's attention, a happenstance that led to the transfer of no little part of his and his friend Iddins' savings into the hands of a convicted felon who had been chased out of one boiler room operation only to open up another. Adding insult to injury, Messer and Iddins never saw a salesman face-to-face, and hence could never enjoy the pittance of satisfaction that comes with being able to describe one's woes to a human visage. Shemya's high wages are as attractive to con artists as they are to people like Messer and Iddins. Indeed, the director of Alaska's Division of Banking of Securities has stated that "the disreputable element in the commodities industry . . . has been the greatest economic disaster to strike Alaska since the 1964 earthquake."

Iddins, who has been on Shemya since 1973, was eager to make his pile and return to civilization. Hoping to speed the process, he filed out the Republic Advisory card requesting more information. Soon he got an urgent call from the firm's San Francisco office.

Republic was a commodity trading adviser. It had been in business for all of 11 months when its come-on card arrived at Shemya. Republic had no seat on any exchange; it executed its trades through a registered broker. The firm's official principal was required to register with the Commodity Futures Trading Commission, a process that consisted of little more than filing out a form. Once that formality was accomplished, Republic—or any other firm that cared to—could set up shop and charge fees for dispensing advice in trading commodities.

In late 1980, Republic salesmen in San Francisco and at the head office in Englewood Cliffs, N.J., were pushing heating oil contracts. "Republic Advisory Corp. has devised a strategy which—if you act *now* . . . can bring you quick and substantial profits. You must send our designated clearing member $10,400 . . .," cried one promotional leaflet.

Without question, the strategy brought quick and substantial profits to Republic. A whopping $4,000 went to it as a management fee. The remaining $6,400 was to go into a margin account to buy one heating oil contract, meaning that the investor was putting up about three times the margin normally required.

The Republic salesman who called Messer and Iddins said that "the big thing now is heating oil. Everyone is getting into it, and it's bound to go up to $1.40," Iddins recollects. A mite lacking in subtlety, the pitch nonetheless was effective; both Messer and Iddins fell for it. And sadly, report federal authorities, an alarming number of other innocent investors are proving easy marks for similar spiels.

Iddins sent Republic a check for $10,400 made out to Eastern Capital Corp., Republic's broker, and, subsequently, Messer sent twice that sum. The heavy-breathing promoter promised he would get them into the market at 92 cents a gallon. Meanwhile, he informed the two novice investors that Republic was switching brokerage because Eastern's service wasn't fast enough.

That is not how Eastern's president, Steven Silverman, remembers it: "We gave Republic 30 days to terminate their relationship with us. They couldn't keep their records straight, their clients' positions. We assigned someone to work full-time with their back office, but it was too much of a mess. We also started hearing rumors. . . ."

For a few weeks, Messer and Iddins vainly tried to contact the Republic salesman. They finally reached him in mid-January. He was "most ecstatic with the news that the market was now up to $1.04 a gallon," Iddins recalls. But when Messer and Iddins asked at what price they had made their purchases, he claimed that it had been so long since they had called him he couldn't remember. Call back Monday, he said, and he'd have the figures.

That was the last Messer and Iddins heard from their original Republic contact. They later managed to reach another Republic salesman, who admitted that no contracts had been purchased for either. A few weeks later, a contract was bought for Iddins for $1.04. The price promptly dropped to $1, and Iddins promptly was sold out.

For his part, Messer learned that he still had not made a trade. The second salesman said that Messer's money had been put into the wrong account. Messer called back a few days later only to learn that Republic's San Francisco phone had been disconnected. With a queasy feeling in the pits of their stomachs, Messer and Iddins phoned the head office in New Jersey to try to solve the mystery of the missing office. They were not exactly comforted by what they say they were told—that one of Republic's San Francisco employes was "a crook and a liar and Republic had closed its California office and fired all the people." By this time, Messer had rather large second thoughts about Republic, so he fired off a letter demanding his money back. What he received in return were evasions and excuses. Fed up, he called Eastern Capital, Republic's original broker, to whom he had made out the check. Eastern Capital said sorry, they'd never heard of him or his check.

As it turns out, Eastern never saw the check because Republic never sent it. Instead, someone in Republic's New Jersey office forged a signature and used the $20,800 check to pay fees owed to the Simon Advertising agency of East Orange, N.J.

Paul Greenholtz, who runs Simon Advertising, acknowledged to a reporter that he handled Republic's promotions, but directed further inquiries to his lawyer, Stephen Dratch. Dratch claims his client hadn't the faintest idea anything was amiss until seven months later when he received an affidavit from Messer that the endorsement was forged. Dratch says the check was given to the ad agency by Thomas Pepe of Republic. (After the ad agency's bank froze its account because of the forgery, Greenholtz sued Messer, Republic and the bank in an attempt to collect the money.)

A MODEST DESCRIPTION

Republic's promotional literature refers to Pepe as a trading consultant, but that does him an injustice. According to a suit filed in U.S. District Court last summer by the CFTC, Pepe was the "undisclosed principal" in the company, whose nominal head was his wife, Maria. Some authorities familiar with his activities view him as a supremely gifted con artist. One seasoned investigator, however, is more skeptical—he says Pepe may be a pro, but that, if he were really good, he would have shut the operation after three or four months; letting it drag on for a year guaranteed he'd be caught.

In any case, Pepe is not easily discouraged. Three years ago, he was convicted of fraudulently obtaining a loan from the Small Business Administration and sentenced to three months in a half-way house and three years of probation. Last year, the CFTC obtained a permanent injunction in federal court ordering Pepe to stop defrauding investors with a crude-oil scheme. Without admitting guilt, Pepe signed a consent decree stating that he would abide by the court order. And this past summer, postal investigators raided his comfortable home in Woodcliff Lake, N.J., looking for evidence of a company he was running that purported to sell shares in a diamond fund. One investigator drily commented that "the search was more notable for the lack of any evidence" of any sort of diamond fund.

Despite repeated efforts to contact him, Pepe has refused to be interviewed. But the CFTC's complaint against him and Republic says his strategy was to sell the unwary a futures contract for an enormous "management fee" and excessive margin and then persuade the investor, who was already hooked, to change to a "managed account," in which Republic would be allowed discretion to make trades as often as it liked, at a cost of $150 per round turn trade.

That is what Republic convinced Iddins to do at the end of February. What remained of Iddins' account was placed in the hands of Raymond H. Ketcham, against whom an injunction had been issued a year earlier in connection with Pepe's crude-oil caper and who also had signed a consent order. Iddins was told that he had made more than $1,600 the first day he had switched to the discretionary account. Alas, when he received a written statement, he discovered that he had lost $356, and for which privilege he had been charged $1,350 in management fees.

Iddins gave up trying to deal with Republic and complained to the CFTC. In July, the agency had a federal judge issue another injunction against Pepe, this time for the Republic scheme. Again he signed a consent decree, and the company went into receivership. Federal authorities estimate that Republic collected some $5 million from investors like Messer and Iddins, losing about two-thirds of it in trading and making off with the rest. So far, the receiver has realized only $900, on the sale of Republic's office furniture.

The authorities say that prospects for recovery of the remaining funds are dim, and Pepe's prospects appear equally dark.

The CFTC has turned over its records on the heating-oil scheme to the U.S. Attorney's Office for New Jersey. Donald Fay, an assistant U.S. attorney in the office's frauds section, would not comment on whether criminal charges would be filed in the case.

As for the other Republic employes, one federal investigator says that many are on the phone right now, peddling some other sure-fire way to make "big money fast."

Mr. STEVENS. In conclusion, Mr. President, it is very important that this bill pass, and pass with this amendment. The States are willing and committed to provide the enforcement resources necessary so that the only risks taken by investors will be those of the marketplace and not those of confidence artists.

TRADEMARK LEGISLATION

Mr. LEAHY. Mr. President I am very pleased that the Congress has finally acted on legislation to clarify that States cannot require modification of trademarked logos, such as the logos of franchised real estate agents. The reason I supported S. 2001 is that the State ought not to interfere with the uniformity of a valuable trademark, and at least one State supreme court had ruled that a State real estate commission could order the modification of trademarked logos.

As the bill was originally drafted, I had strong reservations about whether its language would go further than curing the problem and possibly affect the power of the States to limit or regulate signs, displays, or billboards under generally applicable laws or regulations protecting the environment and esthetics. It might also have been possible to argue that a State's right to prohibit unfair competition or deceptive acts or practices was curtailed by the bill.

H.R. 5154 added language to the text of S. 2001 that has cured the problems. Its effect is very similar to an amendment I had discussed with Senator CRANSTON, and I am happy to say the House version does it in fewer words. By adding the words "in the mark" to the bill's language, it is now clear that Vermont's laws regulating roadside signs, which are a model for the country, and our historic Act 250, which also deals with signs, will not be questioned.

It was the integrity of the trademarked logo that had been threatened, and that threat has been dispelled by our action.

Senator CRANSTON has requested that his name be associated with these remarks.

MILITARY MEDICAL FACILITIES SIZE FACTOR—H.R. 3278

Mr. SARBANES. Mr. President, I express my support for H.R. 3278, regarding military medical facilities. This bill would make some important improvements in the way plans are developed for military hospitals. Under current law, the military services are unable to program space in military facilities for retirees and their dependents, except for whatever space is necessary to meet teaching and training requirements. This restriction has served to increase the overall cost of providing military health care because retirees, who are eligible for free medical treatment, are often unable to be seen at military facilities and must instead seek treatment at more expensive civilian facilities under the CHAMPUS program.

As the retired population continues to grow in relation to the active duty population the health care dilemma will increase. In areas with an unusually high concentration of retirees the problem is especially severe. The situation in Annapolis, Md., is a good example. In 1980 the naval hospital in Annapolis was closed in spite of the fact that Annapolis has become an extremely popular retirement area. The

many military retirees in the area are forced either to travel to the Bethesda Naval Medical Center to compete for the limited space available there or to seek treatment at private facilities under the complex and largely unpredictable cost-sharing formulas of the CHAMPUS program. In either case the burden on retirees is considerable. It is tragic that people who served their country faithfully are now treated as an afterthought by the military health care system. It is even more tragic, and ironic, because under the current process not only are retirees afforded shoddy treatment, but the Government actually pays more than it would with expanded in-house facilities.

The bill before us, H.R. 3278, would rectify this situation by permitting planners to take into account the needs of the retired community in developing new military medical facilities. The Department of Defense and each military service would be free to include space for retirees if such space would be more cost effective over a hospital's life cycle than the current arrangement. This approach would both improve the treatment of our military retirees and their dependants and would save scarce Federal dollars. I urge my colleagues to support this important legislation.

THE HAMBURGER CRISIS

Mr. HAYAKAWA. Mr. President, we are in the midst of a crisis. The Congress has in the past met to consider the prospect of wars in foreign lands, but never have we considered a conflict that strikes so close to the heart of our society as Burger War I. Three of America's biggest burgermeisters—McDonald's, Wendy's, and Burger King—are at this moment taking each other to court to decide whose burger is best.

Before I consider the implications of the struggle itself, I would like to take a moment to pay tribute to the hamburger. No single food, finger licking or mmmm mmmm good, comes close to matching the hamburger in its all-American appeal. Rich or poor, black, white, or brown, we are of one mind when it comes to our national mania. I have never in my 76 years witnessed a station wagon full of little league baseball players pull into a quiche stand or a Hungarian restaurant. Here in our own Senate cafeteria Chinese weeks and pizza Fridays come and go, but the cheeseburger special lives on. Simply put, nothing tops a hamburger (although the Senator from Pennsylvania may have some thoughts on the subject).

Except for our shared language, the hamburger is probably the only thing we Americans have in common. This is why I am troubled by the burger war now being waged. An American institution is being sullied as it is dragged through the courts, and I fear that complex legal issues may bewilder harried citizens into foregoing the hamburger entirely. That would indeed be a tragic occurrence.

But, Mr. President, all is not lost. I believe that the good judgment and democratic intuition of the American people will prevail in the end. Even a lawyer cannot deter an American from his favorite food.

So I will say it with relish. Give me a hamburger, Mr. President, but hold the lawsuit.

I ask unanimous consent that an article by Raymond Sokolov in today's New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD.

THE BURGER COURT: PATTY CLAIMS

(By Raymond Sokolov)

It was a normal noon out on the sidewalks of New York's financial district. Pinstriped bulls and bears were ambling toward fancy fish lunches at The Recess and the D.T.A. In Liberty Plaza, hard by the Federal Reserve Bank, the air was thick with the heady aromas of Italian sausage and Cannabis sativa. The Texan Epicure and I eschewed all these opportunities to indulge in regional specialties. Solemn from the gravity of the public rsponsibility we had just agreed to shoulder, we headed along the souk of Nassau Street. Our mission: Eat burger.

Like everyone else who reads this newspaper, the T.E. and I knew that in the billion-dollar world of fast hamburgers, the fat was in the fire. The number-two chain, Burger King, had sent off the first salvo in this patty war with its aggressive new fall television ad campaign. You might call these spots Big Mac attacks, since they seethe with derogatory charges against the world's top chopped-meat chain, McDonald's. Its self-esteem seared by these unaccustomed fusillades, McDonald's sued Burger King. Not to be outdone, yet another large chain, Wendy's International Inc., also filed papers in federal court against Burger King, whose ads additionally malign Wendy's hamburgers.

Wendy's chairman and chief executive officer, Robert L. Barney also took his case to the general public. "Let's let the consumer decide once and for all."

Hearkening to this action clarion call, the T.E. and I loosened our suspenders and strode into the dark, cavernous Burger King on Park Row, girded for judgment.

Casablanca fans overhead and photoenlargements on the wall of old New York scenes (Gay Nineties bib-and-tucker banquets and a family bakery) lent an air of refinement and good taste to the room. At the point of sale, a polite cashier changed my $50 bill and filled our order with alacrity. And, as if in an O. Henry story of bygone days in the city, another customer offered me a dollar discount coupon he had forgotten to use himself.

Once seated, at a table resembling in shape and comfort a traditional schoolroom desk, I opend the package containing my Whopper. Elegantly thin, perhaps too elegantly thin, it had solidified nicely during the cooking process and held together quite remarkably in the mouth. Chewy will do as a brief description. Vegetarians might consider the Whopper for episodes of backsliding, since it does not remotely suggest the taste of ordinary meat. The bun, pillow-like and unassertive, was warm and curiously moist on top. On a scale of one to five, with five the best, I would rate the Whopper a 2.

Although the current flap does not directly focus on anything besides burgers themselves, it seemed useful to rate French fried potatoes and shakes as well, since these are typically consumed along with burgers and affect one's appreciation of the sandwich. At Burger King, fries were freshly made, tinged with a *soupcon* of grease and not so crisp as to prevent them flopping over when held up in the air. They rate only a 1.

The shake was medium thick, that is, pourable, and did not give off any chemical exhalations or leave a suspicious after-taste. I gave it a 2.

Cleaning up the various wrappers and packages, and unsuccessfully attempting to purchase an employee's badge that read: "Whopper Beats Big Mac," we rounded the corner and edged our way into a crowded McDonald's. Taking time to admire the photos on the wall of the Manhattan skyline and of the floor of the New York Stock Exchange, we were once again rapidly supplied with victuals and repaired to a sort of booth where one stands and supports one's posterior against a cushion attached to the wall.

The legendary Big Mac seemed even more elegantly thin—perhaps petite is the word—than the Whopper. Its taste was, at best, evanescent, as was that of the bun, despite its much touted sesame seeds. The texture was once again chewy. Big Mac got a 1.5. McDonald's French fries, greaseless and bordering on the truly crisp, rated a 3. The chocolate shake was so thick it was almost gravity-proof, but the flavor smacked more of the laboratory than the cacao bean. The shake scored 1.5.

Another kindly New Yorker, noticing the ɔbeaginous state of my hands, presented me with an extra napkin. Thus freshened up, I went off to Wendy's, my pace slackening but my ardor for locating the best fast burger unabated. The T.E. needed some prodding but he finally agreed to persist. "Have it your way," he said.

Looking around us at the cheerful promo material on the walls at our final destination, we wondered if we were "Wendy's kind of people." The company appears to stress the naturalness of its food and service. It chose period prints for its decor (an antique map of New York and a 1939 cover of Fortune magazine) and hanging plants. Its standard burger is the "single," a quarter-pound patty without trimmings in a plain bun.

This natural pose is somewhat undercut by the shape of the Wendy's patty, which is square. But then there is nothing all that natural about the conventional circular hamburger either, and one certainly has learned to suspect that secret sauces a la McDonald's Big Mac are really a cover-up for low-quality meat. The Wendy's single really does remind you of bona fide beef. It is also somewhat thicker than its competitors. The bun was about the same quality as supermarket hamburger buns. I give the Wendy's single a 3. The French fries were even better, hot and crisp and nicely salted. The T.E. thought they were too salty. Sorry, T.E. The Wendy's fries rate a 4.

The shake was not bad either. It was as thick as could be and it had clearly rubbed

up against honest chocolate at some point in its career. Let's call it a 3.

So Wendy's came out the big winner in our informal taste test. Probably the results could have turned out differently if we had picked different outlets around the country. But even these results really involved hair-splitting. The three chains are a classic example of what David Riesman in "The Lonely Crowd" called marginal differentiation. At bottom, they're all fast burgers. And whichever chain executive it was who said that comparing the three companies' burgers was like comparing apples and oranges, forgot that apples and oranges are real food untouched by corporate ingenuity.

PRETRIAL DETENTION

Mr. HAYAKAWA. Mr. President, I was encouraged yesterday when the Senate passed S. 2572, the Violent Crime and Drug Enforcement Improvements Act of 1982.

I do not need to stand here and recite statistics showing the terrible effects of crime on our society. Anyone who reads the newspaper, watches television, or dares to venture from his home knows that the problem of crime is real and growing every day.

In praising S. 2572, I realize that it is not a cure-all for crime. No piece of legislation can by itself solve problems with roots deep in the complex foundation of society. If we could pass a bill that would somehow create strong family units, establish solid, caring communities, and instill respect for the law in every American, then we might put an end to the epidemic of crime in the United States. Unfortunately, such legislation is beyond our ability.

But we can take steps to ease the burden of crime, and S. 2572 is such a measure. By making important reforms in our Federal criminal law such as allowing pretrial detention of dangerous criminals, abolishing the much abused parole system, toughening drug penalties, permitting the transfer of excess Federal properties to the States for their use in fighting crime, and by stiffening criminal forfeiture laws, S. 2572 can improve the ability of the Federal Government to fight crime and can set an important example for the States.

I am heartened by the Senate's decision to approve S. 2572.

THE CONTINUING TRAGEDY IN EL SALVADOR

Mr. PELL. Mr. President, reports of continuing human rights abuses emanating from El Salvador are especially troublesome coming on the heels of the administration's certification which was presented to the Congress at the end of July.

The Acting Archbishop of San Salvador in his homily of August 22 lamented the fact that there were 270 political deaths between August 6 and August 19 as reported by church sources. He attributed the majority of the deaths to paramilitary bands or security forces. There was a report in Monday's New York Times which said that church sources reported 701 killings in August, blaming Government troops and rightist death squads. Twenty-six teachers participating in a meeting of the Andes 21 de Junio Teachers Union were arrested by the treasury police on August 14. Less than a week later, the treasury police entered a suburban home and arrested a leader of the FDR opposition, a representative of the committee of mothers and relatives of political prisoners, the wife of an imprisoned labor leader and a member of the human rights commission of El Salvador.

Just before the certification, there were reports of the torture of a Salvadoran Green Cross volunteer in the headquarters of the national police. A leading Salvadoran industrialist and his daughter who once worked for the legal office of the archdiocese also disappeared just days before the certification was presented.

On top of these reports of continuation of serious human rights abuses have surfaced serious charges by very credible sources which cast doubt on the fundamental bases for the conclusions reached by the administration in the certification. Last Wednesday, the House Intelligence Committee released a report critical of the performance of the CIA and other U.S. intelligence agencies in Central America. The report, which covers both the Carter and Reagan administrations, repeatedly raised questions and cited instances in which administration policies may have been based on skewed intelligence gathering. The former head of the U.S. interests section in Havana, Wayne Smith, saw fit to publicly question the policy contention, based on intelligence sources, that Cuba was supplying vast quantities of weapons to the guerrillas.

Mr. President, these revelations cause me to question the administration's assessments on El Salvador. Earlier I, along with many of my colleagues, warily accepted the administration's contention that improvements were taking place, although there was a long way to go. But because of the continued abuses, and now this indication that intelligence is being geared to the policy of the day, I have cause to question seriously whether the Congress and the American people are being given the true picture.

I again urge the administration to do all in its power to convince the Salvadoran Government that real progress must be made in improving the human rights situation and that it must do a lot better than it is doing at present. For my part, I will continue to point out to the Government of El Salvador, as I did in the meeting with the Salvadoran Foreign Minister on August 11, that continued U.S. military aid will depend on the progress made in eliminating human rights abuses.

Regarding the cases of the murdered Americans, the reported arrest in San Salvador of two military officers in connection with the two land reform specialists is somewhat encouraging after many long months of waiting for action. I would hope that there are no further delays in the Salvadoran Government's handling of the case of the churchwomen.

The U.S. Government should give its strongest support to the efforts of the Government of Costa Rica designed to begin a real negotiation process between the Government and the opposition forces in El Salvador. I also believe that the administration should get behind peace efforts recently initiated by the Governments of Mexico and Venezuela to bring Honduras and Nicaragua to the negotiating table before the eruption of open warfare which potentially could envelope the rest of Central America.

Mr. President, the situation in El Salvador, and the rest of Central America demands positive, forthright attention from the U.S. Government. The administration must press the Salvadoran Government to end human rights abuses and impediments to the essential land report program. It should also be in the forefront of efforts to bring the opposing forces in Central America to the negotiating table to prevent a virtual certain conflagration at the cost of thousands more innocent human beings.

ELIMINATE LAMEDUCK CONGRESSES

Mr. PELL. Mr. President, the Congress and the Nation are faced, once again, with the dismal prospect of a lameduck session of the Congress, a session to be held after the congressional elections in November but before newly elected Senators and Representatives begin to serve the terms for which they were elected.

The disadvantaged of postelection sessions of the Congress are self-evident. In such sessions votes will be cast by a number of Members of the House and of the Senate despite the fact that the voters on November 2 will have chosen to replace them.

In addition, little action of significance can realistically be expected from lameduck sessions of the Congress. After the November elections, both the proponents and opponents of any legislation will know whether the prospects for passage of the legislation will be better or worse when the newly elected Congress convenes in January. On almost every issue the lines will be drawn between those who see an advantage in immediate lameduck action

and those who see advantages in awaiting the arrival of newly elected Members more favorable to their cause. It is a prescription for stalemate and parliamentary maneuvering instead of serious consideration of national policy.

To underscore this point, consider just one example of an issue that some have suggested should be considered during the postelection session for the Congress this year—revision of the social security system after issuance of the anticipated report by the blue ribbon commission.

This issue is now being debated by opponents in Senate and House election contests across the Nation. Although no election is a referendum on a single issue, we must presume that the candidates elected next month will more closely reflect the views of the American people on that issue than do the current membership of the House and Senate. In light of this I think it is neither prudent, nor good Government for a lameduck Congress to act on issues that do not require immediate or urgent action.

Mr. President, lameduck sessions are not only undesirable, they are really unnecessary. In my view there is no reason, in this age of rapid communication and transportation, why newly elected Members of Congress should wait 2 months after the election before taking office.

In all but a few cases, the results of House and Senate elections are known decisively within a few hours of the closing of the polls. The long delay between the date of election and the date of assuming office is totally unnecessary. Indeed, the Congress in 1789 initially provided under the Constitution for a 4-month delay between the November election and the beginning of the terms of Office of the President, Vice President and Members of the House and Senate. That 4-month period was considered necessary at the time because of the slowness of transportation and communications.

Then, 50 years ago, in 1932, the Congress proposed what became the 20th amendment to the Constitution, reducing the hiatus from election to assumption of office by 2 months.

Today, there is no reason for a hiatus of even 2 months.

Early in this Congress I introduced legislation (S.J. Res. 27) that would eliminate any possibilities of either lameduck Congresses or lameduck Presidents. Under this amendment, the terms of Members of Congress would begin on November 15, following the date of election, and in Presidential election years, the President and Vice President would be inaugurated on November 20 after their election.

This proposal was prompted in large part by the justified public dismay over the constitutionally required delay in 1980 between the election of President Reagan and his inauguration. It was a time when President Carter, having been defeated, had lost much of his authority to deal with foreign nations or the Congress, and Mr. Reagan, although President-elect, had no real authority at all.

That experience brought home clearly to all of us that a lameduck Presidency is bad for the Nation. In my view, a lameduck Congress also is bad for the Nation.

Both of these problems—lameduck Presidencies and lameduck Congresses—are unnecessary. We can provide for a more efficient democracy, and for better representation of the people by permitting newly elected Federal Government officials to take office promptly.

The coming lameduck session of the Congress will be the seventh postelection congressional session in the past 17 Congresses, dating back to a 2-hour lameduck session held by the 80th Congress in 1945. Although the record shows that some significant legislation was enacted during those postelection sessions, the record also shows that the lameduck sessions frequently were marked by acrimony and filibusters.

I do not mean to criticize the leadership of the House or the Senate for agreeing to President Reagan's request for a lameduck session this year. There are important measures, including appropriations bills, upon which action is desirable. The fault lies not with the congressional leadership, but with our outdated constitutional provision which extends the life of a Congress for 2 months after the people have selected the membership of a new Congress. It is time to change that provision.

LANHAM TRADEMARK ACT AMENDMENTS

Mr. CRANSTON. Mr. President, I am delighted that the Senate this week gave its approval to H.R. 5154, the bill to amend the Lanham Trademark Act so that States cannot interfere with a trademarked logo. The Senate's action clears the bill for the President to sign.

The right to do business under a franchised business name is fundamental to our free enterprise system. American business has thrived because we have allowed it to develop without unnecessary and artificial restrictions. Franchising is a way of doing business and it has proven to be a fair and successful way to compete. This is why I was proud to introduce legislation in the last Congress to protect trademarks, such as Century 21's trademark, from unfair and biased restrictions imposed by some States on your way of doing business. And that is why I again joined the effort which has successfully ended in this Congress to assure that States will not interfer with federally protected trademarks.

MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

Mr. GORTON. Mr. President, after months of discussion, public hearings, and hard work, the Senate has before it a package of comprehensive amendments to the Magnuson Fishery Conservation and Management Act.

The Magnuson Fishery Conservation and Management Act is unquestionably the single most important piece of fisheries legislation in our Nation's history. It established a comprehensive system of U.S. management of fisheries in an area of over 2 million square nautical miles, within which is found 15 to 20 percent of the world's traditionally harvested marine fishery resources. The act authorized the Federal Government to conserve and manage fishery resources within the U.S. fishery conservation zone, which extends from the seaward boundaries of the territorial sea to 200 nautical miles from shore.

The act set up a system of regional councils to manage fisheries, in recognition of the fact that fish do not respect political boundaries. The councils have the principal responsibility for development of fishery management plans for resources within the fishery conservation zone adjacent to the States and territories comprising the council area. In addition, the act set rigid biological requirements, broadened management goals to include consideration of social and economic issues, set national standards against which management plans must be gaged, reserved certain resources exclusively for domestic use, and declared the right of the United States to enforce such measures. With respect to foreign fishing, the act limited foreign catch in the fishery conservation zone to that portion of the optimum yield that would not be harvested by U.S. vessels, in recognition of the continuing strength and importance of our domestic fisheries industry.

Several major changes have taken place in fisheries management in the past several years since enactment of the act. First, a "fish-and-chips" policy was implemented in our dealings with foreign nations, whereby cooperation by foreign nations in U.S. fisheries development was made a significant factor in determining allocations. Second, the State Department, in cooperation with the National Marine Fisheries Service, instituted what would prove to be a highly successful policy of withholding a percentage of the directed fish allocations of foreign nations, and gradually releasing these

89-059 O-86-11 (Pt. 20)

allocations as foreign nations demonstrated their good faith compliance with the "fish and chips" policy. Finally, privision was made for full observer coverage on foreign vessels fishing in our fishery conservation zone, to be financed by fees paid in advance by foreign vessel owners. Each of these changes was specifically designed to strengthen and support our domestic fishing industry.

Yet fishermen and processors, council members, and Federal officials, and all those who are intimately familiar with the day-to-day workings of the act, have reported that there continue to be impediments to the smooth functioning of the act, and to fulfillment of the goals of the act. These problems include obstacles to timely plan development, review and approval, procedures for emergencies in fisheries resources, the efficient functioning of the regional councils, and the identification of continuing inadequacies in observer and enforcement efforts.

Mr. President, I am proud to have played a part, from the first discussions at the outset of this reauthorization process, to our consideration today of a final package of amendments, of this important effort to improve the functioning of fisheries management. I cosponsored S. 2450, which received the unanimous endorsement of the Senate Commerce Committee, and I believe that the package before us today, which is the product of months of work by the Senate and House in resolving the differences between the two bills, merits the enthusiastic support of all of my colleagues.

Mr. President, our goal has been to make the regulatory framework fit the reality and needs of sound fisheries management, as opposed to asking fisheries management to fit within an often unrealistic, cumbersome and unwieldy regulatory process. But our task must not end with this package of amendments; we must continue to be vigilant in insuring that the legislation fits the changing needs of the people and industries it serves and affects.

Mr. President, I am pleased to rise in support of these amendments to the Magnuson Fishery Conservation and Management Act, and the reauthorization of that act, as well as of several other important pieces of fisheries legislation. Ultimately, enactment of this bill should bring us closer to realization of the goals of the act—to promote, protect, and develop the resources of our fishery conservation zone for the benefit of our U.S. industry.

ACRS ELECTION FOR OVER-THE-ROAD TRACTORS

Mr. DURENBERGER. Mr. President, I had intended to offer an amendment at this time that would permit owners of over-the-road tractors to elect ACRS lives of either 3 or 5 years.

The issue arises because of an unintended effect in the administration's proposal on ACRS that was incorporated into last year's tax bill. In an effort to make special tools 3-year property so that they would have the advantage of 3-year depreciation, the law was written putting all section 1245 property with an ADR midpoint life of 4 years or less in the 3-year category.

For some trucking companies having over-the-road tractors in the 3-year category this was advantageous, but for others it was a disadvantage. For small trucking companies whose financing depend on their bottom line after tax profit it is important for them to have the larger investment tax credit instead of the quicker depreciation.

Trucking companies and truck renting and leasing companies have different types of operations and different types of over-the-road tractors—tractors that typically cost between $40,000 and $70,000. Fleet purchasers of these units generally specify all the major components based on such variables as type of service, operating terrain, and maintenance expenses. Thus, some engineer this equipment for as little as 3 years while others specify more durable or heavy-duty components and engineer the tractor for a longer service life. These latter operators typically also have invested more in maintenance facilities, including "rebuild" shops, which remanufacture major components such as engines and transmissions.

The business decision to plan, engineer, finance, and purchase truck tractors for a given service life, therefore, is governed by considerations such as anticipated use, mileage, capital requirements, and overall cost. The "right" answer will be different for different operators.

This business decisions should not be artificially distorted by tax code provisions, but that is exactly what we did last year by requiring that these tractors be put in the 3-year category. And we are also hurting the bottom line of those companies who need the 5-year category with the larger investment tax credit in order to receive favorable financing.

I understand that such an election—because of the tradeoff between shorter lives and smaller ITC versus longer lives and larger ITC—would not involve a revenue loss.

Mr. President, my distinguished colleague, Senator DOLE, the chairman of the Finance Committee, and I discussed this amendment when the committee dealt with the Tax Equity and Fiscal Responsibility Act of 1982 earlier this year and again recently when the committee was marking up some House-passed bills. I understand his reluctance to consider it at this late hour. But I would like the chairman's commitment to examine this issue, either in the lameduck session or early next Congress.

Mr. DOLE. When we passed the Economic Recovery Tax Act last year we were not intending to place additional burdens on businesses. If there appear to be inequities, the committee should certainly examine them. I will ask the committee to look at this issue and appreciate the forbearance of the senior Senator from Minnesota in not offering the amendment at this time so that we are able to complete action on this measure.

SOCIAL SECURITY DISABILITY INSURANCE AMENDMENTS

Mr. CHAFEE. Mr. President. I rise in support of the SSDI amendment to H.R. 7093.

The 1980 amendments to social security disability require the Social Security Administration to review cases of social security disability insurance recipients at least once every 3 years—except where an individual's impairment is considered permanent.

This amendment is in response to the growing concern surrounding the Social Security Administration's continuing disability investigations (CDI). It is my firm belief that the current situation must be confronted and actions taken to inject fairness into the investigation and review process.

It heartens me to note the introduction of so many bills seeking to remedy the current situation and to see the efforts of my colleagues to end the injustices inflicted on thousands of disability recipients. I believe this amendment represents a sound move toward that end.

Social security disability insurance is an important part of the Federal Government's "safety net" to protect those persons who can no longer support themselves through work. SSDI is not a welfare program. There is no so-called means test to determine benefits. Rather, the recipient's benefits are based on his or her contribution to the program.

For almost 5 million workers and their dependents, this essential program has made the difference that allowed severely disabled people to continue to support themselves and their families. Older workers, in particular, have been able to collect benefits under this program when their physical and mental illnesses have prevented them from continuing in their former work. In fact, more than half of the disabled workers on the rolls are 55 or older.

In 1956, the program was liberalized to expand benefits to younger workers

and to dependents and survivors of disabled workers.

It was in response to the rapid growth of the disability program that Congress passed legislation in 1977, and again in 1980, which sought to improve the incentives for disabled beneficiaries to return to work. This legislation was accompanied by an effort on the part of the Social Security Administration to tighten the management of disability programs by working toward more uniform disability determinations and by reexamining beneficiaries more frequently to ascertain whether they remained disabled.

When a disabled worker is denied benefits or terminated from the SSDI roles, it is possible for the worker to appeal. The disability appeals process involves four distinct levels—the State agencies, the administrative law judge (ALJ's), the appeals council and the courts.

The number of cases reversed on appeal has been increasing, with most of the increase occurring at the ALJ level. Since 1964, the percentage of reversals has tripled.

A lack of uniformity among the different levels of adjudication has created a situation in which State agencies are denying about 70 percent of initial claims while the ALJ's are awarding benefits by reversing the State agencies in about 60 percent of the cases. This rate will no doubt increase even more, as the Social Security Administration reexamines beneficiaries who have not had medical examinations before.

The high reversal rate is due in part to the different rules surrounding the State agency decisions and those of the ALJ's. State agencies must make their initial and reconsideration decisions according to the law and to regulations and guidelines issued by the Social Security Administration. The reconsideration process may result in fewer reversals of the initial decision because both are governed by identical rules. However, at the hearing level, an ALJ is prohibited from using administrative guidelines—the purpose being to protect the independence of the appeals process from the administration of the program.

As a result of the stepped-up review process mandated in 1980, problems surrounding SSDI have grown at an alarming rate. Disability beneficiaries are being terminated from the roles—many of whom have not experienced any improvement in their condition. Beneficiaries granted benefits in the past are currently being evaluated under more stringent disability standards. For those recipients terminated and whc persist through the appeals process to the ALJ level, almost 60 percent are reinstated. There is an increasing consensus that the problems with the disability review process need to be addressed immediately.

Consider these facts as additional evidence that remedial action is needed: Of all recipients who are initially reviewed, 70 percent are denied disability benefits. (The Government Accounting Office estimates that only 18 percent of those receiving benefits are ineligible. However, between May 1981 and February 1982, 47 percent of the cases reviewed were terminated.) Of those denied benefits, 44 percent continue onto the next level of appeal where 85 percent of them are again denied benefits at the reconsideration level. For those who then appeal to the administrative law judge, benefits are being granted to 60 percent of those initially denied.

Given the present scale of the SSDI program—2.8 million recipients receiving $1.1 billion each month—the objective of carrying out the 1980 review is a laudable one. However, there must be a more exact and therefore more equitable way of doing so.

The SSDI amendment that I support today is a stopgap measure which mandates that:

First, DI benefits and medicare coverage—at the individual's option—continue through the administrative law judge (ALJ) hearing decision for terminated beneficiaries pursuing an appeal. These additional DI payments would be subject to recovery as overpayments if the initial termination decision were upheld, unless the Secretary determines that the appeal request was made in good faith and repayment would work an undue hardship on the individual. In such cases, repayment could be fully or partially waived.

The amendment would be effective for termination decisions occurring between the date of enactment and July 31, 1983, but in no case would payments be made beyond October 1, 1984. Cases now pending an ALJ decision would also be covered by this provision, although lump sum back payments would not be authorized.

Second, the Secretary of HHS would slow—on a State-by-State basis—the flow of cases sent to State agencies for review of continuing eligibility. The Secretary would be instructed to take into consideration State workload and staffing requirements, and would be authorized to slow the review requirement only in States that demonstrated a good faith effort to meet staffing requirements and process claims in a timely fashion.

Third, the Secretary would be required to obtain all relevant medical evidence from all persons or institutions which have diagnosed or treated the individual within the preceding 12-month period.

Fourth, the Secretary would also be required to report to Congress semiannually on the number of: Continuing eligibility reviews, termination decisions, reconsideration requests, and termination decisions which are overturned at the reconsideration or hearing level.

It is my sincere hope that the Senate will expeditiously consider this and move in a positive manner toward a complete review of the social security disability system.

THOR POWER DECISION

Mr. DURENBERGER. Mr. President, I had intended to offer an amendment at this time that would give relief to small businesses from the Thor Power decision and give Congress time to examine the issue of inventory accounting and decide on a permanent solution.

This amendment would postpone, until January 1, 1983, the further implementation of the Thor Power decision that requires businesses holding excess or obsolete inventory to value it at the lower of cost or sales price. This postponement would apply only to small businesses—those whose gross sales in 1981 were $5 million or less.

Under present law, unless a small businessman sells his inventory for scrap or destroys it, he is unable to account for the loss of value in that inventory for tax purposes. This affects evcry imaginable type of business from the farm implement and automobile dealer to air-conditioning contractors as well as almost every manufacturer.

Because of the Thor Power decision businesses are now caught between the proverbial rock and a hard place. If they try to be considerate to their customers by keeping parts on hand that have really outlived their usefulness for most people, the dealers suffer an unfair loss of profits. If the dealers act in the manner best for the profitability of their business, they sell the outdated parts for scrap and force their customers to lose thousands of dollars worth of needlessly junked machinery or stop work at a critical time while they await shipment of the part from a distant dealer.

Given the lack of time remaining in this session, and the fact that the Treasury is required to submit an omnibus report on inventory accounting as of December 31, 1982, it makes good sense to delay further implementation of the IRS Revenue Procedure and Revenue Ruling issued in 1979 that changed the prior practice of the service rather than to adopt a comprehensive solution such as that in my bill S. 1276.

But I understand that even this limited amendment will meet with objections and prevent completion of action on this bill. So I will not offer it at this time. I would, though, like the commitment of the chairman of the Finance Committee to examine this

issue, either in the lame duck session or early next Congress.

Mr. DOLE. Mr. President, the problems with inventory accounting and the Thor Power decision in particular should be examined, and I give my commitment to ask the committee to do so. I appreciate the forbearance of the senior Senator from Minnesota in not offering the amendment at this time so we are able to complete action on this measure.

DISABILITY INVESTIGATIONS

Mr. DURENBERGER. Mr. President, serious problems exist in the continuing disability investigations conducted by the Social Security Administration. This bill we are considering today is a major step in correcting some of the problems that have caused thousands of disability beneficiaries to be erroneously terminated from the disability rolls and have brought financial chaos and personal tragedy. We are also setting the stage for comprehensive reform early in the next Congress.

This bill will continue the payment of benefits through the appeal to the Administrative Law Judge (ALJ), give the Secretary greater flexibility in slowing down the review process, and require the Social Security Administration to obtain evidence from the treating physican. These changes are in addition to those we have been successful in urging the Social Security Administration to implement under their administrative authority—a face-to-face meeting at the beginning of the CDI process and an improved notice describing the review process.

The disability review process, mandated by Congress in 1980, has become a major concern for the 80,000 Minnesotans who are severely disabled. There is nothing intrinsically wrong with reviews every 3 years. We cannot and should not continue payments to persons who are no longer disabled. Thus, our original intent should remain unchanged. What we must change is the process by which we carry out this intent.

My first concern is correcting the real tragedy—the suffering that many beneficiaries and their families endure because of the loss of benefits. We can alleviate their financial affliction by continuing payment through the ALJ level, and this bill does that. The review and appeals process has almost become a test of endurance with no compensation. In Minnesota over 30,000 social security disability insurance recipients are projected to be reviewed during 1982. About 9,600 people will be terminated by State agencies, but then 4,800 of these people will be reinstated on appeal by the ALJ's. What this means is that over 4,800 disabled people who should not be terminated in the first place will be forced to live, for an average of 6 months, without necessary benefits—both the disability payments themselves and the often equally important medicare eligibility.

This bill addresses the problem of loss of benefits by continuing ALJ disability benefits and medicare coverage through the ALJ hearing decision for terminated beneficiaries pursuing an appeal. This provision is effective for new terminations and those pending appeal between the date of enactment and June 30, 1983.

The second significant change this bill addresses is the egregious errors that are resulting from the stepped-up review process—the State agencies just do not have enough staff to adequately review claims. The 1980 amendments require SSA to review 500,000 cases in 1982 and 700,000 cases in 1983, a 500- and 600-percent increase over 1980 levels. Yet in Minnesota, the staff increase has been only 40 percent.

The lack of staff has taken an unreasonable toll on the State agencies. The caseload has become unmanageable, initial claims are lagging behind, delays are making the review process into a marathon, review of the claims is not as thorough as needed, and the beneficiary too often ends up the loser.

This bill allows the Secretary of Health and Human Services to proceed with the reviews at a rate that insures that sufficient staff and time are available to conduct more thorough reviews. This change, exclusively, can correct the excessive and unwarranted caseload our State examiners administer.

The final change this bill addresses is that present law does not require all relevant medical evidence to be produced in the review process. Too many times the treating physician's report is not included in the review process. The determination often is based on the last medical opinion from a consulting physician who has seen the patient only once. Prior medical reports in many case are not even considered.

This bill requires the Social Security Administration to use all reasonable efforts to obtain evidence from treating physicians within the preceding 12-month period and to include the evidence in the review.

The need for change within the disability review process cannot be underestimated. A number of us have been working for months to resolve this very troubling situation. This bill addresses the most urgent problems. While more comprehensive changes are needed in the appeals process, this bill will prevent financial hardships and protect the disabled beneficiaries who are being unnecessarily terminated, while giving Congress time next year to complete a thorough review.

In closing I would like to thank my Volunteer Handicapped Task Force that has provided valuable insight into this problem and shares Minnesota's perspective on handicapped and disabled issues. I look forward to their continuing assistance as Congress deals with comprehensive legislation on the disability review process.

HELMS SCHOOL PRAYER STATUTE

Mr. DURENBERGER. Mr. President, the vote on the Helms school prayer statute was one of the most difficult I have ever cast. The reason is that I agree with the end Senator HELMS is trying to accomplish—restoring prayer in the public schools. In fact, I voted to restore school prayer on four separate occasions over the last 4 years.

But this is one statute I cannot support—not because I disagree with Senator HELMS' objective, but because there are tremendous dangers in the way this bill tries to acomplish that objective.

This proposal is not a constitutional amendment. Instead, it is simply a statute that strips the courts of any authority to hear school prayer cases. This type of court stripping might sound like a good idea when it overturns the decision you or I do not agree with. But court stripping is a Pandora's box that can threaten all of our rights once it is opened up.

Our system of government has been able to protect the rights of its people largely because of the checks and balances built into the Federal system. Restricting the ability of the Federal courts to review congressional acts disrupts that balance, and the consequences of the disruption will go far beyond the short-term goals the backers of these bills may support. No matter how one feels on the school prayer issue, it is essential to recognize that if the courts can be deprived of jurisdiction over that question, they can be deprived of jurisdiction over any question—freedom of worship, civil rights, criminal law, anything. And in the long run that process can only mean destruction of our basic rights and our Federal system of government.

The courts exist to apply the accumulated wisdom of 205 years—embodied in our system of laws—to the political judgments of the day, as made by the elected Representatives of the people, That blending of long-term judgments and short-term desires has been a key to the effective functioning of our system of representative democracy. Although there are times when I am extremely frustrated by Federal court decisions, I am simply against making such a basic, fundamental change in our system.

I am certainly prepared to work with Senator HELMS and others in pushing

for a constitutional amendment to restore prayer in the schools, as President Reagan has proposed. What I will not do is support a statute that seeks to restore school prayer by dismembering the court system. That is a bad means to a good end, and I simply could not support it.

NRC AUTHORIZATION BILL

Mr. MITCHELL. Mr. President, will the distinguished ranking minority member of the Subcommittee on Nuclear Regulation engage in a colloquy with me on the NRC authorization bill conference report?

Mr. HART. I would be delighted to engage in a colloquy with my good friend from Maine.

Mr. MITCHELL. The portion of the statement of managers discussing section 12 of the report, the so-called Sholly provision, stresses that, in determining whether a proposed amendment to a facility operating license involves no significant hazards consideration, the Commission "should be especially sensitive * * * to license amendments that have irreversible consequences." Is my understanding correct that the statement means the Commission should take special care in evaluating, for possible hazardous considerations, amendments that involve irreversible consequences?

Mr. HART. The Senator's understanding is correct. As you know, this provision seeks to overrule the holding of the U.S. Court of Appeals for the District of Columbia in Sholly against Nuclear Regulatory Commission. That case involved the venting of radioactive krypton gas from the damaged Three Mile Island Unit 2 reactor—an irreversible action.

As in this case, once the Commission has approved a license amendment, and it has gone into effect, it could prove impossible to correct any oversights of fact or errors of judgment. Therefore, the Commission has an obligation, when assessing the health or safety implications of an amendment having irreversible consequences, to insure that only those amendments that clearly raise no significant hazards issues will take effect prior to a public hearing.

Mr. MITCHELL. I thank the Senator. I also understand the amendments to the Uranium Mill Tailings Radiation Control Act, included in the NRC authorization bill conference report, differ significantly from those adopted by the Senate.

Mr. HART. The Senator is correct. The House-passed version of the NRC authorization bill for fiscal years 1982 and 1983 did not contain any amendments to the Uranium Mill Tailings Act. The provision in the conference report differs from the Senate provision in an important respect: The Senate provision suspended the NRC's final regulations for uranium mill tailings, promulgated October 3, 1980, until EPA issued its final standards for active uranium mill sites under section 275 of the Atomic Energy Act. The conference report suspends these final NRC regulations until January 1, 1983. On that date, they become immediately effective except for any NRC regulation that first, is inconsistent with the EPA standards, required to be proposed October 3, 1982, and second, would also require a significant commitment or action by the licensee. Although such a commitment or action could include financial obligations or expenditures, the conferees agreed not to state that a "major investiment" would trigger the suspension of a particular NRC regulation.

Mr. MITCHELL. Is my understanding correct, then, that this suspension of the NRC regulations until January 1, 1983, is only for the purpose of sorting out potential conflicts between the NRC regulations and the EPA standards?

Mr. HART. This Senator is absolutely correct.

Mr. MITCHELL. Is it also correct, then, that these amendments do not prejudge the validity or appropriateness of the NRC's final regulations, promulgated October 3, 1980?

Mr. HART. That is correct. The statement of managers underscored the point that where legislative language directed the NRC and the EPA to "consider the risk to public health, safety, and the environment, the environmental and economic costs of such standards or regulations, and such other factors as EPA or NRC, respectively, determine to be appropriate," this language "* * * reflects accurately the current regulatory approach of the agencies."

The statement of managers clearly recognized that the NRC and EPA are already considering these factors in their regulatory procedures. I might also point out that the 10th Circuit Court of Appeals, in its decision in Kerr-McGee Nuclear Corp. against Nuclear Regulatory Commission, upheld the legality and validity of the NRC regulations. In fact, it noted that the NRC had already considered costs when it proposed its uranium mill tailing regulations and found them economically feasible.

The Statement of Managers also is clear that although the Federal agencies involved should continue to consider these costs, they need not carry out a cost-benefit analysis nor should such considerations "* * * divert EPA or NRC from their principal focus of protecting the public health and safety."

I also note that none of these amendments affects the Findings and Purposes section of the Uranium Mill Tailings Act.

Mr. MITCHELL. I thank the Senator.

MILL TAILING LEGISLATION

Mr. SCHMITT. Mr. President, our domestic uranium industry is on the verge of total collapse. My State, New Mexico, is the Nation's most important uranium producer, but it now has fewer operating uranium mills than two decades ago. Thousands of miners are unemployed. New exploration has plummeted.

There are many causes for this disaster including the absence of a nation's commitment to energy security. One of the additional is the rapidly increasing tide of low cost foreign uranium. Indeed, almost all new contractual commitments by our utilities are with foreign suppliers and some domestic uranium companies are even shutting down their operations in order to purchase low cost foreign uranium to meet their contractual obligations. These developments pose a serious and immediate threat to the continued survival of our domestic uranium industry. Once mines and mills are shutdown, it is unclear whether they can ever be reopened. It will take as many as 10 years to bring new facilities on line.

Congress has long recognized that it is essential to our national security and to our policy of energy independence to assure the maintenance of a viable domestic uranium industry. Indeed, in 1964 Congress adopted legislation, codified in section 161(v) of the Atomic Energy Act, specifically for this purpose.

Nothing has occurred since 1964 to make the Nation's domestic uranium industry any less essential to our security interests. To the contrary, we now rely on nuclear power heavily for our electrical energy needs. It would be most unwise to place ourselves at the mercy of a handful of uranium exporting countries by undue dependence on foreign supplies. This is particularly the case since these countries pursue documented policies to support their own uranium industries and to assure their own uranium supplies.

Recognizing the urgency of this situation, I cosponsored an amendment to the NRC Reauthorization Act to adjust future imports of uranium to a level compatible with preservation of a viable domestic industry and our vital national security interests. The conferees have modified the Senate proposal in many particulars. However, they have incorporated requirements that DOE promulgate criteria to determine the industry's viability and that DOE make an annual determination of viability. This will serve the important function of prompting implementation of section 161(v).

The conferees also have adopted language providing for a moratorium on new contracts of up to 2 years if foreign contractual commitments reach 37½ percent in any 2 consecutive years. This moratorium, although temporary, should provide the Department of Commerce and the President the time necessary to take appropriate action to protect the national security before it is too late.

Mr. President, I understand that there have been objections to this provision on grounds of free trade. I heartily endorse the principle of free trade. However, we must recognize that free trade is not an end unto itself but an interest which must be balanced against other important interests. Uranium is a unique resource which is particularly important for national security reasons. The United States must take appropriate action to protect its vital interests in this area.

Some have also attacked this legislation on grounds of impact on consumers. I believe that the impact on consumers will be favorable, particularly in the long term, because the provision in question will assure the availability of a stable long-term supply of uranium and will maintain the domestic industry as a viable competitor against foreign suppliers. This is particularly important in view of policies pursued by foreign governments, to which I have already alluded, to support to their own domestic uranium industries.

Mr. President, I am also pleased to note that the conferees have adopted language amending the Mill Tailings Act to require NRC and EPA to weigh the significance of the risk associated with mill tailings and to develop regulatory requirements whose burdens are reasonably related to the expected benefits. As the statement of managers indicates, this does not mean that cost-benefit analysis/optimization is mandatory. However, it does mean that agency requirements must be reasonably tailored to meet identifiable hazards and that if the hazards are slight, the burdens imposed by the regulations must be small as well. This should also lay to rest the position by some agency officials that they are required, under the preamble to the Mill Tailings Act, to impose certain kinds of controls on mill tailings regardless of risk and regardless of cost.

Because the conferees were anxious that the DOE remedial action program proceed, they have revised the law to permit certain NRC and DOE actions in advance of final EPA standards. However, the language of the bill and the statement of managers makes clear that the agencies are to coordinate their actions to minimize backtracking and churning. For example, DOE should avoid remedial actions predicated on those aspects of EPA inactive site standards which must be changed in light of the administrative record and the Mill Tailings Act as clarified by this legislation.

Another feature of the mill tailing legislation reported by the conferees bears special mention. Although requiring NRC and EPA to weigh costs, the conferees have deleted the provision in the Senate amendment calling on NRC and EPA to consider all relevant factors. I understand that the conferees were concerned that that language might lead to unwarranted litigation and unintended results. For example, that language might be interpreted to require or to permit the agencies to weigh not only actual hazards but also psychological factors as suggested in the recent Pane decision. The agencies should develop requirements whose burdens are reasonably related to actual risks, and not to mere fears or concerns.

Finally, the legislation reaffirms that agreement States may diverge from impracticable Federal requirements, and clarifies that no agreement State program is automatically terminated and that NRC may reassert regulatory jurisdiction only after notice and a hearing before the five commissioners as provided in subsection 274(j) of the Atomic Energy Act.

The language adopted by the conferees makes clear that there is no dual jurisdiction under the Mill Tailings Act. Mill tailings are regulated by a State as provided in section 274 or by the Commission, but not by multiple authorities. Moreover, the conferees have acknowledged that title I sites are not regulated under title II and that NRC and agreement States may exempt sand backfilling from land ownership requirements.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

DEFERRAL OF CERTAIN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT—PM-184

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on the Budget, the Committee on Appropriations, the Committee on Foreign Relations, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Commerce, Science, and Transportation, the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Labor and Human Resources, the Committee on Finance, and the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report twenty deferrals of fiscal year 1983 funds totaling $598,780,000. The deferrals are primarily routine in nature and do not, in most cases, affect program levels.

The deferrals are for programs in International Development Assistance, the Departments of Agriculture, Commerce, Defense, Energy, Health and Human Services, Interior, State, Transportation, Treasury, the District of Columbia, the Pennsylvania Avenue Development Corporation and the Railroad Retirement Board.

The details of each deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *October 1, 1982.*

MESSAGES FROM THE HOUSE

At 10:30 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5930) to extend the aviation insurance program for 5 years.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6976) to amend title 28, United States Code, to require the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing persons (including unemancipated persons).

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 2035) to authorize certain employees of the U.S. Department of Agriculture charged with the enforcement of animal quarantine laws to carry firearms for self-protection.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 6164) to authorize the Secretary of Agriculture to implement the Agreement on the

International Carriage of Perishable Foodstuffs and on the special equipment to be used for such carriage (ATP), and for other purposes.

The message further announced that the House agrees to the amendments of the Senate to the amendments of the House to the bill (S. 1872) to amend the act establishing the Capitol Reef National Park in the State of Utah to provide for a grazing phaseout schedule, and for other purposes.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 187. An act to authorize the Secretary of the Interior to convey certain lands near Miles City, Montana, and to remove certain reservations from prior conveyances.

The message further announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 2420. An act to protect victims of crime.

The message also announced that the House has passed the following bill and joint resolutions, each without amendment:

S. 2436. An act to designate the Mary McLeod Bethune Council House in Washington, District of Columbia, as a national historic site, and for other purposes;

S.J. Res. 197. Joint resolution to provide for the designation of the week of October 17 through 23, 1982, as "Myasthenia Gravis Awareness Week";

S.J. Res. 235. Joint resolution to proclaim March 21, 1983, as "National Agriculture Day"; and

S.J. Res. 241. Joint resolution to provide for the designation of the week of December 12, 1982, through December 18, 1982, as "National Drunk and Drugged Driving Awareness Week".

The message further announced that the House has agreed to the following concurrent resolutions, each without amendment:

S. Con. Res. 18. Concurrent resolution relating to the restoration of the free exercise of religion in the Ukraine;

S. Con. Res. 73. Concurrent resolution to condemn the Iranian persecution of the Baha'i community; and

S. Con. Res. 117. Concurrent resolution expressing the sense of the Congress that September 4, 1982, the one hundredth anniversary of Thomas Edison's Pearl Street central power station, should be commemorated as "Pearl Street Centennial Day".

The message also announced that the House has passed the following bills and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 5785. An act to provide for consideration, under the Color-of-Title Act, of a certain private land claim in Livingston Parish, Louisiana, and for other purposes;

H.R. 6471. An act for the acquisition by the United States by exchange of certain native owned lands or interest in lands in Alaska;

H.J. Res. 531. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Parkinson's Disease Week";

H.J. Res. 537. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the first week in October for the calendar years 1982, 1983, and 1984 as "National Port Week"; and

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day".

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 330. Concurrent resolution expressing the sense of the Congress with respect to the Soviet Union's obligations under international law to allow Ida Nudel to emigrate to Israel, and for other purposes;

H. Con. Res. 336. Concurrent resolution expressing the sense of the Congress concerning the compliance by the Soviet Union with certain international agreements on human rights; and

H. Con. Res. 376. Concurrent resolution recognizing the outstanding service and patriotism exhibited by the volunteers of the American National Red Cross during times of war and expressing the gratitude of the Congress for the service of such volunteers.

At 11:19 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has agreed to the following resolution:

H. Res. 605. Resolution requesting the Senate to return to the House the bill S. 1210, together with accompanying papers.

ENROLLED BILLS SIGNED

At 4:35 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bills:

H.R. 5930. An act to extend the aviation insurance program for five years; and

H.R. 6422. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land previously conveyed to the State of Connecticut.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 7:45 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the amendment of the Senate to the amendment of the House to the text of the bill (S. 1210) amending the Environmental Quality Improvement Act of 1970, with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1698. An act to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of United States citizens.

The message further announced that the House agrees to the amendments of the Senate to the following bill:

H.R. 5145. An act to amend title 5, United States Code, to provide training opportunities for employees under the Office of the Architect of the Capitol and the Botanic Garden, and for other purposes.

The message also announced that the House agrees to the amendments of the Senate to the amendment of the House to the following bill:

H.R. 5139. An act to authorize appropriations for certain insular areas of the United States, and for other purposes.

The message further announced that the House disagrees to the amendment of the Senate to the following bill.

H.R. 3963. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated.

At 8:54 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 83, 85, and 86, and agrees to thereto; and it recedes from its disagreement to the amendments of the Senate numbered 15, 30, 33, 57, 59, 69, 73, 75, 76, 78, 88, 89, 90, 90, 93, and 100, and agrees thereto, each with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 6968) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 1, 8, and 32, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 420. Concurrent resolution authorizing that a certain correction be made in the enrollment of House Joint Resolution 599, making continuing appropriations for the fiscal year 1983.

The message further announced that the House agrees to the amendment of the Senate to the amend-

ments of the House to the following bill:

S. 2577. An act to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1983, and for other purposes.

The message also announced that the House agrees to the amendments of the Senate to the following bill:

H.R. 6055. An act to revise subchapter S of the Internal Revenue Code of 1954 (relating to small business corporations).

The message further announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 2574. An act to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 4717) to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5890) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 6267) to revitalize the housing industry by strengthening the financial stability of home mortgage lending institutions and insuring the availability of home mortgage loans.

The message further announced that the House agrees to the amendments of the Senate numbered 1, 3, 4, 5, 6, and 7 to the amendment of the House to the bill (S. 2273) to amend section 7 of the Earthquakes Hazards Reduction Act of 1977 (title 42 United States Code section 7706) to extend authorizations for appropriations, and for other purposes; and it agrees to the amendment of the Senate numbered 2 to the bill, with an amendment, in which it requests the concurrence of the Senate.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

At 10:56 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 188. An act to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes;

S. 1777. An act relating to the establishment of a permanent boundary for that portion of the Acadia National Park as lies within the town of isle au Haut, Maine;

S. 2586. An act to authorize certain construction at military installations for fiscal year 1983, and for other purposes;

S. 2874. An act to amend the Act of March 16, 1934, as amended, to credit entrance fees for the migratory-bird hunting and conservation stamp contest to the account which pays for the administration of the contest;

H.R. 2035. An act to authorize certain employees of the U.S. Department of Agriculture charged with the enforcement of animal quarantine laws to carry firearms for self-protection and to improve the quality of table grapes for marketing in the United States;

H.R. 6782. An act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children, and to modify and improve the educational assistance programs administered by the Department of Labor, and for other purposes;

S.J. Res. 197. Joint resolution to provide for the designation of the week of October 17 through October 23, 1982, as "Myasthenia Gravis Awareness Week"; and

S.J. Res. 235. Joint resolution to proclaim March 21, 1983, as "National Agricultural Day".

The enrolled bills and joint resolutions were subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED JOINT RESOLUTION SIGNED

At 12:48 a.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 599. Joint resolution making continuing appropriations for the fiscal year 1983, and for other purpsoes.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

At 2:02 a.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 2375. An act to extend the Defense Production Act of 1950; to amend section 719 of such act to transfer the authorities and functions of the Cost Accounting Standards Board; to establish a Commission on Strategic and Critical Materials Stock Piling Needs; and to establish a White House Conference on Productivity.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 7292. An act to establish a White House Conference of Productivity; and

H.R. 7293. An act to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 6457. An act to amend the Public Health Service Act to revise and extend the authorities under that act relating to the National Institutes of Health and the National Research Institutes, and for other purposes; to the Committee on Labor and Human Resources.

H.R. 6471. An act for the acquisition by the United States by exchange of certain Native owned lands or interest in lands in Alaska; to the Committee on Energy and Natural Resources.

H.R. 7173. An act to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations; to the Committee on Governmental Affairs.

H.J. Res. 531. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Parkinson's Disease Week"; to the Committee on the Judiciary.

H.J. Res. 537. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the first week in October for the calendar years 1982, 1983, and 1984 as "National Port Week"; to the Committee on the Judiciary.

H.J. Res. 595. Joint resolution designating December 11, 1982, as "Fiorello H. La Guardia Memorial Day"; to the Committee in the Judiciary.

HOUSE BILLS PLACED ON CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 5785. An act to provide for consideration, under the Color of Title Act, of a certain private land claim in Livingston Parish, La., and for other purposes; and

H.R. 7144. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for fiscal year ending September 30, 1983, and for other purposes.

HOUSE CONCURRENT RESOLUTIONS REFERRED

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 336. Concurrent resolution expressing the sense of the Congress concerning the compliance by the Soviet Union with certain international agreements on human rights; to the Committee on Foreign Relations.

H. Con. Res. 376. Concurrent resolution recognizing the outstanding service and patriotism exhibited by the volunteers of

American National Red Cross during times or war and expressing the gratitude of the Congress for the service if such volunteers; to the Committee on the Judiciary.

HOUSE CONCURRENT RESOLUTION PLACED ON THE CALENDAR

The following concurrent resolution was read, and placed on the calender:

H. Con. Res. 330. Concurrent resolution expressing the sense of the Congress with respect to the Soviet Union's obligations under international law to allow Ida Nudel to emigrate to Israel, and for other purposes;

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The President pro tempore (Mr. THURMOND) announced that on today, October 1, 1982, he signed the following enrolled bills and joint resolution, which had previously been signed by the Speaker of the House of Representatives:

S. 1409. An act to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservior, Shoshone project, Pick-Sloan Missouri basin program, Wyoming, and for other purposes;

S. 2852. An act to require a separate family contribution schedule for Pell grants for academic years 1983-1984 and 1984-1985, to establish restrictions upon the contents of such schedule, and for other purposes;

H.R. 3881. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain lands conveyed to the Arkansas Forestry Commission, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such lands to such Commission.

H.R. 5154. An act to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for the use within such State, and to encourage private enterprise with special emphasis on the preservation of small business;

H.R. 6133. An act to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal year 1983, 1984, and 1985, and for other purposes;

H.R. 6168. An act to amend title 18, United States Code, to provide a criminal penalty for threats against former Presidents, major Presidential candidates, and certain other persons protected by the Secret Service, and for other purposes;

H.R. 6454. An act to amend title 18, United States Code, to clarify the applicability of offenses involving explosives and fire; and

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, October 1, 1982, he had presented to the President of the United States the following enrolled bills:

S. 1409. An act to authorize the Secretary of the Interior to construct, operate, and maintain modifications of the existing Buffalo Bill Dam and Reservoir, Shoshone project, Pick-Sloan Missouri basin program, Wyoming, and for other purposes; and

S. 2852. An act to require a separate family contribution schedule for Pell grants for academic years 1983-84 and 1984-85, to establish restrictions upon the contents of such schedule, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GARN, from the committee of conference:

Report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally (Rept. No. 97-644).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. Res. 455. A resolution instructing the Secretary of Commerce to strengthen and define his position regarding the status of Pacific salmon stocks.

By Mr. MATHIAS, from the Committee on Rules and Administration:

Special report of the Committee on Rules and Administration on oversight hearings on the Office of Technology Assessment (Rept. No. 97-645).

By Mr. DOLE, from the Committee on Finance, with an amendment in the nature of a substitute and an amendment to the title:

H.R. 5470. An act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness (Rept. No. 97-646).

By Mr. DOLE, from the Committee on Finance, with amendments, and an amendment to the title:

H.R. 5573. An act to amend the Internal Revenue Code of 1954 to encourage contributions of computer equipment to elementary and secondary schools (Rept. No. 97-647).

By Mr. DOLE, from the Committee on Finance with an amendment, and an amendment to the title:

H.R. 7093. An act to amend the Internal Revenue Code of 1954 to reduce the rate of certain taxes paid to the Virgin Islands on Virgin Islands source income (Rept No. 97-648).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 492. An original resolution authorizing the Sergeant at Arms of the Senate with the approval of the Committee on Rules and Administration, to settle certain claims involving Members, officers, and employees of the U.S. Senate (Rept. No. 97-649).

S. Res. 493. An original resolution authorizing the printing of the prayers by the Reverend Edward L. R. Elson, S.T.D., as Chaplain of the Senate during the 96th and 97th Congress (Rept. No. 97-650).

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

H.R. 6417. An act to amend Public Law 94-423 relating to the U.S. Capitol Grounds (Rept. No. 97-651).

By Mr. COHEN, from the Select Committee on Indian Affairs, with an amendment:

S. 2847. A bill to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes (Rept. No. 97-652).

By Mr. COHEN, from the Select Committee on Indian Affairs, with amendments:

S. 563. A bill to authorize the States and the Indian tribes to enter into mutual agreements and compacts respecting jurisdiction and governmental operations in Indian country (Rept. No. 97-653).

S. 1340. A bill to provide for the use and distribution of Clallam judgment funds in docket numbered 134 before the Indian Claims Commission, and for other purposes (Rept. No. 97-654).

S. 1735. A bill to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims (Rept. No. 97-655).

By Mr. COHEN, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

S. 2418. A bill to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain lands held in trust for such band (Rept. No. 97-656).

By Mr. COHEN, from the Select Committee on Indian Affairs, with amendments:

H.R. 4364. An Act to declare that the United States holds in trust for the Pascua Yaqui Tribe of Arizona certain land in Pima County, Ariz. (Rept. No. 97-657).

By Mr. ROTH, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 2127. A bill to revise the procedures for soliciting and evaluating bids for Government contracts and awarding such contracts, and for other purposes.

By Mr. DOMENICI, from the Committee on the Budget, without amendment and without recommendation:

S. Res. 479. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 861.

By Mr. COHEN, from the Select Committee on Indian Affairs:

H.R. 4365. An act to provide that per capita payments to Indians may be made by tribal governments, and for other purposes; (Rept. No. 97-659).

By Mr. COHEN, from the Select Committee on Indian Affairs, with amendments:

H.R. 3731. An act to amend the act of October 19, 1973 (87 Stat. 466) relating to the use or distribution of certain judgment funds awarded by the Indian Claims Commission or the Court of Claims. (Rept. No. 97-658).

JOINT REFERRAL—H.R. 5949

Mr. BAKER. Mr. President, I next have a unanimous-consent request in respect to a referral. I ask unanimous consent that H.R. 5949, the Cable TV Copyright Act, be jointly referred to the Committee on Commerce and the Committee on the Judiciary.

Mr. ROBERT C. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PRYOR (for himself, Mr. ROTH, and Mr. LEVIN):

S. 3001. A bill to establish a Director of Operational Testing and Evaluation in the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. STAFFORD (for himself, Mr. PELL, Mr. DOLE, Mr. SIMPSON, Mr. BRADLEY, Mr. DURENBERGER, Mr. PRYOR, Mr. BOSCHWITZ, Mr. NUNN, Mr. JOHNSTON, Mr. LEVIN, Mr. WALLOP, and Mr. RIEGLE):

S. 3002. A bill to increase the authorization of appropriations for the Allen J. Ellender Fellowship Program, and for other purposes; considered and passed.

By Mr. STEVENS:

S. 3003. A bill to amend the Labor Management Relations Act, 1947, to establish a final offer arbitration procedure for the resolution of labor disputes involving certain organized professional team sports and to end the current National Football League labor dispute through the use of such procedure; to the Committee on Labor and Human Resources.

By Mr. ZORINSKY (for himself, Mr. ANDREWS, Mr. SARBANES, Mr. BAUCUS, Mr. MELCHER, Mr. BURDICK, Mr. DECONCINI, Mr. SASSER, Mr. HEFLIN, Mr. DIXON, and Mr. EXON):

S. 3004. A bill to amend the Soil Conservation and Domestic Allotment Act to provide that the number of local committees selected under such act shall be not less than the number of such local committees on December 31, 1980, and to amend the Agricultural Adjustment Act of 1938 to provide that the members of local, county, and State committees selected under the Soil Conservation and Domestic Allotment Act shall be paid travel expenses; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 3005. A bill to clear certain impediments to the licensing of the yacht *Ellen Ruth* for employment in the coastwise trade; to the Committee on Commerce, Science, and Transportation.

By Mr. SCHMITT:

S. 3006. A bill to establish a program under the coordination of the Office of Science and Technology Policy for improving the use of risk analysis by those Federal agencies concerned with regulatory decisions related to the protection of human life, health, and the environment; to the Committee on Commerce, Science, and Transportation.

By Mr. MURKOWSKI:

S. 3007. A bill to amend the Federal Aviation Act of 1958; to the Committee on Commerce, Science, and Transportation.

By Mr. DOLE (for himself, Mr. SCHMITT, Mr. GORTON, Mr. DURENBERGER, Mrs. KASSEBAUM, Mr. HATFIELD, Mr. PACKWOOD, Mr. ANDREWS, Mr. METZENBAUM, Mr. DANFORTH, Mr. PRESSLER, Mr. ROTH, Mr. LAXALT, Mr. GARN, Mr. HEINZ, Mr. COHEN, Mr. DOMENICI, Mr. D'AMATO, Mr. RUDMAN, and Mr. BAKER):

S. 3008. A bill to amend the laws of the United States to eliminate gender-based distinctions; to the Committee on the Judiciary.

By Mr. WARNER:

S. 3009. A bill to amend the Tariff Schedules of the United States to impose a one-tenth of one cent duty on apple and pear juice; to the Committee on Finance.

By Mr. CRANSTON:

S. 3010. A bill to amend certain Federal laws to prohibit mandatory retirement, eliminate barriers to the employment of older workers, and provide incentives for part-time and full-time employment of such workers; to the Committee on Finance.

By Mr. SASSER:

S. 3011. A bill to amend the Disaster Relief Act of 1974 to increase the aggregate amount of grants which may be made under such Act to any individual or family adversely affected by a major disaster; to the Committee on Environment and Public Works.

By Mr. SASSER:

S. 3012. A bill to amend the Small Business Act to reduce the interest rate payable on the Federal share of certain disaster loans made under such Act; to the Committee on Small Business.

By Mr. McCLURE (for himself and Mr. SYMMS):

S. 3013. A bill to provide relief for certain desert land entrymen in Idaho; to the Committee on Energy and Natural Resources.

By Mr. DECONCINI:

S. 3014. A bill entitled "The Small Business Emergency Assistance Act of 1982."; to the Committee on Small Business.

By Mr. GOLDWATER:

S. 3015. A bill to amend the Tariff Act of 1930 to prohibit an allowance against the foreign market value of merchandise to offset the adjustment to the exporter's sales price of such merchandise required to be made by section 772(e)(2) of such Act, and for other purposes; to the Committee on Finance.

By Mr. DIXON:

S. 3016. A bill to provide for the public financing of general elections for the United States Senate, and for other purposes; to the Committee on Rules and Administration.

By Mr. PERCY (for himself, Mr. BAUCUS, and Mrs. HAWKINS):

S. 3017. A bill to provide for the temporary duty-free treatment of certain needlecraft display models, and for other purposes; to the Committee on Finance.

By Mr. EAST:

S. 3018. A bill to reform the federal judiciary and promote the separation of powers; to the Committee on the Judiciary.

By Mr. HEINZ (for himself and Mr. HATFIELD):

S. 3019. A bill to direct the Secretary of Housing and Urban Development to undertake a program to demonstrate the feasibility of funding neighborhood development activities by providing Federal matching funds to private nonprofit neighborhood organizations on the basis of the voluntary contributions such organizations receive from individuals, businesses, and religious institutions in their neighborhoods; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. JEPSEN:

S. 3020. A bill to establish a Presidential Advisory Panel for Coordination of Government Debt Collection and Delinquency Prevention Activities; to the Committee on Governmental Affairs.

S. 3021. A bill to amend part B of title IV of the Higher Education Act of 1965 to provide that the guaranteed student loan program be available only to students having need for such assistance; to the Committee on Labor and Human Resources.

S. 3022. A bill to amend the Internal Revenue Code of 1954 and title IV of the Higher Education Act of 1965 to establish the collection of student loans in default; to the Committee on Finance.

By Mr. CHILES:

S. 3023. A bill to amend the Internal Revenue Code of 1954 to exempt from rules relating to foreign conventions all conventions, et cetera, held on domestic cruise ships and on certain foreign cruise ships which port in qualified Caribbean Basin countries; to the Committee on Finance.

By Mr. WALLOP:

S. 3024. A bill to amend the Internal Revenue Code of 1954 to promote transfers of real property interests to certain organizations for use for conservation purposes; to the Committee on Finance.

S. 3025. A bill to amend the act of July 15, 1968 (82 Stat. 356), Public Law 90-401 to include units of the National Forest System within the provisions of the act, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DECONCINI (for himself and Mr. DOMENICI):

S. 3026. A bill relating to the Navajo and Hopi Indian Tribes; to the Select Committee on Indian Affairs.

By Mr. HATCH:

S. 3027. A bill to amend the Bankruptcy Act regarding executory contracts, and for other purposes; to the Committee on the Judiciary.

By Mr. METZENBAUM:

S. 3028. A bill to amend the Natural Gas Policy Act of 1978; to the Committee on Energy and Natural Resources.

By Mr. PROXMIRE:

S. 3029. A bill to promote the nuclear nonproliferation policies of the United States; to the Committee on Foreign Relations.

By Mr. CHAFEE (for himself and Mr. BAUCUS):

S. 3030. A bill to amend the Internal Revenue Code of 1954 to allow an employer to provide participants in a defined benefit plan with supplemental retirement benefits through a defined contribution plan of the employer; to the Committee on Finance.

By Mr. HUDDLESTON (for himself and Mr. FORD):

S. 3031. A bill to amend the Internal Revenue Code of 1954 to provide that proceeds from identical wagers shall not be aggregated for purposes of determining whether a tax should be withheld; to the Committee on Finance.

By Mr. MOYNIHAN:

S. 3033. A bill to suspend, until September 30, 1984, the duty on the radio portion of certain clock radios; to the Committee on Finance.

By Mr. CRANSTON:

S. 3034. A bill to amend title II of the Social Security Act to provide that the combined earnings of a husband and wife during the period of their marriage shall be divided equally and shared between them for benefit purposes, so as to recognize the economic contribution of each spouse to the marriage and assure that each spouse will have social security protection in his or her own right; to the Committee on Finance.

By Mr. BRADLEY:

S. 3035. A bill to amend the Tariff Schedules of the United States to provide for a temporary suspension of the duty on certain alloys of cobalt; to the Committee on Finance.

S. 3036. A bill to amend the Tariff Schedules of the United States to provide for a temporary suspension of duty on natural graphite; to the Committee on Finance.

By Mr. DOLE (for himself, Mr. DANFORTH, Mr. HEFLIN, and Mr. ANDREWS):

S. 3037. A bill to amend the bankruptcy laws regarding farm produce storage facilities, and for other purposes; considered and passed.

By Mr. STEVENS (for himself, Mr. GORTON, and Mr. KASTEN):

S. 3038. A bill to admit a certain passenger vessel to the coastwise trade; to the Committee on Commerce, Science, and Transportation.

By Mr. ROBERT C. BYRD (for Mr. DECONCINI (for himself and Mr. GOLDWATER)):

S. 3039. A bill to provide for the use of certain fees collected from visitors to Grand Canyon National Park, and for other purposes; considered and passed.

By Mr. ARMSTRONG (for himself, Mr. COHEN, Mr. HOLLINGS, Mr. MATSUNAGA, Mr. ANDREWS, Mr. CANNON, Mr. GARN, Mrs. HAWKINS, Mr. INOUYE, Mr. TSONGAS, and Mr. ROBERT C. BYRD):

S. 3040. A bill establishing a new G.I. Education Program; to the Committee on Veterans Affairs.

By Mr. HEINZ (for himself, Mr. DOLE, Mr. DOMENICI, Mr. LUGAR, Mr. HART, Mr. SPECTER, Mr. HELMS, Mr. EAST, Mr. CANNON, Mr. STEVENS, Mr. GRASSLEY, Mr. METZENBAUM, Mr. MATHIAS, Mr. HEFLIN, Mr. SARBANES, Mr. THURMOND, Mr. BENTSEN, Mr. KASTEN, Mr. JOHNSTON, Mr. BUMPERS, Mr. SCHMITT, Mr. ROTH, Mr. D'AMATO, Mr. KENNEDY, Mr. BOSCHWITZ, Mr. HOLLINGS, Mr. DURENBERGER, Mr. STENNIS, Mr. LAXALT, Mr. RIEGLE, Mr. PRYOR, Mr. ZORINSKY, Mr. INOUYE, and Mr. DIXON):

S.J. Res. 260. A joint resolution to designate the period commencing January 1, 1983, and ending December 31, 1983, as the "Tricentennial Anniversary Year of German Settlement in America"; considered and passed.

By Mr. BAKER (for Mr. GARN, (for himself, Mr. BAKER, Mr. ROBERT C. BYRD, Mr. LUGAR, Mr. RIEGLE, Mr. ABDNOR, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BOSCHWITZ, Mr. BURDICK, Mr. BUMPERS, Mr. CANNON, Mr. COCHRAN, Mr. D'AMATO, Mr. DIXON, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. GRASSLEY, Mr. HEFLIN, Mr. HUDDLESTON, Mr. KASTEN, Mr. LEAHY, Mr. MCCLURE, Mr. PERCY, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. RANDOLPH, Mr. SASSER, Mr. STAFFORD, Mr. WALLOP, Mr. WARNER, Mr. GOLDWATER, Mr. DOLE, Mr. CRANSTON, Mr. CHAFEE, Mr. NICKLES, Mr. THURMOND, Mr. MATTINGLY, and Mr. BENTSEN)):

S.J. Res. 261. A joint resolution designating the week of October 24 through 31, 1982 as "National Housing Week"; considered and passed.

By Mr. ROBERT C. BYRD (for himself and Mr. BAKER):

S.J. Res. 262. A joint resolution to designate the month of November 1982 as "National Christmas Seal Month"; considered and passed.

By Mr. THURMOND:

S.J. Res. 263. A joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week"; to the Committee on the Judiciary.

By Mr. HEINZ (for himself, Mr. THURMOND, Mr. CRANSTON, Mrs. HAWKINS, Mr. SPECTER, Mr. DECONCINI, Mr. HOLLINGS, Mr. CANNON, Mr. MATSUNAGA, Mr. KASTEN, Mr. BURDICK, Mr. DIXON, Mr. BAUCUS, Mr. DODD, Mr. CHAFEE, Mr. LEVIN, Mr. DURENBERGER, Mrs. KASSEBAUM, Mr. GORDON, Mr. D'AMATO, Mr. DOLE, Mr. HAYAKAWA, and Mr. BOSCHWITZ):

S.J. Res. 264. A joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Week"; to the Committee on the Judiciary.

By Mr. DENTON (for himself, Mr. HARRY F. BYRD, JR., Mr. HELMS, Mr. JEPSEN, Mr. MATTINGLY, and Mr. NICKLES):

S.J. Res. 265. A joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism"; to the Committee on the Judiciary.

By Mr. CRANSTON:

S.J. Res. 266. A joint resolution on the declaration on prevention of nuclear war; to the Committee on Foreign Relations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER (for himself and Mr. ROBERT C. BYRD):

S. Res. 490. A resolution to establish a procedure during recesses and adjournments to authorize the production of Senate documents and testimony; considered and agreed to.

By Mr. DECONCINI:

S. Res. 491. A resolution to request the President to attempt to eliminate differential foreign exchange rates in Mexico; to the Committee on Foreign Relations.

By Mr. MATHIAS:

S. Res. 492. An original resolution authorizing the Sergeant at Arms of the Senate, with the approval of the Committee on Rules and Administration, to settle certain claims involving Members, officers, and employees of the U.S. Senate; from the Committee on Rules and Administration; placed on the calendar.

By Mr. MATHIAS:

S. Res. 493. An original resolution authorizing the printing of the prayers by the Reverend Edward L. R. Elson, S.T.D., as Chaplain of the Senate during the 96th and 97th Congresses; from the Committee on Rules and Administration; placed on the calendar.

By Mr. MATHIAS:

S. Res. 494. A resolution to preserve and restore the first town hall of the city of Washington, District of Columbia—the historic Rhodes Tavern; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PRYOR:

S. 3001. A bill to establish a Director of Operational Testing and Evaluation in the Department of Defense, and for other purposes; to the Committee on Armed Services.

(The remarks of Mr. PRYOR on this legislation appear earlier in today's RECORD.)

By Mr. STEVENS:

S. 3003. A bill to amend the Labor Management Relations Act, 1947, to establish a final offer arbitration procedure for the resolution of labor disputes involving certain organized professional team sports and to end the current National Football League labor dispute through the use of such procedure; to the Committee on Labor and Human Resources.

(Mr. STEVENS' remarks on this legislation and a copy of the legislation appear earlier in today's RECORD.)

By Mr. ZORINSKY (for himself, Mr. ANDREWS, Mr. SARBANES, Mr. BAUCUS, Mr. MELCHER, Mr. BURDICK, Mr. DECONCINI, Mr. SASSER, Mr. HEFLIN, Mr. DIXON, and Mr. EXON):

S. 3004. A bill to amend the Soil Conservation and Domestic Allotment Act to provide that the number of local committees selected under such act shall be not less than the number of such local committees on December 31, 1980, and to amend the Agricultural Adjustment Act of 1938 to provide that the members of local, county, and State committees selected under the Soil Conservation and Domestic Allotment Act shall be paid travel expenses; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

● Mr. ZORINSKY. Mr. President, I am introducing a bill which will assure that county and community committees, which are selected under established procedures provided by the Soil Conservation and Domestic Allotment Act, will continue to function on the same basis as they have prior to December 31, 1980.

Joining me in cosponsoring this bill are Senators ANDREWS, SARBANES, BAUCUS, MELCHER, BURDICK, DECONCINI, SASSER, HEFLIN, DIXON, and EXON.

The Congress has previously acted in an amendment to the tobacco bill to advise the administration of its support for these committees that are a vital part of the Agricultural Stabilization and Conservation Service.

In Nebraska, as in other States, these committees operate within local communities to inform their neighbors about farm programs and play an important role in seeing that these programs are administered with fairness and equity.

The recent activities of top level USDA officials have created doubts and uncertainties about the role of local committees. This bill is designed to do nothing more than protect the traditional and historic role of these committees.

It has been my privilege to have had the opportunity to consult with the leaders of the National Association of Farmer-Elected Committees and the affiliated Nebraska Association. These members have assured me of the strong support of their members for this legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3004

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Agricultural Stabilization and Conservation Committees Act of 1982".

NUMBER OF LOCAL COMMITTEES

SEC. 2. The fifth paragraph of section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) is amended by inserting after the second sentence the following: "The number of such local areas in any county shall be not less than the number of such local areas in such county on December 31, 1980.".

TRAVEL EXPENSES FOR MEMBERS OF LOCAL, COUNTY, AND STATE COMMITTEES

SEC. 3. Section 388(b) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1388(b)) is amended—

(1) by inserting "(1)" after "(b)", and

(2) by adding at the end the following new paragraph:

"(2) The Secretary is authorized and directed, from any funds made available for the purposes of the Acts in connection with which local, county, and State committees of farmers are utilized, to make payments to the members of such committees to cover the administrative expenses for travel incurred by such members in cooperating in carrying out the provisions of such Acts. Such administrative expenses for travel shall be paid in the same manner as is authorized under section 5703 of title 5, United States Code, for the payment of expenses and allowances for individuals employed intermittently in the Government service. No part of such administrative expenses for travel may be deducted from the Soil Conservation payments, parity payments, or loans, or other payments under such Acts.".

APPLICATION OF AMENDMENTS

SEC. 4. (a)(1) Except as provided in paragraph (2), the amendment made by section 2 shall apply with respect to elections of members of local, county, and State committees conducted under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) after the effective day of this Act.

(2) Notwithstanding such section 8(b), any member of any such local committee elected on or before such date in a county with respect to which—

(A) such local committee is also the county committee, and

(B) such amendment results in an increase in the number of local administrative areas designated under such section 8(b),

shall serve the unexpired portion of such member's term as a member of the local committee for the local administrative area so designated in which such member resides if such local administrative area is in the county in which such member resided on the date of such member's election to such term.

(b) The amendment made by section 3 shall not apply with respect to travel expenses incurred before the effective date of this Act.

EFFECTIVE DATE

SEC. 5. This Act and the amendments made by this Act shall take effect October 1, 1983.●

● Mr. SASSER. Mr. President, the Zorinsky bill, S. 3004 is a measure deserving not only of our support but of our prompt attention. I am proud to be a cosponsor of this measure.

For almost 50 years the farmer-elected committee system has played an important part in administering the commodity stabilization program as well as the price support programs. This system achieves a very worthwhile goal, putting the administration of farm programs in the hands of those who are best equipped to handle such a task, the local farmers.

We have seen these different committees adjust through the years to a variety of new and often innovative agriculture programs. They have always managed to meet the task we place before them.

In my home State of Tennessee there are 285 county committeemen and between 2,500 and 2,700 community committeemen. These are individuals who are in touch with the concerns of their community. With this knowledge and experience they can provide a leadership role in overseeing the smooth operation of the various programs affecting farmers in their areas.

Mr. President, several States have recently seen drastic upheavals in the committee system. These changes have left all who are involved with this worthwhile program wondering just what the future has in store for them. I believe we should take the necessary steps to assure these dedicated individuals of our commitment to support their efforts on behalf of American farmers.

S. 3004 does just that Mr. President. In light of these considerations I urge my colleagues to support S. 3004 and work for its prompt passage.●

By Mr. THURMOND (for himself and Mr. HOLLINGS):

S. 3005. A bill to clear certain impediments to the licensing of the yacht *Ellen Ruth* for employment in the coastwise trade; to the Committee on Commerce, Science, and Transportation.

THE VESSEL "ELLEN RUTH"

Mr. THURMOND. Mr. President, on behalf of Senator HOLLINGS and myself, I am today introducing a bill to have the vessel *Ellen Ruth* documented as a vessel of the United States.

Mr. President, section 27 of the Merchant Marine Act of 1920 prohibits American-made vessels subsequently placed under foreign registry from engaging in coastwise trade between posts in the United States or its territories. The vessel *Ellen Ruth* was built in the United States in 1960 and documented for coastwise trade through 1979, after which time she was registered in the Republic of Panama. In the summer of 1980, she was returned to the United States for repairs, and, after being substantially refitted, she was sold to an American citizen, who then made extensive additional repairs in the United States.

Unfortunately, due to the prohibition contained in section 27 of the Merchant Marine Act of 1920, this vessel cannot now be documented for coastwise trade in the United States or its territories, and is restricted to use solely as a pleasure craft. The purpose of this bill is to waive that restriction as to this particular vessel, so that she might now engage in the coastwise trade for which she was built and fitted.

Mr. President, this is not an unusual legislative procedure in matters of this sort, and there should be no objection to granting this particular exemption. This vessel was both built and refitted in the United states, with but 1 year of foreign registry, and the failure to grant an exemption in this case would serve no useful purpose. I ask unanimous consent that this bill appear in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3005

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provisions of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel *Ellen Ruth* (official number 282354), owned by Jefferson B. Bruton, of Isle of Palms, South Carolina, to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.

By Mr. SCHMITT:

S. 3006. A bill to establish a program under the coordination of the Office of Science and Technology Policy for improving the use of risk analysis by those Federal agencies concerned with regulatory decisions related to the protection of human life, health, and the environment; to the Committee on Commerce, Science, and Transportation.

RISK ANALYSIS RESEARCH AND DEMONSTRATION ACT OF 1982

● Mr. SCHMITT. Mr. President, today I am pleased to introduce a bill "to establish a program under the coordination of the Office of Science and Technology Policy for improving the use of risk analysis by those Federal agencies concerned with the regulatory decisions related to the protection of human life, health, and the environment."

This legislation, the "Risk Analysis Research and Demonstration Act of 1982," will increase coordination of risk analyses in a number of Federal agencies and provide for a series of demonstration projects. The goal of this undertaking is to improve our understanding of risk and comparative risk analysis and to develop standards for its application.

It is timely and important that the Congress guide efforts for improving the understanding and systematic use of comparative risk analysis by the Federal regulatory agencies. Our society relies increasingly on science and technology as bases for its health, welfare, and security. At the same time, increased concerns have also arisen regarding the risks to health and safety which are posed by this reliance. Concerns over technological hazards have led to steadily increasing governmental involvement in risk assessment and management.

Presently there are a number of Federal regulatory agencies which are grappling with the meaning, role, and application of risk analysis in the fulfillment of their missions. These efforts are generally little coordinated, so that the presumptions, criteria, and standards which are applied vary widely. Congress has provided little overall guidance on how risks are to be identified or analyzed.

This legislation does not require balancing of risks with benefits or of benefits with costs; agencies retain discretionary authority to determine acceptable levels of risk. The general use of such balancings must be preceded by an assessment of available methods of analysis and demonstration of their validity. This legislation is a necessary step on the road to a better and more balanced use of risk analyses by the Federal Government. When enacted this bill will be a major contribution to determining whether, where and how comparative risk analysis can be a useful tool in the design and assessment of Federal regulations.

Mr. President, I urge the Senate to act on this legislation favorably, as the House of Representatives has already done on related legislation, H.R. 6159, sponsored by Congressman RITTER. And I ask unanimous consent that a copy of the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3006

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Risk Analysis Research and Demonstration Act of 1982".

FINDINGS AND DECLARATIONS

SEC. 2. (a) The Congress hereby finds and declares that—

(1) a number of Federal agencies have been mandated by law to protect, or provide information to protect, human life, health, and the environment;

(2) decisions by Federal agencies, legally mandated to protect human life, health, and the environment, often involve rules to reduce risk to human life, health, and the environment;

(3) such regulatory decisions involve scientific, economic, social, and philosophical considerations;

(4) these decisions increasingly involve an assessment of risks to human life, health, and the environment and a balancing of those risks against the economic and social consequences of controlling them;

(5) improving the quality of the scientific component of such decisions is an important aspect of preserving the public's freedom of choice in weighing the social and philosophical values intrinsic in them; and

(6) analysis of the comparative risks to health and individual welfare among different groups can assist in setting broad public policy objectives.

(b) Accordingly, it is necessary for Federal agencies—

(1) to equip themselves with an effective means for securing information on, and an understanding of, the scientific bases for their regulatory decisions;

(2) to utilize such information and understanding, whenever appropriate, as one factor in the assessment of matters before them pertaining to decisions related to the protection of human life, health, and the environment; and

(3) to better delineate the scientific basis for agency decisions from their more subjective, judgmental aspects.

(c) Since risk analysis is an emerging tool for regulatory decisionmaking, there is a need to encourage basic and applied research in this interdisciplinary field; and the results of this research can contribute to enhancing the quality of the scientific component of the regulatory decisionmaking process.

(d) Risk analysis is basically a multistep process consisting first of a scientifically based risk assessment, which concentrates on the identification, probability, and consequences of risk, and secondly of a risk evaluation, which is more judgmental in nature and concentrates on decisions defining acceptable levels of risk. Risk analysis will not provide a formula for setting public policies and making regulatory decisions, however, it may be a procedure by which the delineation in section 2(b)(3) is facilitated.

(e) Scientific and technological decisions concerning risk normally involve consideration of alternative courses of action. Evaluation of these alternatives involves different risks and a balancing and ranking of the risks involved in these options. Comparative risk analysis is a means by which a rational objectivity can be brought to the process of risk evaluation and the balancing of these alternatives. An important part of such decisions, and the ultimate question, is the acceptability of risk by the public; and comparison of risks represents a means by which levels of risk can be presented to the public in terms which facilitate freedom of choice in the weighing of nonquantifiable values.

(f) While many Federal agencies utilize risk analyses, there is presently no systematic, coordinated effort to establish risk analysis as an instrument in making regulatory decisions.

(g) Recent judicial decisions have demonstrated the need to further develop risk analysis in order to meet the rigorous standards of evidence and proof of cause and effect which the courts have found to be required by some agency statutes.

PURPOSE

SEC. 3. It is the purpose of this Act to develop a comprehensive and coordinated research and demonstration program for risk analysis, taking into account the findings and declarations set forth in section 2, in order to—

(a) improve the use of risk analysis within those Federal agencies concerned with regulatory decisions related to human life, health, and the environment;

(b) develop a coordinated and systematic approach to the conduct and use of risk analysis by such Federal agencies;

(c) define criteria and standards to guide the development and use of risk analysis;

(d) identify research needed by Federal agencies to improve the methodologies and use of risk analysis in regulatory decisionmaking;

(e) establish within such Federal agencies a means to promote an understanding by the public of the risk to life, health, and the environment of scientific and technological decisions made within their jurisdictions, by expressing those risks in terms of easily understood, everyday experience; and

(f) facilitate public understanding of the nature of regulated risks and the means of their quantification.

DEFINITIONS

SEC. 4. For the purposes of this Act—

(a) the term "risk" means the potential for realization of unwanted, negative consequences to human life, health, or the environment;

(b) the term "risk assessment" means the process of quantification of the probabilities and consequence values for an identified risk;

(c) the term "risk evaluation" means the complex process of developing acceptable levels of risk to individuals, society, or the environment;

(d) the term "risk analysis" means the total process, including both risk assessment and risk evaluation, of quantifying a risk and finding an acceptable level of that risk for an individual, group, society, or the environment; and

(e) the term "comparative risk analysis" means a procedure of risk evaluation in which the probabilities and consequences of the risks associated with one course of action versus one or many alternative courses of action are compared, and which may include—

(1) comparisons of one particular action versus no action at all;

(2) comparisons of two or more different actions directed at achieving the same benefit;

(3) comparisons of the risks due to decisions to control potential hazards to differing levels;

(4) ranking of the risks that may result from any single course of action; and

(5) comparisons of the risks of any decision to control the effects of any course of action as compared to similar risks which may occur, or be present, due to natural occurrence;

(f) the term "Administrator" means the Administrator for Information and Regulatory Affairs in the Office of Management and Budget;

(g) the term "Office" means the Office of Science and Technology Policy;

(h) the term "Director" means the Director of the Office of Science and Technology Policy; and

(i) the term "Federal regulatory agencies" means agencies within the Federal Government which are involved with regulatory decisions concerning human life, health, and the environment.

OBJECTIVES AND ESTABLISHMENT OF PROGRAM

SEC. 5. (a) The objectives of the program established under subsection (b) shall include—

(1) development of research programs within Federal agencies (particularly those specifically designated in subsections (b)(4) and (b)(5)), intended to improve and develop new techniques for measuring, gathering, analyzing, and evaluating data necessary to complete risk assessments and evaluations, with particular emphasis on the use of comparative risk in risk evaluation;

(2) application, as appropriate, of such research to the regulatory decisionmaking process to eliminate the deficiencies in that process identified in the findings;

(3) coordination among Federal agencies for the use of common research results and information required for risk analysis; and

(4) development of strategies for the use of comparative risk—

(A) to set priorities on what specific actions or hazards should be the subject of regulation;

(B) to establish the most effective means of regulating a specific environmental, health, or safety hazard; and

(C) to improve public understanding of decisions involving risk to human life, health, and the environment; and

(5) establishment of a procedure for the transfer and utilization of information and data between Federal agencies and private and nonprofit corporations and institutions.

(b) The President shall establish and direct in accordance with the provisions of this Act a coordinated program for the improvement and use of risk analysis, which shall—

(1) be designed to achieve the objectives set forth in subsection (a);

(2) direct the Office to provide oversight and guidance for the program;

(3) direct the Administrator to provide coordination, planning, and implementation of the program within and among Federal agencies;

(4) involve, where appropriate, Federal agencies involved in regulatory decisions or providing information for regulatory decisions, including but not limited to, the Food and Drug Administration, the Environmental Protection Agency, the Occupational Safety and Health Administration, the Food Safety and Inspection Service of the Department of Agriculture, and the Consumer Product Safety Commission; and

(5) involve, where appropriate, the National Science Foundation and other agencies with basic and applied research programs applicable to the improvement of risk analysis.

(c) The Administrator within twelve months after the enactment of this Act shall present to the Congress a plan which shall include—

(1) a review of the risk analyses presently being carried out within the Federal regulatory agencies specifically designated in subsection (b)(4), and their use in the regulatory decisionmaking process;

(2) a review of the risk analysis research being carried out by Federal agencies specifically designated in subsection (b)(4), and the procedures within those agencies for linking this research to the regulatory decisionmaking process;

(3) for purposes of comparison with the findings to be made under paragraphs (1) and (2), a brief review of risk analysis and risk analysis research presently being carried out outside Federal agencies;

(4) identification of specific areas of emphasis for research conducted within Federal agencies, and recommendations for the funding of such research outside such agencies by the Federal regulatory agencies, the National Science Foundation, and the National Institutes of Health;

(5) recommendations for a coordinating mechanism to transmit and share research results among Federal agencies, between Federal agencies and other public agencies, and between Federal agencies and private and nonprofit corporations and institutions;

(6) a program plan for prototypical risk analysis demonstrations which shall be carried out within the Federal regulatory agencies specifically designated in subsection (b)(4);

(7) identification of the areas where the use of the results of a risk analysis is limited or prohibited by current law, regulation, or practice; and

(8) recommendations for increasing public awareness and understanding of risk.

RESEARCH

SEC. 6. (a) The Federal regulatory agencies specifically designated in section 5(b)(4) shall recommend to the Director research required to meet the objectives stated in section 5(a).

(b) The National Science Foundation, on the basis of work done by the National Academy of Sciences and other individuals and institutions both inside and outside the Federal Government, shall recommend to the Director a program of research directed at strengthening the basic and applied sciences required to support Federal agencies in utilizing risk analysis methods in regulatory decisionmaking. Such program shall include—

(1) research on new and improved methods for gathering data;

(2) research on new and improved methodologies for analyzing and utilizing such data; and

(3) research on the role of comparative risk analysis in regulatory decisionmaking.

(c) The Director shall establish a mechanism for coordinating the research programs of the Federal agencies pursuant to subsection (a) and of the research programs recommended by the National Science Foundation pursuant to subsection (b).

DEMONSTRATION PROJECTS

SEC. 7. (a) Each of the Federal agencies specifically designated in section 5(b)(4) shall undertake a prototypical risk analysis study. These studies should utilize presently available information and techniques, or new developments where available, and wherever appropriate should include the following elements:

(1) Comparison of risk of alternative courses of action.

(2) Delineation between scientific and policy judgments.

(3) Identification of specific assumptions and uncertainties.

(4) Identification of limitations placed on the analysis due to relevant organizational and statutory constraints.

(5) Identification of specific tradeoffs posed in the particular risk analysis.

(6) Suggestions of how additional information, or changes in statutory language and organizational structure, could change the strategy chosen to cope with this problem.

(7) Discussion of how comparative risk analysis could be utilized to make the public aware of the relevance of the decisions, including a consideration of factors such as voluntary versus involuntary nature of similar risks, manmade versus natural risks, and necessary versus unnecessary risks.

(8) Delineation of information concerning the different levels of risk to health and welfare among different groups within the population, including consideration of socioeconomic, location, and other pertinent factors, to assist in the equitable sharing of risks and for benefits to be realized from the regulatory process and the implementation of public policy.

(b) Such studies shall be completed within two years after the date of the enactment of this Act, and shall be available to experts in the field for critical peer review and to the public at large.

REPORT

SEC. 8. (a) The Administrator shall issue a report to the Congress within thirty months after the date of the enactment of this Act, which shall include—

(1) a summary of the findings made pursuant to section 5(c);

(2) a critical review of agencies' risk analysis procedures or capabilities as evidenced by the prototype studies prepared pursuant to section 7;

(3) recommendations for future research necessary to achieve the purposes and objectives of this Act;

(4) recommendations for legislation needed to implement and facilitate the use of risk analysis within Federal agencies;

(5) recommendations for nonlegislative changes, including organizational changes, to implement a policy of risk analysis within Federal agencies;

(6) recommendations that will result in the improved transfer of risk-related research and information between Federal agencies and private and nonprofit corporations and institutions; and

(7) recommendations for improving and increasing public understanding and appreciation of risk and regulatory decisions.

(b) In the preparation of the report the Administrator shall seek the advice and comment by organizations and representatives of both public and private interests, and any comments made shall be included in the final draft of such report submitted to Congress.

SEC. 9. Nothing in this Act shall constitute an authorization for the appropriation of funds from the Treasury of the United States.●

By Mr. MURKOWSKI (for himself, Mr. D'AMATO, and Mrs. HAWKINS):

S. 3007. A bill to amend the Federal Aviation Act of 1958; to the Commit-

tee on Commerce, Science, and Transportation.

FEDERAL AVIATION ACT AMENDMENTS

● Mr. MURKOWSKI. Mr. President, today I am introducing legislation which would liberalize current cabotage law and allow foreign air carriers to engage in interstate air transportation between Alaska and New York.

The legislative history of cabotage laws can be characterized as a progressive tightening of the terms and conditions under which the CAB will allow exemptions, and consequently the language incorporated in final statutes is very restrictive and quite narrowly defines the authority of the CAB. The only limited provision allowing cabotage, placed in the FAA Act by the International Air Transportation Competition Act of 1979, was an outgrowth of the debate over travel disruptions during 1979 following the United Airlines strike and the grounding of the DC-10. These situations demonstrated a need for statutory relief, under strict guidelines, which the CAB could confer under emergency circumstances. The bill I propose today would allow relief for one other circumstance under equally strict guidelines.

At present there is no nonstop domestic passenger carrier service from Alaska to the east coast of the United States. The route is available to domestic carriers but not flown. There are at least two foreign carriers who operate nonstop flights daily between Alaska and New York, but our cabotage laws preclude interstate transport of passengers between domestic points by foreign carriers.

This prohibition results in 11-hour or more flights on domestic carriers with one or more layovers, while foreign carriers fly a direct nonstop 6½-hour flight often with empty seats.

Section 416(b)(7) of the FAA Act of 1958 allows cabotage exemptions under unusual emergency conditions. This exemption is available only when all possible efforts to accommodate traffic by utilizing the resources of U.S. air carriers have been exhausted. In Alaska's case, there are no U.S. air carriers serving such a route. Since Alaska is so dependent on oil transportation, travel to and from Alaska is not ordinary or usual and should receive additional consideration. Remember that transportation to, from, and within the State of Alaska is unlike any other region in the United States in that Alaska is separated by a foreign country, Canada.

The State of Alaska is extremely dependent upon air service as a basic means of transportation. For example, the capital of the State, Juneau, is only accessible by sea or air. A traveler in Seattle, bound for Anchorage could opt for a direct 3-hour flight or a 5- to 6-day driving trip, which is the next fastest available means of transport. Furthermore, in terms of flight time and actual distance, the capital of Japan—Tokyo—is at least 4½ hours closer to Alaska than our own Nation's Capital here in Washington, D.C. Similarly, flights from Anchorage to London, Paris, and Copenhagen are at least 2½ hours shorter than existing flights between Alaska and Washington, D.C.

The geographic location and unique circumstances of travel to Alaska clearly necessitate that special consideration or relief be allowed for the public good.

To further illustrate the uniqueness of transportation in Alaska, I might add that Alaska has the highest per capita number of pilots and highest per capita number of private aircraft owners. Air travel is a part of every Alaskan's life. The use and ownership of aircraft in Alaska is similar to having a second car in the continental U.S. and is often out of necessity.

I am well aware of industry's longstanding opposition to the relaxation of these laws. Note however, that this bill is narrowly defined and allows cabotage between Alaska and New York only if the CAB finds that it is in the public interest and that no other domestic carrier is accommodating the public between such points. Hence, should a domestic carrier initiate similar service between Alaska and the east coast, the foreign carrier would not be allowed to continue its domestic passenger service.

The bill introduced to this body today is straightforward and proposes an exemption only under specific circumstances. It should not be construed as an opening wedge that would lead to additional exemptions in other areas in the future. It seeks consideration only for the State of Alaska due to its geographical location and the ujique circumstances and difficulties associated with travel to and from the State.●

By Mr. DOLE (for himself, Mr. GORTON, Mr. DURENBERGER, Mrs. KASSEBAUM, Mr. HATFIELD, Mr. PACKWOOD, Mr. ANDREWS, Mr. METZENBAUM, Mr. DANFORTH, Mr. PRESSLER, Mr. ROTH, Mr. LAXALT, Mr. GARN, Mr. HEINZ, Mr. COHEN, Mr. DOMENICI, Mr. D'AMATO, Mr. RUDMAN, and Mr. BAKER):

S. 3008. A bill to amend the laws of the United States to eliminate gender-based distinctions; to the Committee on the Judiciary.

ELIMINATION OF GENDER-BASED DISTINCTIONS

Mr. DOLE. Mr. President, today I am introducing omnibus legislation to cleanse the Federal Code of some 100 gender-based distinctions. This bill is aimed solely at statutes which discriminate on their face and therefore is limited in scope. I think we can all agree that with few exceptions, statutes which explicitly provide for different treatment of the basis of sex have no place in our Nation's laws. I think we can also all recognize that while a bill of this nature is only a small step, it is an important and necessary step, in our continuing efforts to achieve equality for women under the law.

BACKGROUND

Sex bias in the United States Code has been the subject of three comprehensive studies over the past several years: The first, "Sex Bias in the United States Code" was released by the U.S. Commission on Civil Rights in 1977; a second, more comprehensive report was completed by the Department of Justice's task force on sex discrimination in 1978, the most recent was completed last June by President Reagan's Task Force on Legal Equity for Women. The June report provided an extensive listing of discriminatory statutes which have been cured in recent years and those still remaining on the books, a listing which led to the development of this legislation.

WHAT THE BILL WOULD NOT DO

This bill would not cure all of the sex-biased statutes which have been identified by these various studies. For instance, because its focus is aimed at eradicating substantive discrimination, it would not cure all the sex-biased terminology in the code. It would also not amend several controversial code sections, such as the combat limitations and selective service provisions in title 10, and a few sections of the Social Security Act and Criminal Code. Any amendment which might be of a controversial nature was purposefully omitted, so that its sensitive nature would not imperil the fate of the remainder of the bill.

WHAT THE BILL WOULD DO

This bill would amend the vast majority of identified code sections which still explicitly provide for substantive sex discrimination. Most of these remaining provisions are of narrow application; some have already been held unconstitutional, and therefore are no longer followed. A few of the amendments would have some real impact. For instance, the bill would cure certain provisions of the Social Security Act and Railroad Retirement Act which, in very technical areas, still discriminate in the determination of benefits. But most of the amendments can properly be characterized as house cleaning. For instance under current law, widows but not widowers of deceased military personnel may use commissaries. The bill would cure this distinction.

In emphasizing the limitations of this legislation, I do not mean to trivialize its importance. In my opinion, sex discrimination, no matter how limited in application, has no place in our statutes, unless necessary to further

some compelling governmental interest. But I also want it to be understood that elimination of facial gender bias is just one small step in a long journey, and cannot be equated with the true achievement of full equality under the law.

OTHER STEPS WHICH MAY BE TAKEN

To truly achieve full equality, of course, we must not only cure those laws which facially discriminate, but also address those laws which, though neutral on their face, nevertheless allow for the discriminatory treatment of women. Laws, which in particular, relate to economic equity—pay equity, insurance discrimination, and pension reform—encompass the more burning issues of the day. With older women comprising the fastest growing poverty group in American society, I believe that pension reform, specifically, requires priority attention. I have instructed my staff to explore possible reforms in our laws dealing with both public and private pension plans, as well as social security benefits, and have resolved that this will be an issue before the Finance Committee next Congress. I do not expect comprehensive reforms to take place overnight, but there are needed changes which we can realistically begin to implement. For instance, the recently enacted tax bill effected one change of significant benefit to women, by reducing the vesting requirements for top heavy plans. But, I believe much more can be done to help women in the overall pension area.

PRESIDENT'S SUPPORT

I am happy to report that President Reagan has written me of his support for this effort to cleanse the code of most remaining, substantive gender bias. As I have previously mentioned, the President's Task Force on Legal Equity for Women has done much work in this area, and the President has welcomed this legislation as a complement to the task force's efforts. But the President also shares the feelings which I have expressed today about the scope of this legislation. Specifically, he states in his letter that:

As important as this is, all of us realize that it is only one step that must be followed by many others. But in the end, I hope we will be able to say that full equality before the law is not just an ideal, but a practical reality.

CONCLUSION

I do not expect, of course, that Congress will be able to act on this bill in this Congress. Rather, I hope that over the next few months, all interested parties will review this legislation, provide me with their comments, if any, and thus enable me to be in a position to push for swift action on the bill either in the lameduck session, or early next year. I reemphasize that I consider this bill to be primarily house cleaning—an important and necessary, but modest step, which we can quickly put behind us.

CREDITS

Before concluding, I would like to give credit to those in the Senate who have introduced legislation in this Congress containing proposals similar to those in this omnibus package. First, credit should go to Senators DURENBERGER, PACKWOOD, and HATFIELD, the three key sponsors of the Economic Equity Act. In this and past Congresses, the Economic Equity Act has contained amendments which would cure the gender-based distinctions in the Naval and Marine reserve promotion system, and in the priority lists used to distribute the effects of certain deceased military personnel: amendments which are incorporated into this bill. Credit should also go to Senator METZENBAUM, who has introduced a bill to remove gender-based references from the Social Security Act, some of which are similar to those contained in this legislation. I commend these Senators for their efforts and thank them for their cooperation.

Mr. President, cosponsoring this legislation are the following Senators: Mr. GORTON, Mr. DURENBERGER, Mrs. KASSEBAUM, Mr. HATFIELD, Mr. PACKWOOD, Mr. ANDREWS, Mr. METZENBAUM, Mr. DANFORTH, Mr. PRESSLER, Mr. ROTH, Mr. LAXALT, Mr. GARN, Mr. HEINZ, Mr. COHEN, Mr. DOMENICI, Mr. D'AMATO, Mr. RUDMAN, and Mr. BAKER.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a letter from the President dated September 27, 1982.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, September 27, 1982.

Hon. ROBERT DOLE,
U.S. Senate,
Washington, D.C.

DEAR BOB: Equality before the law has long been the cornerstone of the American constitutional system. I cherish that principle, and in my responsibilities as President, I have done my utmost to ensure that no person is discrimated against because of race, color, creed, national origin, or sex.

Last year I issued Executive Order 12336, which directed the Attorney General to complete the review of federal laws and regulations containing language that unjustifiably differentiates or discriminates on the basis of sex. The Order also created a Task Force on Legal Equity for Women which is responsible for implementing changes in regulations, policies, and practices ordered by me following review of the Attorney General's report. I am happy to report that the first stage of that process is underway, and I fully expect that when we are finished a significant contribution will have been made toward the achievement of full equality for women before the law.

The legislation which you will be introducing shortly seeks to remove or revise a number of statutes identified as sex biased in a June, 1982, Department of Justice report to me. I welcome your joining me in developing this effort. We will work closely with you and your staff to produce a bill and to see that it is enacted into law.

As importatnt as this is, all of us realize that it is only one step that must be followed by many others. But in the end, I hope we will be able to say that full equality before the law is not just an ideal but a practical reality.

Sincerely,

RON.

Mr. DOLE. Mr. President, I ask unanimous consent that a copy of the bill and a section-by-section summary of this bill be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 3008

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—ARMED FORCES, SOLDIERS' HOME, COAST GUARD, LIGHTHOUSE SERVICE, AND MERCHANT MARINE

PART A—AMENDMENTS RELATING TO THE ARMED FORCES AND THE SOLDIERS' HOME

AMENDMENTS TO TITLE 10, UNITED STATES CODE, RELATING TO THE ARMY

SEC. 101. (a) Section 3683 of title 10, United States Code, is repealed.

(b) Section 3963 of such title is repealed.

(c) Section 4309(b) of such title is amended by striking out "males" and inserting in lieu thereof "persons".

(d) Section 4651 of such title is amended to read as follows:

"§ 4651. Arms, tentage, and equipment: educational institutions not maintaining units of R.O.T.C.

"Under such conditions as the Secretary of the Army may prescribe, such Secretary may issue arms, tentage, and equipment that such Secretary considers necessary for proper military training, to any educational institution at which no unit of the Reserve Officers' Training Corps is maintained, but which has a course in military training prescribed by such Secretary and which has at least 100 physically fit students over 14 years of age.".

(e) Section 4712(d) of such title is amended by striking out clauses (1) through (9) and inserting in lieu thereof the following:

"(1) A beneficiary named in the will of the deceased to receive the property.

"(2) The surviving spouse or legal representative.

"(3) A child of the deceased.

"(4) A parent of the deceased.

"(5) A brother or sister of the deceased.

"(6) The next of kin of the deceased.".

(f) Section 4713(a)(2) of such title is amended by striking out subclauses (A) through (I) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(E) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

AMENDMENTS TO TITLE 10, UNITED STATES CODE, RELATING TO THE NAVY

SEC. 102. (a) Section 5896(a) of title 10, United States Code, is amended—

(1) by striking out "male" each place it appears in subsection (a)(1);

(2) by striking out "male" each place it appears in subsection (a)(2);

(3) by striking out clauses (3), (4), (5), (6), (7), and (8) in subsection (a) and inserting in lieu thereof the following:

"(3) those eligible officers, including eligible officers appointed under section 5581 of this title before September 15, 1981, under consideration for promotion to the grade of commander or above in the Judge Advocate General's Corps, the Chaplain Corps, or the Medical Corps, the Dental Corps, or any other staff corps in the Medical Department of the Navy; and

"(4) those eligible officers, including eligible officers appointed under section 5581 of this title before September 15, 1981, under consideration for promotion to the grade of commander or above in the Judge Advocate General's Corps, the Chaplain Corps, or the Medical Corps, the Dental Corps, or any other staff corps in the Medical Department of the Navy";

(4) by striking out subsection (b); and

(5) by redesignating subsections (c), (d), (e), and (f) as subsections (b), (c), (d), and (e), respectively.

(b) Section 5897 of such title is amended—

(1) by striking out clauses (1) through (8) in subsection (b) and inserting in lieu thereof the following:

"(1) Officers in the line of the Naval Reserve.

"(2) Officers of the Marine Corps Reserve.

"(3) Officers of the Naval Reserve in the Supply Corps.

"(4) Officers of the Naval Reserve in the Civil Engineer Corps.

"(5) Officers of the Naval Reserve in any staff corps in the grade of lieutenant or lieutenant commander or above."; and

(2) by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) A board convened under this chapter that recommends officers of the Naval Reserve including officers appointed under section 5581 of this title before September 15, 1981, in the grade of lieutenant or lieutenant (junior grade) in the Judge Advocate General's Corps, the Chaplain Corps, or the Medical Corps, the Dental Corps, or any other staff corps in the Medical Department of the Navy for promotion shall certify in its report that, in the opinion of a majority of the members of the board, the officers recommended are selected as fitted to assume the duties of the next higher grade.".

(c) Section 5898 of such title is amended—

(1) by striking out "(a)" at the beginning of subsection (a);

(2) by striking out "shall, except as provided in subsection (b) of this section," in the second sentence of subsection (a) and inserting in lieu thereof "shall"; and

(3) by striking out subsection (b).

(d) Section 5899 of such title is amended—

(1) by striking out "A male officer of the Naval Reserve, or a woman officer" in the first sentence of subsection (a) and inserting in lieu thereof "An officer of the Naval Reserve, including an officer";

(2)(A) by striking out "A male officer" in the first sentence of subsection (b) and inserting in lieu thereof "An officer"; and

(B) by striking out "any male officer" in such sentence and inserting in lieu thereof "any officer";

(3) by striking out subsections (c) and (d); and

(4) by redesignating subsections (e), (f), (g), and (h) as subsections (c), (d), (e), and (f), respectively.

(e) Section 6403 of such title is repealed.

(f) Section 7601 of such title is amended—

(1) in subsection (a) by striking out "widows" and inserting in lieu thereof "surviving spouses"; and

(2) in the first sentence of subsection (b)—

(A) by striking out "him" and inserting in lieu thereof "the Secretary"; and

(B) by striking out "he" each place it appears and inserting in lieu thereof in each such place "the Secretary".

AMENDMENTS TO TITLE 10, UNITED STATES CODE, RELATING TO THE AIR FORCE

SEC. 103. (a) Section 8683 of title 10, United States Code, is repealed.

(b) Section 8963 of such title is repealed.

(c) Section 9651 of such title is amended to read as follows:

"§ 9651. Arms, tentage, and equipment: educational institutions not maintaining units of A.F.R.O.T.C.

"Under such conditions as the Secretary of the Air Force may prescribe, such Secretary may issue arms, tentage, and equipment that such Secretary considers necessary for proper military training, to any educational institution at which no unit of the Air Force Reserve Officers' Training Corps is maintained, but which has a course in military training prescribed by such Secretary and which has at least 100 physically fit students over 14 years of age.".

(d) Section 9712(d) of such title is amended by striking out clauses (1) through (9), and inserting in lieu thereof the following:

"(1) A beneficiary named in the will of the deceased to receive the property.

"(2) The surviving spouse or legal representative.

"(3) A child of the deceased.

"(4) A parent of the deceased.

"(5) A brother or sister of the deceased.

"(6) The next of kin of the deceased.".

(e) Section 9713(a)(2) of such title is amended by striking out subclauses (A) through (I) and inserting in lieu thereof the following:

"(A) A beneficiary named in the will of the deceased to receive the property.

"(B) The surviving spouse or legal representative.

"(C) A child of the deceased.

"(D) A parent of the deceased.

"(E) A brother or sister of the deceased.

"(F) The next of kin of the deceased.".

REPEAL OF AUTHORITY TO MAKE TEMPORARY APPOINTMENTS AS OFFICERS IN THE ARMY

SEC. 104. The Act entitled "An Act to authorize temporary appointment as officers in the Army of the United States of members of the Army Nurse Corps, female persons having the necessary qualifications for appointment in such corps, female dietetic and physical-therapy personnel of the Medical Department of the Army (exclusive of students and apprentices), and female persons having the necessary qualifications for appointment in such department as female dietetic or physical-therapy personnel, and for other purposes.", approved June 22, 1944 (58 Stat. 324; 50 U.S.C. App. 1591 et seq.) is repealed.

AMENDMENTS RELATING TO ALLOTMENT OF PENSIONS OF INMATES OF THE SOLDIERS' HOME

SEC. 105. Section 4 of the Act entitled "An Act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes.", approved March 3, 1883 (22 Stat. 564; 24 U.S.C. 52) is amended—

(1) in the first sentence—

(A) by striking out "wife" each place it appears and inserting in lieu thereof in each such place "spouse"; and

(B) by striking out "his" and inserting in lieu thereof "the inmate's";

(2) in the third sentence—

(A) by striking out "him" each place it appears and inserting in lieu thereof in each such place "the pensioner"; and

(B) by striking out "him";

(3) in the fourth sentence—

(A) by striking out "his" each place it appears and inserting in lieu thereof in each such place "the inmate's"; and

(B) by striking out "he" and inserting in lieu thereof "the pensioner"; and

(4) in the fifth sentence—

(A) by striking out "him" and inserting in lieu thereof "the pensioner"; and

(B) by striking out "his" and inserting in lieu thereof "the pensioner's".

TECHNICAL AMENDMENTS

SEC. 106. (a) The table of sections at the beginning of chapter 353 of title 10, United States Code, is amended by striking out the item relating to section 3683.

(b) The table of sections at the beginning of chapter 369 of such title is amended by striking out the item relating to section 3963.

(c) The table of sections at the beginning of chapter 573 of such title is amended by striking out the item relating to section 6403.

(d) The table of sections at the beginning of chapter 853 of such title is amended by striking out the item relating to section 8683.

(e) The table of sections at the beginning of chapter 869 of such title is amended by striking out the item relating to section 8963.

SAVINGS PROVISIONS

SEC. 107. (a) The repeal made by section 101(a) shall not apply in the case of any person who performed active service described in section 3683 of title 10, United States Code, as such section was in effect on the day before the effective date of such repeal.

(b) The repeal made by section 101(b) shall not apply in the case of any member of the Regular Army described in section 3963 of title 10, United States Code, as such section was in effect on the day before the effective date of such repeal.

(c) The repeal made by section 103(a) shall not apply in the case of any person who performed active service described in section 8683 of title 10, United States Code, as such section was in effect on the day before the effective date of such repeal.

(d) The repeal made by section 103(c) shall not apply in the case of any Air Force nurse or medical specialist described in section 8963 of title 10, United States Code, as such section was in effect on the day before the effective date of such repeal.

(e) The repeal made by section 104 shall not apply in the case of any officer in the Army appointed and assigned under the first section of the Act referred to in section 104, as such Act was in effect on the day before the date of enactment of this Act.

PART B—AMENDMENTS RELATING TO THE COAST GUARD, THE LIGHTHOUSE SERVICE, AND THE CREW OF THE MERCHANT MARINE

AMENDMENTS RELATING TO THE COAST GUARD

SEC. 108. (a) Section 371 of title 14, United States Code, is amended—

(1) in the second sentence of subsection (a) by striking out "male" each place it appears; and

(2) in subsection (c)(1)—

(A) by striking out "he agrees in writing that upon his" and inserting in lieu thereof "the person agrees in writing that upon"; and

(B) by striking out "he will" and inserting in lieu thereof "the person will"; and

(3) in subsection (c)(2) by striking out "he has the consent of his parent or guardian to his agreement" and inserting in lieu thereof "the person has the consent of the person's parent or guardian to the agreement".

(b) The first sentence of section 487 of such title is amended—

(1) by striking out "men" each place it appears and inserting in lieu thereof in each such place "members"; and

(2) by striking out "widows" and inserting in lieu thereof "surviving spouses".

AMENDMENTS RELATING TO THE LIGHTHOUSE SERVICE

SEC. 109. (a) The first section of the Act entitled "An Act to provide benefits for the widows of certain persons who were retired or are eligible for retirement under section 6 of the Act entitled 'An Act to authorize aids to navigation and for other works in the Lighthouse Service, and for other purposes', approved June 20, 1918, as amended.", approved August 19, 1950 (64 Stat. 465; 33 U.S.C. 771) is amended—

(1) by striking out "he" in clause (1) and inserting in lieu thereof "that employee"; and

(2) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the surviving spouse of such former employee was married to such former employee prior to the retirement of such former employee from the Lighthouse Service and has not remarried—"; and

(3) by striking out "widow, so long as she" in the flush material after clause (2) and inserting in lieu thereof "surviving spouse, so long as such surviving spouse".

(b) Section 2 of such Act (64 Stat. 466; 33 U.S.C. 772) is amended—

(1) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the surviving spouse of such employee has not since remarried,"; and

(2) by striking out "widow, so long as she" in the flush material after clause (2) and inserting in lieu thereof "surviving spouse, so long as such surviving spouse".

AMENDMENTS RELATING TO THE CREW OF THE MERCHANT MARINE

SEC. 110. (a) Section 4509 of the Revised Statutes (46 U.S.C. 561) is amended—

(1) in the first sentence—

(A) by striking out "boys" and inserting in lieu thereof "youths";

(B) by striking out "his power" and inserting in lieu thereof "the power of such official";

(C) by striking out "boy" each place it appears and inserting in lieu thereof in each such place "youth"; and

(D) by striking out "he has attained" and inserting in lieu thereof "the youth has attained"; and

(2) in the third sentence by striking out "him" and inserting in lieu thereof "such official".

(b) Section 10(b)(1) of the Act entitled "An Act to remove certain burdens on the American merchant marine and encourage the American foreign carrying trade and for other purposes", approved June 26, 1884 (23 Stat. 55; 46 U.S.C. 599(b)) is amended by striking out "wife, sister" and inserting in lieu thereof "spouse, sibling".

TITLE II—ELIMINATION OF GENDER-BASED DISTINCTIONS UNDER THE OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM, RAILROAD RETIREMENT, AND THE WORK INCENTIVE PROGRAM

DIVORCED HUSBANDS

SEC. 201. (a)(1) Section 202(c)(1) of the Social Security Act is amended, in the matter preceding subparagraph (A), by inserting "and every divorced husband (as defined in section 216(d))" before "of an individual" and inserting "or such divorced husband" after "if such husband".

(2) Section 202(c)(1) of such Act is further amended—

(A) by redesignating subparagraph (C) as subparagraph (D), and by inserting after subparagraph (B) the following new subparagraph:

"(C) in the case of a divorced husband, is not married, and"; and

(B) by striking out the matter following subparagraph (D) (as so redesignated) and inserting in lieu thereof the following:

"shall be entitled to a husband's insurance benefit for each month, beginning with—

"(i) in the case of a husband or divorced husband (as so defined) of an individual who is entitled to an old-age insurance benefit, if such husband or divorced husband has attained age 65, the first month in which he meets the criteria specified in subparagraphs (A), (B), (C), and (D), or

"(ii) in the case of a husband or divorced husband (as so defined) of—

"(I) an individual entitled to old-age insurance benefits, if such husband or divorced husband has not attained age 65, or

"(II) an individual entitled to disability insurance benefits,

the first month throughout which he is such a husband or divorced husband and meets the criteria specified in subparagraphs (B), (C), and (D) (if in such month he meets the criterion specified in subparagraph (A)),

whichever is earlier, and ending with the month preceding the month in which any of the following occurs:

"(E) he dies,

"(F) such individual dies,

"(G) in the case of a husband, they are divorced and either (i) he has not attained age 62, or (ii) he has attained age 62 but has not been married to such individual for a period of 10 years immediately before the divorce became effective,

"(H) in the case of a divorced husband, he marries a person other than such individual,

"(I) he becomes entitled to an old-age or disability insurance benefit based on a primary insurance amount which is equal to or exceeds one-half of the primary insurance amount of such individual, or

"(J) such individual is not entitled to disability insurance benefits and is not entitled to old-age insurance benefits.".

(3) Section 202(c)(3) of such Act is amended by inserting "(or, in the case of a divorced husband, his former wife)" before "for such month".

(4) Section 202(c) of such Act is amended by adding after paragraph (3) the following new paragraph:

"(4) In the case of any divorced husband who marries—

"(A) an individual entitled to benefits under subsection (b), (e), (g), or (h) of this section, or

"(B) an individual who has attained the age of 18 and is entitled to benefits under subsection (d), by reason of paragraph (1)(B)(ii) thereof,

such divorced husband's entitlement to benefits under this subsection shall, notwithstanding the provisions of paragraph (1) (but subject to subsection (s)), not be terminated by reason of such marriage.".

(5) Section 202(c)(2)(A) of such Act is amended by inserting "(or divorced husband)" after "payable to such husband".

(6) Section 202(b)(3)(A) of such Act is amended by striking out "(f)" and inserting in lieu thereof "(c), (f),".

(7) Section 202(c)(1)(D) of such Act (as redesignated by paragraph (2) of this subsection) is amended by striking out "his wife" and inserting in lieu thereof "such individual".

(b)(1) Section 202(f)(1) of such Act is amended, in the matter preceding subparagraph (A), by inserting "and every surviving divorced husband (as defined in section 216(d))" before "of an individual" and inserting "or such surviving divorced husband" after "if such widower".

(2) Section 202(f)(1) of such Act is further amended by striking out "his deceased wife" in subparagraph (D) and in the matter following subparagraph (F) and inserting in lieu thereof in each instance "such deceased individual".

(3) Paragraphs (3), (4), (6), and (7) of section 202(f) of such Act are each amended by inserting "or surviving divorced husband" after "widower" each place it appears.

(4) Section 202(f)(3) of such Act is further amended by striking out "his deceased wife" each place it appears and inserting in lieu thereof in each instance "such deceased individual", and by striking out "wife" each place it appears and inserting in lieu thereof in each instance "individual".

(5) Section 202(f)(4) of such Act is amended by striking out "remarries" and inserting in lieu thereof "marries", and by inserting "or surviving divorced husband's" after "widower's".

(6) Section 202(e)(3)(A) of such Act is amended by striking out "(f)" and inserting in lieu thereof "(c), (f),".

(7) Section 202(g)(3)(A) of such Act is amended by inserting "(c)," before "(f),".

(8) Section 202(h)(4)(A) of such Act is amended by inserting "(c)," before "(e),".

(c)(1) Section 216(d) of such Act is amended by redesignating paragraph (4) as paragraph (6), and by inserting after paragraph (3) the following new paragraphs:

"(4) The term 'divorced husband' means a man divorced from an individual, but only if he had been married to such individual for a period of 10 years immediately before the date the divorce became effective.

"(5) The term 'surviving divorced husband' means a man divorced from an individual who has died, but only if he had been married to the individual for a period of 10 years immediately before the divorce became effective.".

(2) The heading of section 216(d) of such Act is amended to read as follows:

"Divorced Spouses; Divorce".

(d)(1) Section 205(b) of such Act is amended by inserting "divorced husband," after "husband," and by inserting "surviving divorced husband," after "widower,".

(2) Section 205(c)(1)(C) of such Act is amended by inserting "surviving divorced husband," after "wife,".

REMARRIAGE OF SURVIVING SPOUSE BEFORE AGE 60

SEC. 202. Section 202(f)(1)(A) of the Social Security Act is amended by striking out "has not remarried" and inserting in lieu thereof "is not married".

ILLEGITIMATE CHILDREN

SEC. 203. (a) Section 216(h)(3) of the Social Security Act is amended by inserting "mother or" before "father" each place it appears.

(b) Section 216(h)(3)(A)(ii) of such Act is amended by striking out everything after "time" and inserting in lieu thereof "such applicant's application for benefits was filed;".

(c) Section 216(h)(3)(B)(i) of such Act is amended by striking out "daughter," at the end of clause (III) and all that follows and inserting in lieu thereof "daughter; or".

(d) Section 216(h)(3)(B)(ii) of such Act is amended by striking out "such period of disability began" and inserting in lieu thereof "such applicant's application for benefits was filed".

TRANSITIONAL INSURED STATUS

SEC. 204. (a) Section 227(a) of the Social Security Act is amended—

(1) by striking out "wife" each place it appears and inserting in lieu thereof in each instance "spouse";

(2) by striking out "wife's" each place it appears and inserting in lieu thereof in each instance "spouse's";

(3) by striking out "she" each place it appears and inserting in lieu thereof in each instance "he"; and

(4) by inserting "or section 202(c)" after "section 202(b)" each place it appears.

(b) Subsections (b) and (c) of section 227 of such Act are each amended—

(1) by striking out "widow" each place it appears and inserting in lieu thereof in each instance "surviving spouse";

(2) by striking out "widow's" each place it appears and inserting in lieu thereof in each instance "surviving spouse's";

(3) by striking out "her" each place it appears and inserting in lieu thereof in each instance "the"; and

(4) by inserting "or section 202(f)" after "section 202(e)" each place it appears.

(c) Section 216 of such Act is amended by inserting before subsection (b) the following new subsection:

"Spouse; Surviving Spouse

"(a)(1) The term 'spouse' means a wife as defined in subsection (b) or a husband as defined in subsection (f).

"(2) The term 'surviving spouse' means a widow as defined in subsection (c) or a widower as defined in subsection (g).".

EQUALIZATION OF BENEFITS UNDER SECTION 228

SEC. 205. (a) Section 228(b)(2) of the Social Security Act is amended—

(1) by striking out "the husband's benefit" and inserting in lieu thereof "each of their benefits";

(2) by striking out "$64.40" and inserting in lieu thereof "$48.30"; and

(3) by striking out everything after "section 215(i)" the first place it appears and inserting in lieu thereof a period.

(b) Section 228(c)(3) of such Act is amended to read as follows:

"(3) In the case of a husband or wife, both of whom are entitled to benefits under this section for any month, the benefit amount of each, after any reduction under paragraph (1), shall be further reduced (but not below zero) by the excess (if any) of (A) the total amount of any periodic benefits under governmental pension systems for which the other is eligible for such month, over (B) the larger of $48.30 or the amount most recently established in lieu thereof under section 215(i).".

(c) The Secretary of Health and Human Services shall increase the amounts specified in section 228 of the Social Security Act, as amended by this section, to take account of any general benefit increases (as referred to in section 215(i)(3) of such Act), and any increases under section 215(i) of such Act, which occur after June 1974.

FATHER'S INSURANCE BENEFITS

SEC. 206. (a) Section 202(g) of the Social Security Act is amended—

(1) by striking out "widow" each place it appears and inserting in lieu thereof in each instance "surviving spouse";

(2) by striking out "widow's" each place it appears and inserting in lieu thereof in each instance "surviving spouse's";

(3) by striking out "wife's insurance benefits" in paragraph (1)(D) and inserting in lieu thereof "a spouse's insurance benefit";

(4) by striking out "her" each place it appears and inserting in lieu thereof in each instance "his";

(5) by striking out "she" each place it appears and inserting in lieu thereof in each instance "he";

(6) by striking out "mother" each place it appears and inserting in lieu thereof in each instance "parent";

(7) by inserting "or father's" after "mother's" each place it appears;

(8) by striking out "after August 1950"; and

(9) by inserting "this subsection or" before "subsection (a)" in paragraph (3)(A).

(b) The heading of section 202(g) of such Act is amended by inserting "and Father's" after "Mother's".

(c) Section 216(d) of such Act (as amended by section 201(c)(1) of this Act) is further amended by redesignating paragraph (6) as paragraph (8), and by inserting after paragraph (5) the following new paragraphs:

"(6) The term 'surviving divorced father' means a man divorced from an individual who has died, but only if (A) he is the father of her son or daughter, (B) he legally adopted her son or daughter while he was married to her and while such son or daughter was under the age of 18, (C) she legally adopted his son or daughter while he was married to her and while such son or daughter was under the age of 18, or (D) he was married to her at the time both of them legally adopted a child under the age of 18.

"(7) The term 'surviving divorced parent' means a surviving divorced mother as defined in paragraph (3) or a surviving divorced father as defined in paragraph (6).".

(d) Section 202(c)(1) of such Act (as amended by section 201(a)(2) of this Act) is further amended by inserting "(subject to subsection (s))" before "be entitled to" in the matter following subparagraph (D) and preceding subparagraph (E).

(e) Section 202(c)(1)(B) of such Act is amended by inserting after "62" the following: "or (in the case of a husband) has in his care (individually or jointly with such individual) at the time of filing such application a child entitled to child's insurance benefits on the basis of the wages and self-employment income of such individual".

(f) Section 202(c)(1) of such Act (as amended by section 201(a)(2) of this Act) is further amended by redesignating the new subparagraphs (I) and (J) as subparagraphs (J) and (K), respectively, and by adding after subparagraph (H) the following new subparagraph:

"(I) in the case of a husband who has not attained age 62, no child of such individual is entitled to a child's insurance benefit".

(g) Section 202(f)(1)(C) of such Act is amended by inserting "(i)" after "(C)", by adding "or" after "223,", and by inserting at the end thereof the following new clause:

"(ii) was entitled, on the basis of such wages and self-employment income, to father's insurance benefits for the month preceding the month in which he attained age 65,".

(h) Section 202(f)(6) of such Act is amended by striking out "or" at the end of subparagraph (A), by adding "or" after the comma at the end of subparagraph (B), and by adding after subparagraph (B) the following new subparagraph:

"(C) the last month for which he was entitled to father's insurance benefits on the basis of the wages and self-employment income of such individual,".

(i) Section 203(f)(1)(F) of such Act is amended by striking out "section 202(b) (but only by reason of having a child in her care within the meaning of paragraph (1)(B) of that subsection)" and inserting in lieu thereof "section 202(b) or (c) (but only by reason of having a child in his care within the meaning of paragraph (1)(B) of subsection (b) or (c) as may be applicable)".

CREDIT FOR CERTAIN MILITARY SERVICE

SEC. 207. Section 217(f) of the Social Security Act is amended by striking out "widow" each place it appears and inserting in lieu thereof in each instance "surviving spouse", and by striking out "her" each place it appears in paragraph (2) and inserting in lieu thereof in each instance "his".

CONFORMING AMENDMENTS

SEC. 208. (a) Section 202(b)(3)(A) of the Social Security Act (as amended by section 201(a)(6) of this Act) is further amended by inserting "(g)," after "(f),".

(b) Section 202(q)(3) of such Act is amended by inserting "or surviving divorced husband" after "widower" in subparagraphs (E), (F), and (G).

(c) Section 202(q)(5) of such Act is amended—

(1) by inserting "husband's or" before "wife's" each place it appears;

(2) by inserting "he or" before "she" each place it appears;

(3) by inserting "his or" before "her" each place it appears;

(4) by striking out "woman" each place it appears and inserting in lieu thereof in each instance "an individual"; and

(5) in subparagraph (D), by inserting "widower's or" before "widow's", by inserting "wife or" before "husband" each place it appears, by inserting "wife's or" before "husband's" each place it appears, and by inserting "father's or" before "mother's".

(d)(1) Section 202(q)(6)(A)(i) of such Act is amended by striking out "or husband's insurance" in subdivision (I), and by inserting "or husband's" after "wife's" in subdivision (II).

(2) Section 202(q)(7) of such Act is amended, in subparagraph (B), by inserting "husband's or" before "wife's", by inserting "he or" before "she", and by inserting "his or" before "her", and in subparagraph (D) by inserting "or widower's" after "widow's".

(e)(1) Section 202(s)(1) of such Act is amended by inserting "(c)(1)," after "(b)(1),".

(2) Section 202(s)(2) of such Act is amended by inserting "(c)(4)," after "(b)(3),".

(3) Section 202(s)(3) of such Act is amended by inserting "(c)(4)," after "(b)(3),", and by inserting "(f)(4)," after "(e)(3),".

(f) The third sentence of section 203(b) of such Act is amended by inserting "or father's" after "mother's".

(g) The text of section 203(c) of such Act is amended to read as follows:

"(c) Deductions, in such amounts and at such time or times as the Secretary shall determine, shall be made from any payment or payments under this title to which an individual is entitled, until the total of such deductions equals such individual's benefits or benefit under section 202 for any month—

"(1) in which such individual is under the age of seventy and on seven or more different calendar days of which such individual engaged in noncovered remunerative activity outside the United States;

"(2) in which such individual, if a wife or husband under age sixty-five entitled to a wife's or husband's insurance benefit, did not have in his care (individually or jointly with his spouse) a child of such spouse entitled to a child's insurance benefit and such wife's or husband's insurance benefit for such month was not reduced under the provisions of section 202(q);

"(3) in which such individual, if a widow or widower entitled to a mother's or father's insurance benefit, did not have in his care a child of his or her deceased spouse entitled to a child's insurance benefit; or

"(4) in which such an individual, if a surviving divorced mother or father entitled to a mother's or father's insurance benefit, did not have in his care a child of his deceased former spouse who (A) is his son, daughter, or legally adopted child, and (B) is entitled to a child's insurance benefit on the basis of the wages and self-employment income of such deceased former spouse.

For purposes of paragraphs (2), (3), and (4) of this subsection, a child shall not be considered to be entitled to a child's insurance benefit for any month in which paragraph (1) of section 202(s) applies or an event specified in section 222(b) occurs with respect to such child. Subject to paragraph (3) of such section 202(s), no deductions shall be made under this subsection from any child's insurance benefit for the month in which the child entitled to such benefit attained the age of eighteen or any subsequent month; nor shall any deduction be made under this subsection from any widow's insurance benefits for any month in which the widow or surviving divorced wife is entitled and has not attained age sixty-five (but only if she became so entitled prior to attaining age sixty), or from any widower's insurance benefit for any month in which the widower or surviving divorced husband is entitled and has not attained age sixty-five (but only if he became so entitled prior to attaining age sixty).".

(h) Section 203(d) of such Act is amended by inserting "divorced husband," after "husband," in paragraph (1), and by inserting "or father's" after "mother's" each place it appears in paragraph (2).

(i)(1) Section 205(b) of such Act (as amended by section 201(d)(1) of this act) is further amended by inserting "surviving divorced father," after "mother,".

(2) Section 205(c)(1)(C) of such Act (as amended by section 201(d)(2) of this Act) is further amended by inserting "surviving divorced father," after "surviving divorced mother,".

(j) Section 216(f)(3)(A) of such Act is amended by inserting "(c)," before "(f)".

(k) Section 216(g)(6)(A) of such Act is amended by inserting "(c)", before "(f)".

(l) Section 222(b)(1) of such Act is amended by striking out "or surviving divorced wife" and inserting in lieu thereof ", surviving divorced wife, or surviving divorced husband".

(m) Section 222(b)(3) of such Act is amended by inserting "divorced husband," after "husband,".

(n) Section 222(b)(2) of such Act is amended by inserting "or father's" after "mother's" each place it appears.

(o) Section 222(d)(1) of such act is amended by inserting "and surviving divorced husbands" after "for widowers" in the matter following clause (iii).

(p) Section 223(d)(2) of such Act is amended by striking out "or widower" each place that term appears in subparagraphs (A) and (B) and inserting in lieu thereof in each instance "widower, or surviving divorced husband".

(q) Section 225(a) of such Act is amended by inserting "or surviving divorced husband" after "widower".

(r)(1) Section 226(e)(3) of such Act is amended to read as follows:

"(3) For purposes of determining entitlement to hospital insurance benefits under subsection (b), any disabled widow age 50 or older who is entitled to mother's insurance benefits (and who would have been entitled to widow's insurance benefits by reason of disability if she had filed for such widow's benefits), and any disabled widower age 50 or older who is entitled to father's insurance benefits (and who would have been entitled to widower's insurance benefits by reason of disability if he had filed for such widower's benefits), shall, upon application for such hospital insurance benefits be deemed to have filed for such widow's or widower's benefits.".

(2) For purposes of determining entitlement to hospital insurance benefits under section 226(e)(3) of the Social Security Act, as amended by paragraph (1) of this subsection, an individual becoming entitled to such hospital insurance benefits as a result of the amendment made by such paragraph shall, upon furnishing proof of such disability within twelve months after the month of enactment of this Act, under such procedures as the Secretary may prescribe, be deemed to have been entitled to the widow's or widower's benefits referred to in such section 226(e)(3), as so amended, as of the time such individual would have been entitled to such widow's or widower's benefits if he or she had filed a timely application therefor.

EFFECTIVE DATE

SEC. 209. Except as otherwise specifically provided in this title, the amendments made by the preceding provisions of this title apply only with respect to monthly benefits payable under title II of the Social Security Act for months after December 1982.

RAILROAD RETIREMENT

SEC. 210. (a) Section 2(c) of the Railroad Retirement Act of 1974 is amended—

(1) in subdivision (1)(ii)(C), by striking out ", in the case of a wife, has in her care (individually or jointly with her husband)" and inserting in lieu thereof "has in his or her care (individually or jointly with his or her spouse)";

(2) in subdivision (2), by inserting "or divorced husband" after "divorced wife" each place it appears;

(3) in subdivision (3)—

(A) by striking out "who (i)" and inserting in lieu thereof "who", and

(B) by striking out "husband; and (ii)" and all that follows and inserting in lieu thereof a period; and

(4) by amending subdivision (4) to read as follows:

"(4) The divorced wife (as defined in section 216(d) of the Social Security Act) or divorced husband (as defined in such section) of an individual, if—

"(i) such individual (A) is entitled to an annuity under subsection (a)(1) of this section, and (B) has attained age 62;

"(ii) such divorced wife or divorced husband (A) has attained age 65, and (B) is not married; and

"(iii) such divorced wife or divorced husband would have been entitled to a benefit under section 202(b) or 202(c) of the Social Security Act as the divorced wife or divorced husband of such individual if all of such individual's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in such Act,

shall, subject to the conditions set forth in subsections (e), (f), and (h) of this section, be entitled to a divorced wife's or divorced husband's annuity, if she or he has filed an application therefor, in the amount provided under section 4 of this Act.".

(b) Section 2(d) of such Act is amended—

(1) in subdivision (1)(i), by striking out "and who, in the case of a widower" and all that follows and inserting in lieu thereof a semicolon;

(2) in subdivision (1)(ii), by inserting "or widower (as defined in section 216(g) and (k) of the Social Security Act)" after "a widow (as defined in section 216(c) and (k) of the Social Security Act)", and by striking out "her care" and inserting in lieu thereof "her or his care";

(3) by amending subdivision (1)(v) to read as follows:

"(v) the widow (as defined in section 216(c) of the Social Security Act), who is married, or has been married after the death of the employee, the widower (as defined in section 216(g) of the Social Security Act) who is married, or has been married after the death of the employee, the surviving divorced wife (as defined in section 216(d) of the Social Security Act), the surviving divorced husband (as defined in section 216(d) of the Social Security Act), the surviving divorced mother (as defined in section 216(d) of the Social Security Act), and the surviving divorced father (as defined in section 216(d) of the Social Security Act) if such widow, widower, surviving divorced wife, surviving divorced husband, surviving divorced mother, or surviving divorced father would have been entitled to a benefit under section 202(e), 202(f), or 202(g) of the Social Security Act as the widow, widower, surviving divorced wife, surviving divorced husband, surviving divorced mother, or surviving divorced father of the employee if all of the employee's service as an employee after December 31, 1936, had been included in the term 'employment' as defined in that Act. For the purpose of this paragraph—

"(A) the references in section 202(e)(3) and 202(g)(3) of the Social Security Act to an individual entitled under section 202(f) of that Act shall include an individual entitled to an annuity under paragraph (i) of this subdivision and an individual entitled to an annuity under paragraph (ii) of this subdivision,

"(B) the reference in section 202(f)(4) of the Social Security Act to an individual entitled under section 202(b) of that Act shall include an individual entitled to an annuity under subsection (c) of this section,

"(C) the reference in section 202(f)(4) of the Social Security Act to an individual entitled under section 202(e) or (g) of that Act shall include an individual entitled to an annuity under paragraph (i) of this subdivi-

sion and an individual entitled to an annuity under paragraph (ii) of this subdivision,

"(D) the reference in section 202(f)(4) of the Social Security Act to an individual entitled under section 202(h) of that Act shall include an individual entitled to an annuity under paragraph (iv) of this subdivision,

"(E) the reference in section 202(f)(4) of the Social Security Act to an individual entitled under section 202(d) of that Act shall include an individual entitled to an annuity under paragraph (iii) of this subdivision,

"(F) the reference in section 202(e)(3) and section 202(g)(3) of the Social Security Act to an individual entitled under section 202(d) or section 202(h) of that Act shall include an individual entitled to an annuity under paragraph (iii) or paragraph (iv) of this subdivision, and

"(G) the references in section 202(g)(3) and section 223(a) of that Act shall include an individual entitled to an annuity under subsection (a)(1) of this section."; and

(4) by amending subdivision (2)(B) to read as follows: "the last month for which the widow or widower was entitled to an annuity under paragraph (2) of subdivision (1) as the widow or widower of the deceased employee, or".

(c) Section 2(e)(5) of such Act is amended by inserting "or divorced husband" after "divorced wife" each place it appears.

(d) Section 2(f)(2) of such Act is amended by inserting "or divorced husband's" after "divorced wife's" each place it appears.

(e) Section 2(h) of such Act is amended by inserting "or divorced husband" after "divorced wife" each place it appears.

(f) Section 4(a)(1) of such Act is amended by inserting "or divorced husband" after "divorced wife" each place it appears.

(g) Section 4(f)(2)(iii) of such Act is amended to read as follows:

"(iii) the provisions of paragraphs (i) and (ii) of this subdivision shall not apply to the annuity of a widow, widower, surviving divorced wife, surviving divorced husband, surviving divorced mother, or surviving divorced father, who is entitled to such annuity on the basis of the provisions of section 2(d)(1)(v) of this Act.".

(h) Section 4(g)(5) of such Act is amended to read as follows:

"(5) This subsection shall not apply to the annuity of a widow, widower, surviving divorced wife, surviving divorced husband, surviving divorced mother, or surviving divorced father, who is entitled to such annuity on the basis of the provisions of section 2(d)(1)(v) of this Act.".

(i) Section 4(h)(2) of such Act is amended by striking out the first sentence thereof and inserting in lieu thereof the following: "Subdivision (1) of this subsection shall not apply to the annuity of a widow, widower, surviving divorced wife, surviving divorced husband, surviving divorced mother, or surviving divorced father, who is entitled to such annuity on the basis of the provisions of section 2(d)(1)(v) of this Act.".

(j) Section 4(i) of such Act is amended by inserting "or divorced husband" after "divorced wife" each place it appears.

(k) Section 5(c)(3) of such Act is amended—

(1) by inserting "or husband" after "wife" each place it appears in the first sentence thereof;

(2) by striking out "her care" and inserting in lieu thereof "her or his care"; and

(3) by inserting "or divorced husband" after "divorced wife" each place it appears in the second sentence thereof.

(l) Section 5(c)(6) of such Act is amended—

(1) by inserting "or widower" after "widow";

(2) by inserting "or he" after "she" each place it appears; and

(3) by striking out "her care" and inserting in lieu thereof "her or his care".

(m) Section 6(a)(3) of such Act is amended by inserting "or divorced husband" after "divorced wife" and by inserting "or divorced husband's" after "divorced wife's".

(10) by inserting "or her" before "credit at said hospital" in the last sentence.

(b) The third clause of section 4843 of the Revised Statutes (24 U.S.C. 191) is amended by striking out "Men" and inserting in lieu thereof "Persons".

FEDERAL MINE SAFETY AND HEALTH ACT OF 1977

SEC. 332. (a) Section 203 of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 843) is amended—

(1) in subsection (a)—

(A) by striking out "commencement of his employment" in the second sentence and inserting in lieu thereof "the commencement of employment";

(B) by striking out "he" the first place it appears in the second sentence and inserting in lieu thereof "the worker";

(C) by inserting "or she" after "he" the second place it appears in the second sentence;

(D) by inserting "or her" after "his" in the fourth sentence; and

(E) by striking out "advise him of his rights" in the fifth sentence and inserting in lieu thereof "advise the miner of the miner's rights";

(2) in subsection (b)—

(A) by striking out "from his position" each place it appears in paragraphs (1) and (2);

(B) by striking out "him" in paragraph (3) and inserting in lieu thereof "the miner"; and

(C) by striking out "his" in paragraph (3); and

(3) by striking out "him" in the first sentence of subsection (c) and inserting in lieu thereof "the miner"; and

(4) by striking out "such miner" in the first sentence of subsection (d) and all that follows through the end of the sentence and inserting in lieu thereof "such miner, with the consent of the surviving spouse or, if there is no such surviving spouse, then with the consent of the surviving next of kin.".

(b) Section 402 of such Act (30 U.S.C. 902) is amended—

(1) in subsection (a)(2)—

(A) by inserting "or husband" after "wife" in the first sentence;

(B) by striking out "her" the first place it appears in the first sentence;

(C) by striking out "husband" in the first sentence and inserting in lieu thereof "spouse";

(D) by inserting "his or" before "her" each place it appears (after the amendment made by subparagraph (B));

(E) by inserting "or 'husband' " after "'wife' " in the second sentence; and

(F) by striking out "The term 'wife' also includes a 'divorced wife' " in the third sentence and inserting in lieu thereof "The terms 'wife' and 'husband' also include a 'divorced wife' and a 'divorced husband', respectively,";

(2) in subsection (e)—

(A) by striking out "The term 'widow' includes the wife" in the first sentence and inserting in lieu thereof "The terms 'widow' and 'widower' include the spouse";

(B) by striking out "his" each place it appears and inserting in lieu thereof "the miner's";

(C) by inserting "or 'widower' " after "'widow' " in the second sentence;

(D) by striking out "a 'surviving divorced wife' as defined in section 216(d)(2) of the Social Security Act" in the third sentence and inserting in lieu thereof " a 'surviving divorced wife' and a 'surviving divorced husband' as defined in paragraphs (2) and (5), respectively, of section 216 of the Social Security Act"; and

(E) by inserting "his or" before "her" each place it appears in the third sentence; and

(3) by striking out "widow" each place it appears in the third sentence of subsection (g) and inserting in lieu thereof "the miner's widow or widower".

(c) Section 411 of such Act (30 U.S.C. 921) is amended—

(1) in subsection (a)—

(A) by striking out "him" and inserting in lieu thereof "the Secretary"; and

(B) by striking out "his"; and

(2) in subsection (c)—

(A) by striking out "his" in paragraph (1) and inserting in lieu thereof "the";

(B) by striking out "his" in the first sentence of paragraph (2);

(C) by striking out "he" each place it appears in paragraph (3) and inserting in lieu thereof "the miner";

(D) by striking out "his" each place it appears in paragraph (3) and each place it appears in the first sentence of paragraph (4);

(E) by striking out ", widow's" in the first sentence of paragraph (4) (after the amendment made by subparagraph (D)) and inserting in lieu thereof "or the miner's widow's, widower's";

(F) by striking out "he" in the first sentence of paragraph (4) and inserting in lieu thereof "the miner";

(G) by inserting "or husband's" after "wife's" in the second sentence of paragraph (4);

(H) by striking out "he" in the third sentence of paragraph (4) and inserting in lieu thereof "the Secretary"; and

(I) by striking out "his" in the fourth sentence of paragraph (4) and inserting in lieu thereof "such miner's".

(d) Section 412 of such Act (30 U.S.C. 922) is amended—

(1) in subsection (a)—

(A) by striking out "his widow" in paragraph (2) and inserting in lieu thereof "the widow or widower";

(B) by striking out "he were" in paragraph (2);

(C) by striking out "his" each place it appears in the first sentence of paragraph (3);

(D) by inserting "or widower" after "widow" each place it appears in paragraph (3);

(E) by striking out "her" in the first sentence of paragraph (3) and inserting in lieu thereof "the widow's or widower's";

(F) by striking out "he" in the first sentence of paragraph (3) and inserting in lieu thereof "the child";

(G) by inserting "or she" after "he" in the proviso of the second sentence of paragraph (3);

(H) by striking out "his" the first place it appears in the first sentence of paragraph (5);

(I) by striking out "at the time of his death" each place it appears in the first sentence of paragraph (5) (after the amendment made by subparagraph (H));

(J) by striking out "a widow or a child" each place it appears in the first sentence of paragraph (5) and inserting in lieu thereof "a widow, widower, or child";

(K) by striking out "a widow, child, or parent" each place it appears in the first sentence of paragraph (5) and inserting in lieu thereof "a widow, widower, child, or parent";

(L) by striking out "at the time of his or her death" each place it appears in the first sentence of paragraph (5);

(M) by striking out "a brother only if he is—" in the fourth sentence of paragraph (5) and inserting in lieu thereof "a brother or sister only if the brother or sister is—"; and

(N) by striking out "him" in paragraph (6) and inserting in lieu thereof "the Secretary"; and

(2) by striking out "his widow," each place it appears in the first sentence of subsection (b) and inserting in lieu thereof "the miner's widow, widower,".

(e) Section 413 of such Act (30 U.S.C. 923) is amended—

(1) in subsection (b)—

(A) by striking out "he uses" in the first sentence and inserting in lieu thereof "used";

(B) by striking out "his wife's" in the second sentence and inserting in lieu thereof "the wife's or husband's"; and

(C) by striking out ", widow," in the ninth sentence and inserting in lieu thereof "or the miner's widow, widower,"; and

(2) by inserting "or her" after "his" in subsection (c).

(f) Section 414 of such Act (30 U.S.C. 924) is amended—

(1) in subsection (a)—

(A) by inserting "or widower" after "widow" in paragraph (1);

(B) by striking out "her husband" and inserting in lieu thereof "the miner" in paragraph (1); and

(C) by striking out "his" in paragraph (2)(C) and inserting in lieu thereof "the claimant's"; and

(2) in subsection (e)—

(A) by inserting "widower," after "widow," in the matter preceding clause (1); and

(B) by striking out "his" in clause (1) and inserting in lieu thereof "the miner's".

(g) Section 421 of such Act (30 U.S.C. 931) is amended—

(1) by inserting "widowers," after "widows," in subsection (a); and

(2) in subsection (b)(2)—

(A) by striking out "if he finds" in the matter preceding subparagraph (A) and inserting in lieu thereof "upon finding"; and

(B) by striking out "by him" in subparagraph (F).

TITLE IV—EFFECTIVE DATE

SEC. 401. Except as otherwise provided, the amendments made by this Act shall become effective upon the date of enactment.

SECTION-BY-SECTION SUMMARY—SEX DISCRIMINATION IN THE U.S. CODE REFORM ACT

MILITARY

Army

[1] 10 U.S.C. 3683 (Section 101(a)) applies to nurses, women medical specialists and similar employees of the Army Medical Department who received special appointments during World War II. It identifies various periods of service which are creditable for retirement eligibility and for computing retirement pay. It applies only to service completed before January 1, 1949. DOD has indicated that the section is probably obsolete because all personnel with service prior to 1949 should have retired by now. The Act would repeal Section 3683, but contains a grandparent clause in the event that there may be persons still on active duty.

[1] 10 U.S.C. 3963 (Section 101(b)) also applies to nurses, women medical specialists and similar employees of the Army Medical Department who received special appointments during World War II. It provides that personnel in these categories who served before July 1, 1946 in a higher active duty

[1] Women in these classes of service received appointments to higher grades during WWII, but were then demoted after the war was over. Sections 3683, 3963, 8683 and 8963 were necessary to restore benefits lost as a result of the demotion.

grade, can be retired in that grade. Again, DOD has indicated that the section is probably obsolete as anyone with service prior to 1946 should have retired by now. The Act would repeal Section 3963, but contains a grandparent clause in the event that there may be persons still on active duty.

10 U.S.C. 4309 (Section 101(c)) allows "members of armed forces and able-bodied males capable of bearing arms" to use rifle ranges operated by the the Secretary of the Army. The Act would amend Section 4309 by changing "males" to "persons".

10 U.S.C. 4651 (Section 101(d)) allows the Secretary of the Army to provide equipment to any school that does not have an ROTC unit but does have a course in military training and at least "100 physically fit male students". The Act would amend Section 4651 by deleting "male".

10 U.S.C. 4712(d) (Section 101(e)) contains the priority list for the disposition of effects of decreased military personnel by summary court martial. The list gives preference to a "son" over a "daughter" a "father" over a "mother" and a "brother" over a "sister". The Act would amend Section 4712(d) so that family members are treated on a sex-neutral basis.

10 U.S.C. 4713(a) (20 (Section 101(f)) contains the same priority list for the disposition of effects of certain deceased military personnel which have been held by the Army for three years after death. The Act would amend Section 4713(a) (2) so that family members are treated on a sex-neutral basis.

24 U.S.C. 52 (Section 105) allows the inmate of a soldier's home to have the inmate's pension paid to a "child, wife, or parent living". The Act would amend Section 52 by replacing "wife" with "spouse".

50 U.S.C. 1591-1598. (Section 104) All sections refer to P.L. 78-3509, which provided temporary appointment for Army Nurse Corp members, women medical specialists or similar employees of the Army Medical Department. They contain separate standards for these classes of female personnel in such areas as retirement grade and pay, computation of length of service, uniform allowance, rank, pay and travel allowances. P.L. 78-3509 was passed only for World War II and is now, therefore, obsolete. The Act would repeal these provisions, but contains a savings provision clarifying that the repeal is not in any way to affect the present status of women who received these appointments.

Navy

10 U.S.C. 5896-99, (Section 102(a)-(d)) generally provides separate promotion consideration for men and women among Naval and Marine Corps Reserve officers. A DOD Task Force charged with the responsibility of reviewing and proposing comprehensive reforms in the reserve system (ROPMA Study Group) has already recommended that such distinctions be eliminated. The Act would amend Section 5896-99 so that Naval and Marine Corps Reserve officers receive the same promotion consideration, regardless of sex.

10 U.S.C. 6403 (Section 102(e)) authorizes the Secretary of the Navy to eliminate women officers from active duty status in the Naval and Marine Corps Reserve. Again, the ROPMA Study Group has already recommended that this section should be repealed, so that women can be eliminated from active status only under the same conditions that would require men from being eliminated from the active list. The Act would repeal Section 6403.

10 U.S.C. 7601 (Section 102(f)) lists, among others, the "widows" but not the widowers of members of the Navy as persons who may use commissaries. The Act would amend Section 7601 by replacing "widows" with "surviving spouses".

Air Force

10 U.S.C. 8683 (Section 103(a)) applies to nurses, women medical specialists and similar employees of the Air Force Medical Department who received special appointments during World War II. It identifies various periods of service which are creditable for retirement eligibility and for computing retirement pay. It applies only to service completed before January 1, 1949. DOD has indicated that the section is probably obsolete because all personnel with service prior to 1949 should have retired by now. The Act would repeal Section 3683, but contains a grandparent clause in the event that there might still be persons on active duty.

10 U.S.C. 8963 (Section 103(b)) applies to nurses, women medical specialists and similar employees of the Air Force Medical Department who received special appointments during World War II. It provides that personnel in these categories who served before July 1, 1946 in a higher active duty grade, can be retired in that grade. Again, DOD has indicated that the Section is probably obsolete as anyone with service prior to 1946 should have retired by now. The Act would repeal Section 8963, but contains a grandparent clause in the event that there may still be a few persons on active duty.

10 U.S.C. 9651 (Section 103(c)) allows the Secretary of the Air Force to provide equipment to any school that does not have an ROTC unit but does have a course in military training and at least "100 physically fit male students". The Act would amend Section 9651 by deleting "male".

10 U.S.C. 9712 (Section 103(d)) contains the priority list for the disposition of effects of deceased military personnel by summary court martial. As is the case with the Army, it gives priority to male family members. The Act would amend Section 9712 so that family members are treated on a sex-neutral basis.

10 U.S.C. 9713 (Section 103(e)) contains the same priority list for the disposition of effects of deceased military personnel by a Soldier's home and would be amended so that family members are treated on a sex-neutral basis.

Coast Guard

(The Coast Guard now allows women to participate in all components of the Service.)

14 U.S.C. 371 (Section 108(a)) provides that only "male citizens . . . may be enlisted as" and "male enlisted members of the Coast Guard . . . may be designated as aviation cadets". The Act would amend Section 371 by deleting "male". (The Coast Guard no longer has aviation cadets. However, because the Coast Guard may wish to resurrect the program in the future, the Section should be amended, not repealed.)

14 U.S.C. 487 (Section 108(b)) lists, among others, the "widows" but not the widowers of members of the Coast Guard as persons who may use commissaries. The Act would amend Section 487 by replacing "widows" with "surviving spouses".

46 U.S.C. 599 (Section 110(b)) allows for the allotment of a portion of sailor's wages to "his grandparents, parents, wife, sister or children". The Act would amend Section 599 to permit allotment of wages to the "sailor's grandparents, parents, spouse, sibling, or children".

46 U.S.C. 561 (Section 110(c)) allows for the apprenticing only of "boys" to the sea service. The Act would amend Section 561 by replacing "boys" with "youths".

Benefits for Spouses and Families

5 U.S.C. 2108(3)(f) and (g) (Section 301) provide for benefits to be paid to "mothers" but not fathers of disabled veterans or other individuals who lost their lives during active duty under certain sets of circumstances. The Act would amend Section 2108(3)(f) and (g) so that both parents of the veteran would be eligible for benefits if they met the criteria specified in the statute.

30 U.S.C. 902(a) (Section 332) defines, for purposes of black lung benefits, a "dependent" as including "wife" and "widow" but not husbands and widowers. 30 U.S.C. 843(d), 902(e), 902(g), 921, 922(a), 922(b), 923(b), 924(a) and (e), 931, and 934 also contain the sex-based references of "wife" and "widow" as a result of this definition of "dependent". These sections would be amended so that "Husbands" and "widowers" are included as dependants as well. The Department of Labor has already so amended its regulations.

42 U.S.C. 1652 (Section 329) is a little used section of the Defense Base Compensation Act. It provides that compensation to "dependents" of aliens and nonnationals includes the "wife" but not the husband. The section would be amended by replacing "wife" with "spouse".

33 U.S.C. 771 & 772 (Sections 109 (a) & (b)) provide survivor's benefits for the "widows" but not the widowers of Lighthouse Service Personnel. The Act would amend Sections 771 & 772 by replacing "widows" with "surviving spouse". (The Lighthouse Service is no longer a separate service of the Coast Guard and the class of persons to whom Sections 771 & 772 applies is extremely small, if any.)

18 U.S.C. 3056 (Section 313) provides only for Secret Service protection of a former President's "wife" or "widow". The Act would amend Section 3056 by changing "wife" to "spouse" and "widow" to "surviving spouse".

28 U.S.C. 604 (Section 328) allows the Director of the Administrative Office of the U.S. Courts to regulate and pay annuities to "widows" of judges. P.L. 94-544 extended benefits to both the widows and widowers of judges on a sex-neutral basis, but failed to correct Section 604. The Act would amend Section 604 by replacing "widow" with "surviving spouse".

Immigration and Naturalization

8 U.S.C. 1557 (Section 302(e)) prohibits the transportation in foreign commerce of "women and girls" for the purposes of prostitution and debauchaery. The Act would amend Section 1557 by replacing "women and girls" with "adults and youths".

8 U.S.C. 1353 (Section 302(a)) authorizes payment of the transportation expenses of the "wives" and dependent children of employees of INS performing duties in foreign countries. The Act would amend Section 1353 by providing for the expenses of "spouses" of INS employees, consistent with current practice.

[2] 8 U.S.C. 1452 (Section 302(c)) provides procedures to procure certificates of citizen-

[2] These statutes are "protective" in nature. That is, they were designed to protect women from laws existing in the early part of the century in this

ship for persons who derived U.S. citizenship through the naturalization of a parent or "husband". The Act would amend Section 1452 by changing "husband" to "spouse".

[2] 8 U.S.C. 1451(e) (Section 302(b)) provides that the revocation of a person's citizenship or naturalization shall not affect any right or privilege of the person's "wife" or minor child which would have derived if the revocation had not occurred. The Act would amend Section 1451(e) by changing "wife" to "spouse".

[2] 8 U.S.C. 1489 (Section 302(d)) provides that notwithstanding any treaty or convention to the contrary no "woman" is to lose U.S. nationality because of marriage to an alien, or through residence abroad following such a marriage. The Act would amend Section 1489 by changing "woman" to "person".

22 U.S.C. 214 (Section 302(f)) excuses the payment of passport fees for a "widow" of a deceased member of the Armed Forces who is traveling abroad to visit the grave of a deceased. The Act would amend Section 214 by changing "widow" to "surviving spouse".

Social Security [3]

42 U.S.C. 402(b), (c), (e) & (f) (Section 201) provides for the payment of benefits to aged divorced wives and aged or disabled surviving divorced wives, but benefits are not provided for similarly situated men. These provisions have been held unconstitutional in a number of court decisions and benefits are currently also being paid to aged divorced husbands and aged surviving divorced husbands, based on their former wives' earnings. The Act would amend these Sections to conform to the court decisions.

42 U.S.C. 402(b) & (g), (Section 206) provides benefits for a mother who has in her care a child of her retired, disabled, or deceased husband. Benefits are not provided for similarly situated men. This distinction was held unconstitutional in *Weinberger* v. *Wiesenfeld,* 420 U.S. 636 (1975), other court decisions and subsequent administrative decisions. Currently a similarly situated father can also qualify for benefits based on his retired, disabled, or deceased wife's past earnings. The act would amend these Sections to conform to the court decisions.

42 U.S.C. 402(e) & (f) (Section 202) provides that widows and widowers who remarry before age 60 are treated differently with respect to their eligibility for benefits based on their deceased spouses' earnings. A woman may qualify for benefits as a surviving spouse, even though she has remarried, so long as she is not married at the time she applies for benefits. A man on the other hand, currently loses forever his eligibility as a surviving spouse of his deceased working wife if he remarries before age 60. This distinction was held to be unconstitutional in *Mertz* v. *Harris,* 497 F. Supp. 1134 (S.D. Tex. 1980) and benefits are now paid to widowers who have remarried but are not married at a the time of application. The Act would amend these Sections to conform to the court decisions.

42 U.S.C. 403 and 405 refer to benefit categories established by the preceeding sections and would be amended to conform to the amendments made to those sections.

42 U.S.C. 416 (Section 203) relates to benefits for illegitimate children. In general, the determination of one's status as a parent or child for purposes of the Social Security program is based upon the intestate succession laws of the state in which the insured individual is domiciled. However, an illegitimate child may be eligible for benefits based upon a man's earnings, without regard to the appropriate state intestate laws, if, among other things, the man has been decreed by a court to be the father of the child, or the man is shown by evidence satisfactory to the Secretary to be the father of the child. Similar provisions do not currently apply when an illegitimate child claims a benefit based upon his mother's earnings. The Act would amend this Section so that illegitimate children would be eligible for benefits based on their mother's earnings as they are currently for benefits based on their father's earnings.

42 U.S.C. 417 (Section 207) permits the widow of a veteran, under certain circumstances, to waive her right to a civil service survivor's annuity and receive credit for military service prior to 1957 for purposes of determining eligibility for, or the amount of, Social Security survivor's benefits. The Act would amend this Section to extend the same option to widowers.

42 U.S.C. 422, 425, and 426 refer to benefits categories established by Section 402 (listed above and would be amended to accordingly).

42 U.S.C. 427. (Section 204) Under this provision, certain workers who attained age 72 before 1969 are eligible for Social Security benefits under transitional insured status provisions which require fewer quarters of coverage than would ordinarily be required. Wives and widows of eligible male workers who reached 72 prior to 1969 also are eligible for benefits under this provision, but husbands and widowers of eligible female workers are not. The Act would amend this Section to extend transitional insured status to such husbands and widowers.

42 U.S.C. 428 (Section 205) authorize benefits for certain uninsured individuals who attained age 72 prior to 1972. In order for a couple to receive benefits under this section, both spouses must have attained age 72 prior to 1972. However, even though each spouse must meet the same eligibility requirements he or she would have to meet if not married, once the eligibility of both is determined, the couple is treated as if the husband were the retired worker and the wife were the dependent. The amount of the special payment of the couple is not divided equally between husband and wife. Rather, the payment is allocated so that the husband is paid two-thirds and the wife is paid one-third. The Act would amend these Sections so that the payment is equally divided between the two.

Welfare

42 U.S.C. 633 (Section 214(a)) gives priority for placement in the WIN program first, to unemployed fathers, and then to mothers. The Act would amend Section 633 by giving a uniform category of preference to "unemployed parents". (The priorities are a vestige of the Aid to Dependent Children Unemployed Fathers Program under 42 U.S.C. Section 607. The courts found the sex-based distinction unconstitutional in *Westcott* v *Califano,* 443 U.S. 76 (1979). As a result, that program is now the Unemployed Parents Program. Note: The Administration has recommended the termination of the WIN program, though the Congress may decide to continue funding.)

Department of Agriculture

42 U.S.C. 1773(c) (Section 304) concerns the priority to be given to the selection of schools for participation in the school breakfast program. One of the factors listed to consider is whether there is a special need to improve the dietary practices of children of working "mothers". The Act would amend Section 1773(c) by changing "mothers" to "households in which both parents work or from single-parent households in which the parent works".

Department of Transportation

46 U.S.C. 331 (Section 311) abolishes customs and other fees for certain services to U.S. vessels. One of these services is the apprenticing of "boys" to the merchant service. The Act would amend Section 331 by changing "boys" to "youths".

46 U.S.C. 601 (Section 312) prohibits the attachment of a sailor's wages unless attached pursuant to a court order regarding the payment of support and maintenance for the sailor's "wife and minor children". The Act would amend Section 601 by replacing "wife" with "spouse".

Bureau of Indian Affairs

25 U.S.C. 13 (Section 305) authorizes the Bureau of Indian Affairs to direct, supervise and expend monies for the benefit, care and assistance of Indians for a number of specified purposes, including the employment of "field matrons". This particular provision is obsolete. The Act would amend Section 13 by deleting "field matrons".

25 U.S.C. 137 (Section 306) was enacted in 1875 and authorizes an agent distributing supplies on an Indian reservation to require "able-bodied Indian males" to perform certain services for the benefit of a tribe. The Act would repeal Section 137.

[4] 25 U.S.C. 181 (Section 307(2)) provides that a white man may not acquire a right to tribal property by marrying an Indian woman. The Act would amend Section 181 by providing that no "non-Indian" may acquire a right to tribal property by marrying an Indian.

25 U.S.C. 182 (Section 307(3)) provides that an Indian woman who marries a U.S. citizen also becomes a U.S. citizen, but does not lose any tribal property rights. Section 182 was made obsolete by the Indian Citizenship Act. The Act would repeal Section 182.

[4] 25 U.S.C. 183 (Section 307(4)) specifies the type of evidence which is required to prove a marriage between a "white man" and "Indian woman". The Act would amend Section 183 by changing "white man" to "non-Indian" and deleting "woman".

[4] 25 U.S.C. 184 (Section 308(1)) provides that the children of a marriage solemnized prior to June 7, 1897, between a "white man" and an "Indian woman" shall have the same rights and privileges as other members of the "mothers" tribe. The Act would amend Section 184 so that the chil-

---

country, and the customs and conventions of foreign countries, making the legal status of a woman dependent on that of her husband. Because there are no similar known laws, customs, or conventions affecting men, rephrasing the language of these statutes in sex-neutral terms will not bestow any additional citizenship rights, privileges, etc. that do not already exist under current law.

[3] A cost impact analysis of eliminating gender-based distinctions in the Social Security Act was done in late 1980. None of the proposed changes would have a cost-impact greater than ½ million dollars.

[4] Sections 181, 183, and 184 were all designed to protect Indian women from tribal customs giving the non-Indian spouse all her tribal property rights, and divesting the children of such marriages of tribal property rights. Because there are no similar tribal customs applying to men, extending the same protections to men by rephrasing the language of these provisions in sex-neutral terms will have no substantive impact.

dren of marriages between a "non-Indian" and an "Indian" will have the rights and privileges of the "parents" tribe.

25 U.S.C. 274 (Section 308(2)) authorizes the Commissioner of Indian Affairs to employ "Indian girls as Assistant matrons" and "Indian boys as farmers and industrial teachers". The Act would amend Section 274 by allowing the Commissioner to employ Indian "youths" as "dormitory aides" and "as farmers and industrial teachers", consistent with current practice.

25 U.S.C. 342 (Section 309) prohibits the removal of Southern Utes to a new reservation without the consent of the "adult male" tribal members. Section 342 is obsolete and would be repealed by the Act.

[5] 25 U.S.C. 371 (Section 310) provides that illegitimate Indian children are the legitimate issue of their father for the purpose of determining descent of land. The Act would amend Section 371 to provide that illegitimate children are the legitimate issue of both parents for such purposes.

Homesteading [6]

43 U.S.C. 161 and 162 (Sections 314 and 315) allows a citizen or a person intending to become a citizen, who has reached the age of 21, or who is "the head of a family" to be entitled to enter unappropriated public lands. Under state statutes, federal regulations and the common law, the "head of a family" customarily refers to the husband or the father. The Act would amend Sections 161 and 162 to clarify that either spouse or parent is entitled to entry.

43 U.S.C. 164 (Section 316) sets forth the rules for the issuance of certificates or patents. The provisions applicable when the enterer dies refer only to the "widow". The Act would amend Section 164 by replacing "widow" with "surviving spouse".

43 U.S.C. 166 (Section 317) provides that an unmarried female settler does not forfeit her rights to enter upon marriage so long as she does not abandon her residence. Section 166 also provides, however, that she forfeits her rights if the man she marries claims a separate tract under the homestead laws. The Act would amend Section 166 by eliminating the provision requiring the woman to forfeit her rights if her husband claims a separate tract, and extends to both sexes the requirement that they must continue to reside on the tract if they wish to make entry.

43 U.S.C. 167 (Section 318) provides that the marriage of two homesteaders does not impair either's right to a patent, but gives the husband the right to choose the family's domicile. The Act would amend Section 167 so that both husband and wife must elect together on which tract they wish to live.

43 U.S.C. 168 (Section 319) provides that the marriage of a female enterer to an alien does not impair the females entitlement to a certificate or patent. The provision was designed to protect women from the once prevalent legal doctrine that if a female citizen marries an alien she forfeits her citizenship. Since this legal doctrine no longer applies, Section 168 is obsolete and would be repealed by the Act.

43 U.S.C. 170 (Section 320) provides certain protections to the "wives" of enterers who are deserted. The Act would amend Section 170 to provide the same protections to either spouse if they have been deserted.

43 U.S.C. 240, 243(a), 255, 272, 278 and 50 U.S.C. 563, 564 and 570 (Section 321-326) permit service personnel and their families to count service time toward homestead entry requirements. All sections assume that service personnel are only male, referring only to the "wives" and "widows" of service personnel. The Act would amend the Sections by replacing "wife" with "spouse" and "widow" with "surviving spouse", and clarifying that service personnel includes persons of both sexes.

Department of Justice

42 U.S.C. 1986 (Section 330) creates a cause of action for damages resulting from a wrongful conspiracy. The section provides that if death results from the conspiracy, the deceased's legal representative can recover damages for the benefits of the "widow" and if there is no widow, to the "next of kin". The Act would amend Section 1986 by replacing "widow" with "surviving spouse".

Railroad Retirement Board

45 U.S.C. 231a(c)(1)(ii)(C) (Section 213) pertains to retirement benefits for the spouses of retired employees. Generally, the spouse of a retired employee will not be eligible for benefits unless the spouse has also reached retirement age. The exception is for a "wife" when the couple has dependent children in their care. The Act would amend this Section to also provide benefits to the husbands of female retired employees where the husband has not yet reached retirement age and the couple still has dependent children.

45 U.S.C. 231a(d)(1). This Section entitles a widow, surviving divorced wife, and surviving divorced mother to annuity benefits, but not to similarly situated males. These eligibility provisions are based on definitions contained in Section 216 of the Social Security Act, which, as previously mentioned, have been held unconstitutional. The Railroad Retirement Board currently pays benefits to widowers, surviving divorced husbands, and surviving divorced fathers. The Act would amend this Section to conform to current practice.

45 U.S.C. 231e(a)(2) was amended by the Omnibus Reconcilation Act in this Congress (P.L. 97-35) and the sex based distinction contained in it was simply a drafting error. A code section of the Social Security Act was used as a guide, even though the particular section used has been held unconstitutional. The section, as written, provides eligibility for lump-sum payments where an individual has died leaving no "widow, surviving divorced wife, or widower", but not requiring there to be no surviving divorced husband. The Act would amend this Section to include a requirement that there also be no surviving divorced husband.

Criminal Code

18 U.S.C. 2032 provides that whoever, within the special maritime and territorial jurisdiction of the United States "carnally knows any female, not his wife, who has not attained the age of sixteen years" shall, for a first offense, be imprisoned not more than fifteen years, and for a subsequent offense, be imprisoned not more than thirty years. The Act would replace the quoted language with the phrase "engages in a sexual act with another person who is not his spouse, who in fact, is less than sixteen years old". This language is identical to that proposed by S. 1630 (Section 1643). The Title of Section 2032 would also be amended to read "Sexual Abuse of a Minor".

18 U.S.C. 1153 makes a violation of Section 2032 (above) on Indian territory a federal offense. The gender based language would be amended in accordance with the amendments made to Section 2032.

18 U.S.C. 2198 makes it an offense to "seduce" a female passenger on an American vessel. Section 2198 would be repealed by the Act.

18 U.S.C. 3614 specifies the penalty for a violation of Section 2198 (above) and would also be repealed by the Act.

18 U.S.C. 2424 is an obsolete provision of the Mann Act which pertains to the filing of factual statements with the Immigration and Naturalization Service concerning "women and girls" who have been kept, maintained, controlled, etc., in this country for the purpose of prostitution or other immoral purposes. The Act would repeal Section 2424.

18 U.S.C. 245 prohibits interference with certain civil rights by force or threat of force. The Act would add "sex" as a protected category.

Miscellaneous

24 U.S.C. 165 (Section 331 (a)) provides that pensions of male inmates of St. Elizabeth's may be used for the benefit of their "wives and minor children," but pensions of female inmates may be used only for the benefit of "minor children". The Act would amend Section 165 by allowing pensions to be used for the benefit of both the "spouse and minor children" of female inmates.

24 U.S.C. 191 (Section 331 (b)) provides that St. Elizabeth's may admit insane civilians of the Quarter Master Corps and "men" who were insane while in military service and become insane again after discharge. The Act would amend Section 191 by replacing "men" with "persons".

48 U.S.C. 1461 (Section 327) provides that no polygamist or bigamist or woman cohabiting with the same may vote or hold office in a U.S. Territory. The provision is of questionable constitutionality and in any event no longer has any known substantive application. The Act would repeal Section 1461.

41 U.S.C. 35 and 36 (Section 303(a) & (b)) establish minimum age levels for persons able to enter into contracts with executive departments, independent agencies, etc. The minimum age for males is 16 but for females, 18. DOL has already amended its regulation to provide the same minimum age of 16 for both sexes. The Act would amend Sections 35 and 36 to conform to current practice.

CODE SECTIONS IDENTIFIED AS CONTAINING SEX BIAS WHICH WOULD NOT BE AMENDED BY THE ACT

A. Controversial Code Sections

Military

10 U.S.C. 6015 (Department of Navy) prohibits women in combat.

10 U.S.C. 8549 (Air Force) prohibits women in combat.

50 U.S.C. App. 453-456, 466 Selective Service Provisions.

Immigration and Naturalization

8 U.S.C. 1101(b)(1)(D), 1409, 1432 provide that children born out of wedlock are deemed to have acquired the nationality status of their mother, but not their father, and thus relates to the sensitive "Amerasian Children" issue. Separate legislation to address the problem is currently moving its way through the Senate.

[5] Under the applicable tribal customs and common law principles, illegitimate children are also deemed the legitimate issue of the mother. Thus, rephrasing the language of Section 371 in sex-neutral terms will have no substantive impact.

[6] The Homesteading provisions amended by the Act now only apply to the state of Alaska, and will no longer be effective after 1986.

8 U.S.C. 1101(a)(42), 1182(e), 1253(h)(1) all provide protections to aliens fleeing from countries because of persecution based on race, religion, nationality, etc. Sex is not a protected category. These Code Sections implement the U.N. Convention Relating to the Status of Refugees. (Adopted in 1951. U.S. became signatory in 1968.) The convention is not self-executing. To date, U.S., laws have been implemented and applied coextensively with the Convention, but have not gone beyond it. The legislative solution should entail a careful analysis of the policy implications of going beyond the convention, and resolution of the definitional problems arising as a result of including "sex" as a protected category.

Social Security

42 U.S.C. 202 (c) and (d) pertain to benefits for spouses of disabled workers and childhood disability beneficiaries. Currently, in general, if a childhood disability beneficiary or disabled worker beneficiary marries a person getting certain kinds of social security dependent or survivor benefits, the benefits of each individual continue. If the beneficiary is a male and he recovers or engages in substantial work and his benefits are terminated, his wife's benefits also end. If, however, the disabled beneficiary is a woman, her husband's benefits are not terminated when her disability benefits end. There is a significant difference in opinion as to whether benefits would be "equalized up" so that neither beneficiary loses benefits when the spouse recovers, or whether they should be "equalized down" so that either beneficiary loses benefits when the spouse recovers, the presumption being that the dependency situation on which the benefits were originally based no longer exists. The legislative solution should entail a careful analysis of the impact of each approach, and exploration of possible "middle-road" alternatives.

42 U.S.C. 411. This Section currently provides that in community property states, all income from a business owned or operated by a married couple is deemed, for purposes of Social Security, to be the husband's unless the wife exercises substantially all the mangement and control. In all other States, such self-employment income is credited to the spouse who owns or is predominantly active in the business. Simple deletion of the sex-based distinction, i.e., so that the self-employment income of a married couple in a community property state is treated the same as such income in non-community property state, may not be the most equitable solution, and in any event, would be inconsistent with the recent case of *Edwards* v. *Schweicker,* a nationwide class action suit, where the court ordered that a pro-rata share of the income should be credited to each spouse, depending upon the contributions of that spouse. The legislative solution to the problem should entail a detailed analysis of the *Edwards* order and evaluation of SSA's experience in complying with it.

Criminal Code

18 U.S.C. 2031 provides that "Whoever within the special maritime and territorial jurisdiction of the United States, commits rape shall suffer death, or imprisonment, for any terms of year of for life." Though the statute on its face contains no gender-based distinctions, it has been interpreted as incorporating the common law definition of rape, i.e., that it involves carnal knowledge of a female not the offender's wife by force or threat of bodily harm and without her consent. Every state in the Union now has a sex-neutral definition of the rape offense in their criminal codes. Unfortunately, efforts in Congress to cure this provision have met with opposition centered on such issues as the removal of the common law requirements that the victim and offender not be married, and that a victim's testimony must be corroborated.

18 U.S.C. 2421-2423, the Mann Act, is the principal federal statute dealing with prostitution. Section 2421 makes it an offense for a person to knowlingly transport in interstate or foreign commerce any "woman or girl" for the purpose of prostitution, debauchery, or other immoral purposes. Section 2422, a companion statute, makes it an offense for any person to knowingly pursuade, induce, entice, etc., any "woman or girl" to travel in interstate or foreign commerce for the purposes of prostitution, debauchery, etc. Section 2423, as amended by P.L. 95-225 is now phrased in sex-neutral terms and deals with the transportation of minors for prostitution purposes or to otherwise commercially exploit the sexual conduct of the minor.

As the Report on the proposed criminal code, S. 1630 states, in addition to being objectionable because of its sex-bias, the Mann Act is also defective because its focus is on the jurisdictional, rather than on areas where there is a true federal government interest, e.g., organized crime's involvement in prostitution businesses. As the report concludes, the Mann Act should be repealed and replaced with a sex-neutral offense of prostitution, which is not greared primarily toward inforcement against the female prostitute, a focus of many state prostitution statutes.

Note: Section 2424 of the Mann Act which is obsolete would be repealed by the Act.

B. Code Sections Already Cured or Containing No Facial Substantive Bias

Military

10 U.S.C. 3504 repealed P.L. 96-513, Title II, Section 210, 12/12/80.

10 U.S.C. 3848 (Separate Section for Women repealed 1960 P.L. 86-559.)

10 U.S.C. 3888 repealed P.L. 96-513 12/12/80.

10 U.S.C. 3927 repealed P.L. 96-513 12/12/80.

24 U.S.C. 44a repealed 94-454 10/2/76.

14 U.S.C. 373, 373 and 10 U.S.C. 6912, 6913 and 6915 provide benefits for aviation cadets. They contain no facial sex-bias. Presumably were listed because 14 U.S.C. 371 and 10 U.S.C. 6015 do not allow women to be aviation cadets, and therefore women would not be eligible for those benefits. (14 U.S.C. 371 would be cured by Act.)

33 U.S.C. 773, 774 and 775 contain no facial sex-bias.

Benefits for Spouses and Families

28 U.S.C. 375 repealed P.L. 96-504(1980).

Welfare

42 U.S.C. 602, 602(a)(19)(A), and 602(a)(19)(G)(iv) have all been cured in this Congress by P.L. 97-35 (Omnibus Reconciliation Act).

Department of Agriculture

7 U.S.C. 1923 was cured in this Congress by P.L. 97-98.

Department of Interior

43 U.S.C. 271, 278 contain no facial bias.

U.S. Congress

31 U.S.C. 97, 43(b) were cured in this Congress by P.L. 97-258.

Miscellaneous

31 U.S.C. 125 was cured in this Congress by P.L. 97-258.

42 U.S.C. 1395 mm(a)(3)(A)(iv) was cured in this Congress by P.L. 97-248.

Remedial

10 U.S.C. 8848(b) allows the Secretary of the Air Force to retain on active duty nurses, medical specialists and female line officers who are in the reserve grade of lieutenant colonel until the completion of 30 years of active service. Section 8848(b) is apparently remedial in nature as previously, these categories of female personnel were limited to 25 years (as opposed to 28 for their male counterparts).

By Mr. WARNER:

S. 3009. A bill to amend the tariff schedules of the United States to impose a one-tenth of 1 cent duty on apple and pear juice; to the Committee on Finance.

DUTY ON APPLE AND PEAR JUICE

Mr. WARNER. Mr. President, today I am introducing legislation to impose a duty of one-tenth of 1 cent per gallon on apple and pear juice entering this country.

Over the past 6 years, the quantity of apple juice imported into the United States has grown from 34.38 million gallons—single strength equivalent—in 1976 to 71.39 million gallons in 1981. The 1981 import quantity represents a quantity of 10.67 million bushels of apples, just about equal to the total apple production for the State of Virginia for last year and our expected crop for 1982.

Foreign apple juice is imported in concentrated form for reconstitution in this country. Thirty million gallons of this increase is from Argentina which shipped 18.86 million gallons in 1976 and 38.42 million gallons in 1981.

The dramatic increase in apple juice imports are a major concern to U.S. apple growers. Their concerns are magnified when we find that the government of an exporting nation is providing a substantial subsidy to the processors and exporters of that product. In meetings of apple growers, we find a willingness to compete with growers in other countries on a fair bases, but a resentment of having to compete with the government of their country.

Such is the case with Argentina. The Argentine Government is subsidizing its apple industry to develop exports at the expense of our domestic applegrowers.

According to information from the Foreign Agricultural Service, USDA, the following programs were in effect in Argentina during 1981 and are still in effect:

(1) About 12 concentrating plants are operating this year, however some are very small.

(2) About 65 percent of the apples for processing go to concentrated apple juice (CAJ).

(3) The country of destination for concentrated apple juice (CAJ) remains unchanged i.e. mostly to the U.S.

(4) a. The current export rebate for CAJ is 10 percent, plus 10 percent for shipments going through Patagonia port of Puerto Madryn. Reportedly, almost half of 1981 season shipments took advantage of shipping through Puerto Madryn.

b. CAJ is also eligible for an "additional" export rebate of 15 percent for the six month period ending next April 21.

c. Since late August, CAJ exporters have also been eligible for pre-export financing covering up to 60 percent of the export value, with interest at one percent per annum and a repayment term of 120 days.

d. The 10/90 percent financial/commercial exchange rate mix is still in effect for CAJ exports. Currently the financial rate has increased to almost 60 percent above the commercial rate level. (Financial rate is 11,000 pesos per US S, commercial rate is 6,942 pesos per US S). This increasing the export value edge over non-value added products such as fresh apples, by six percent.

e. Given the current situation, all plants which operated this year are expected to be in operation for 1982. Sources expected a normal to good year.

f. Current price levels range at about U.S. $6.60-6.90 per gal. CIF U.S. ports. Price prospects remain strong and local supplies are almost completely sold out.

g. Grower price sequence for this season is as follows: slanting price in March was about 80,000 pesos/mt of apples (U.S. $35, $1.60 per cwt.). In late May it reached 180-200,000 pesos/mt of apples (U.S. $60, $2.72 per cwt.). In September and October when most plants finished processing, about 300,000 pesos/mt of apples (U.S. $40, $1.81 per cwt.). This is clearly below cost of production of apples.

h. Sudden peso devaluations this year occurred as follows: Feb. 2-10 percent, April 1-30 percent, June 1-30 percent, June 22-30 percent; (the two-tier exchange rate system was applied only to the financial rate with a few exceptions, export transactions utilize the commercial rate). (If loans are available for CAJ shippers because of the devalued peso $180 U.S. per metric ton is available, no interest is charged and the loan is to be repaid within 10 years with a grace period of two years.) About $10 million U.S. worth of loans were utilized by the SAJ sector.

Over the past year, applegrowers across the Nation have been attempting to deal with the Argentine situation through the U.S. Commerce Department and the Foreign Agricultural Service of USDA. Their efforts have apparently reached a dead end through these channels.

It appears that the major problem confronting the U.S apple industry in this situation is the fact that the Tariff Schedules of the United States provides a zero duty on apple and pear juice imported from countries which enjoy the most-favored-nation designation. Argentina has been so designated. Imports of apple and pear juice from countries not enjoying most-favored-nation designation are subject to duty of 5 cents per gallon under TSUS Item No. 165.15. Interestingly, apple and pear juice are the only juice imports free of duty under MFN category.

They have been advised that since apple and pear juice enjoys a duty-free status in the Tariff Schedules of the United States, a petition to the International Trade Commission and proof of injury through their investigation and hearing process is the only route of seeking relief. The problem with this course of action is that Public Law 96-39 imposes certain constraints which preclude applegrowers from being the initiators of such petition.

Section 771(4)(A) states:

The term "industry" means the domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product.

Section 771(10) states:

Like product, the term "like product" means a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.

The "like product" definition in this instance is interpreted to mean juice, not the raw product apples. Because of that interpretation, they are told apple growers could not cause the petition to be brought before the International Trade Commission.

The major concerns are that there is no vehicle for imposition of counterveiling duties to offset the governmental subsidies being provided on apple juice imports because of the duty-free status for most favored nations.

To help find a solution to this growing unfair competition against U.S. apple growers, Mr. President, I have introduced this amendment to the tariff schedule. Enactment of this legislation would permit some flexibility to the Commerce Department in imposing a counterveiling duty against nations which do in fact provide export subsidies.

I urge my colleagues to join in this effort to allow our growers to compete with other growers and not other governments.

By Mr. CRANSTON:

S. 3010. A bill to amend certain Federal laws to prohibit mandatory retirement, eliminate barriers to the employment of older workers, and provide incentives for part-time and full-time employment of such workers; to the Committee on Finance.

EMPLOYMENT OPPORTUNITIES FOR OLDER AMERICANS

Mr. CRANSTON. Mr. President, I am today introducing S. 3010, the proposed Employment Opportunities for Older Americans Act of 1982, a comprehensive proposal aimed at promoting a new concept of retirement and eliminating those obstacles and disincentives that keep older Americans out of the work force.

BACKGROUND

Mr. President, each year thousands of older workers are driven into forced idleness because of mandatory retirement rules and fiscal disincentives in both public and private retirement programs. Underlying these rules and policies and continuing to permeate our employment policies is the myth protraying older workers as liabilities, rather than as assets, to the American work force. Numerous recent studies and articles have documented the extent to which older workers are forced out of their jobs or discouraged from continuing to work.

Mr. President, I believe that it is imperative that we begin now to reevaluate and replace these outdated policies regarding older workers. The Federal Government has a major role to play in helping to shape a new national policy regarding older workers.

Every public opinion poll conducted in recent years has demonstrated beyond a shadow of doubt that an overwhelming percentage of older workers would like to continue in the work force beyond the normal retirement age of 65. A significant majority of these older workers indicate that they would like to have the option of part-time work. For example, a Harris poll last year of current workers between the ages of 55 to 64 found that 79 percent said they would prefer part-time work to complete retirement. Surveys of current retirees demonstrate an equally strong desire, to continue to work, particularly in part-time positions.

Although economic factors, especially the double-digit inflation that has eroded the retirement income of millions of Americans, play a role in some of these responses, the desire to continue in the labor force is consistently expressed even when an adequate retirement income is assumed. It is clear that older Americans appreciate and seek the noneconomic benefits of employment—the sense of vitality and productivity that comes from continuing as active participants in the labor force.

Despite this data relating to these desires on the part of older workers to continue working in some fashion, their labor force participation has been steadily declining. Between 1950 and 1980, the portion of those 65 or older in the labor force fell from 24 percent to 13 percent.

The cause of this continual decline of older workers clearly lies with the retirement and employment policies that discourage remaining in the work force. Not only to these policies and practices deprive many older workers of the advantage of continued employment, but they are costly for society and will be increasingly more so in the years ahead.

Demographic trends indicate that the proportion of older Americans in our population will soon be rapidly increasing. In 1980, 1 in 9 , or 24 million

Americans were 65 years or older, compared to 1 in 12 in 1950. This population will increase only moderately over the next 25 years, but soon after 2010 its size will grow dramatically. It is projected that by 2030, nearly 1 in 5, or almost 56 million Americans will be 65 years or older.

If older workers continue to retire at the current rates, the increased costs for the social security system and the general reduction in revenues will be staggering. For each new retiree, social security average payout increases by about $4,800 and Federal income tax revenues drop by about $2,000. In addition, demographic data indicate that we will soon be entering an era when retention of older workers in the workforce will be essential to our national productivity. With today's unemployment statistics at an alltime high—10 million Americans unable to find jobs—it may be difficult to envision a time when we will face a shortage of workers.

Yet, all of the data indicate that the growth rate of the Nation's labor force is slowing dramatically. It is predicted that the number of 18- to 24-year-old entrants to the work force will fall by 16 percent in the next two decades, largely because of the drop in births during the 1970's. As the number of young workers declines, the need to provide opportunities for older workers to stay in the work force will increase.

Moreover, there is every indication that the new job slots that will need to be filled will be ones that are ideal for older workers. According to available employment projections, 74 percent of the increase in employment slots in the next two decades will be in wholesale or retail sales and in services industries—two industries which currently employ 60 percent of all workers age 65 or older. These data also indicate expanded opportunities for part-time employment for older workers over the same period since those industries and occupations projected to have the largest increased future employment needs are frequent users of part-time employees.

Mr. President, it is clear that this Nation is going to need the skills of older workers in the labor-scarce years ahead. It is equally clear that older workers want to stay in the work force, particularly in part-time employment. And it is just as clear from the standpoint of the social security system and Federal tax revenues that the Nation would benefit substantially from their continued employment. Our task is to remove the obstacles, policies, and practices which currently drive out of the work force those older workers who want to continue working.

REEVALUATING AND REVISING RETIREMENT CONCEPTS

Mr. President, if we are going to meet the challenges that are ahead, it is imperative that we begin now to reevaluate and revise our basic attitudes toward retirement. The concept of retirement in America today is one of abrupt, total withdrawal from the labor force. One day, an individual is engaged full time as a part of the labor force; the next, he or she is forced into total retirement, complete exclusion from the workplace. The economic costs of continuing these policies will be substantial. The human and societal costs are incalculable.

Substantial evidence exists to demonstrate that forced retirement has severe deteriorative impact upon the physical and psychological health of older individuals. Mandatory retirement policies often subject workers to sudden and sometimes strong negative reactions that affect mental attitudes, health and, eventually in many cases, longevity. These policies detract from the quality of life for many older Americans by taking away from them the sense of fulfillment and self-sufficiency that many workers gain from productive employment. They are left with forced idleness, a loss of meaning and worth in their lives, and often insufficient resources to maintain an adequate standard of living.

It is time for our Nation to begin to foster a new perspective on retirement and older workers. I believe that the new perspective should be premised upon a shift from the concept of an abrupt, total withdrawal from the labor force to one of gradual withdrawal where older workers are afforded the opportunity, if they choose, to reduce their work pace, shift to less demanding work roles, or participate in more flexible work schedules. In particular, part-time employment represents an appealing and practical way for older workers to remain in the work force and supplement their incomes, to fill the need for additional workers in the labor-scarce years ahead and, at the same time, to reduce their work pace.

Mr. President, efforts to develop new models of retirement options are already beginning as some leading corporations throughout America have begun programs that captalize on the skills and experience of older workers and promote hiring practices and work patterns that accommodate the needs and desires of these workers.

Hearings over the past several years in both the Senate and House have documented the extent to which major American corporations such as Xerox, Polaroid, GE, Grumman Aerospace Co., Bank of America, and the Travelers Insurance Co. have begun developing innovative ways of providing employment opportunities for older workers. Travelers Insurance Co. provides an excellent example. After learning that 85 percent of its employees over 55 were interested in some kind of paid employment after retirement, the company established a retiree job bank, offering flexible work options to retirees—options include temporary work either part- or full-time, from 1 day to 6 months or more; part-time permanent jobs, either 5 part-days or several full-days a week; and job sharing in which two or even three retirees share the same full-time job.

In order to encourage retirees to work. Travelers changed its pension rules to provide that retirees can work for the company 960 hours a year, nearly half time, with no reduction in pension benefits. Travelers has found the program to benefit both the retirees and the company itself as it retains the services of experienced employees. Out of the average of 60 temporary positions available at Travelers headquarters each day, 55 of those positions are filled by retirees familiar with the work. However, these companies have expressed concern about the continuation of Government policy which hinder and impede the development of these new programs.

NEED TO REVISE GOVERNMENT POLICIES WHICH HINDER FLEXIBLE RETIREMENT POLICIES

Mr. President, a successful implementation of an older worker's employment policy and a reversal of the existing restrictive concepts of retirement depends in large part upon the voluntary acceptance and promotion by American employers of this new approach to older workers. As I noted, many of our leading corporations are beginning to propose and implement these new policies.

But this task cannot be successful unless we begin, at the Federal level, to revise those Government policies that encourage early retirement, discourage delayed retirement, and inhibit employers from developing the type of flexible work arrangements that older workers need in order to encourage them to stay in the work force.

For example, the social security system—the major retirement program for the vast majority of Americans—contains serious disincentives to continued work for older Americans. The current adjustment schedule—the basis for computing benefit levels—for early and delayed retirement is unquestionably tilted to encourage early retirement. The social security earnings limitation provision is also a major impediment to continued work.

A person who continues to work after age 65 loses $1 in benefits for every $2 earned over the exempt amount, currently set at $6,000 a year. This is the equivalent of a 50 percent tax on that additional income. When this 50 percent tax is added to the current 6.7 percent social security payroll

tax imposed upon earned income, to the Federal income tax of at least 12 percent on taxable income, and to possible State and local taxes, it can easily amount to a tax rate over 70 percent on earnings above the $6,000 limitation until the entire social security benefit is forfeited.

Similarly, the Federal Government sanctions mandatory retirement at age 70 by limiting the applicability of the Age Discrimination in Employment Act and provides tacit approval under the Employee Retirement Income Security Act—ERISA—of private pension plans which penalize older workers by benefit forfeiture and elimination of pension accrual benefits for continued work beyond the "normal" retirement age.

Mr. President, the legislation I am introducing today is aimed at revising those Federal policies that are partly responsible for reduced employment of many older Americans and substituting policies designed to enhance the employment opportunities of those older Americans who can and choose to continue to work. This measure provides a blueprint for a new Federal policy to promote employment opportunities for older Americans.

DESCRIPTION OF S. 3010

Mr. President, as I indicated in my opening remarks, the legislation I am introducing today is a comprehensive proposal aimed at eliminating the obstacles and disincentives which tend to discourage employers from providing employment opportunities for older workers and discourage the older workers themselves from staying in the work force. The proposed Employment Opportunities for Older Americans Act of 1982 deals with a number of different statutes relating to these issues, and I would like to take a few moments to describe briefly the various provisions contained in this measure.

ELIMINATION OF MANDATORY RETIREMENT

Mr. President, the first step that must be taken to encourage older workers to stay in the work force is elimination of mandatory retirement.

Forcing older workers out of their jobs at some arbitrary age is an archaic, discriminatory, and unreasonable policy. It is a policy that robs society of the contributions and productivity of an increasingly important segment of our work force, and it robs these individuals of the dignity and self-sufficiency which comes from working. In 1978, we began to deal with the issue of mandatory retirement by abolishing it for Federal workers and by raising the age from 65 to 70 for most other workers. I supported the 1978 measure as an interim step toward total abolition of mandatory retirement. It is time now to finish the work we began in 1978 and to eliminate once and for all the mandatory retirement policies that force workers out of their jobs at an arbitrary age.

Mr. President, I am pleased to report that a number of my colleagues have come to agree with this view, and there is legislation pending in both the House and Senate which would eliminate the age 70 limitation from the Age Discrimination in Employment Act—ADEA—thereby prohibiting mandatory retirement policies for most American workers. I am a cosponsor of one of these measures, S. 2617, which was introduced last June by the distinguished chairman of the Select Committee on Aging, the Senator from Pennsylvania (Mr. HEINZ), and my good friend from Florida (Mr. CHILES), the ranking minority member of that committee. President Reagan has also publicly indicated his support for legislation to prohibit mandatory retirement. The bill I am introducing today would eliminate the age 70 provision as well as the two exemptions contained in the 1978 bill which denied tenured college professors and certain business executives the protection of the statute.

Mr. President, the 1978 amendments to the ADEA also directed the Department of Labor to conduct a study to determine the impact of raising the mandatory retirement age from 65 to 70 on both older and younger workers and upon employers and to determine the probable impact of total abolition of mandatory retirement. The interim report of the Department of Labor, submitted last year, estimated that raising the retirement age from 65 to 70 resulted in over 200,000 older workers being able to stay in their jobs. The report indicated that another 200,000 would continue working if mandatory retirement ages were abolished altogether.

This report also contains some very interesting data on the impact upon women, minorities, and younger workers of retaining older workers in their jobs. As my colleagues may recall, in 1978, the argument was made that raising the retirement age from 65 to 70 would adversely affect employment opportunities for younger workers, women, and minorities. Those arguments were forcefully rebutted by the testimony of a number of groups, such as the National Organization for Women and the National Caucus on the Black Aged, which pointed out that women and minority group individuals have a special interest in seeing the elimination of mandatory retirement since they often have the least resources in their retirement years and hence forced retirement often means relegating them to an existence below the poverty level.

Mr. President, in my view the Department of Labor report is particularly important because it conclusively and finally lays to rest the spurious argument that we must deny employment opportunities to older workers in order to protect other groups of workers. The report found that there was no significant job slot competition between older workers likely to continue in the work force and these other categories of workers.

Specifically, the report found that the additional over 65 workers would be potential competitors for less than one-quarter of 1 percent of all full-time workers ages 16 to 24; for less than one-half of 1 percent of all full-time black workers ages 16 to 59; and around for around one-tenth of 1 percent of all full-time female workers ages 16 to 59. The report also cited studies indicating that even a substantial increase in labor force participation by workers over 65—such as a 10-percent rise—would have insignificant impact upon the employment and promotional opportunities for younger workers.

Mr. President, elimination of mandatory retirement policies will give older workers the option—I stress, the option—of continuing in the labor force rather than being forced to retire when they reach some fixed chronological age. An older worker's ability to perform a job and the desire to continue working—not his or her birthdate—should be the determinative factors in retirement decisions. Elimination of mandatory retirement at a specified age is an essential prerequisite to the development of a comprehensive policy to encourage older workers to stay in the labor force.

PENSION DISCRIMINATION

Mr. President, it is estimated that one-half of the male retirees and one-third of the female retirees between 1979 and 1982 were eligible for a private pension. Discrimination in private pension plans against older workers is among the various factors which tend to discourage older workers from continuing in the work force.

A number of private pension plans discourage continued work past a set retirement age in two ways: First, many plans provide that an employer can refuse to credit the additional work years after retirement age to an employee's pension; and second, many plans provide for a total forfeiture of pension benefits if an employee continues working beyond a minimum amount in a particular industry or for a former employer.

According to a report published by the Congressional Budget Office, "Work and Retirement Options for Continued Employment of Older Workers," July 1982, 27 percent of the workers covered by private pension plans are subject to provisions that prohibit accrual of pension benefits entirely after the normal retirement age, and 22 percent are in plans that limit in some fashion pension benefit accrual after a particular age. Under

these plans, if a worker continues to work after the normal retirement age, he or she gets no or reduced additional pension credits for those additional work years. In effect, the older worker is denied this fringe benefit that younger workers receive automatically. The Department of Labor estimates that elimination of this discrimination in private pension programs against older workers would keep close to 70,000 more men in the work force after normal retirement age. No estimates are currently available on the number of female workers likely to continue working if these disincentives were eliminated.

The legislation I am introducing today would deal with this problem by amending the ADEA to state clearly that it is unlawful to treat older workers differently from younger workers with respect to the accrual of pension benefits. A companion amendment would prohibit plans under ERISA from containing this type of discrimination.

Mr. President, the second type of disincentive contained in private pension plans involves provisions requiring total forfeiture if an individual continues to work for the same employer or in the same industry after he or she becomes eligible for pension benefits. Prior to 1982, a pension could be withheld for any amount of work by a pensioner. According to one estimate, there are about 66,000 pensioners between the ages of 65 to 69 who did not work because of these forfeiture of benefit rules. Current Department of Labor regulations permit some work activity by pensioners but allow all benefits to be withheld from retirees who work more than 40 hours per month in prohibited employment.

The legislation I am introducing today would prohibit an employer from withholding pension benefits so long as the pensioner did not work more than 1,000 hours per year. This is roughly twice the current allowable amount and would enable a retiree to work approximately halftime before losing his pension.

Mr. President, I want to stress here that what we are trying to achieve is increased flexibility and opportunities for older workers to stay in the work force, particularly part time. We are rapidly approaching an era when our society is going to need the skills and contributions of these older workers. These part-time employees will be able to contribute to our national productivity, continue to be taxpayers, and increase their own standard of living in old age through continued work effort.

PART-TIME EMPLOYMENT INCENTIVES

Mr. President, a major purpose of this legislation is to promote the availability of part-time employment opportunities for older workers. Older Americans have repeatedly indicated that they are desirous of these part-time employment opportunities. In addition to the provision permitting part-time work without losing pension benefits which I just described, there are several other provisions in this legislation designed to have specific impact upon part-time employment opportunities.

First, this legislation would provide for cutting in half the FICA tax—commonly known as the social security payroll tax—imposed upon both the employee and the employer for workers over the age 65 with respect to wages that do not exceed one-half of the contribution and wage base established under the Social Security Act. Under current law, the employer is obligated to pay the full FICA tax for each employee, regardless of the fact that the employee may be part time. Thus, an employer faces a situation where the FICA tax on two part-time employees will exceed the tax which would have been paid to one worker performing the same job.

For the older worker, having to pay the full employee FICA tax on part-time employment creates an additional fiscal disincentive, particularly when the employee is already subjected to the equivalent of a 50-percent tax on earnings up to a certain level in excess of the social security earnings limitation. There have been proposals made to eliminate entirely FICA taxes on workers over 65. Consideration has also been given to providing for a pro rata reduction in the FICA tax. However, the administrative difficulties in applying a pro rata reduction would be enormous. Hence, the legislation I am proposing would simply cut the FICA tax in half for older workers and their employees for wages up to one-half of the applicable wage base provided under the Social Security Act.

Seond, this legislation would extend the existing targeted job tax credit to low-income older workers. As I will explain in a moment, this would result primarily in the creation of part-time jobs for older workers.

The targeted job tax credit provides employer with a tax credit equal to 50 percent of the first $6,000 in wages paid in the first year to workers in certain targeted categories, and 25 percent of the first $6,000 paid in the second year of employment. Between 1979 and 1981, 800,000 workers were benefited under the existing targeted categories which cover persons who are economically disadvantaged and are 18 to 24 years olds, Vietnam era veterans, or former convicts as well as youths 16 to 19 in cooperative educations programs, former CETA public service employment participants, vocational rehabilitation referrals, and welfare assistance recipients.

The Congressional Budget Office has estimated that 1.5 million older workers between the ages of 62 and 69 and 2.6 million who are 70 years and older would be eligible under the same income standards that are applied to the other categories under the existing credit. Costs of extending the credit to low-income older workers could range between $50 million per year in reduced revenues if 2 percent of the 1.5 million used the credit to $250 million if 10 percent used the credit. However, the Congressional Budget Office estimates that this cost would be partially offset by increased social security revenues ranging from $7 million to $25 million, by increased income taxes paid by the employer, and reduced social security benefits resulting from the work effort of these new employees.

The Congressional Budget Office has also indicated that because of the combined effects of the social security earnings limitation and the $6,000 limit in the existing offset for employers, the likely effect of extending the TJJC to this group would be primarily to create jobs paying under $6,000 likely to be part-time jobs. Thus, this provision would contribute to stimulating the availability of the part-time employment opportunities that older workers have repeatedly indicated they desire.

SOCIAL SECURITY PROVISIONS

Mr. President, the current social security law discourages older workers from delaying retirement and continuing in the work force in two major ways: First, the social security earnings limitation discourages continued work effort by imposing on those under 72 the equivalent of a 50-percent tax on earned income in excess of a specified amount—currently $6,000 per year—and second, the present adjustment factors in benefit levels for early or late retirement favor those who retire before age 65 and discourage those who delay retirement past age 65.

The social security limitation earnings limitation requires that a social security recipient lose $1 in social security benefits for every $2 in earned income over $6,000. This work disincentive is compounded by the fact that the social security benefits are not taxable while the earned income that may replace them under the earnings limitation provision is taxable. Thus, the social security recipient not only loses his or her social security benefits because of the earned income restriction, that earned income is then reduced by the applicable income tax.

In addition, it has been a continuing source of resentment that this earnings limitation applies only to earned income and not to other sources of income. Thus, the social security recipient who must work to supplement his or her social security benefit is penalized while the recipient who has income from other sources, for exam-

ple, investment income, is not penalized. Although arguments can be made to justify this distinction—it encourages savings for retirement years since there is no penalty for income from such sources—the basic provision clearly discourages working.

There have been various proposals to eliminate entirely the earnings limitation or to mitigate its adverse impact by raising the exempt amount. Although I am sympathetic to the desire to abolish the earnings limitation, efforts in that direction have been unsuccessful in major part because of the large cost entailed. It has been estimated that repeal of the earnings test would increase social security program costs by $6 to $7 billion in the first year and more in future years, and that most of the added benefits would go to individuals with higher incomes. At a time when the social security trust fund is subject to so many other difficulties, it is likely that a total repeal of the earnings limitation would be perceived as neither prudent or feasible.

The legislation I am introducing today, however, deals in a different manner with one aspect of the earnings limitation problem.

It includes a proposal made by the 1981 National Commission on Social Security for the creation of a partially refundable tax credit for people 65 and older who lose social security benefits under the earnings test. The purpose of this credit is to offset the additional income tax paid by these individuals on the earned income that replaced their nontaxable social security benefits. This credit would be equal to the lowest Federal income tax rate—currently 14 percent—multiplied by a specific factor based on the age attained in the year and then applied to the amount of social security benefits withheld during the tax year. The multiple would increase with age, so as to encourage people to work longer. Under this credit, if a 66-year-old worker earned $20,000 in 1982 and had his or her full social security benefit of $6,000 withheld under the earnings limitation provision, the income tax credit he or she would be eligible for would be computed as 14 percent times 0.7 multiplied by the foregone social security benefit of $6,000. The result would be a tax credit of $588, offsetting the taxation of the earned income.

Mr. President, this proposal by the 1981 National Commission on Social Security is a creative response to the earnings limitation problem and one that would not place an additional financial drain on the already strained social security trust fund.

Mr. President, the second proposal I have incorporated in this measure dealing with the social security disincentives to delayed retirement is also derived from the recommendations of the 1981 Commission. A number of individuals and organizations studying the problem have urged a change in the adjustment factors used in the social security program for delayed retirement. In order to create an incentive to delay retirement, larger increases in benefits for retirement after 65 have been urged. The 1981 Commission presented four different alternative schedules for early and delayed retirement. The legislation that I am introducing incorporates the alternative D schedule proposed by that Commission. An important feature of this alternative is that it incorporates the concept that there is no normal retirement age. Instead, it provides a range between 62 and 72 of actuarial equivalent benefits, rather than artifically setting the 100-percent benefit at age 65. The actuarial equivalent concept is based upon the notion that a person who retires early, being younger, can be expected to receive benefits for a longer period of time and, conversely, that those who retire late need to receive higher benefits because, being older, they can expect fewer years of benefit payments.

I ask unanimous consent that a table setting forth the four alternative schedules for benefit adjustment factors set forth in the 1981 National Commission on Social Security report be reprinted in the RECORD at this point.

There being no objection, the following table was ordered to be printed in the RECORD, as follows:

TABLE 5–4.—BENEFIT ADJUSTMENT FACTORS FOR AGE OF RETIREMENT

Age at retirement	Percent of full benefit payable under—					
	Present law	Actuarial equivalent	Alternatives			
			A	B	C	D
62	80	79.5	80	80	78.7	78
63	86.67	87.0	86.67	86.67	86.1	85
64	93.33	93.5	93.33	93.33	92.6	92
65	100	100.0	100	100	99.0	99
66	103	107.2	107	107	106.1	106
67	106	115.1	114	115	114.0	113
68	109	124.0	121	124	122.8	122
69	112	134.0	128	134	132.7	132
70	115	145.4	135	145	144.0	143
71	118	158.3	142	158	156.7	156
72	121	172.9	149	173	171.2	170
Estimated long range cost as percentage of taxable payroll		.09	.09	.11	0	−.03

Source: "Social Security in America's Future," final report of the National Commission on Social Security, Mar. 1981, p. 135.

Mr. CRANSTON. Mr. President, although I think that each of the four alternative schedules deserves consideration, alternative D has two advantages. First, it does not presume any particular age is the normal age for retirement, but establishes equal benefits at any age within the range of 62 to 72. Second, it would not increase the long-term costs of the social security system and, in fact, would slightly reduce the long-term deficit. Because this schedule would result in some, albeit slightly, reduction in rates for persons retiring before the age of 65, I have included a delayed effective date—1990—for those provisions because I strongly believe that we should not be proposing changes that would adversely affect—even mildly—anyone approaching retirement age without giving that person adequate opportunity to plan accordingly. In any event, these reductions would be minimal; for example, an individual retiring at the earliest possible age—62—who would receive a $400 a month benefit under current law, 80 percent of the benefit at age 65, would receive a monthly benefit of $390 or 78 percent of the benefit at age 65 under this proposal. The schedule would provide substantial increases for those retiring after age 65. For example, a person retiring at age 68 who would receive a benefit of $545 under current law would receive $610 under this formula. These increases would become effective almost immediately upon retirement.

Mr. President, the proposal in this alternative D would establish an actuarially based range of retirement options with incentives toward delayed retirement to replace the current adjustment factors which discourage delayed retirement. It would not assume any normal retirement age, but would allow individuals to choose any time between the ages of 62 and 72 for retirement and receive retirement benefits of equal value to those provided

and receive at any age within this range.

This formula is neutral as to the various proposals to raise the age of retirement from 65 to 68. It assumes no normal retirement age; should the Congress adopt one of the proposals to raise the age of retirement, this adjustment range could be shifted from the current 62 to 72, to 65 to 75 or whatever range might be established. I am very sympathetic to those proposals to raise the basic retirement age gradually over a long period of time, but the proposal I am introducing today stays within the existing range for retirement benefit adjustments. It would simply equalize benefits within that range so that those individuals who delay their retirement would not be penalized as they are under present adjustment factors.

APPRENTICESHIP PROGRAMS

Finally, Mr. President, the proposed Employment Opportunities for Older Americans Act of 1982 includes a provision in the National Apprenticeship Act to which would prohibit age discrimination in apprenticeship programs. A great number of apprenticeship programs which recruit entrants into the skilled trades apply upper age limits for aspiring workers. These policies reflect an attitude toward the productivity and longevity of older workers that is inconsistent with the demographic changes ahead in our work force. As the demand for older workers grows and older workers look at second careers, age barriers in apprenticeship and other job training programs must be reevaluated. A worker in the year 2000 is as likely to spend as many years in the work force after his 45th birthday as before that age. In many cases, older workers will be needed to transfer from heavy industrial jobs to lighter tasks. They will need to have access to training programs to make these transfers. Elimination of age discrimination in apprenticeship programs is one of the steps that should be taken as we attempt to reorient our attitude toward older workers.

CONCLUSION

Mr. President, I believe that this proposal represents a comprehensive approach to expanding the employment opportunities of older Americans who want to stay in the work force in some fashion after the normal retirement age. I hope that the introduction of this measure at this time will stimulate a dialog within the Congress that will contribute to a reevaluation and revision of our basic policies regarding retirement. The changes which have taken place in our society and will continue to take place in the coming decades demand that we discard our existing rigid concepts about retirement and replace them with a flexible range of options that will meet the needs of older workers, of American business, of our economy and of our society.

Mr. President, I ask unanimous consent that the full text of the bill that I am introducing today be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3010

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Employment Opportunities for Older Americans Act of 1982".

TITLE I—AMENDMENTS TO AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967

AGE LIMITATION

SEC. 101. (a)(1) Section 12(a) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 631(a)) (relating to age limitations) is amended by striking out "but less than 70 years of age".

(b) Subsections (c) and (d) of section 12 of such Act (29 U.S.C. 631 (c) and (d)) are repealed.

BENEFIT ACCRUAL BEFORE MAXIMUM NORMAL RETIREMENT BENEFIT

SEC. 102. Section 4(f)(2) of the Age Discrimination in Employment Act of 1967 (29 U.S.C. 623(f)(2)) (relating to prohibition of age discrimination) is amended—

(1) by striking out "and" after "hire any individual,"; and

(2) by inserting before the semicolon at the end thereof a comma and "and no employee benefit plan shall require or permit the suspension of an employee's benefit accrual or the reduction of the rate of an employee's benefit accrual because of age before accruing the maximum normal retirement benefit".

TITLE II—PENSION ACCRUALS FOR OLDER WORKERS

BENEFIT ACCRUAL BEYOND NORMAL RETIREMENT AGE

SEC. 201. (a)(1) Subsection (a) of section 204 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1054(a)) (relating to benefit accrual requirements) is amended to read as follows:

"(a) Each pension plan shall satisfy the requirements of subsection (b)(3), and—

"(1) in the case of a defined benefit plan, shall satisfy the requirements of subsection (b)(1); and

"(2) in the case of a defined contribution plan, shall satisfy the requirements of subsection (b)(2).".

(2) Section 204(b)(1) of such Act (29 U.S.C. 1054(b)(1)) is amended by adding at the end the following new subparagraph:

"(H) Notwithstanding the preceding subparagraphs, a defined benefit plan shall be treated as not satisfying the requirements of this paragraph if, under terms of the plan, an employee's benefit accrual is suspended or the rate of an employee's benefit accrual is reduced solely because of age before accruing the maximum normal retirement benefit.".

(3) Section 204(b) of such Act (29 U.S.C. 1054(b)) is further amended—

(A) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(B) by inserting after paragraph (1) the following new paragraph:

"(2) An individual account plan satisfies the requirements of this paragraph if, under the plan, employer contributions to the employee's account are not suspended or reduced solely because of age.".

(b)(1) Section 411(b)(1) of the Internal Revenue Code of 1954 (relating to accrued benefit requirements) is amended—

(A) by striking out "GENERAL RULES.—" and inserting in lieu thereof "DEFINED BENEFIT PLANS.—"; and

(B) by adding at the end thereof the following new subparagraph:

"(H) CONTINUED ACCRUAL BEYOND NORMAL RETIREMENT AGE.—Not withstanding the preceding subparagraphs, a defined benefit plan shall be treated as not satisfying the requirements of this paragraph if, under the terms of the plan, an employee's benefit accrual is suspended or the rate of an employee's benefit accrual is reduced solely because of age before accruing the maximum normal retirement benefit."

(2) Section 411(b) of the Internal Revenue Code of 1954 is further amended—

(A) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(B) by inserting after paragraph (1) the following new paragraph:

"(2) DEFINED CONTRIBUTION PLANS.—A defined contribution plan satisfies the requirements of this paragraph if employer contributions to the employee's account are not suspended or reduced solely because of age."

(3) The first sentence of section 411(a) of the Internal Revenue Code of 1954 (relating to minimum vesting standards) is amended by striking out "paragraph (2) of subsection (b), and" and all that follows down through the end thereof and inserting in lieu thereof "subsection (b)(3), and also satisfies, in the case of a defined benefit plan, the requirements of subsection (b)(1) and, in the case of defined contribution plan, the requirements of subsection (b)(2)."

EMPLOYMENT BEYOND NORMAL RETIREMENT AGE

SEC. 202. (a) Section 206 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1056) (relating to form and payment of benefits) is amended—

(1) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively; and

(2) by inserting after subsection (b) the following new subsection:

"(c) If—

"(1) a participant or beneficiary is receiving benefits under a pension plan, or

"(2) a participant or beneficiary is separated from the service and has nonforfeitable rights to benefits,

a plan may not deny, suspend, or reduce the benefits of such a participant by reason of any increase in the income of the participant due to employment of the participant by any employer for less than 1,000 hours during a calendar year.".

(b)(1) Section 203(a)(3)(D)(v) of such Act (29 U.S.C. 1053(a)(3)(D)(v)) is amended by striking out "section 206(c)" and inserting in lieu thereof "section 206(d)".

(2) Section 211(b)(1) of such Act (29 U.S.C. 1061(b)(1)) is amended by striking out "206(d)" and inserting in lieu thereof "206(e)".

EFFECTIVE DATE

SEC. 203. The amendments made by this title shall apply with respect to plan years beginning after December 31, 1983.

TITLE III—FURTHER AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

CREDIT FOR EMPLOYMENT OF CERTAIN NEW EMPLOYEES

SEC. 301. (a) Subsection (d) of section 51 of the Internal Revenue Code of 1954 (relating to members of targeted groups) is amended—

(1) by striking out "or" at the end of subparagraph (H);

(2) by striking out the period at the end of subparagraph (I) and inserting in lieu thereof a comma and "or";

(3) by inserting after subparagraph (H) the following new subparagraph:

"(J) low-income older worker.";

(4) by redesignating paragraphs (11), (12), (13), and (14) as paragraphs (12), (13), (14), and (15), respectively, and inserting after paragraph (10) the following new paragraph:

"(11) LOW-INCOME OLDER WORKER.—The term 'low-income older worker' means an individual certified by the designated local agency as—

"(A) at least 65 years of age, and

"(B) a member of an economically disadvantaged family (as determined under paragraph (12)).".

(b) Paragraph (3)(A)(ii), paragraph (4)(C), and paragraph (7)(A) of such Code are amended by striking out "paragraph (11)" each place it appears and inserting in lieu thereof "paragraph (12)".

(c) The amendments made by this section shall apply to amounts paid or incurred after December 31, 1983, in taxable years ending after such date.

CREDIT FOR CERTAIN OLDER WORKERS

SEC. 302. (a) Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable against tax) is amended by inserting before section 45 the following new section:

"SEC. 44H. CREDIT FOR CERTAIN OLDER WORKERS.

"(a) ALLOWANCE OF CREDIT.—In the case of an individual who has attained 62 years of age before the close of the taxable year, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the applicable percentage of the section 44H amount of such individual for such taxable year.

"(b) LIMITATION.—No credit shall be allowable under subsection (a) with respect to an individual who was eligible for an old-age insurance benefit under section 202 of the Social Security Act prior to January, 1979.

"(c) DEFINITIONS.—For purposes of this section—

"(1) APPLICABLE PERCENTAGE.—The term 'applicable percentage' means the product obtained (expressed as a percentage) by multiplying the lowest rate of tax imposed under the subsection of section 1 which is applicable to such individual for the taxable year by the following multiple:

If the age of the individual at the close of the taxable year is:	The multiple is:
62	0.3
63	.4
64	.5
65	.6
66	.7
67	.8

"(2) SECTION 44H AMOUNT.—The term 'section 44H amount' means an amount equal to the amount by which old-age benefits otherwise payable to an individual under section 202 of the Social Security Act for a taxable year are reduced pursuant to section 203 of such Act for such taxable year on account of work by such individual.".

(b)(1) Subsection (b) of section 6401 of such Code (relating to excessive credits treated as overpayments) is amended—

(A) by striking out "and 43 (relating to earned income credit)," and inserting in lieu thereof "43 (relating to earned income credit), and 44H (relating to older worker credit),", and

(B) by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44H".

(2) Paragraph (2) of section 55 (b) of such Code (defining regular tax) is amended by striking out "39 and 43" and inserting in lieu thereof "39, 43, and 44H".

(c) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting before the item relating to section 45 the following new item:

"Sec. 44H. Credit for certain older workers.".

(d) The amendments made by this section shall apply to taxable yesrs beginning after December 31, 1983.

SEC. 303. REDUCTION IN EMPLOYMENT TAXES WITH RESPECT TO OLDER WORKERS.

(a) (1) Section 3101 of the Internal Revenue Code of 1954 (relating to rate of FICA tax on employees) is amended by adding at the end the following new subsection:

"(e) TAX WITH RESPECT TO OLDER WORKERS.—In the case of wages received during a calendar year by an individual who is 65 years of age or older, each rate of tax imposed by subsections (a) and (b) shall be, with respect to that portion of such wages which does not exceed one-half of the contribution and benefit base (as defined in section 230 of the Social Security Act) in effect for such calendar year, one-half of the rate otherwise applicable under such subsection.".

(2) Section 3111 of such Code (relating to rate of FICA tax on employers) is amended by adding at the end the following new subsection:

"(d) TAX WITH RESPECT TO OLDER WORKERS.—In the case of wages received during a calendar year by an individual who is 65 years of age or older, each rate of tax imposed by subsections (a) and (b) shall be, with respect to that portion of such wages which does not exceed one-half of the contribution and benefit base (as defined in section 230 of the Social Security Act) in effect for such calendar year, one-half of the rate otherwise applicable under such subsection.".

(b)(1) Section 3201 of such Code (relating to rate of Railroad Retirement Act tax on employees) is amended by adding at the end the following new subsection:

"(c)(1) In the case of compensation paid in any calendar month for services rendered by an employee who is 65 years of age or older, the rate of tax imposed on the income of such employee under subsection (a) for such month shall equal, with respect to that portion of such compensation which, when added to the compensation paid in the preceding months of the same calendar year to such employee, does not exceed one-half of the current maximum annual taxable 'wages' (as defined in section 3121), one-half of the rate of tax otherwise applicable under such subsection.

"(2) In the case of compensation paid in any calendar month for services rendered by an employee who is 65 years of age or older, the rate of tax imposed on the income of such employee under subsection (a) shall be increased—

"(A) with respect to the portion of such compensation described in paragraph (1), by each rate of tax specified in section 3101(e); and

"(B) with respect to the remainder (if any) of such income, by each rate of tax specified in subsection (b).".

(2) Section 3211 of such Code (relating to rate of Railroad Retirement Act tax on employee representatives) is amended by adding at the end of the following new subsection:

(c)(1) In the case of compensation paid in any calendar month for services rendered by an employee representative who is 65 years of age or older, the rate of tax imposed under subsection (a) shall be, with respect to the portion of such income described in section 3201(c)(1), one-half the rate of tax otherwise imposed under such subsection.

"(2) In the case of compensation paid in any calendar quarter for services rendered by an employee representative who is 65 years of age or older, the rate of tax imposed under subsection (a) shall be increased—

"(A) with respect to the portion of such compensation described in section 3201(c)(1), by the rates of tax specified in section 3101(e) and section 3111(d); and

"(B) with respect to the remainder (if any) of such compensation, by the rates otherwise applicable under such subsection.".

(3) Section 3221 of such Code (relating to rate of Railroad Retirement Act tax on employees) is amended by adding at the end the following new subsection:

"(e)(1) In the case of compensation paid in any calendar month by an employer for any services rendered to him by an employee who is 65 years of age or older, the rate of tax imposed on such employer under subsection (a) shall be, with respect to the portion of such compensation described in section 3201(c)(1), one-half the rate of tax otherwise imposed on such employer under such subsection.

"(2) In the case of compensation paid in any calendar month by an employer for any services rendered to an employee who is 65 years of age or older, the rate of tax imposed under subsection (a) shall be increased—

"(A) with respect to the portion of such compensation described in section 3201(c)(1), by the rates of tax specified in section 3111(d); and

"(B) with respect to the remainder (if any) of such compensation, by the rates of tax specified in subsection (b).".

(c) The amendments made by this section shall apply with respect to wages received and compensation paid after December 31, 1983.

TITLE IV—AMENDMENTS TO THE SOCIAL SECURITY ACT

CHANGE IN OLD-AGE INSURANCE BENEFIT AMOUNTS ON ACCOUNT OF EARLY OR DELAYED RETIREMENT

SEC. 401. (a)(1) Section 202(q)(1)(A) of the Social Security Act (relating to reduction of benefit amounts for certain beneficiaries) is amended by striking out "5/9 of 1 percent" and inserting in lieu thereof "0.5833 percent".

(2) Section 202(q)(9) of such Act (relating to definition of retirement age) is amended to read as follows:

"(9)(A) Except as provided in subparagraph (B), for purposes of this subsection, the term 'retirement age' means age 65.

"(B) For purposes of determining the amount (if any) by which an old-age insurance benefit shall be reduced under paragraph (1), the term 'retirement age' means age 65 and 2 months.".

(b)(1) Paragraph (1) of subsection (w) of section 202 of such Act relating to increase in old-age insurance benefit amounts on account of delayed retirement is amended by striking out subparagraphs (A) and (B) and inserting in lieu thereof the following new subparagraphs:

"(A) 0.5 percent of such amount, multiplied by the number of the increment months (if any) of such individual ending after such individual attains age 65 and before such individual attains age 66; plus

"(B) 0.5833 percent of such amount, multiplied by the number of the increment months (if any) of such individual ending after such individual attains age 66 and before such individual attains age 67; plus

"(C) 0.75 percent of such amount, multiplied by the number of increment months (if any) of such individual ending after such individual attains age 67 and before such individual attains age 68; plus

"(D) 0.8333 percent of such amount, multiplied by the number of increment months (if any) of such individual ending after such individual attains age 68 and before such individual attains age 69; plus

"(E) 0.9166 percent of such amount, multiplied by the number of increment months (if any) of such individual ending after such individual attains age 69 and before such individual attains age 70; plus

"(F) 1.0833 percent of such amount, multiplied by the number of increment months (if any) of such individual ending after such individual attains age 70 and before such individual attains age 71; plus

"(G) 1.1666 percent of such amount, multiplied by the number of increment months (if any) of such individual after such individual attains age 71 and before such individual attains age 72.".

(2) Paragraph (2) of subsection (w) of section 202 of such Act is amended to read as follows:

"(2) For purposes of this subsection, the term 'increment month' means a month with respect to which an individual—

"(A) is a fully insured individual (as defined in section 214(a)), and

"(B)(i) is not entitled to an old-age insurance benefit, or

"(ii) suffers a deduction under section 203(b) or 203(c) in an amount equal to the amount of such benefit.".

(3) Paragraph (3) of subsection (w) of section 202 of such Act is amended to read as follows:

"(3) A determination shall be made annually of the amount by which the benefits of an individual are required to be increased pursuant to paragraph (1), and such amount shall be applied to the old-age insurance benefit payable to such individual without regard to this subsection, beginning with bendfits for January of the year following the year with respect to which such determination is made; except that the amounts applicable to the benefits of an individual who attains age 72 shall be determined through the month before the month in which such individual attains such age and shall be applicable to the old-age insurance benefit payable to such individual without regard to this subsection beginning with the month in which such individual attains such age.".

(d) (1) The amendments made by subsections (b) and (c) of this section shall apply with respect to increased benefit amounts payable under section 202 (w) of the Social Security Act for months after December 1983.

(2) The amendments made by subsection (a) of this section shall apply with respect to reduced benefit amounts payable under section 202 (q) of such Act for months after December 1989.

TITLE V—AMENDMENTS TO THE NATIONAL APPRENTICESHIP ACT

PROHIBITION OF AGE DISCRIMINATION IN APPRENTICESHIP PROGRAMS

SEC. 501. The first section of the Act of August 16, 1937 (50 Stat. 664, chapter 663; 19 U.S.C. 50) popularly known as the National Apprenticeship Act, is amended by inserting "(a)" after the section designation and by adding at the end thereof the following new subsection:

"(b) In promoting labor standards for the welfare of apprentices under subsection (a) of this section, the Secretary shall ensure that no program of apprenticeship discriminates against any individual, because of the age of such individual, in admission to, or employment in, any such program.".

By Mr. SASSER:

S. 3011. A bill to amend the Disaster Relief Act of 1974 to increase the aggregate amount of grants which may be made under such act to any individual or family adversely affected by a major disaster; to the Committee on Environment and Public Works.

S. 3012. A bill to amend the Small Business Act to reduce the interest rate payable on the Federal share of certain disaster loans made under such act; to the Committee on Small Business.

REDUCTION OF INTEREST RATES FOR CERTAIN EMERGENCY ASSISTANCE AND AN INCREASE IN THE AGGREGATE AMOUNT OF CERTAIN EMERGENCY GRANTS

● Mr. SASSER. Mr. President, on September 28, I introduced legislation, S. 2962, which is aimed at easing the financial burdens of persons who take out certain disaster emergency loans. I am today continuing that effort by introducing two more bills, S. 3011 and S. 3012, which seek to achieve this same result.

S. 3011 follows closely the language in S. 2962 in reducing the interest payable on disaster loans. However, S. 3011 works this reduction for emergency loans taken under the Small Business Act.

The other measure I am introducing, S. 3012, provides a different form of assistance by increasing the aggregate amount of grants which may be made under the Disaster Relief Act of 1974 from $5,000 to $10,000.

Mr. President, I am again introducing these bills as companion bills to identical legislation introduced by Mr. GORE in the House.

I pointed out the need for this type of legislation of September 28. The arguments I raised at that time are equally valid for the bills I have introduced today.

Mr. President, I ask unanimous consent that the full text of S. 3011 and S. 3012 be printed in the RECORD following my remarks.

There being no objection, the ordered to be printed in the RECORD, as follows:

S. 3011

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 408(b) of the Disaster Relief Act of 1974 (42 U.S.C. 5178(b)) is amended by striking out "$5,000" and inserting in lieu thereof "$10,000".

SEC. 2. The amendment made by the first section of this Act shall not apply with respect to major disasters declared before June 1, 1982.

S. 3012

Be it enacted by the Senate and House of Representatives of the United States of American in Congress Assembled, That section 7(c)(4) of the Small Business Act (15 U.S.C. 636(c)(4)) is amended—

(1) in subparagraph (A) by striking out "8 per centum" and inserting in lieu thereof "5 per centum", and

(2) in subparagraph (C) by striking out "8 per centum" and inserting in lieu thereof "5 per centum".

SEC. 2. The amendments made by the first section of this Act shall apply with respect to the outstanding amount of the Federal share of any loan made on or after August 31, 1981.●

By Mr. McCLURE (for himself and Mr. SYMMS):

S. 3013. A bill to provide relief for certain desert land entrymen in Idaho; to the Committee on Energy and Natural Resources.

IDAHO ENTRYMEN

Mr. McCLURE. Mr. President, today I and Senator SYMMS are introducing a bill to reinstate desert land entries in two projects in Idaho and to permit the entrymen or their heirs to complete the requirements of the Desert Land Act in accordance with interpretations of that act adopted by the Department of the Interior and retroactively applied to those entries after those entries had been developed and final payment had been made to the United States.

This bill is necessary to eliminate the harsh and unfair results arising from the retroactive application of an interpretation of the Desert Land Act, 43 U.S.C. 329—the Act—by the Department of the Interior to transactions that were completed before the interpretation of the act was rendered. The authority of the Department of the Interior to retroactively apply such interpretation has been upheld by the U.S. courts on appeal in this matter. The result of this retroactive application by the Department of its interpretation of the act is forfeiture to the Government of the land and the money paid by the entrymen, despite that from as early as the 1800's and continuing to as late as 1964 or

beyond, the Department consistently held that desert land entries were controlled by interpretations in effect at the time the entries were made.

The subject two projects are located adjacent to the Snake River in Elmore County, Idaho. The Black Mesa project consists of 14 entries comprising approximately 4,400 acres, and the Sailor Creek project consists of 12 entries comprising approximately 3,700 acres. Both projects were initiated in 1963 and the applications for all the entries had been allowed by March of 1964. Development of the Sailor Creek project proceeded forward in 1964 and the lands were placed under irrigation and in production that year. Development of the Black Mesa project commenced in the summer of 1964 and was completed in time for irrigation and crop production in 1965. Final proof and final payment under the act were made for the Sailor Creek project in 1964 and for the Black Mesa project in 1965.

The Sailor Creek entries were farmed under 2-year leases, with two, 5-year renewals (one entry was leased originally only for 1964). The Black Mesa entries were farmed under 1-year verbal agreements, following cancellation of 10-year operating agreements that had been made in reliance on the BLM Director's 1964 decision in the Indian Hills case. At that time, the Department of the Interior had no regulations concerning leases or farming contracts for desert land entries. However, it did have a regulation expressly authorizing mortgages on desert entries. Decisions of the Department made between 1891 and 1910, and still in effect in 1964, stated that desert entries did not require residence or settlement, that all acts of improvement could be done by an agent instead of by the claimant in person, and that other parties could assist in financing the development of entries so long as there was no agreement for transfer of title to the person providing the financing. Accordingly, in both projects the farm operators received mortgages to secure payment of the development costs. As is amply shown in the administrative records of the Bureau of Land Management ("BLM"), the Sailor Creek entrymen were encouraged by BLM employees to lease their entries in order to insure sound farming operations and a successful project. The Black Mesa farm operating contracts were made only after the BLM issued a decision in 1964 approving long-term leases and mortgages for the development and farming of another desert entry project.

The basis for the cancellation of the entries on both projects was the 320-acre holding limitation set forth in the act. The first indication that the Department thought that the holding limitation applied to anything other than transfers of title came in an opinion issued by the Department Solicitor in April of 1965, several months after final payment had been made on the Sailor Creek entries and only 4 months before final payment was made and accepted by the United States on the Black Mesa entries. The Solicitor's opinion was followed by a decision by Secretary Udall in *U.S. v. Shearman* 73 I.D. 386, which interpreted the act as prohibiting leases and development arrangements. This interpretation made the holding limitation under the act applicable to leases by construing leases to constitute an effective transfer title under the act. The courts have upheld the Secretary's authority to make this interpretation and to apply it retroactively in this matter.

However, the entrymen were not advised that the new policy would be applied to their entries. Moreover, in another 1964 decision, *Raymond L. Gunderson*, 71 I.D. 477, 483-484, the Department had confirmed its policy that new interpretations of the public land laws would not be applied retroactively. There has even been confusion in applying the new policy set forth in UDALL'S decision in U.S. against Shearman, supra. For instance, in 1972, the Department issued two patents on two entries comprising 600 acres, even though all of the development work and farming was done under 5-year leases to a partnership.

In May, 1966, for Sailor Creek, and July, 1967, for Black Mesa, almost 2 years after final proof was submitted, the Idaho office of the BLM filed contest complaints against the entrymen on grounds that they had violated the holding limitation under the act. In the Sailor Creek matter, the administrative law judge who heard the testimony ruled in favor of the entrymen. However, that decision was overruled by the Interior Board of Land Appeals on the basis of its own interpretation of section 329. In a suit for judicial review, the U.S. District Court for Idaho held that, while the Department's interpretation of the act was a proper one, the Interior Board of Land Appeals was estopped from applying that interpretation retroactively to the entries and that the entrymen should have been given an opportunity to comply with that new interpretation. On appeal, the U.S. Court of Appeals for the Ninth Circuit reversed the district court and interpreted section 329 as permitting no latitude for modifying contractual arrangements to comply with the new interpretations. In the Black Mesa case, the administrative law judge and the Interior Board of Land Appeals ruled against the entrymen. On judicial review, the district court confirmed that the entries must be forfeited on the basis of the decision by the Ninth Circuit Court of Appeals in the Sailor Creek case. The district court decision in the Black Mesa case was affirmed on appeal to the ninth circuit.

The purpose of this bill is to provide relief to the entrymen from forfeiture of their entries resulting from the retroactive application of the subsequent interpretation of the act. The bill is designed to provide the entrymen with an opportunity to come into compliance with the new interpretations. Through the process of administrative evolution, the Department now has taken the position that an individual entryman must participate actively in the reclamation and cultivation of his entry. The function of this bill is to reinstate the entries and afford the entrymen or their heirs (three entrymen are now deceased) the opportunity to complete the reclamation and cultivation of their entries in accordance with the Department's newly adopted policy.

The relief provided in this bill is similar to that provided for a large number of desert entrymen in Imperial County, Calif., by the act of June 25, 1910, 36 Stat. 867. Many entries that had been made by dummy entrymen had been obtained by innocent purchasers, through assignments. Other entries had been assigned to persons who already held entries but not for the full 320 acres allowed by law. Technically, the entries were subject to cancellation for illegal inception or because the assignees were disqualified, just as the courts have held that the Sailor Creek and Black Mesa entries technically were subject to cancellation for failure to comply with the requirements of the law. Many of the innocent assignees had invested thousands of dollars to obtain the assignments and additional thousands of dollars to develop the entries. In the Sailor Creek and Black Mesa entries, the transactions were entered into innocently because the entrymen did not know that their development and farming arrangements would be interpreted as constituting holdings under 43 U.S.C. sec. 329. That lack of knowledge is emphasized by the BLM's 1964 decision in the Indian Hill case, which held that long-term leases and mortgages were a permissible method of development and farming and did not constitute violations of section 329.

The 1910 act provided relief by permitting the assignee to complete the entry, notwithstanding any contest that had been filed or that might later be filed against the entry, based upon a charge of fraud of which the assignee had no knowledge, or a charge that the assignee was disqualified. This bill relieves the entrymen of the harsh effect of an interpretation of the Desert Land Act of which they had no knowledge at the time they entered into the critical transactions, because the interpretation had not been developed at that time and, in fact, a con-

trary interpretation was in effect at the time.

In providing relief to these entrymen from the harsh effects of retroactive application of the new interpretation of the act, this bill will not affect the Department's present policy or affect any other desert entries. This bill is limited in its application to the desert land entries in the Sailor Creek and Black Mesa projects, the BLM serial numbers for which are set forth the bill. This bill does not amend the Desert Land Act nor any regulations promulgated thereunder; rather, it merely provides relief to these entrymen from retroactive application of new interpretations of the act and consequential forfeiture of their entries. The bill will give these entrymen a fair opportunity to comply with the law as now interpreted by the Department and it will prevent the wasting of several hundred thousands of dollars of material and energy resources that were used in the development of the projects and the construction of the two irrigation systems that serve the projects.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3013

SECTION 1. The Congress finds that the certain developed and productive desert land entries in Idaho made under the Desert Land Act of March 3, 1877, as amended, 43 U.S.C. §§ 321, *et seq.*, generally known as the Black Mesa and the Sailor Creek Projects, and specifically identified in Section 2 of this Act by Bureau of Land Management serial number, have been cancelled under the provisions of 43 U.S.C. § 329 as a result of the retroactive application of an interpretation of the holding limitation of 43 U.S.C. § 329; the Congress further funds that the retroactive application of the interpretation of the holding limitation was made approximately two years after final development and proof of and final payment for these desert land entries made several years after the entries were allowed, without giving the entrymen any opportunity to comply with the new interpretation; the Congress further finds that cancellation of the desert land entries under those circumstances was harsh, unfair and results in forfeiture to the government of the developed entries, and that such cancellation was not necessary for the proper operation and administration of the Desert Land Act; and the Congress further finds that the entrymen have fulfilled the requirements of the Desert Land Act in all respects other than the holding limitation and that the entrymen and the assignees hereinafter named are entitled to have their entries reinstated in order that they may comply with the new interpretation of the Desert Land Act and qualify for issuance of patents.

SEC. 2. The names of the entrymen and assignees, and the serial numbers of the desert land entries, to which this Act applies, are as follows:

A. Sailor Creek project desert entries:

Entryman (Idaho):	*BLM designated serial number*
G. Patrick Morris	013820
Joan E. Roth	013905
Elise L. Neeley	013906
Lyle D. Roth	013907
Vera M. Noble (now Baltzor)	014126
Charlene S. Baltzor	014128
George R. Baltzor	014129
John E. Morris (deceased)	014130
Juanita M. Morris	014249
Nellie Mae Morris (deceased)	014250
Milo Axelsen	014251
Peggy Axelsen	014252

B. Black Mesa project desert entries:

Golden Grigg	013917
LeFawn Grigg (now Ottley)	013918
Fred Baines	013919
Merthan G. Ellis, assignee of Otis H. Williams	013920
Vonnie E. Ellis, assignee of Kathryn Williams	013921
Lovell Taylor	013922
William A. Anderson	013923
Saragene Smith	013924
Thomas M. Anderson	013925
Bonnie Anderson	013926
Charles L. Taylor	013927
Darlene Baines (deceased)	013928
Lu Ann Hogg	013933
Paul R. Hogg	013934

SEC. 3. The desert land entries identified—in Section 2 of this Act are hereby reinstated, and the entrymen and above named assignees, or the heirs or devisees of any deceased entryman or above named assignee, are allowed six (6) months from the effective date of this Act to rescind any agreements they might now be party to which are prohibited by the Secretary of the Interior's current interpretation of 43 U.S.C. § 329, and are allowed until December 31 in the third year following the effective date of this Act to resubmit final proof of reclamation and cultivation of the land in accordance with the provisions of 43 U.S.C. § 329. Upon making satisfactory final proof, patents shall issue to the entrymen and the above named assignees or to their heirs or devisees, without further payment, final payment having been made by the named entrymen in 1964 and 1965.

SEC. 4. Notwithstanding any other provision of the desert land laws, the property right prior to issuance of patent to the lands of any entryman or his assignee identified in Section 2 of this Act, or the heirs or devisees of any such entryman or assignee, whose entry is reinstated in accordance with Section 3 of this Act, shall be a personal right, inheritable but not assignable; provided, however, that any such entry may be mortgaged in the manner permitted by the regulations issued by the Secretary of the Interior for the purpose of securing repayment of monies borrowed for development of the entry or for farm operating or crop production expenses.

SEC. 5. This Act is limited in scope and applies only to those certain desert land entries in Idaho identified above in Section 2 of this Act. The purpose of this Act is to provide relief unique to the entrymen and assignees listed above in Section 2 of this Act, and this Act does not amend or interpret or provide any change in interpretation of any provision of 43 U.S.C. § 329 or any other section of the Desert Land Act.

By Mr. DECONCINI:

S. 3014. A bill entitled the "Small Business Emergency Assistance Act of 1982"; to the Committee on Small Business.

SMALL BUSINESS EMERGENCY ASSISTANCE ACT OF 1982

Mr. DECONCINI. Mr. President, the financial crisis in Mexico is having serious repercussions in this country, especially the adjoining States. The dramatic devaluation of the peso since February of this year coupled with the imposition of exchange controls has disrupted normal patterns of trade and commerce and has compounded the depression-like conditions already prevalent in many of the border communities.

The southwestern border area, Mr. President, has never been noted for its great wealth and affluence. It has a history of chronic underdevelopment and suffers from national inattention to its special problems. Thus, the people who have settled there are used to hardship. They are tough, resourceful, and self-reliant. But the economic cataclysm of the last year exceeds even their capacity for coping. It has brought what by any fair and reasonable standard would have to be considered a full blown disaster.

Yet, the businesses in my State and the others along the border can, because of changes enacted in the administration's reconciliation bill of last year, no longer qualify for the small business disaster loan program. To be sure, the SBA has recently announced a so-called Peso Pack of loans, loan guarantees, and technical assistance to eligible businesses in border communities. The problem is that the minimum interest rate on the financial assistance included in the package is 14¾ percent. Firms that have been doubly devastated by both the deepening recession in this country and the massive devaluation of the peso simply cannot be expected to bear that kind of debt service burden. Most are in desperate straits already.

In Douglas, Ariz., for example, business activity has fallen 80 percent since the latest peso devaluation in August. In Nogales, Ariz., eight firms have already gone under and the volume of business is down 78 percent. Almost 50 percent of the local work force has been laid off. In July—the last month for which data are available—the unemployment rate in the border counties of my State was already extremely high. In Yuma County it was 19.2 percent, In Pima County it was 10 percent; in Santa Cruz County, 18.4 percent; and in Cochise County, 10.4 percent. It is a lot higher today and unless we act quickly, conditions can only get worse.

The bill I am introducing today is designed to address the situation in the most direct and expeditious manner possible under the circumstances. It would cut through the red-tape and make SBA loans available at the rates that apply to other types of disasters.

Now, Mr. President, I have here a copy of a letter from Mr. David Stockman, Director of the President's Office of Management and Budget, which outlines the administration's objections to certain provisions in the continuing resolution we have just passed. I ask that it be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., September 23, 1982.

Hon. MARK HATFIELD,
Chairman, Senate Appropriations Committee, U.S. Capitol, Washington, D.C.

DEAR MARK: As the Appropriations Committee begins its work on the Continuing Resolution for Fiscal Year 1983, I would like to share with you the Administration's concerns about operating under a Continuing Resolution in certain key areas.

As we have discussed on several occasions, the Administration believes that attempting to operate at current levels in the Department of Defense—for even a short period of time—would be highly detrimental to our Nation's security. In our view, the rate for the Department of Defense should conform as closely as possible with the FY 1983 Budget Resolution level. We believe the Department of Defense Appropriations Act schedule to be reported to the Senate generally achieves this objective. I strongly urge you to report the Resolution with this amendment.

Similarly, the levels for Foreign Operations provided in the House-passed Continuing Resolution make inadequate provision for program levels needed to enable the President to conduct foreign policy. First, the House-passed language falls short of actual current levels in two respects. The language fails to incorporate 1982 supplemental appropriations enacted by the Congress in establishing current levels. The language also restricts appropriations in those areas where budget estimates are lower than current rates.

In addition, the restrictions on foreign assistance program activities in the Resolution would prevent the timely implementation of key Administration initiatives in Namibia, and make no provision for startup of Radio Marti, which has been approved by the Senate Foreign Relations Committee. I strongly urge you to remedy these critical funding shortages.

In non-security areas, the House-passed Resolution incorporates a number of specific provisions which are highly troublesome. These are: Failure to provide for an Executive-level pay increase (section 101(e)); Technical defects in the treatment of blue collar pay (section 110); A prohibition of funding SLUC increases (section 111); exclusion of stockpile purchase authority from the limits for discretionary programs established by the Budget Resolution (section 112); insufficient flexibility in the Public Buildings Fund authority to manage the building program on a cost-effective basis (section 113); and provisions which, in effect, would dictate postal rates to the Postal Service in contravention of the authorizing legislation (section 115).

Your staff has been provided with a package of amendments needed to remedy these defects. I urge you to incorporate these amendments in the Resolution as reported by the Committee.

Similarly, the House-passed Continuing Resolution fails to provide for a number of situations where inaction in the Continuing Resolution would pose severe problems in the short term. These are:

Department of Defense.—Failure to include limitations on pay for DoD overseas school personnel;

Department of Commerce.—Failure to provide any funds for the continuation of the LANDSAT program under the Resolution;

Department of Housing and Urban Development.—Failure to provide appropriations for subsidized housing programs for which the House has deferred consideration;

Department of Health and Human Services.—Language (section 127) which would prevent the Administration from enforcing the conditions of the Child Support Enforcement program; failure to ensure that past-due claims under titles IV, XIX and XX of the Social Security Act, which have been barred by the Appropriations Committees since 1978, do not become payable.

Department of Transportation.—Failure to provide authority for the transition to Coast Guard funding of certain medical expenses of Coast Guard personnel; failure to appropriate funds for the pay increase for Air Traffic Controllers, as provided in S. 1912.

Veterans' Administration.—Failure to fund the 7.4 percent increase enacted for compensation to service-connected disabled veterans;

Small Business Administration.—Language in the House Commerce, State, Justice Appropriations Act which, if not overridden, would inhibit the ability of the SBA to cure defaults from the Business Loan and Investment Fund; and

Executive Office of the President.—Failure to provide fiscal year 1983 funding for the President's Foreign Intelligence Advisory Board and the President's Foreign Intelligence Oversight Board.

Your staff has been provided with a package of technical amendments needed to correct these oversights. I hope you will incorporate them in the Resolution as reported.

Thank you for this opportunity to clarify the Administration's concerns about the Resolution as passed by the House. I know you share the President's commitment to meeting essential national needs in a fiscally responsible manner. If we may be of any assistance in working with you to ensure that the Continuing Resolution reported to the Senate meets this essential standard, do not hesitate to let me know.

Sincerely,

DAVID A. STOCKMAN.

Mr. President, this letter is illuminating in several respects as to the sense of priorities that apparently guides this administration's policies. The third paragraph, for example, complains that the level of foreign aid funding in the House resolution—$9.8 billion—is inadequate. Interestingly, Mr. Stockman also objects to limitations on increases in the salaries of the highest paid Federal bureaucrats, himself included.

Now, Mr. President, if the administration can recommend increases in foreign aid and bureaucratic salaries, surely it is willing to extend a real helping hand to our border communities. That is what my bill would do. I urge its early passage and ask that it be reprinted in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3014

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Notwithstanding any other provision of law, the Administrator of the Small Business Administration in providing loans or loan guarantee assistance to businesses affected by the economic dislocation resulting from the 1982 devaluation of the Mexican peso shall make such assistance available at the rates prescribed in Section 7(c)(4)(C) of the Small Business Act, as amended.

By Mr. GOLDWATER:

S. 3015. A bill to amend the Tariff Act of 1930 to prohibit an allowance against the foreign market value of merchandise to offset the adjustment to the exporter's sales price of such merchandise required to be made by section 772(e)(2) of such Act, and for other purposes; to the Committee on Finance.

ALLOWANCE AGAINST FOREIGN MARKET VALUE

● Mr. GOLDWATER. Mr. President, I am introducing a bill containing two amendments to our trade law which will carry out the intent of Congress that the antidumping and countervailing duty laws be effectively enforced.

The first amendment is important to many domestic industries. It corrects a situation in which Congress has failed to deal specifically with what is known as the offset adjustment. Even though the Senate report on the 1979 Trade Act specifically said that Congress was not approving or disapproving current regulations or administrative practice regarding the application of the offset, the law in being interpreted in a way that guts antidumping enforcement and gives importers a license to dump.

Unfortunately, the antidumping law, which is supposed to measure and provide a mechanism to correct price discrimination, has become a game played by foreign firms after violation of the law has been established. Under the rules of this game, various accounting claims can be asserted by importers to explain away dumping margins without changing actual prices in the U.S. marketplace.

Under current practice, employees in the Commerce Department exercise broad discretion to adjust dumping margins downward based on claimed indirect costs incurred in the importer's home market. One of these adjustments is the so-called exporters sales price "offset."

The use of the offset defeats the congressional plan for determining the amount of price discrimination which is supposed to be neutralized by assessing an equivalent amount of antidumping duties. The offset allows an amount equal to the importers's U.S.

resale expenses to be deducted from the importers's selling price in the home market, even though the U.S. resale expenses are of a kind not incurred by the manufacturer in Japan, but are, instead, incurred by the manufacturer's wholesale customer. The effect is to defeat entirely the intent of Congress that an arms-length equivalent of a purchase price between unrelated exporter and importer be applied in determining the foreign market value.

The offset is used by the Commerce Department to adjust the real home market price to produce a theoretical price lower than that which was actually charged in the home market. The effect of that adjustment is to reduce or eliminate any dumping margin.

The exporters sales price offset is the most important of a number of discretionary adjustments of indirect expenses granted to importers, who, I would point out, have already been found guilty of violating the antidumping law, and I believe Congress must clarify its position that strict enforcement of our trade policy will not be frustrated by departmental fiat.

Also, I have included in the bill a provision removing from the Secretaries of Commerce and Treasury authority to settle or compromise assessments of antidumping duties and countervailing duties. For example, the Japanese television set dumping case was settled for an amount generally believed to represent a small fraction of the actual liability for antidumping duties. This practice frustrated the intended operation of statutes which are supposed to neutralize the harmful effects of unfair methods of import competition.

Mr. President, I believe strongly in the principle of open trade both ways. However, where this trade is unfair or illegal under international standards, we cannot stand idly by and allow the destruction of important American industries in the name of pure principle.

Therefore, I am seeking to improve the enforcement of our rules of fair trade in order to support the concept of free trade. Mr. President, I ask that the text of the bill may appear in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3015

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of section 773 of the Tariff Act of 1930 (19 U.S.C. 1677b (a)) is amended by adding at the end thereof the following new paragraph:

"(5) TREATMENT OF SELLING EXPENSES.—Notwithstanding paragraph (4), for purposes of determining—

"(A) the foreign market value of merchandise, and

"(B) the amount (if any) by which the foreign market value of merchandise exceeds the exporter's sales price of such or similar merchandise,

no allowance shall be made for any selling expenses incurred by the exporter, manufacturer, or producer of such merchandise with respect to the sale of such merchandise by such exporter, manufacturer, or producer in the home market of the country of exportation, manufacture, or production.".

(b) Section 617 of such Act (19 U.S.C. 1617) is amended by inserting "(except a claim arising under section 701 or 731)" after "laws".●

By Mr. DIXON:

S. 3016. A bill to provide for the public financing of general elections for the U.S. Senate, and for other purposes; to the Committee on Rules and Administration.

PUBLIC FINANCING OF SENATE ELECTIONS

Mr. DIXON. Mr. President, although it is late in the session, I am today offering a bill calling for the introduction of public matching funds in general elections for U.S. Senators.

With the 1982 election upon us, there is no better time to consider this vital issue, especially when we see on all sides the extravagant expenditures by candidates and committees at all levels. The timeliness of reviewing campaign fundraising and spending with a view toward improving the entire process is self-evident in this crucial election year.

Similar proposals have been offered in recent years. Because of the success of public financing in the election of American Presidents, the idea of similar financing for congressional candidates will eventually become a reality. I, for one, am convinced that for this to happen sooner is far better than later.

Let me describe briefly, Mr. President, how this bill, which would be strictly voluntary for Senate candidates, would work in my home State of Illinois.

A candidate choosing to participate in Illinois would, with certain exceptions, be limited to a total maximum expenditure of $1,490,500 in the general election. This figure is arrived at through a formula using a base of $250,000 plus 15 cents multiplied by the voting age population of a State.

A candidate in Illinois would receive dollar for dollar matching funds for contributions up to $100 from individuals. In other words, the candidate could raise $745,250 from individuals and receive the same amount in matching funds.

If on the other hand, the candidate receives, for example, $50,000 in contributions from party and political action committees, the matching funds mechanism would not be triggered. In Illinois, the candidate would have to raise only $720,250 from individuals. This amount, coupled with $720,250 in matching funds and the $50,000 from party and political action committees, would bring the candidate up to the $1,490,500 spending limit.

I would like to reiterate, Mr. President, that this entire program is voluntary. A candidate can refuse public matching funds and his or her authorized committee can raise and spend as much money as it feels necessary.

But I feel the plan contained in this bill contains these positive elements: It encourages active participation by a broader spectrum of individual contributors, and it places a cap on expenditures by candidates opting for public financing. Both of these developments would result in favorably strengthening the electoral process through increased public involvement and reviving public confidence in the integrity of the workings of our Government. Our States, our Nation, and our citizens will all benefit.

It is my intention, Mr. President, to work assiduously for the adoption of this legislation. I expect to ask my distinguished colleague Senator MATHIAS, chairman of the Committee on Rules and Administration, to which I expect this bill to be referred, to hold hearings on this matter during our lame-duck session beginning November 29. I will be seeking support from everyone interested in the earnest hope that public financing for Senate elections will become as much a permanent fixture in American politics and Government as it now is in Presidential elections.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3016

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act May be cited as the "Senate General Election Reform Act of 1982."

SEC. 2. The Federal Election Campaign Act of 1971 is amended by adding at the end thereof the following new subchapter:

"SUBCHAPTER III—PUBLIC FINANCING OF SENATE GENERAL ELECTION CAMPAIGNS

"DEFINITIONS

"SEC. 501. For purposes of this subchapter—

"(1) the definitions set forth in section 301 of this Act apply to this subchapter;

"(2) 'general election' means any regularly scheduled or special election held for the purpose of electing a candidate to the United States Senate;

"(3) 'eligible candidate' means a candidate who is eligible, under section 502, for payments under this subchapter;

"(4) 'account' means the Senate General Election Campaign Account maintained by the Secretary of the Treasury in the Presidential Election Campaign Fund established by section 9006(a) of the Internal Revenue Code of 1954; and

"(5) 'authorized committee' means, with respect to any candidate for election to the United States Senate, any political committee which is authorized in writing by such candidate to accept contributions or to make expenditures on behalf of such candi-

date to further the election of such candidate.

"ELIGIBILITY FOR PAYMENTS

"SEC. 502. (a) To be eligible to receive payments under this subchapter, a candidate shall agree—

"(1) to obtain and to furnish to the Commission any evidence it may request about the campaign expenditures and contributions of such candidate;

"(2) to keep and to furnish to the Commission any records, books, and other information it may request; and

"(3) to an audit and examination by the Commission under section 507 and to pay any amounts required under section 507.

"(b) To be eligible to receive payments under this subchapter, a candidate shall certify to the Commission that—

"(1) the candidate and the authorized committees of such candidate will not make campaign expenditures greater than the limitations set forth in section 315(b)(3) of this Act;

"(2) no contributions will be accepted by the candidate or the authorized committees of such candidate in violation of section 315(a) of this Act;

"(3) the candidate is seeking election to the United States Senate, and such candidate and the authorized committees of such candidate have received contributions for that campaign in a total amount of not less than the smaller of—

"(A) 20 percent of the amount of expenditures the candidate may make in connection with the campaign under section 315(b)(3) of this Act, or

"(B) $200,000; and

"(4) at least two candidates have qualified for the election ballot for election to the same seat in the United States Senate under the law of the State involved.

"(c) Agreements, certifications, and declarations under this section shall be filed with the Commission at the time required by the Commission.

"ENTITLEMENT TO PAYMENTS

"SEC. 503. (a) Every candidate who meets the eligibility requirements in section 502 is entitled to payments for use in such candidate's general election campaign in an amount equal to the amount of contributions such candidate and the authorized committees of such candidate receive for that campaign.

"(b) A candidate entitled to payments under subsection (a) shall be entitled to—

"(1) an initial payment in an amount equal to the contributions certified under section 502(b)(3); and

"(2) additional payments to be paid in—

"(A) multiples of $10,000 under section 506, if, with respect to each such payment, the eligible candidate and the authorized committees of such candidate have received contributions aggregating $10,000; and

"(B) a final payment under section 506 (designated as such by the candidate involved) of the balance of the entitlement of the candidate under this section.

"(c) In determining the amount of contributions received by a candidate and the authorized committees of such candidate for the purposes of subsection (a) of this section and section 502(b)(3)—

"(1) no contribution received by the candidate or any of the authorized committees of such candidate as a subscription, loan, advance, deposit, or as a contribution of products or services, shall be taken into account;

"(2) no contribution received from a political committee or any other organization shall be taken into account;

"(3) no contribution received from any individual shall be taken into account to the extent that such contribution exceeds $100 when added to the amount of all other contributions made by that individual to or for the benefit of such candidate in connection with the general election campaign of such candidate;

"(4) no contribution received from any individual who resides in a State other than the State in which the election is held shall be taken into account to the extent that such contribution when added to all other contributions received from such individuals exceeds 20 percent of the aggregate of contributions otherwise taken into account;

"(5) no contribution (A) which is received before September 1 of the year immediately preceding the year in which any general election is held and (B) which is not maintained in a separate account until the date on which such candidate qualifies under the law of the appropriate State for election, shall be taken into account;

"(6) no contribution maintained in such a separate account shall be used to make any expenditure until the date on which the candidate qualifies under the law of the appropriate State for election to the Senate; and

"(7) no contribution received after the date on which the election is held shall be taken into account.

"(d) Notwithstanding the provisions of subsection (a), no candidate is entitled to the payment of any amount under this section which, when added to the total amount of contributions received by such candidate and the authorized committees of such candidate and any other payments made to the candidate under this subchapter for such candidate's general election campaign, exceeds the amount of the expenditures limitation applicable to such candidate for that campaign under section 315(b)(3)(A) of this Act.

"WAIVER OF OVERALL EXPENDITURE LIMITATION; ADDITIONAL PUBLIC FINANCING FOR CERTAIN CANDIDATES

"SEC. 504. (a)(1) Not later than the date on which a candidate qualifies under the law of the appropriate State for election to the Senate of the United States, or 90 days before the date of any general election, whichever is earlier, each candidate for election to the Senate of the United States shall file with the Commission a declaration of whether such candidate intends to make expenditures in excess of the limitations on expenditures under section 315(b)(3) of this Act.

"(2) Not later than 60 days before the date of such general election, each candidate who has reason to believe that he may make expenditures in excess of such limitations shall notify the Commission to that effect, unless such candidate filed with the Commission a timely declaration that he intended to exceed such limitations, as provided in paragraph (1).

"(3) Each candidate for election to the Senate of the United States shall notify the Commission and each other candidate for the same election within 48 hours after such candidate, or any of the authorized committees of such candidate—

"(A) makes any expenditure, or incurs any obligation to make an expenditure, in excess of the limitation on expenditures contained in section 315(b)(3) of this Act; or

"(B) receives any contribution which, when added to the total amount of contributions received by such candidate and the authorized committees of such candidate, exceeds the amount of the limitation on expenditures contained in section 315(b)(3)(A) of this Act.

"(4) The Commission is authorized to determine, upon its own initiative or upon the request of any candidate for election to the Senate of the United States, whether any candidate has made expenditures or incurred obligations to make expenditures in excess of the limitations contained in section 315(b)(3) of the Act, or has received contributions in excess of the limitation contained in section 315(b)(3)(A) of this Act.

"(b) The limitation on expenditures contained in section 315(b)(3)(A) of this Act shall not apply to any candidate for election to the Senate of the United States if any other candidate in the same election—

"(1) fails to file with the Commission a timely declaration as provided in paragraph (1) of subsection (a); or

"(2) files with the Commission a notice as provided in paragraph (2) of subsection (a); or

"(3) is required to notify the Commission in connection with the making of expenditures or the receipt of contributions as provided in paragraph (3) of subsection (a).

"(c)(1) Any person who makes independent expenditures, as defined in section 301(17) of this Act, or incurs costs of communication, required to be reported under section 301(9)(B)(iii) of this Act, shall notify the Commission not later than 48 hours after such person first makes such independent expenditures or incurs such costs of communication aggregating more than $5,000, and thereafter shall so notify the commission each time such person makes any additional independent expenditure, or incurs any such additional costs of communication, aggregating $5,000 or more.

"(2) If, with respect to an election, independent expenditures, as defined in section 301(17) of this Act, are made, or costs of communication, required to be reported under section 301(9)(B)(iii) of this Act, are incurred, aggregating more than one-third of the limitation on expenditures in section 315(b)(3)(A) of this Act, the Commission shall, with respect to such election, suspend the limitation on expenditures established in such section 315(b)(3)(A) at the request of any candidate in such election who is eligible to receive payments under section 502, and who has received the benefit of no more than one-third of such independent expenditures or costs of communication.

"(d)(1) The provisions of section 503(d) shall not apply to a candidate who elects to receive payments under this subchapter if the expenditure limitation contained in section 315(b)(3)(A) of this Act is made inapplicable to such candidate under subsection (a), (b), or (c) of this section.

"(2) The additional amount to which a candidate is entitled under this subsection shall be based only upon the amount of contributions received after the date on which such expenditure limitation is made inapplicable, except that any contribution which is received from an individual after the date on which the limitation on expenditures is made inapplicable shall be considered as a contribution from an individual who has not previously made a contribution to such candidate.

"(3) The additional amount to which a candidate is entitled under this subsection shall not exceed 50 percent of the amount of the expenditure limitation under section 315(b)(3)(A) of this Act which would otherwise apply to such candidate.

"CERTIFICATIONS BY COMMISSION

"SEC. 505. (a) No later than 48 hours after a candidate files a request with the Commission to receive payments under section 506, the Commission shall certify the eligibility of such candidate to the Secretary of the Treasury for payment in full of the amount to which such candidate is entitled. The request referred to in the preceding sentence shall contain—

"(1) such information and be made in accordance with such procedures as the Commission may provide by regulation; and

"(2) a verification signed by the candidate and the treasurer of the principal campaign committee of such candidate stating that the information furnished in support of the request, to the best of their knowledge, is correct and fully satisfies the requirements of this subchapter.

"(b) Initial certifications by the Commission under subsection (a), and all determinations made by it under this subchapter, shall be final and conclusive, except to the extent that they are subject to examination and audit by the Commission under section 507 and judicial review under section 511.

"(c) Any candidate who knowingly and willfully submits false information to the Commission under this section shall be punished as provided in section 512.

"PAYMENTS TO ELIGIBLE CANDIDATES

"SEC. 506. (a) The Secretary of the Treasury shall maintain in the Presidential Election Campaign Fund established by section 9006(a) of the Internal Revenue Code of 1954, in addition to any other accounts he maintains under such section, a separate account to be known as the Senate General Election Campaign Account. The Secretary shall deposit into the account, for use by candidates eligible for payments under this subchapter, the amount available after the Secretary determines that amounts in the fund necessary for payments under subtitle of the Internal Revenue Code of 1954 are adequate. The moneys in the account shall remain available without fiscal year limitation.

"(b) Upon receipt of a certification from the Commission under section 505, the Secretary of the Treasury shall pay the amount certified by such Commission out of the account to the candidate to whom the certification relates.

"(c) Payments received under this section shall be used only to defray election campaign expenses incurred with respect to the period beginning on the day after the date on which the candidate qualifies for the election ballot under the law of the State involved, and ending on the date of the election, or the date on which the candidate withdraws from the campaign or otherwise ceases actively to seek election, whichever occurs first. Such payments shall not be used (1) to repay any loan to any person, or (2) to make any payments, directly or indirectly, to such candidate or to any member of the immediate family (as defined in section 315(b)(3)) of such candidate.

"(d)(1) If the Secretary of the Treasury determines that the moneys in the account are not, or may not be, sufficient to pay the full amount of entitlement to all candidates eligible to receive payments, he shall reduce the amount to which each candidate is entitled under section 503 by a percentage equal to the percentage obtained by dividing (A) the amount of money remaining in the account at the time of such determination by (B) the total amount which all candidates eligible to receive payments are entitled to receive under section 503. If additional candidates become eligible under section 502 after the Secretary determines there are insufficient moneys in the account, he shall make any further reductions in the amounts payable to all eligible candidates necessary to carry out the purposes of this subsection. The Secretary shall, by registered mail, notify the Commission and each eligible candidate of the reduction in the amount to which that candidate is entitled under section 503.

"(2) If, as a result of such reduction, payments have been made under this section in excess of the amount to which such candidate is entitled, that candidate is liable for repayment to the account of the excess pursuant to procedures the Commission shall prescribe by regulation.

"EXAMINATION AND AUDITS; REPAYMENTS

"SEC. 507. (a) After each Federal election, the Commission shall conduct a thorough examination and audit of the campaign expenditures of all candidates for Federal office who received payments under this subchapter for use in campaigns relating to that election.

"(b)(1) If the Commission determines that any payment made to an eligible candidate under section 506 was in excess of the aggregate amount of the payments to which such candidate was entitled, the Commission shall notify such candidate, and such candidate shall pay to the Secretary of the Treasury an amount equal to the excess amount. If the Commission determines that any portion of the payments made to a candidate under section 506 to be used in such candidate's general election campaign was not used to make expenditures in connection with such campaign, the Commission shall notify the candidate of such determination and such candidate shall pay to the Secretary an amount equal to the amount of the unexpended portion. In making its determination under the preceding sentence, the Commission shall consider all amounts received as contributions to have been expended before any amounts received under this subchapter are expended.

"(2) If the Commission determines that any amount of any payment made to a candidate under section 506 was used for any purpose other than to defray campaign expenditures, it shall notify the candidate of the amount so used, and the candidate shall pay to the Secretary of the Treasury an amount equal to such amount.

"(3) No payment shall be required from a candidate under this subsection in excess of the total amount of all payments received by the candidate under section 506 in connection with the campaign with respect to which the event occurred which caused the candidate to have to make a payment under this subsection.

"(c) No notification shall be made by the Commission under subsection (b) with respect to a campaign more than 18 months after the day of the election to which the campaign related.

"(d) All payments received by the Secretary under subsection (b) shall be deposited by him in the account.

"OTHER POWERS AND DUTIES OF THE COMMISSION

"SEC. 508. (a) The Commission is authorized to conduct examinations and audits, in addition to the examinations and audits under sections 505 and 507, to conduct investigations, and to require the keeping and submission of any books, records, or other information necessary to carry out the functions and duties imposed on it by this subchapter.

"(b) The Commission shall consult from time to time with the Secretary of the Senate, the Clerk of the House of Representatives, the Federal Communications Commission, and other Federal officers charged with the administration of laws relating to Federal elections, in order to develop as much consistency and coordination with the administration of those other laws as the provisions of this subchapter permit. The Commission shall use the same or comparable data as that used in the administration of such other election laws whenever possible.

"REPORTS TO CONGRESS

"SEC. 509. (a) The Commission shall, as soon as practicable after the close of each calendar year, submit a full report to the Senate setting forth—

"(1) the expenditures incurred by each candidate, and the authorized committees of such candidate, who received any payment under section 506 in connection with an election;

"(2) the amounts certified by it under section 505 for payment to that candidate; and

"(3) the amount of payments, if any, required from that candidate under section 507, and the reasons for each payment required.

Each report submitted pursuant to this section shall be printed as a Senate document.

"(b) The Commission shall submit, not later than March 1 of each year immediately following a year in which any Federal election is held, a special report to the Senate setting forth—

"(1) the amounts certified by it under section 505 of this subchapter and sections 9005, 9008, and 9036 of the Internal Revenue Code of 1954 for payments from the Presidential Election Campaign Fund;

"(2) the amount of money remaining in the fund at the end of the calendar year in which any Federal election is held;

"(3) an estimate of the amount of money which will be transferred to such fund during each of the four calendar years immediately following the year in which any Federal election is held; and

"(4) an estimate, to the extent practicable, of the amount of money necessary to make all payments to which eligible candidates and the national committees of each political party will be entitled with respect to the next two Federal elections to be held.

"PARTICIPATION BY COMMISSION IN JUDICIAL PROCEEDINGS

"SEC. 510. (a) The Commission is authorized to appear in and defend against any action filed under section 511, either by attorneys employed in its office or by counsel whom it may appoint without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and whose compensation it may fix without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title.

"(b) The Commission is authorized to appear, through attorneys and counsel described in subsection (a), in the district courts and other appropriate courts of the United States to seek recovery of any amounts determined to be payable to the Secretary of the Treasury as a result of any examination and audit made pursuant to section 507.

"(c) The Commission is authorized to petition the courts of the United States for declaratory or injunctive relief concerning any civil matter arising under this subchapter.

through attorneys and counsel described in subsection (a). Upon application of the Commission, an action brought pursuant to this subsection shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal from the determination of such court shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.

"(d) The Commission is authorized on behalf of the United States to appeal from, and to petition the Supreme Court of the United States for certiorari to review judgments or decrees entered with respect to actions in which it appears pursuant to the authoritty provided in this section.

"JUDICIAL REVIEW

"SEC. 511. (a) Any certification, determination, or other action by the Commission made or taken pursuant to the provisions of this subchapter shall be subject to review by the United States Court of Appeals for the District of Columbia Circuit upon petition filed in such court by any interested person. Any petition filed pursuant to this section shall be filed within thirty days after such certification, determination, or other action by the Commission.

"(b)(1) The Commission, the national committee of any political party, and any individual eligible to vote for a candidate for the office of Senator of the United States are authorized to institute an action under this section, including an action for declaratory judgment or injuctive relief, as may be appropriate to implement or construe any provision of this subchapter.

"(2) The district courts of the United States shall have jurisdiction of proceedings instituted pursuant to this subsection and shall exercise such jurisdiction without regard to whether a person asserting rights under the provisions of this subsection shall have exhausted administrative or other remedies provided at law. Such proceedings shall be heard and determined by a court of three judges in accordance with the provisions of section 2284 of title 28, United States Code, and any appeal shall lie to the Supreme Court of the United States. Judges designated to hear the case shall assign the case for hearing at the earliest practicable date, participate in the hearing and determination thereof, and cause the case to be in every way expedited.

"PENALTY FOR VIOLATIONS

"SEC. 512. Violation of any provision of this subchapter is punishable by a fine of not more than $10,000, or imprisonment for not more than 5 years, or both.".

LIMITATIONS ON EXPENDITURES IN SENATE GENERAL ELECTION CAMPAIGNS

SEC. 3. (a) Section 315(b) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(b)) is amended—

(1) by striking out "and" at the end of paragraph (2)(A):

(2) by striking out the period at the end of paragraph (2)(B) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end of paragraph (2) the following:

"(C) expenditures made on behalf of any candidate (as determined under subparagraph (B)) for the office of Senator of the United States shall be considered to be expenditures made by such candidate.

"(3)(A) Except as otherwise provided in Section 504 of this Act, a candidate who receives payments for use in his general election campaign for the office of Senator of the United States, pursuant to section 506 of this Act may not make expenditure in such campaign in excess of $250,000 plus 15 cents multiplied by the voting age population, as certified under subsection (e), of the State in which the election is held.

"(B) For purposes of the limitation on expenditures contained in subparagraph (A), only that percentage of an expenditure by a candidate or the authorized political committees of such candidate for broadcasting time which represents the cost to such candidate or committees of transmitting the material broadcast to the State in which such candidate is seeking election shall be taken into account.

"(C) a candidate who receives payments under section 506 of this Act for use in his general election campaign for the office of Senator of the United States may not make expenditures in such campaign from his personal funds or from the personal funds of his immediate family in excess of $35,000. For the purposes of this subsection, the term 'immediate family' means a candidate's spouse, and any child, parent, grandparent, brother, half-brother, sister, or half-sister of the candidate, and the spouses of such persons.".

(b) Section 315(c)(2)(B) of such Act (2 U.S.C. 441a(c)(2)(B)) is amended by inserting before the period a comma and "except that with respect to the limitation established by subsection (b)(3) the term 'base period' means the calendar year 1982".

EFFECTIVE DATE

Sec. 4. The amendments made by this Act apply to any campaign for election to the United States Senate for which the election is held after December 31, 1982.

AUTHORIZATION OF APPROPRIATIONS

SEC. 5. There is authorized to be appropriated to the Federal Election Commission the sum of $900,000 for purposes of carrying out the provisions of this Act during the fiscal year 1983.

By Mr. PERCY (for himself, Mr. BAUCUS, and Mrs. HAWKINS):

S. 3017. A bill to provide for the temporary duty-free treatment of certain needlecraft display models, and for other purposes; to the Committee on Finance.

DUTY-FREE TREATMENT OF NEEDLECRAFT DISPLAY MODELS

Mr. PERCY. Mr. President, I am today introducing legislation with Senators BAUCUS and HAWKINS that would suspend for about 3 years—until June 30, 1985—the duty on imported needlecraft display models.

This legislation is identical to a provision that has been included in House-passed legislation, H.R. 6867. I would like to quote from the Ways and Means Committee report which succinctly describes the matter at hand:

Finished needlework is rarely sold commercially because the hand labor is too expensive. The primary business is in needlecraft kits whereby people provide their own labor to complete needlecraft articles. These kits contain all needed components such as matting, cloth, yarn, needles, etc. Needlecraft kits are sold at a variety of stores throughout the country. The supporters of this provision report that sales of kits improve greatly when a display model is made available at the display counter.

Reportedly, all of these display models are stitched abroad and imported with Haiti being the primary source. The duties prove to be a significant factor in the price of the display models with column 1 duty rates ranging from free (under GSP) to 39.7 percent ad valorem.

Haiti would be the primary country to benefit from a duty suspension. The items in question (except for one) are not eligible for duty-free treatment under the Generalized System of Preferences and, even if such an arrangement were made for needlecraft display models, Haiti would be disqualified after the first year because they supply an estimated 80 percent to 90 percent of the imports.

For the purposes of legislative history, it is intended that this provision does not cover any items which are imported under the TSUS items expressed, unless they are needlecraft display models.

Mr. President, I believe this states the need for this legislation in a nutshell.

Mr. Dennis Smith, national sales manager for Caron International/Columbia Minerva, Inc. and president of the National Needlework Association, testified last May before the Ways and Means Committee. I have read his remarks and was struck by his estimate that the wider availability of models would increase their retail sales by $8 million and would create 400 new jobs for the needlework kit manufacturers.

The administration supports this legislation and I urge my colleagues on the Finance Committee to act on it quickly when Congress returns after the elections.

Mr. President, I ask unanimous consent that the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3017

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the headnotes to subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) are amended by adding at the end thereof the following new headnote:

"5. For the purposes of items 906.10 and 906.12, the term 'mass-produced kits' includes only those which are designed to be sold in the customs territory of the United States exclusively in kit form.".

(b) Subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting in numerical sequence the following items:

	"Needle-craft display models, primarily hand stitched, of completed mass-produced kits:			
906.10	Articles provided for in items 355.16, 360.70, 360.78, 364.18, 364.23, 364.30, 365.78, 365.84, 365.86, 366.79, 367.34, 367.55, 367.60, 386.04, 386.06, 386.09, 386.50, 388.40, and 389.62 of schedule 3 (except shoe uppers and tents).	Free...	No change...	On or before 6/30/85.

906.12	Aprons and baby bibs (provided for in items 383.03, 383.08, 383.20 and 383.50 of schedule 3).	Free...	No change... On or before 6/30/85".

SEC. 2. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

By Mr. EAST:

S. 3018. A bill to reform the Federal judiciary and promote the separation of powers; to the Committee on the Judiciary.

JUDICIAL REFORM ACT OF 1982

Mr. EAST. Mr. President, for some time our Nation has been beset by serious abuses of power in the Federal courts. Many Federal judges—from Supreme Court to district court—have indulged in a jurisprudence which has led them to act more as infallible legislators, or perhaps even as platonic guardians, rather than as judges. Consequently, the rule of law has been compromised and the health of our Nation has suffered.

But the courts are not solely responsible for this predictment. Far more significant for our purposes, Congress has failed to discharge its duty under the Constitution to assist the Federal courts to perform their role properly. Congress has abdicated its responsibility to enact statutes which are susceptible of straightforward judicial interpretation. Congress has abdicated its responsibility to fashion rules for the courts which would render their proceedings more like orderly litigation and less like sessions of a legislature. In sum, Congress has abdicated its responsibility to study the work of judges and the judicial process and, in light of that study, to provide the guidance and structure necessary to the proper functioning of the Federal courts.

In an effort to rectify this grave abdication, I am introducing today the Judical Reform Act of 1982. The act is a unique and comprehensive measure designed to address the most serious systemic problems in the Federal courts. It comprises two titles. The first title, which concerns the authority and procedures of the Federal courts, includes chapters of the applicability of the Bill of Rights to the States, habeas corpus, section 1983 of title 42 of the United States Code, attorneys' fees and general Federal question jurisdiction. Among other things. it limits the role of the exclusionary rule and prohibits the implication of causes of action from Federal statutes. It also requires a three-judge panel if a Federal court is to enjoin a State. Furthermore, the rule on class actions is amended to prevent the many abuses of this improtant type of litigation. The second title pertains to judgeships and the structure of Federal courts. It includes chapters on the conduct of Federal judges and the composition of the Supreme Court. It also requires the President to appoint Federal magistrates.

Mr. President, the Judicial Reform Act of 1982, as this brief summary suggests, is a multifaceted proposal that looks toward major changes in the powers, procedures and jurisdiction of the Federal courts. It is a major reform effort, and I anticipate that it will serve as the principal focal point of attention of the Subcommittee on Separation of Powers in the months ahead.

Because the act addresses the problems of judicial activism from so many different perspectives, it is necessarily a very complicated measure requiring close study and careful examination. For these reasons I shall not burden my colleagues at this time with an item-by-item analysis of each and every provision of the act. At the appropriate time, however, I intend to explore with my colleagues, both in the Committee on the Judiciary and on the Senate floor, the many ramifications of this act and the need for its enactment.

For the present, I offer the Judicial Reform Act of 1982 for study and reflection. My hope is that it will prove useful to my colleagues in their analysis of the difficulties presented to the Congress by the present State of the Federal courts.

By Mr. HEINZ (for himself and Mr. HATFIELD):

S. 3019. A bill to direct the Secretary of Housing and Urban Development to undertake a program to demonstrate the feasibility of funding neighborhood development activities by providing Federal matching funds to private nonprofit neighborhood organizations on the basis of the voluntary contributions such organizations receive from individuals, businesses, and religious institutions in their neighborhood; to the Committee on Banking, Housing, and Urban Affairs.

NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT

Mr. HEINZ. Mr. President, today I am introducing, on behalf of myself and Senator HATFIELD, the Neighborhood Development Demonstration Act. The objective of this act is to demonstrate the feasibility of a new mechanism for encouraging neighborhood development activities such as housing rehabilitation, job creation, new enterprise development and services improvement. The mechanism would provide Federal matching funds to nonprofit neighborhoods organizations which raise voluntary charitable contributions from individual businesses and charitable organizations in their neighborhoods.

In my home State of Pennsylvania, the city of Philadelphia already has an outstanding record of neighborhoods voluntarily organizing to address specific community needs. This bill would provide an additional incentive across the Nation for greater private sector partnerships with community groups for neighborhood revitalization. The Department of Housing and Urban Development would administer a 3-year demonstration project under which neighborhood groups would be selected competitively nationwide to receive a matching grant to locally raised funds.

The Neighborhood Development Demonstration Act would authorize up to 300 demonstration projects over 3 years in distressed areas. Selection of neighborhood groups would be based on geography, community population, size, and neighborhood economic conditions. Eligibility would require nonprofit status, and depend on a proven track record, a representative government board, location in "pockets of poverty," and a plan to coordinate with local government. The maximum grant would be $50,000 in 1-year seed money. The ratio of Federal money to match locally raised funds would vary according to need. It is foreseen that the first year's funding would be used to attract longer term financial support from local philanthropic and charitable organizations.

The ultimate purpose of my bill is to encourage voluntarism and public/private partnership on behalf of better neighborhoods. Several States—including Pennsylvania and Missouri—have enacted Neighborhood Assistance Act legislation which provides tax breaks for neighborhood development contributions by State businesses. This initiative at the Federal level would directly dovetail with those State programs and others aimed at improving neighborhoods.

This program would require an authorization of only $15 million for the entire 3-year demonstration. This is a small price tag for the improvement of a valuable national asset: the neighborhoods of our Nation's cities.

In closing, I would like to include in the RECORD letters of endorsement from Alan Beals, executive director of the National League of Cities and John Gunther, executive director of the U.S. Conference of Mayors.

I ask that the letters and the text of the bill be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., September 30, 1982.

Hon. JOHN HEINZ,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR JOHN: On behalf of the membership of the U.S. Conference of Mayors, it is my pleasure to lend our support to the Neigh-

borhood Development Demonstration Act of 1982.

The demonstration program authorized by your bill is a sensible way to continue federal support of neighborhood-based development efforts which are designed to stimulate employment and housing in distressed cities. Strong neighborhoods are the backbone of healthy cities. Continued federal support as envisioned by your legislation will ensure that the efforts which have been growing in recent years do not wither now for lack of support.

We are especially pleased by the bill's provision for a certification from the chief elected official of the locality in which the neighborhood group is located, that the activities are consistent with the city's own development efforts. This guarantee of close cooperation between City Hall and neighborhood development groups is an important feature of the bill.

We look forward to participating further in the development of this legislation as it moves through the legislative process, and hope you will feel free to call on our staff for assistance for comment as the bill moves along.

Thank you for this opportunity to share our views on your legislative initiative.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

NATIONAL LEAGUE OF CITIES,
Washington, D.C., September 30, 1982.

Hon. JOHN HEINZ,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR SENATOR HEINZ: On behalf of the National League of Cities I would like to express our support and commend you for your positive leadership in introducing the "Neighborhood Development Demonstration Act of 1982." We believe your bill recognizes the important role neighborhood organizations can play in conserving and improving the physical, economic, cultural and social opportunities in our distressed urban areas.

We are pleased that the legislation provides incentives for the leveraging of private sector resources by community groups in conjunction with local and federal efforts in community revitalization. These interactions and relationships are particularly critical during this period of limited budgets and scarce public resources. In addition, the requirement that city governments must certify that neighborhood development organization activities are consistent with and supportive of local government community and economic development plans and objectives is an important feature. Increased coordination and cooperation is necessary if local governments and neighorhood organizations are to supplement and support local revitalization activities rather than undercutting or competing with them.

Thank you for the opportunity to comment on the proposed "Neighborhood Development Demonstration Act." We look forward to working with you and Congress toward its enactment.

Sincerely,

ALAN BEALS,
Executive Director.

S. 3019

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Neighborhood Development Demonstration Act of 1982".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that neighborhood development organizations have effectively contributed to the public welfare through their activities in housing rehabilitation, job training, service delivery, new enterprise development, and other areas. These efforts have been stimulated and assisted by the availability of Federal funds. The Congress therefore finds that it is in the national interest to maintain the availability of Federal funds to neighborhood development organizations and to develop improved mechanisms for providing such funds.

(b) The purpose of this Act is to demonstrate the feasibility of a new mechanism for providing Federal funds for neighborhood development. This mechanism would provide Federal matching funds to eligible neighborhood development organizations that raise voluntary contributions from individuals, businesses, and religious institutions in their neighborhoods. It would help organizations to generate a pool of funds which could be utilized to leverage additional private sector investment in neighborhood development.

DEFINITIONS

SEC. 3. For the purposes of this Act, the term—

(1) "Secretary" means the Secretary of Housing and Urban Development;

(2) "Council" means the Neighborhood Development Advisory Council established by this Act;

(3) "eligible neighborhood development organization" means—

(A) an entity organized as a private, voluntary, nonprofit corporation under the laws of the State in which it operates, as defined by 501(C)(3);

(B) an organization that is responsible to residents of its neighborhood through a governing body not less than 51 percent of the members of which are members of the area served;

(C) an organization that has conducted business for at least three years prior to the date of application for participation;

(D) an organization that operates within an area which meets the requirements for Federal Assistance under section 119 of the Housing and Community Development Act of 1974, as in effect on the date of enactment of this Act; and

(E) an organization which conducts one or more eligible neighborhood development activities, as defined in this Act, which have as their primary beneficiaries low and moderate income people; and

(4) "eligible neighborhood development activity" means—

(A) creating permanent jobs in the neighborhood;

(B) establishing or expanding new businesses within the neighborhood;

(C) developing or rehabilitating neighborhood housing stock;

(D) delivered essential services to the neighborhood; or

(E) planning, promoting, or financing voluntary neighborhood improvement efforts.

ESTABLISHMENT OF DEMONSTRATION PROGRAM

SEC. 4. (a) The Secretary shall carry out, in accordance with this Act, a three-year demonstration program to determine the feasibility of supporting eligible neighborhood development activities by providing Federal matching funds to eligible neighborhood development organizations on the basis of the monetary support such organizations receive from individuals, businesses, and religious institutions in their neighborhoods.

(b) The Secretary shall accept applications from eligible neighborhood development organizations for participation in the demonstration program. No more than 50 organizations shall be selected for participation in the first year of the program, no more than 100 organizations in the second year, and no more than 150 organizations in the third and final year of the program. Eligible organizations may participate in more than one year of the program, but shall be required to submit a new application and to compete in the selection process for each program year.

(c) From the pool of eligible neighborhood development organizations submitting applications for participation in a given program year, the Secretary shall select participating organizations in the appropriate number through a competitive selection process. The Secretary shall establish a Neighborhood Development Advisory Council for each program year to review and rank applications and to make recommendations for selection. The Secretary shall attach great weight to the recommendations of the Advisory Council. The Council shall consist of 15 representatives of eligible neighborhood organizations. No organization represented on the Council in a given program year shall be eligible to submit an application for participation. In selecting participating organizations, the Council and the Secretary shall strive to balance population size, economic condition, and geographic location of neighborhoods to provide the fullest and fairest test of the new mechanism for Federal funding.

OPERATION AND ADMINISTRATION OF DEMONSTRATION PROGRAM

SEC. 5. (a) The Secretary shall assign each participating organization a defined program year, during which time voluntary contributions from individuals, businesses, and religious institutions in the neighborhood shall be eligible for matching.

(b) Subject to paragraph (c), at the end of each three-month period occurring during the program year, the Secretary shall pay to each participating neighborhood development organization the product of—

(1) the aggregate amount of voluntary contributions which such organization certifies to the satisfaction of the Secretary it received during such three-month period; and

(2) the matching ratio established for such test neighborhoods under subsection (d).

(c) The Secretary shall pay not more than $55,000 under this Act to any participating neighborhood development organization during a single program year.

(d) For purposes of subsection (b)(2), the Secretary shall, for each participating organization, determine an appropriate ratio by which monetary contributions made to participating neighborhood development organizations will be matched by Federal funds. In determining that ratio, the Secretary shall take into account the economic conditions and the number of households and businesses in the neighborhood. The highest ratios shall be established for neighborhoods with the smallest number of households or the greatest degree of economic distress. In no case shall the ratio be set lower than three Federal dollars for every dollar

of voluntary contributions, nor higher than ten Federal dollars for every dollar of voluntary contributions.

(e) The Secretary shall insure that —

(d) Grants and other forms of assistance may be made available under this title only if the application contains a certification by the unit of general local government within which the neighborhood to be assisted is located that such assistance is consistent with, and supportive of the specific objectives of that unit of government including housing and community development, economic development, and neighborhood conservation or revitalization activities being carried out by such unit.

(2) eligible neighborhood development activities comply with all applicable provisions of the Civil Rights Act of 1964.

(f) To carry out this Act, the Secretary—

(1) may issue rules as necessary;

(2) shall utilize, to the fullest extent practicable, relevant research previously conducted by Federal agencies, State and local governments, and private organization and persons; and

(3) may undertake any other activity the Secretary deems necessary to carry out this Act, including the performance of research, planning, administration, and evaluation, either directly, or when in the Secretary's judgment such activity will be carried out more effectively, more rapidly, or at less cost, by contract or grant. Any such contract or grant may be made without regard to section 3709 of the Revised Statutes (41 U.S.C. 5), and advance and progress payments may be made under any such contract or grant without regard to the second sentence of section 3648 of the Revised Statutes (31 U.S.C. 529).

REPORTS

SEC. 6. The Secretary shall submit to the Congress—

(1) not later than 3 months after the end of each fiscal year in which payments are made under section 5(a), an interim report containing a summary of the activities carried out under this Act during such fiscal year and any preliminary findings or conclusions drawn from the demonstration program; and

(2) not later than 1 year after the end of the last fiscal year in which such payments are made, a final report continuing a summary of all activities carried out under this Act and any findings, conclusions, or recommendations for legislation drawn from the demonstration program.

AUTHORIZATION OF APPROPRIATIONS

SEC. 7. For purposes of carrying out this Act there are authorized to be appropriated—

(1) not to exceed $2,500,000 for fiscal year 1983;

(2) not to exceed $5,000,000 for fiscal year 1984 and;

(3) not to exceed $7,500,000 for fiscal year 1985.

Any sum appropriated under this section shall remain available until expended.

EFFECTIVE DATE AND ADVANCE APPROPRIATIONS

SEC. 8. (a) This Act shall take effect on Ocotber 1, 1982.

(b) New spending authority, as defined in section 401(c)(2)(A) of the Congressional Budget Act of 1974 (31 U.S.C. 1351(c)(2)(A)), made available by section 5(b) of this Act shall be effective for any fiscal year only to such extent as is provided by appropriations Acts.

By Mr. JEPSEN:

S. 3020. A bill to establish a Presidential Advisory Panel for Coordination of Government Debt Collection and Delinquency Prevention Activities; to the Committee on Governmental Affairs.

PRESIDENTIAL ADVISORY PANEL FOR COORDINATION OF GOVERNMENT DEBT COLLECTION AND DELINQUENCY PREVENTION ACTIVITIES

Mr. JEPSEN. Mr. President, today I am introducing a bill to establish a Presidential Advisory Panel for Coordination of Government Debt Collection and Delinquency Prevention Activities. I am convinced that such a panel, composed of experts from the collection industry in the United States, will give the Government much needed advice in this area.

Over the years, numerous studies by the General Accounting Office, the Office of Management and Budget, and others, have described the Federal Government's poor performance in collecting overdue debts. As the GAO has noted, some 24 agencies—including the Department of Education, Veterans' Administration, Farmers Home Administration, Department of Housing and Urban Development, and the Treasury Department—have not rigorously collected billions of dollars owed to the Government. The revenue loss to the Nation's Treasury is overwhelming. Specifically, as of September 30, 1979, some $175 billion was owed to the United States by domestic and international borrowers. Of this, $25 billion represented delinquent or defaulted payments, and $13 billion of this represented tax delinquencies. The remaining $12 billion were delinquent or defaulted loans and other borrowings. More than $1 billion was written off in fiscal year 1979, and the GAO estimated that $6.3 billion would be written off by the Federal Government in future years.

It is simply unacceptable for the Government to ignore or to write off substantial, indeed, enormous sums at a time when the public expects and deserves to see the Government follow sound business practices and balance the budget.

Recommendations have been made but limited action has been taken to increase the Government's effectiveness in collecting debts. For example, in 1979, the GAO strengthened standards under the Federal Claims Collection Act of 1966 to provide guidance to agencies in debt collection activities. However, agencies have not fully implemented GAO recommendations, either because they are understaffed, or because they perceive legal impediments.

Senator PERCY's bill on debt collection, passed by the Senate, is a major step in the fight against uncollected debt since it will codify a number of key recommendations and remove legal hurdles. For example, among other important features, the bill would permit the disclosure of a debtor's IRS mailing address to private agencies for debt collection, and it will increase the interest rate charged on delinquent taxes.

It is noteworthy that in various studies of the debt collection problem there is a continuing theme that the Federal Government could do a better job if it followed practices of the commercial debt collection industry. For example, the GAO once compared costs of Federal and commercial debt collection and learned that several commercial firms found it cost effective to pursue collection to the point of obtaining a court judgment on debts as small as $25, while the Government did not seek judgment on debts of less than $600. The GAO also learned that one Federal agency spent an average of $8.72 to collect, write off, or refer a delinquent account, while a large retail firm reportedly spent less than $3.50 for the same activity. It was also reported that commercial collection agencies are able to pursue collection to the point of seeking a court judgment within 5 months, while the Government normally takes a year or longer.

The Government has recently begun to contract with private agencies to help collect delinquent accounts. For example, the Department of Education awarded three contracts to two private companies in November 1981 to collect delinquent student loans. While it is too soon to assess the results of these and other private-sector collection efforts, it is appropriate to receive advice from the private sector to assist the Government in its collection activities.

This bill will establish a panel of private sector experts who will share their experience and make recommendations to increase the Government's debt collection efficiency. The panel will be charged not only with providing advice on the development of uniform debt collection standards, but also with producing a manual of practical utility that will be used by Government personnel in collecting debts.

Mr. President, I believe that the panel, although operating for only 18 months, will have an opportunity to render significant advice to the President and the Congress in dealing with a most serious fiscal problem.

By Mr. JEPSEN:

S. 3021. A bill to amend part B of title IV of the Higher Education Act of 1965 to provide that the Higher Education Act of 1965 to provide that the guaranteed student loan program be available only to students having

need for such assistance; to the Committee on Labor and Human Resources.

GUARANTEED STUDENT LOAN ASSISTANCE AMENDMENTS OF 1982

Mr. JEPSEN. Mr. President, I am today introducing a bill that would amend the Higher Education Act of 1965 to provide that the guaranteed student loan program be available only for those students having and proving a need for that assistance.

This legislation would require any student seeking financial assistance in the form of a guaranteed student loan to qualify for that assistance under a uniform needs basis applied to all students. Students would become subject to the same uniform methodology of needs analysis currently approved and used for other title IV programs. Currently there are two methods of determining need, the cutoff point being a $30,000 income for the student's parents.

As pointed out by Iowa College Aid Commission Director Willis Ann Wolff, under current Department of Education rules, if a student is receiving need-based Federal aid under the supplementary educational opportunity grant, national direct student loan, or college work study programs, the school must use the same need analysis system to determine the student's eligibility for a guaranteed student loan. This system is the uniform methodology—ACT or CSS—which currently is in use for the campus-based programs, institutional financial aid, and for the State scholarship and grant programs. The uniform methodology takes into consideration family assets and many other factors that are not considered in the Federal schedule of family contributions. Under the Department's rules, the schools may use the Federal schedule of family contributions (see Federal Register, May 3, 1982) to establish eligibility for any student who is not receiving Federal campus-based aid.

The inequity develops because the uniform methodology is more restrictive and produces a higher level of family contribution in general than does the Federal needs test. As an example, a family of four with one student in college and income of $40,000 and net assets of $40,000 would be expected to contribute about $6,000 under the uniform methodology. If judged under the Federal needs test, this family would be expected to contribute $4,670.

Several of the college financial aid officers have stated that they find families at the $35,000 to $40,000 income level who are eligible for the need-based Pell grants, supplementary educational opportunity grant, national direct student loan, and college work study but are not eligible to borrow under the guaranteed student loan program. On the other hand, they report, it is not unusual at the higher cost college to find families with adjusted gross incomes of $60,000 or higher who are eligible for a guaranteed student loan but who would not qualify for campus-based aid.

Needless to say, this is unfair to all concerned. This legislation is intended to put all applicants on an equal footing in the application process.

By Mr. JEPSEN:

S. 3022. A bill to amend the Internal Revenue Code of 1954 and title IV of the Higher Education Act of 1965 to establish the collection of student loans in default; to the Committee on Finance.

COLLECTION OF STUDENT LOANS IN DEFAULT ACT OF 1982

Mr. JEPSEN. Mr. President, I am introducing a bill that would prohibit persons from receiving income tax refunds if they are delinquent or defaulted on student loans guaranteed by the Federal Government. The amount of their refund would, instead, be considered and used as a payment toward the outstanding part of the debt they owe to the Government.

Recently, similar legislation was passed into law in the State of Iowa. I am informed that other States already have statutes to this effect.

Commonsense dictates that the Government should not be paying out money to those who, in turn, actually owe the Government money. The public is, more and more, demanding that the Government adopt sound business practices in its various dealings. Every business man and woman in the United States, if they are to stay in business, must collect the outstanding debt owed to them and keep delinquencies at a minimum. The Government should do no less.

Those who have borrowed money under the guaranteed student loan program have entered into what should be a binding agreement. As I have pointed out before, those who have skipped out on paying back the Government for these loans are the very people who have helped to give this worthy program a bad news. It is time that they live up to their responsibilities. I believe that this legislation will send the necessary signal to them that the Government means business. While I firmly believe that the only proper function of the Internal Revenue Service is the collection of taxes, I also find it unconscionable to refund money for assistance which individuals have contracted to pay back.

By Mr. WALLOP:

S. 3024. A bill to amend the Internal Revenue Code of 1954 to promote transfers of real property interests to certain organizations for use for conservation purposes; to the Committee on Finance.

S. 3025. A bill to amend the act of July 15, 1968 (82 Stat. 356) Public Law 90-401 to include units of the National Forest System within the provisions of the act and for other purposes; to the Committee on Energy and Natural Resources.

THE NATURAL AREAS TAX PROTECTION ACT OF 1982

Mr. WALLOP. Mr. President, this Nation has achieved a record second to none in the preservation of her natural wonders and assets over the years. While we have suffered losses—the passenger pigeon, this gorge, that pass—we led the world in establishing the first national park, since expanded to an incredible National Park System imitated around the world. We put in place a vast system of forest conservations, a magnificent wildlife refuge system, other lands for recreation and conservation, and we have programs for virtually every phase of environmental protection. All in all, roughly one-third of our Nation is in Federal ownership, protected from indiscriminate use.

For the most part, our parks, refuges, and forests were historically carved out of the public domain. While we purchased great blocks of land, such as the 800,000 square mile Louisiana Purchase from France in 1803 for some $15 million, and 375 million acres of Alaska for a tidy $7.2 million, that purchase power has unfortunately gone the way of the buffalo. In 1978, Congress added a mere 48,000 acres to Redwoods National Park with an open-ended price tag—and we have already paid $330 million for approximately one-third of the acreage. Congress in recent years authorized the Santa Monica Recreation Area near Los Angeles at $125 million, but it may end up costing American taxpayers $1 billion or more before we are done buying.

The hard truth of the matter is that, while there are still many outstanding natural areas across America which merit protection, Uncle Sam can no longer afford to buy up everything worth protecting. Nor should we continue to enlarge Federal land holdings and take private lands out of private ownership and off local taxrolls. Furthermore, we have a heavy moral obligation to husband those lands which we already own. After a decade of unparalled expansion of our National Park System, and of authorizing $4 billion in future Federal acquisitions in this decade alone, the realization is growing that we must pause, take care of the land we already have, and find new and creative ways to protect others short of Government buyout. The Senate Interior Appropriations Committee hit the nail on the head in 1980 when it wrote that "too often Federal land acquisition is seized as a quick fix for recreation, resource conservation, preservation, and environmental protection." GAO reported several years ago that some Federal agencies had been following a general prac-

tice of acquiring as much private land as possible regardless of need, alternative land control methods, or impacts on private landowners. In response to these concerns, the Reagan administration has adopted a new land protection policy which requires Federal agencies to consider needs and look at alternatives before buying land outright.

It is clear we will continue to protect some lands by buying them, but we also need to look in other directions and find new, innovative ways to encourage private and public land protection. My father donated a conservation easement some years ago across part of our ranch in Big Horn, Wyo., and I know that scenic easements, land exchanges, new tax incentives, and other such ideas can promote preservation short of Federal land purchase.

It was in order to explore these kinds of less-than-fee land protection alternatives to help preserve our valuable recreational, open space, and scenic lands that I sponsored workshops in the Senate Public Lands and Reserved Water Subcommittee in 1981 and 1982, as well as a hearing in Jackson Hole, Wyo. Participants came from all walks of life, and all disciplines, with open minds and fresh ideas, and out of the forums came a wealth of suggestions for new policies and laws to protect lands.

I might add that I was privileged to have as moderators in the Washington, D.C. workshops three distinguished leaders in the conservation world: Emery Castle, president of Resources for the Future; Pat Noonan of the Conservation Resources Group and past president of the Nature Conservancy; and Bill Reilly, president of the Conservation Foundation. They and others were and have continued to be of invaluable assistance in reviewing and helping draft some of the legislative suggestions which came from those meetings. In addition George Siehl and Jeff Zinn of the Congressional Research Service have been invaluable helping organize the workshops and develop these proposals.

Mr. President, I am now pleased to announce some of the fruits of that labor. Today, as the initial product of all our work, I am introducing two bills to help promote land protection short of Federal and acquisition. The first, and by far the major effort, is the Natural Areas Tax Protection Act of 1982. This tax package, which incorporates sale, donation, and estate tax incentives for land protection, is designed to serve as the focal point for future deliberations on ways to use the code to more efficiently protect some of this country's most valuable areas. Realistically, I do not anticipate congressional action on this legislation before the end of the current session. But I would hope that all those who contributed to this package and those who have an interest in public lands acquisition alternatives would examine this legislation with a critical, yet constructive eye, so that in the first part of next year we can incorporate those thoughts in a solid piece of consensus legislation which can be guided through the Congress in a most expeditious manner.

Mr. President, I would like to take just a few moments to generally explain the key provisions of this tax legislation. As many Members in the Chamber will recall, it has been nearly 2 years since this Congress passed the Tax Treatment Extension Act of 1980. Passage of that act insured the deductibility of the donations of gifts of partial interests in land for conservation purposes. In addition, that legislation set out several important guidelines for the future. First, tax treatment was only provided with regard to carefully defined natural resource areas. Second, the Congress established that the gift of a partial interest in land must be for a conservation purpose. Third, Congress established that the recipient of the gift—which may be either a governmental unit or a publicly supported charity—must be qualified to manage the resource. The contributions had to be made to organizations which have the commitment and the resources to enforce the perpetual restrictions and to protect the conservation purpose. These basic principles are fundamental to the use of the Tax Code for conservation purposes in the future, and are incorporated in the legislation which I am introducing today.

The first section of this bill deals with a problem within the structure of the Tax Treatment Extension Act itself. The 1980 act provides that existing governmental conservation policies are an important criteria in establishing the deductibility of a contribution of a partial interest in land for conservation purposes. The act fails however to provide an effective means to implement that criteria. The authority to do so was left with the Treasury Department, which despite the pleading by myself and others, has failed to issue regulations to successfully implement the program. Treasury's inaction has brought the donations of conservation land interests to a virtual standstill. This bill will vest that authority with the Secretaries of the Departments of Interior and Agriculture who, by anyone's standard, are best equipped to identify those lands worthy of protection. It is my intent however, that the grassroots organizations at the State and local level, will have the opportunity to provide their input in that identification process.

Second, during the course of a hearing I held in Jackson Hole, Wyo., in August of last year, we heard from a longtime Jackson area rancher by the name of Rod Lucas. He noted that the pressures of development in the Jackson area have led to the loss of a great deal of open space, and he suggested the idea of tax credits for the donation of development rights on open space lands. That idea, in part, is incorporated in this legislation. Using the same criteria presently found in the Tax Treatment Extension Act, estate donations of interests in lands to the Government or conservation organizations will be eligible for an estate tax credit equal to the fair market value of the donation. This provision will be of particular importance to those landowners who wish to pass their land to their sons and daughters, but find that the cash necessary to pay their estate taxes requires that they sell much of their land.

The third major change found in this legislation recognizes the need for tax incentives for the sale and exchange of lands within areas that are identified as worthy of protection pursuant to the Tax Treatment Extension Act. Under the existing provisions of the Internal Revenue Code of 1954, there is no incentive to encourage a sale "exclusively for conservation purposes." There is need to recognize that a voluntary sale for such an established conservation purpose is again in the public interest and that such voluntary sales should be encouraged. I would hasten to note however, that those incentives should be provided for sales to organizations other than the Federal Government.

The first part of the sales provision takes an approach similar to the right to reinvest under a threat of condemnation consistent with section 1033 of the Internal Revenue Code. Proceeds from the sale to any qualified organization for the required conservation purpose will be provided the same reinvestment opportunities available as if the land were purchased by a governmental entity under threat of condemnation. No gain will be recognized so long as the proceeds are converted into property that is similar or related in service or use to the property that was sold.

Second, special capital gains treatment will be available to 10 areas designated jointly by the Secretaries of Interior and Agriculture. Under present law, 60 percent of the gain from long-term capital transactions is excluded from taxation. To provide an incentive for the sale of qualified conservation property to organizations committed to the perpetual protection of conservation lands, an additional 10 percent of the gain from such transaction would be excluded from taxation. My intent with this provision is that the Secretaries of Interior and Agriculture would look to identifying lands adjacant to existing parks, refuges, and recreation areas as being eligible

for this special sales incentive. I would also note, that both of the sales provisions are to sunset after 10 years to provide additional impetus for the present preservation of those lands.

The last area addressed in the tax legislation I am offering today concerns donations of qualifying conservation property. Current law imposes a 30 percent limitation on contributions of capital gain property. Because this limitation poses a frequent barrier to the full use of the tax benefits from substantial gifts, I am proposing a change in that limitation to 50 percent with respect to contributions of qualified conservation property. In addition, carryover of unused contributions deductions has been previously limited to 5 years. If the deductions were not used in that period of time they were lost. This legislation provides that contributions of qualified conservation property will be allowed an unlimited carryover. Because of the ravages of inflation in the past, the importance of this carryover provision has been significantly diminished. However, with the prospect of new found and continued control over the inflation spiral, the allowance of an unlimited carryover should be of considerable help and importance.

I would like to point out that, while the Tax Code provides a very efficient mechanism in implementing acquisition alternatives, there is still a cost involved to the Federal Government. Because of the recognized constraints with respect to Government expenditures, I would ask everyone who looks at this package to do so with the idea in mind that it may be necessary to prioritize its proposals. They should also keep that in mind in suggesting new ideas along these lines.

In addition to all of the suggestions for tax law changes which we heard during the workshops and hearings, we received a whole range of other, nontax suggestions stretching all the way from broad new laws and programs to more modest proposals. I am still looking at these, but there is one small but potentially useful change that I want to introduce this year. My second bill would amend current law to encourage the use of purchase sell-back/lease-backs. Existing Federal law authorizes the NPS to use these in many park units, but unfortunately this is not occuring. For those unfamiliar with this tool, purchase sell-back/lease-backs are an arrangement whereby a Federal agency purchases a tract of land in fee, and then sells or leases it back to private owners with a protective covenant restricting development attached. Under current law the former owner has a right of first refusal for 2 years at the highest bid price, in no case less than fair market value. This bill would remove the 2-year time limitation for the owner of record and extend his or her right indefinitely. If would also give the Forest Service the authority to use this tool. Finally, whereas proceeds under current law go into the General Treasury, my bill would credit them to the land management agency. This is designed to provide a financial incentive for land managers to use this tool. I might add that during our 1981 workshop both California and Maryland reported using sell-back/lease-backs with great success, and that we have added these same provisions to H.R. 861, a bill amending the National Trails Act.

Eastern religions have a saying that there is but one top to the mountain, yet many paths lead there. Our challenge, as we contemplate fashioning land protection policies to take use through the turn of the century, is not to gaze with tunnel vision at land acquisition as the only way to protect lands, but to seize hold of the opportunities that exist elsewhere to preserve portions of our Nation. This legislation provides a very real opportunity to tread new paths in land and resource protection, using outright acquisition as but one of many tools.

Mr. President, I ask unanimous consent that the text of these bills appear in the RECORD immediately following my remarks.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 3024

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "The Natural Areas Tax Protection Act of 1982".

SEC. 2. INCREASE AND CLARIFICATION OF DEDUCTION FOR CONTRIBUTIONS FOR CONSERVATION PURPOSES.

(a) INCREASE IN DEDUCTION FOR CONTRIBUTIONS FOR CONSERVATION PURPOSES.—Subparagraph (C) of section 170(b)(1) of the Internal Revenue Code of 1954 (relating to percentage limitations for individuals on deductions for charitable, etc., contributions and gifts) is amended by adding at the end thereof the following new clause:

"(v) For purposes of applying this subparagraph if the charitable contribution of capital gain property qualifies as a qualified conservation contribution under subsection (h) of this section—

"(I) clauses (i) and (ii) shall be applied by substituting '50 percent' for '30 percent', and

"(II) clause (ii) shall be applied by substituting 'each of the succeeding taxable years' for 'each of the 5 succeeding taxable years'.".

(b) CLEARLY DELINEATED GOVERNMENTAL CONSERVATION POLICY AND SIGNIFICANT PUBLIC BENEFIT DEFINED.—Paragraph (4) of section 170(h) of such Code (relating to qualified conservation contribution) is amended by adding at the end thereof the following new subparagraph:

"(C) CLEARLY DELINEATED GOVERNMENTAL CONSERVATION POLICY AND SIGNIFICANT PUBLIC BENEFIT.—For purposes of subparagraph (A)(iii), the preservation of open space by means of the contribution of a qualified real property interest shall be considered to be pursuant to a clearly delineated Federal, State, or local governmental conservation policy and to yield a significant public benefit if—

"(i) the qualified organization to which such interest is contributed is an agency or instrumentality of a governmental unit described in subsection (c)(1);

"(ii) the Secretary of the Interior or the Secretary of Agriculture certifies that such contribution—

"(I) is pursuant to a clearly delineated Federal, State, or local governmental conservation policy; and

"(II) will yield a significant public benefit; or

"(iii) such interest meets such qualifications as the Secretary may by regulation prescribe;

and the qualified organization which is the donee certifies that it will use such interest exclusively for conservation purposes, and, in the case of an interest described in paragraph (2) (C), that it will enforce such interest.".

SEC. 3. CREDIT ALLOWED AGAINST ESTATE TAX.

(a) IN GENERAL.—Part II of subchapter A of chapter 11 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by redesignating section 2016 as section 2017, and by inserting after section 2015 the following new section:

"SEC. 2016. CREDIT FOR CERTAIN QUALIFIED CONSERVATION CONTRIBUTIONS TO THE UNITED STATES.

"(a) IN GENERAL.—There shall be allowed as a credit against the tax imposed by section 2001 the amount of a qualified conservation contribution (as defined in section 170(h)) to the United States.

"(b) NO DOUBLE BENEFIT.—No credit shall be allowed under subsection (a) with respect to a contribution for which any deduction is allowed.".

(b) CLERICAL AND CONFORMING AMENDMENTS.—

(1) The table of sections for such part is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 2016. Credit for certain qualified conservation contributions to the United States.

"Sec. 2017. Recovery of taxes claimed as credit."

(2) Sections 6040(3), 6213(h)(2)(B), and 6501(c)(5) of such Code are each amended by striking out "2016" and inserting in lieu thereof "2017".

SEC. 4. ROLLOVER OF GAIN PERMITTED.

(a) IN GENERAL.—Part III of subchapter O of chapter 1 of the Internal Revenue Code of 1954 (relating to common nontaxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1041. ROLLOVER OF GAIN FOR SALE OF REAL PROPERTY FOR CONSERVATION PURPOSES.

"(a) NONRECOGNITION OF GAIN.—If a taxpayer sells or exchanges real property to a qualified organization for use for conservation purposes, and within 2 years after the close of the first taxable year in which any part of the gain upon such sale or exchange is realized, real property for use for conservation purposes is purchased by the taxpayer, then gain on such sale or exchange shall be recognized only to the extent that the amount realized by the taxpayer on such

sale or exchange exceeds the taxpayer's cost of purchasing such real property.

"(b) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED ORGANIZATION.—The term 'qualified organization' has the meaning given to such term by paragraph (3) of section 170(h), except that such term shall not include the United States.

"(2) CONSERVATION PURPOSE.—

"(A) IN GENERAL.—The term 'conservation purpose' has the meaning given to such term by subparagraph (A) of section 170 (b)(4) (determined without regard to clause (iv) thereof).

"(B) CONSERVATION PURPOSE MUST BE PROTECTED.—A sale or exchange of real property shall not be treated as for conservation purposes unless the conservation purpose is protected in perpetuity.

"(c) ADDITIONAL REQUIREMENTS.—

"(1) GAIN MUST BE LONG-TERM CAPITAL GAIN.—Subsection (a)(1) shall not apply to any gain unless (without regard to this section) such gain would be long-term capital gain.

"(2) ENTIRE INTEREST MUST BE TRANSFERRED.—Subsection (a) shall not apply to the sale or exchange of any interest in property which consists of less than the taxpayer's entire interest in such property unless such sale or exchange—

"(A) is consistent with an authorized governmental conservation program for fish or wildlife conservation purposes, or

"(B) excludes the taxpayer's qualified mineral interest.

"(3) QUALIFIED MINERAL INTEREST.—The term 'qualified mineral interest' has the meaning given to such term by paragraph (6) of section 170(h).

"(4) SALE MUST NOT BE PURSUANT TO CONDEMNATION, ETC.—Subsection (a) shall not apply to any sale or exchange pursuant to any seizure, requisition, or condemnation of property.

"(d) RECAPTURE.—If a taxpayer who has claimed the benefit of subsection (a) in connection with the sale of real property for use for conservation purposes uses the property for use for conservation purposes purchased during the period described in subsection (a) for other purposes within the 5-year period beginning on the date of sale of such property, then there shall be included in the taxable income of the taxpayer for the taxable year an amount equal to the amount not recognized under subsection (a).

"(e) TERMINATION.—Subsection (a) shall not apply to any sale or exchange 10 years after the date of the enactment of this section unless such sale or exchange is of a taxpayer's entire interest remaining after a qualified conservation contribution (as defined in section 170(h)).".

(b) CLERICAL AMENDMENT.—The table of sections for such part is amended by adding at the end thereof the following new item:

"Sec. 1041. Rollover of gain for sale of real property for conservation purposes.".

SEC. 5. INCREASE IN CAPITAL GAINS DEDUCTION WITH RESPECT TO CONSERVATION PROPERTY.

Subsection (a) of section 1202 of the Internal Revenue Code of 1954 (relating to deduction for capital gains) is amended to read as follows:

"(a) DEDUCTION ALLOWED.—

"(1) IN GENERAL.—If for any taxable year a taxpayer other than a corporation has a net capital gain, there shall be allowed as a deduction from gross income an amount equal to the sum of—

"(A) 70 percent of the lesser of—

"(i) the net capital gain, or

"(ii) the qualified conservation property capital gain, plus

"(B) 60 percent of the excess (if any) of—

"(i) the net capital gain, over

"(ii) the amount of the net capital gain taken into account under subparagraph (A).".

"(2) QUALIFIED CONSERVATION PROPERTY CAPITAL GAIN.—For purposes of paragraph (1)—

"(A) IN GENERAL.—The term 'qualified conservation property capital gain' means—

"(i) gain described in section 1222 (3),

"(ii) attributable to the sale or exchange of real property to a qualified organization for use for conservation purposes.

"(B) LIMITATIONS.—The term 'qualified conservation property capital gain' does not include any gain attributable to the sale or exchange of an interest in real property to a qualified organization for use for conservation purposes if—

"(i) such interest consists of less than the taxpayer's entire interest in such property unless such sale or exchange—

"(I) is consistent with an authorized governmental conservation program for fish or wildlife conservation purposes, or

"(II) excludes the taxpayer's qualified mineral interest; or

"(ii) such sale or exchange is pursuant to any seizure, requisition, or condemnation.

"(C) DEFINITIONS.—

"(i) QUALIFIED ORGANIZATION.—The term 'qualified organization' has the meaning given to such terms by paragraph (3) of section 170 (h), excluding the United States

"(ii) CONSERVATION PURPOSE.—

"(I) IN GENERAL.—The term 'conservation purpose' has the meaning given to such term by subparagraph (A) of section 170(h)(4) (determined without regard to clause (iv) thereof).

"(II) CONSERVATION PURPOSE MUST BE PROTECTED.—A sale or exchange of real property shall not be treated as for conservation purposes unless the conservation purpose is protected in perpetuity.

"(iii) QUALIFIED MINERAL INTEREST.—The term 'qualified mineral interest' has the meaning given to such term by paragraph (6) of section 170(h).

"(3) TERMINATION.—Subparagraph (A) of paragraph (1) shall not apply to any sale or exchange 10 years after the date of the enactment of such subparagraph unless such sale or exchange is of a taxpayer's entire interest remaining after a qualified conservation contribution (as defined in section 170 (h)).".

SEC. 6. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to interest transferred after the date of the enactment of this Act, in taxable years ending after such date.

S. 3025

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of July 15, 1968 (82 Stat. 356) is hereby amended as follows: delete SEC. 5 and insert in lieu thereof a new SEC. 5;

(a) FREEHOLD AND LEASEHOLD INTERESTS; COMPETITIVE BIDDING.—With respect to any property administered by the Secretary of the Interior within a unit of the national park system or miscellaneous area, except property within national parks, or within national monuments of scientific significance, or administered by the Secretary of Agriculture within a unit of the national forest system, except property within a National Forest Wilderness area or national monument, the appropriate Secretary may convey a freehold or leasehold other interests therein, subject to such terms and conditions as will assure the use of the property in a manner which is, in the judgment of the appropriate Secretary, consistent with the purposes for which the area was authorized by the Congress. In any case in which the appropriate Secretary exercises his discretion to convey such interests, he shall do so to the highest bidder, in accordance with such regulations as the appropriate Secretary may prescribe, but such conveyance shall be at not less than the fair market value of the interest, as determined by the appropriate Secretary; except that if any such conveyance is proposed, he shall allow the last owner or owners of record of such property thirty days following the date of which they are notified by the appropriate Secretary in writing that such property is to be conveyed within which to notify the appropriate Secretary that such owners wish to acquire such interest. Upon receiving such timely request, the appropriate Secretary shall convey such intesest to such person or persons, in accordance with such regulations as the appropriate Secretary may prescribe, upon payment or agreement to pay an amount equal to the highest bid price.

(b) EXCHANGE OF LANDS; OTHER DISPOSAL; EQUAL LAND VALUES.—The Secretary of the Interior is authorized to accept title to any non-Federal property or interest therein within a unit of the National Park System or miscellaneous area under his administration, and in exchange therefor he may convey to the grantor of such property or interest any Federally-owned property or interest therein under his jurisdiction which he determines is suitable for exchange or other disposal and which is located in the same State as the non-Federal property to be acquired: Provided, however, That timber lands subject to harvest under a sustained yield program shall not be so exchanged. Upon request of a State or a political subdivision thereof, or of a party in interest, prior to such exchange the Secretary of his designee shall hold a public hearing in the area where the lands to be exchanged are located. The values of the properties so exchanged, either shall be approximately equal, the values shall be equalized by the payment of cash to the grantor from funds appropriated for the acquisition of land for the area, or to the Secretary as the circumstances require.

(c) PROCEEDS CREDITED TO LAND AND WATER CONSERVATION FUND.—The proceeds received from any conveyance under this section shall be credited to the appropriation bearing the cost of land acquisition for the affected area of the National Park or National Forest Systems.

By Mr. DECONCINI (for himself and Mr. DOMENICI):

S. 3026. A bill relating to the Navajo and Hopi Indian Tribes; to the Select Committee on Indian Affairs.

NAVAJO AND HOPI INDIAN TRIBES

Mr. DECONCINI. Mr. President, I am introducing proposed legislation to stop the forced relocation of those Navajo Indians who reside on what is now land that has been partitioned to the Hopi Indian Tribe. With the termination of the relocation process

there would no longer be the necessity for obtaining additional lands for the relocatees. Thus, this bill also repeals section 4 of Public Law 96-305 which transfers 250,000 acres of Bureau of Land Management land to the Navajo Tribe, and which permits the tribe to purchase up to 150,000 acres of private lands located near the reservation.

I have been on record as supporting repeal of Public Law 93-531 since being elected to the Senate in 1976. This law partitioned what is known as the former joint use area to the Hopi and Navajo Tribes. Those Navajos residing on the Hopi side of the partition are required to relocate, as were any Hopis residing on the Navajo side of the partition. Because the Navajos have traditionally subsisted by grazing sheep and the Hopis are more prone to live in established communities, many more Navajos than Hopis have resided on the former joint use area. It is my understanding that all of the Hopis who resided on what is now the Navajo side of the partition have been relocated. However, because of the large number of Navajos residing on the Hopi side of the partition, and the fact that these Navajos are the most traditional Navajos who are literally wedded to their land, many Navjos still must be relocated. Many of these Navajos speak no English. Most have no salable job skill. There are also many elderly who reside on the Hopi side. They have lived on this land for many years, as have their ancestors who are buried on this land. These Navajos simply do not want to be relocated. If they are relocated, many will be unable to continue to exist.

I say that many will be unable to exist because a substantial number of those already relocated have been provided living facilities in various communities just outside the boundaries of the reservation. Information just provided me by the Navajo and Hopi Indian Relocation Commission, the Federal agency responsible for relocation, shows that 31 percent of those relocated to communities near the reservation no longer own the homes provided by the relocation program. The Commission points out that there may be several reasons for this occurrence, but one reason has to be the lack of the ability to adapt to a life in a community off the reservation because of financial problems. The Navajos located on the Hopi side of the partition in all probability may experience more severe difficulties because of their more traditional way of life. Further, the mere act of relocation may severely impact those elderly Navajos who must relocate.

Not only do most of these Navajos not want to move, but the costs of this forced relocation will be enormous. Total cost estimates range from $200 million to $500 million. When all of these factors are considered—the harsh and negative impact relocation will have on most of the potential relocatees, the tremendous cost of the program, and the impact of relocation on the bordering communities—it seems to me that the Congress must reconsider its decision made during the 93d Congress.

The bill is designed to be the catalyst for congressional reconsideration of Public Law 93-531, as amended. It will permit those Navajos residing on the Hopi side of the partition to remain and continue in their tradtional way of life, while allowing those who may wish to relocate to do so if the relocation occurs within 180 days of enactment. Because those Navajos who choose not to relocate would be living on Hopi land, this measure calls for an annual rental fee to be paid to the Hopi Tribe by the Secretary of the Interior. The bill also assures those Navajos who remain that they will be able to maintain their traditional way of life. Further, any Hopi, Indian residing on the Navajo side of the partition will be assured similar rights.

Since there would be no necessity for any further relocation 180 days after enactment, the bill provides that at that time the Navajo and Hopi Indian relocation Commission would stop operations.

Additionally, the bill would repeal that part of the law that provides up to 400,000 acres to the Navajo Tribe for relocation purposes. The 400,000 acres includes the 250,000 acres that would be transferred from the bureau of Land Management to the tribe and the 150,000 acres of private land that the tribe may purchase. Because the relocation program will be terminated soon after enactment there will be no necessity for the tribe acquiring the 400,000 acres as this land was specifically earmarked for use by the relocatees.

In conclusion, Mr. President, I urge my colleagues to seriously focus their attention on this issue. I believe that the hearing process should begin during the lame duck session of Congress scheduled to begin at the end of November. The issues addressed by this measure are of significant importance to Indians and non-Indians alike in the northeastern portion of Arizona.

I ask unanimous consent that the letter from the Navajo and Hopi Indian Relocation Commission and the text of the bill be printed in the RECORD at this point.

There being no objection, the material was ordeed to be printed in the RECORD, as follows:

U.S. GOVERNMENT,
NAVAJO & HOPI INDIAN
RELOCATION COMMISSION,
Flagstaff, Ariz., September 24, 1982.

Hon. DENNIS DECONCINI,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR DECONCINI: Thank you for your letter to me dated July 14, 1982, regarding the number of families who have relocated to certain communities in Arizona and New Mexico and the number of those families who no longer own or occupy the homes provided to them by the Commission.

During the period that we have been gathering this information, we have communicated tentative results to your legislative Assistant, John Mulkey. In response to the specific questions posed in your letter, the following information is provided:

	Number of homes purchased	Number of homes no longer owned
Arizona communities:		
Flagstaff	131	50
Page	19	2
Winslow	55	17
St. Johns	8	3
Holbrook	14	1
Subtotal (32 percent)	227	73
New Mexico communities:		
Albuquerque	4	1
Gallup	14	1
Farmington	7	2
Subtotal (16 percent)	25	4
Total (31 percent)	252	77

It is most important that certain information and basic facts be noted to place the information in the proper perspective. Of the 73 homes sold in Arizona, the average sales price is 7.6% higher than the original acquisition. Of the 77 homes sold in New Mexico and Arizona, the average period of ownership was one year and four months. It is impossible to draw firm conclusions from this study, but we believe that many of the homes were sold for the same reasons as the general public does; to find employment elsewhere, to seek education elsewhere, for military service, for investment purposes and to seek financial gain.

Additionally, we concluded that some of the homes were sold when the relocatee families were about to obtain homesite leases on-reservation and the proceeds from the sales were used to underwrite the costs of building new homes. Obviously, many of the homes were sold when the relocatee families had financial or other serious problems of adjustment in their new communicaties.

To further quantify this information, it would be necessary for us to conduct further investigation to determine the specific reasons on a case-by-case basis of why the homes were sold. A major problem is that most of the families have not maintained contact with the Commission. With our limited staff and resources, we do not believe it is feasible for us to continue this particular analysis. Comparisons of any kind are by their nature speculative and quite subjective.

For a number of years, we have been concerned with this particular problem. We have attempted to make changes in our housing acquisition program during the last year to address the root cause. We hope that we will be able to continue our cooperative agreement with the Navajo Tribe

through which homesite leases are provided to families wishing to remain on-reservation.

Additionally, the Commission has strengthened its counseling and consumer education seminars with a goal of improving the quality of choices made by Navajo and Hopi relocatees. It is my personal feeling that like much of the Indian population in Northern Arizona, families will continue to move to areas where employment and other opportunities might exist. This fact will result in a continued pattern of home sales. Recently, we have also adopted stronger housing acquisition standards that should result in the improved quality of the homes the government purchases for or builds for relocatees.

Senator, the acquisition of new lands is now and always has been the primary answer to many of the basic institutional problems we face in trying to conduct a workable program under the most difficult of circumstances. We share the same concerns. Meaningful cooperation from the Navajo Tribe in this regard can insure some measure of success for those families displaced as a result of the partitionment of the Former Joint Use Area.

If we can provide any additional information, we will try to do so.

Sincerely,

HAWLEY ATKINSON,
Chairman.

S. 3026

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any other provision of law, any Navajo or Hopi Indian who is residing on lands partitioned pursuant to the Act of December 22, 1974 (88 Stat. 1712), shall not be required to relocate. Such Navajo Indians residing on the Hopi side of the partition shall have a right to the use and occupancy of such lands as they have traditionally and customarily used and occupied. Such Hopi Indians residing on the Navajo side of the partition shall have equal rights to the use and occupancy of such lands as they presently use and occupy on the Navajo side of the partition. Neither the Navajo Tribe nor the Hopi Tribe shall enact any ordinance restricting such residents from following their customary daily practices or from receiving visitors or visiting off the partitioned area or from discriminating against members of the other Tribe or way of life of members of the other Tribe in any manner whatsoever.

(b) As soon as practicable following the date of the enactment of this Act, the Secretary of the Interior shall make a determination with respect to the amount of land affected by this Act and which is traditionally and customarily used by any such Navajo Indian or Hopi Indian. After such determination, the Secretary of the Interior shall pay to the Hopi Indian Tribe an annual rental, based on the fair market value of the interest involved, for the use by the Navajo Indians of the land affected by this Act, and shall pay to the Navajo Indian Tribe an annual rental based on the fair market value of the interest involved, for use by the Hopi Indians of the land affected by this Act.

SEC. 2. Effective upon the expiration of the 180-day period following the date of the enactment of this Act, the Navajo-Hopi Indian Relocation Commission shall cease to exist.

SEC. 3. All relocations pursuant to the provisions of the Act of December 22, 1974 (88 Stat. 1716), shall cease on the date of the enactment of this Act, except that any individual actually living in a dwelling on either side of the partition line may elect within 180 days following the date of the enactment of this Act to accept the housing and bonus benefits and relocate.

SEC. 4. Section 11 of the Act of December 22, 1974 (88 Stat. 1716), is repealed.

By Mr. HATCH:

S. 3027. A bill to amend the Bankruptcy Act regarding executory contracts, and for other purposes; to the Committee on Finance.

RIGHT-TO-USE BANKRUPTCY ACT

● Mr. HATCH. Mr. President, since the early 1970's an industrial phenomenon has swept throughout the United States. Americans finding the cost of full time ownership in resort and vacation accommodations too expensive have shifted to purchasing timeshares in resort condominiums, hotels, campgrounds, and various other real estate. The timeshare industry has grown from as few as eight resorts in 1972, into a $1.5 billion industry soon to have 825 resorts with more than 25,000 units. A timeshare is a right, which the purchaser buys, to use a property for a designated length of time each year. There are two broad categories of timeshares. One where the person buys an ownership interest in real estate—the building and common areas—and another where the person buys a right to use the living space for a specific number of years but does not have ownership interest in the real estate. This latter category has been given the title of right-to-use timeshares.

This rapid growth of the timeshare industry in a relatively short period of time has left some of our traditional real estate laws incompatible with timesharing.

Mr. President, today I wish to introduce a bill that specifically addresses one of these traditional laws and its incompatibility to timesharing. Section 365 of the Bankruptcy Code Provides that a trustee in bankruptcy or debtor-in-possession may "assume or reject an executory contract or unexpired lease of the debtor." Earlier this year in the case of *Sombrero Reef Club, Inc.* v. *Allman,* 18 B.R. 612 (Bkrtcy. S.D. Fla. 1982), the court held that the right-to-use timesharing contract used at Sombrero Reef were executory and allowed the debtor-in-possession to reject them. That holding presents significant problems for the consumer who is thereby relegated to the position of a general, unsecured creditor of the resort. A consumer would practically forfeit his investment permitting the resort to sale the property without obligation. In the case of the Somberero Reef Club, the consumer would lose their original purchase price of $1,000 to $3,000 plus a yearly fee of around $80.

The threshold question in a rejection case is if a contract is executory. The most widely accepted definition of an executory contract for bankruptcy purposes is a contract "under which the obligation of the bankrupt and other party is so far unperformed that the failure of either to complete performance would constitute a material breach excusing the performance of the other." The Sombrero Reef Club case clearly gave right-to-use contracts the status of executory. In other words, the courts ruling permits the resort to reject right-to-use contracts in bankruptcy cases.

Mr. President, in the interest of the consumer in this rapidly expanding industry my bill would do the following things:

First. Add section L to section 365 of the Bankruptcy Code providing for a separate treatment for timeshare situations.

Second. Clause 1 of section L would provide if the trustee rejects an executory contract of the debtor the purchaser may treat such contract as terminated and receive a lien on the interest in the timeshare for the price he has invested. In the alternative, the purchaser may continue to exercise his rights to use and occupy the timeshare premise to the extent provided for in the contract.

Third. Clause 2 of section L provides that the purchaser may offset payments if after rejection any damages occur due to the nonperformance of obligations of the debtor.

Fourth. Clause 3 of section L provides a definition of timeshare plan, timeshare interest, and timeshare premises.

Fifth. Amends section 365(f)(2) to provide in a situation where the trustee has assigned the contract to a third party that a purchaser may have the option to terminate his contract rather than participating with the assignee in the resort.

Sixth. Amends section 544(a)(3) to anticipate the argument that the trustee could attempt to void the contract containing the nondisturbance language as a transfer in real property, eliminating the protection preserved in section L(1).

Seventh. Makes the necessary amendment to section 365(a) for the insertion of (L) into the listed paragraph.

Mr. President I feel that my bill will update the Bankruptcy Code so that it may effectively handle this problem dealing with right-to-use timeshares. I feel it important to keep current with this rapidly growing industry so that the consumer and developers may be fully protected where traditional laws may not provide adequate protection.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.●

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3027

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 365 of title II, United States Code, is amended—

(1) by striking from subsection (a) "and (d)" and inserting in lieu thereof ", (d) and (l)".

SEC. 2. Section 365 of title 11, United States Code, is amended by adding after subsection (k) the following:

"(l)(1) If the trustee rejects an executory contract of the debtor for the sale of a timeshare interest in a timeshare plan under which the purchaser has not relinquished the right to occupy and use the timeshare premises, such purchaser may treat such contract as terminated and receive a lien on the interest of the debtor in the timeshare premises for the recovery of any portion of the purchase price that such purchaser has paid less any portion of the purchaser price attributable to years prior to the contract rejection. In the alternative, such purchaser may continue to exercise his rights to use and occupy the timeshare premises to the extent provided in the timeshare plan contract or applicable state law, so long as such purchaser continues to make all required installment and maintenance payments.

"(2) If such purchaser continues to use and occupy the premises, such purchaser may offset against any installment and/or maintenance payments any damages occurring after the date of the trustee's rejection caused by the nonperformance of any obligation of the debtor after such date, but such purchaser does not have any rights against the estate on account of any damages arising after such date from such rejection, other than such offset. The amount eligible for such offset shall be fixed as a sum certain after notice and hearing.

"(3) For the purposes of this section, "timeshare plan" means any arrangement, plan, scheme, or similar device, but not including exchange programs, whether by membership, agreement, tenency-in-common, sale, lease, deed, rental agreement, license, right-to-use agreement, by any other means, whereby a purchaser, in exchange for consideration, receives a right-to-use accommodations or facilities, or both, for a specific period of time less than a full year during any given year, but not necessarily for consecutive years, and which extends for a period of more than three years. A timeshare interest is that interest purchased in a timeshare plan which grants purchaser the right to use and occupy facilities or accommodations pursuant to a timeshare plan. Timeshare premises are those facilities and/or accommodations subject to a time share plan.".

SEC. 3. Section 365(f)(2) of title 11, USC, is amended by—

(1) striking out "and" at the end of subparagraph (A);

(2) striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; and"; and

(3) adding at the end thereof the following new subparagraph:

"(C) in the case of timeshare interest purchaser, the timeshare interest purchasers are given the option to treat their executory contracts as terminated pursuant to Section 365(l)(1) of this title".

SEC. 4. Section 544(a)(3) of title 11, United States Code, is amended by inserting after "exists" the following: "; however, nothing in this subsection shall be construed to grant the trustee the power to assert the rights and powers of a bona fide purchaser against the contractual or state-mandated rights of any timeshare interest purchase in a timeshare plan as defined in Section 365(l)(3)".

By Mr. METZENBAUM:

S. 3028. A bill to amend the Natural Gas Policy Act of 1978; to the Committee on Energy and Natural Resources.

NATURAL GAS POLICY ACT AMENDMENTS

● Mr. METZENBAUM. Mr. President, when Congress passed the Natural Gas Policy Act of 1978, the industry and its supporters promised that the price of natural gas to consumers would rise by only 12 percent a year. I and several of my colleagues challenged those claims but we were dismissed. Unfortunately, though, we have turned out to be right.

Four years ago, the average residential cost of natural gas was $2.63 per 1,000 cubic feet (Mcf). Today, it is $5.31, an increase of 98 percent—or nearly 25 percent a year. In Ohio, where the average residential consumer uses 110 Mcf per year, the typical annual gas bill has soared from $283 to $584.

There was some reason to hope that this winter would be different for our Nation's hard-pressed natural gas consumers. The natural gas market is experiencing a supply surplus. Demand is soft. By every economic theory and rule, prices should be falling. But the natural gas industry marches to its own economic beat.

So, instead of stable prices this winter, consumers across the country will be slammed with price hikes of staggering proportions. In my home State of Ohio, the East Ohio Gas Co., which serves more than 1 million consumers in northeast Ohio, predicts that consumers will find their gas bills 40-percent higher this winter than a year ago. In the West, the Southern California Natural Gas Co., is predicing a 70-percent increase. What ever happened to the 12-percent increase?

There are, of course, several reasons for the latest round of price increases. But many of them can be traced to a single provision in the NGPA—section 601(c). That provision provides that an interstate pipeline can passthrough to its retail customers all purchased gas costs, unless, in the words of section 601(c), those costs are excessive due to "fraud, abuse, or similar grounds."

Congress intended that section 601(c) be used by the Federal Energy Regulatory Commission to insure that interstate pipelines continue to meet their public obligations under the Natural Gas Act to provide their customers with reliable gas supplies at the lowest reasonable price. Congress did not intend for FERC to let the interstate pipelines, many of which own producing subsidiaries, run wild, purchasing new gas supplies at any price without regarded to the impact on the pipelines' retail customers.

But on February 4, FERC issued a statement of policy setting in print what had been FERC's informal policy for several months on the passthrough of purchased gas costs. That statement concluded that the phrase "fraud, abuse, or similar grounds" was meant to cover only fraudulent misrepresentation, negligent misrepresentation, and innocent misrepresentation. Under FERC's standard, then, passthroughs are automatic unless one of these three types of fraud is found.

Mr. President, that interpretation is indefensibly narrow. It ignores the plain meaning of the words is section 601(c), is contrary to congressional intent and, most importantly, is devastatingly harmful to consumers.

In defining "abuse, or similar grounds" as forms of fraud, FERC has turned the dictionary on its head. "Fraud" means one thing. "Abuse" means something else. And "similar grounds" means still a third thing. If Congress had meant to cover only fraud, it would not have written the law to reflect that intent. The fact that it included the additional words indicates that it had a much broader intent.

Mr. President, the legislation I am introducing today would simply insure that section 601(c) is interpreted as originally intended by Congress. It is necessary because FERC has made an improper and unauthorized effort to redefine the NGPA by severely restricting the scope of the passthrough standard.

I want to make it very plain that this bill does not reopen the debate over natural gas pricing. The bill does not impose any new controls on natural gas. It does not touch the NGPA's multiple pricing categories.

The bill would simply amend section 601(c) by striking the words "or similar grounds" and adding the following: "waste, imprudence, or similar grounds including action not in the public interest, in which case the commission shall take appropriate action under sections 4 and 5 of the Natural Gas Act, including but not limited to, the revision, annulment, or mandating of contract terms and provisions."

This bill would reaffirm Congress original intention that pipelines continue to have an obligation to provide reliable gas supplies at the lowest reasonable price. It underscores Congress desire that pipelines which engage in abusive pricing or purchasing practices at the expense of its retail customers not be permitted to pass excessively high priced gas through under section 601(c). And by approving this legislation the Congress would make clear to FERC that it should reconsider all of purchased gas adjustment proceedings

in which section 601(c) was erroneously interpreted. In additon to the provisions in this legislation, the remedies available to the Commission would, of course, include refunds to the retail customers of the interstate pipelines for all purchased gas costs the Commission found to be excessive.

Mr. President, this legislation deals with much more than a theoretical problem. It addresses very real and ongoing abuses. Indeed, today we are experiencing precisely the type of situation which Congress meant to prohibit by writing section 601(c).

There are many examples of interstate pipelines abusing the NGPA's pricing provisions. However, the case of Columbia Gas Transmission Co. (CGT), the interstate pipeline subsidiary of the Columbia Gas System, is an excellent example of what I am talking about.

A few years ago, Columbia Gas Transmission began purchasing massive amounts of new gas supplies. CGT undertook this purchasing program becauise it claimed its future gas needs would increase dramatically. The basis of CGT's claims, however, was not an independent study of the future needs of the system's customers. Instead, Columbia relied solely on the estimates its retail customers provided for purposes of establishing a curtailment plan. A pipeline's retail customers always inflate their demand estimates for curtailment purposes. The retail customers want to insure they will not have their supplies shut off during a shortfall.

With only these curtailment estimates in hand, CGT went forward and contracted for vast quantities of deregulated, high-priced section 107 gas from producers in the Southwest. In fact, according to Columbia's own records, section 107 has jumped from 3.5 percent of the pipeline's total gas mix in January 1981 to 11.4 percent in July 1982.

CGT has been paying astronomical prices for this section 107 deregulated Southwestern gas. The average price CGT paid in 1981 was more than $8 per Mcf. And that figure continues to rise. This price is far in excess of market cleaning levels. The alternative fuel for most of Columbia's industrial customers is high sulfur No. 6 fuel oil. The price for high sulfur No. 6, minus transportation and distribution costs, is approximately $3.25 per Mcf. That is market clearing price for CGT. In addition, that price is almost identical to the market clearing price assumed by FERC in it recent notice of inquiry regarding section 104 gas prices.

Thus, CGT is paying almost $5 per Mcf above market clearing levels for this costly section 107 gas and passing it on to its retail customers. In a competitive marketplace, CGT could never do that.

But that is only part of the story. Columbia continues to purchase more and more of this section 107 deregulated gas, even though CGT expects a systemwide surplus this year of 150 to 200 billion cubic feet. At the same time, Columbia has shut in more than 8,000 producing wells in Ohio and 20,000 wells throughout Appalachia. That gas sells, on average, for approximately $2.75 per Mcf.

CGT has refused this lower priced gas while continuing to take the high priced gas, in large part, because the company failed to protect itself with "market out" clauses. Other interstate pipelines such as Transco, United, and Michigan-Wisconsin, included "market out" clauses in their contracts with producer/suppliers. Those pipelines are now exercising those clauses to reduce the price they are willing to pay for section 107 deregulated gas to less than $5.50 per Mcf. Columbia, on the other hand, is continuing to purchase the deregulated gas at $8 per Mcf because it would have to pay for the volumes of gas in any event. The cheaper Appalachian gas, then, is being shut in to help lessen CGT's systemwide surplus created by CGT's grossly overestimated gas demand projections.

During the past 18 months Columbia has filed three purchased gas adjustment passthrough requests with FERC. Those three filings contain price increases totaling more than $1 billion. That translates into a 40-percent price for customers of Columbia Gas of Ohio, Dayton Power & Light, and Cincinnati Gas & Electric.

I am an intervenor protesting these three rate hikes, Mr. President. In each of three proceedings, CGT has claimed that these higher purchased gas costs are solely the result of CGT's producer/suppliers raising their prices in accordance with the NGPA's phased decontrol timeable.

Nothing could be further from the truth. GGT has used the NGPA's pricing provisions to enrich itself at the expense of its retail customers and at the expense of independent producers in the Appalachian region.

Let me give you two examples: First, the Columbia Gas System, in addition to owning CGT, Columbia Gas of Ohio and five other retail distribution companies, also owns a producing subsidiary, Columbia Gas Development. Columbia Gas Development negotiates all of CGT's supply contracts with Southwestern producers. On top of its duties as CGT's contracting agent, Columbia Gas Development also sells most of the gas it produces to CGT. CGT's two 1981 purchased gas adjustment filings show that Columbia Gas Development and CGT have negotiated at less than arm's length. In fact, CGT has been purchasing section 107 gas from Columbia Gas Development at prices higher than CGT is paying other Southwestern producers.

Second, in the Appalachian region, Columbia has no producing subsidiary. CGT, however, owns several hundred producing wells in Appalachia. The 1981 PGA filings also reveal that CGT is purchasing section 107 tight sands gas in the Appalachian region for prices higher than it is paying other producers.

Mr. President, I would argue that these two examples are also "abuses" of the NGPA's pricing and passthrough provisions. Clearly, Congress never intended an interstate pipeline to purchase gas from itself at prices higher than it pays other producers. Yet, once again, under FERC's statement of policy, Columbia's self-dealings will be passed through to its retail customers and ultimately paid for by consumers.

Ideally, perhaps, FERC's disastrous error could be changed through the legal process. Congressional intent is an issue in many of the major PGA proceedings before the Commission. The question of congressional intent may ultimately reach the Federal courts for resolution. In the meantime, consumers will be shelling out more and more money to heat their homes. Mr. President, consumers can not afford to wait for judicial resolution of this question. Consumers need relief now.

Furthermore, residential and commercial consumers may not have seen the worst of the increases. The average rolled-in price of natural gas is rising dangerously close to the price of alternative fuels. Several industrial users with fuel switching capability have already switched back to residual fuel oil. As prices continue to rise, many more will leave the retail gas distribution systems throughout the country. If so, the bills of residential, commercial, and captive industrial users will skyrocket as fixed costs are spread over fewer and fewer on-systems customers.

The best course, then, is for Congress to act now to reaffirm its intent regarding the scope and purpose of section 601(c). It is time for Congress to make clear what we meant regarding the passthrough of purchased gas costs and to correct FERC's seriously misguided policy statement. Otherwise, consumers will continue to face staggering price increases during a period of lower demand. At the same time, interstate pipelines such as CGT will continue to make hundreds of millions of dollars by using the NGPA in a manner Congress never intended.

Mr. President, I ask unanimous consent that the bill be reprinted in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3028

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section 601 (c) of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301, 3431 (c)) is amended by deleting "or similar grounds." and inserting in lieu thereof "waste, imprudence, or similar grounds including action not in the public interest, in which case the Commission shall take appropriate action under sections 4 and 5 of the Natural Gas Act, including but not limited to, the revision, annulment, or mandating of contract terms and provisions.".●

By Mr. PROXMIRE:

S. 3029. A bill to promote the nuclear nonproliferation policies of the United States; to the Committee on Foreign Relations.

NUCLEAR NONPROLIFERATION POLICIES

Mr. PROXMIRE. Mr. President, today I am introducing the Nuclear Nonproliferation Policy Act of 1982. The purpose of this bill is to apply consistent restrictions on the export of fuel, equipment, and other nuclear related materials.

At the present time the export of such equipment and materials is licensed by the Nuclear Regulatory Commission. But there are no similar restraints on export procedures under the Department of Energy.

This legislation strengthens the congressional control over Department of Energy actions in the export of nuclear technology. It prohibits shipments to a nonnuclear weapons state that does not accept full-scope nuclear safeguards. And it would halt shipments to nations engaged in activities detrimental to full nonproliferation safeguards.

The United States appears to be encouraging a policy of unlimited business activity no matter what the consequences for nuclear proliferation. There may be, in fact I am certain there is no more foolhardy course of action that our Nation could engage in than an open ended race to export nuclear technology.

This legislation will help put the breaks on the headlong rush toward a nuclear disaster and I urge its earliest consideration.

By Mr. CHAFEE

S. 3030. A bill to amend the Internal Revenue Code of 1954 to allow an employer to provide participants in a defined benefit plan with supplemental retirement benefits through a defined contribution plan of the employer; to the Committee on Finance.

SUPPLEMENTAL RETIREMENT BENEFITS

● Mr. CHAFEE. Mr. President, today I am introducing, along with Senator BAUCUS, legislation to provide employers and their employees with increased ability to meet rising costs of living during retirement years. Our bill calls for a supplemental retirement benefit (SRB) program.

One of the serious problems facing this Nation is the impact of inflation on fixed retirement income. Traditional solutions such as the indexing of pensions have proven too costly for virtually all employers, except the Federal Government. And the ad hoc cost-of-living increases that some employers do occasionally provide for retirees are unpredictable since they are contingent on the firm's profitability.

Complex problems such as this require innovative solutions, like the one we are putting forward today. This legislation, which amends the Internal Revenue Code, would permit employers to share with an employee the cost of purchasing an annuity to supplement the company's retirement benefits. These annuities would be purchased from licensed insurance carriers and would be subject to the protections and safeguards of both the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code. More specifically, the SRB program would:

Permit employers to institute an annuity purchase program funded upon retirement through a tax-qualified defined contribution pension or profitsharing plan. The annuity would supplement the employers' pension program, by providing a compounded annual increase of up to 3 percent each year.

Permit employers to share the cost of the annuity with their employees by permitting the employers to make contributions at or after retirement.

Permit employees to use a portion of their account balances in a tax qualified plan or money from personal savings toward the purchase of such an annuity.

Permit an employee to take advantage of present law which defers income tax on the annuity until payments—supplemental retirement benefits—are actually received.

The initial cost of this program to the Treasury should be negligible. And any future cost would, to some extent, be recovered as program participants are taxed on the benefits they receive.

While I expect future hearings will fully explore the approach taken in this bill, let me take this opportunity to anticipate some of the questions that might arise:

Why is a supplemental retirement benefit program important?

Recent sustained periods of high inflation have eroded the value of retirement benefits. An SRB is intended to preserve the relative buying power of pension payments.

Why do employers not simply increase benefits payable under their defined benefit pension plan?

Most companies' defined benefit plans calculate the benefits payable to an employee at retirement as a percentage of final pay or or final average earnings. Provided an employer's salaries keep pace with inflation, the initial pension is generally adequate to meet a retiree's needs. However, once the pension is payable, its purchasing power can be rapidly eroded by even a modest rate of inflation. To simply raise the benefits payable at retirement in anticipation of cost-of-living increases or to index defined benefit pensions to inflation is itself inflationary and too expensive for most employers.

How have employers dealt with the effects of inflation on fixed retirement income in the past?

Most large employers cope with this problem by increasing the pensions payable to retirees through ad hoc adjustments, payable out of general corporate assets. Traditionally, these ad hoc payments have to be renewed on a year-to-year basis and are increasingly expensive and administratively burdensome. From a retiree's viewpoint, ad hoc payments are also unsatisfactory since, given their contingency on an employer's profitibility, the retiree cannot rely on either a continuation of the increments granted to his pension in previous years or the employer's decision to increase his or her pension in response to current inflation.

In spite of these drawbacks, why can employers not continue to increase basic pensions using ad doc payments?

The Employee Retirement Income Security Act of 1974 ("ERISA") requires essentially that these gratuitous ad hoc payments be treated as retirement payments which must be funded prior to retirement through a tax-qualified retirement plan and must be subject to vesting requirements applicable to retirement plans. In 1980 Congress amended ERISA to allow for nonretirement supplemental payments. However, neither the statute nor the proposed supplemental payment regulations issued by the Department of Labor permit a sustained annuity purchase program comparable to the SRB proposal.

How does an SRB program work?

A participant in both a defined benefit pension plan and a defined contribution plan maintained by the same employer will be allowed to use a portion of his account balance in the defined contribution plan—or from other sources, including personal savings—toward the purchase of an insured annuity. The cost of the annuity will be shared through a matching employer contribution made to the plan at the time of the participant's election. The annuity will provide a percentage increase in the pension payable under his employer's defined benefit pension plan each year.

What are the advantages to an employee of providing an SRB through a tax-qualified retirement plan?

Employer annuities purchased outside a tax-qualified plan on behalf of an employee result in immediate tax-

ation, to the employee, equal to the cash value of the annuity. Under our bill, however, an employer may contribute to the purchase of a nontransferable annuity on behalf of a participant in a tax-qualified plan without causing the participant to recognize tax on the distribution until he begins to receive payments under the annuity, and then only to the extent of employer-derived amounts actually received in a given tax year. Finally, the use of a tax-qualified plan as a vehicle to provide supplemental retirement benefits assures employees that the benefits will be distributed equitably and that past and current increases in pension benefits will be continued.

Why can a supplemental retirement benefit not be provided under current law?

The overall limitations on amounts allocated to a participant's account is limited to 25 percent of compensation, up to a maximum dollar amount. Since the cost of purchasing an SRB annuity is high, ranging from approximately 70 percent to 120 percent of final pay, employer contributions to fund an SRB will, in most cases, exceed the current applicable limits.

How is the employee who purchased an SRB annuity protected?

By requiring that the SRB be provided through an annuity purchased from a licensed insurance carrier and by further requiring that the annuity be fully funded prior to the commencement of supplemental benefits, the risk that the benefit will not be provided is practically nonexistent.

May the SRB annuity be provided through a profit-sharing plan?

Yes. Many employers use profit-sharing plans to supplement defined benefit plan benefits since the costs of such plans can be more easily controlled. Often, to encourage employee savings, such plans provide for employee contributions which are then matched by employer contributions. Under present law, employer contributions to profit-sharing plans must be contingent upon the existence of profits. Under the proposed legislation, an employer's contribution to purchase an SRB annuity could likewise be made contingent on profits; however, the legislation specifically provides that if the employer fails to make its contribution for any reason, the employee's contribution is to be returned at the employees's request. Furthermore, if an employee retires during a year in which the employer does not fund supplemental benefits, he may still elect to participate in the SRB program at such a time when the employer resumes its contributions. It should be reemphasized that once the annuity is purchased the SRB is guaranteed.

May the SRB benefit be limited to employees who retire from service with the employer maintaining the SRB benefit, as opposed to employees who terminate service with an employer prior to retirement with a vested benefit—terminated vested employees)?

Yes. Present law does not require an employer to provide the same benefits to both retirees and terminated vested participants. At the same time, employers have traditionally limited supplemental payments to retirees as both an incentive and a reward for faithful, long-term service.

Mr. President, I ask unanimous consent that this bill be printed in the CONGRESSIONAL RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 401 of the Internal Revenue Code of 1954 (relating to qualified pension, profit-sharing, stock bonus plans, etc.) is amended by inserting after subsection (1) the following new subsection:

"(m) QUALIFIED SUPPLEMENTAL BENEFIT ARRANGEMENTS.—

"(1) GENERAL RULE.—A defined contribution plan shall not fail to satisfy the requirements of this section merely because the plan includes a qualified supplemental benefit arrangement.

"(2) QUALIFIED SUPPLEMENTAL BENEFIT ARRANGEMENT.—For purposes of this subsection, the term 'qualified supplemental benefit arrangement' means an arrangement which is part of a defined contribution plan of an employer and which meets the requirements of paragraph (3)(B) and the following requirements:

"(A) IN GENERAL.—The arrangement provides that—

"(i) an eligible participant in a defined benefit plan of the employer may elect, in the earlier of the year in which—

"(I) the participant attains normal retirement age and retires, or

"(II) the primary retirement benefit of the participant begins,

to purchase a life annuity which commences not earlier than the year after the year in which the election is made,

"(ii) such annuity is provided through the purchase, on or before the date on which payments under the annuity begin, of an individual or group annuity contract (including a guaranteed investment contract or similar arrangement) from an insurance carrier licensed under the laws of any State to issue such contracts, and

"(iii) the employer and the participant each share the cost of such annuity.

"(B) ELIGIBILITY.—Each employee of the employer who—

"(i) is a participant in any defined benefit plan of the employer,

"(ii) is employed by the employer at the time the employee—

"(I) attained the earliest age at which a benefit may be paid under the defined benefit plan, or

"(II) became disabled, and

"(iii) is entitled to a benefit under the defined benefit plan at the time described in clause (ii),

must be eligible to participate in the arrangement.

"(C) AMOUNT OF SUPPLEMENTAL BENEFIT.—Any benefit payable under the arrangement for any year is computed as a percentage of the primary retirement benefit, except that the supplemental benefit may not exceed 3 percent of the primary retirement benefit, compounded annually from the date on which such benefit commences.

"(D) EMPLOYER MAY MAKE CONTRIBUTION CONTINGENT UPON PROFITS.—If the employer provides an arrangement under a profit-sharing plan, the employer may make any employer contribution for any year contingent upon profits for such year, except that any participant who elected to participate in the arrangement in the year described in subparagraph (a)(i) shall—

"(i) be reimbursed for any contribution made by him, and

"(ii) be eligible to participate in the arrangement in any subsequent year (for which profits are available) before any other participant who made such election after such participant.

"(3) APPLICATION OF DISCRIMINATION STANDARDS.—

"(A) IN GENERAL.—Any contributions under a qualified supplemental benefit arrangement shall not be taken into account under subsection (a)(4)

"(B) INTEGRATED PLANS.—If a plan fails to meet the requirements of subsection (a)(4) without taking into account contributions under chapter 2 (relating to tax on self-employment income), chapter 21 (relating to Federal Insurance Contributions Act), title II of the Social Security Act, or any other Federal or State law, then the arrangement must provide that the supplmental benefit amount with respect to any participant be determined as a percentage of the sum of—

"(i) the primary benefit amount of the participant under the defined benefit plan, plus

"(ii) the primary insurance amount with respect to the participant under title II of the Social Security Act.".

SEC. 2. (a) Section 415(c) of the Internal Revenue Code of 1954 (relating to limitation on defined contribution plan) is amended by adding at the end thereof the following new paragraph:

"(9) CONTRIBUTIONS TO QUALIFIED SUPPLEMENTAL BENEFIT ARRANGEMENTS.—Any contribution or addition with respect to any participant under a qualified supplemental benefit arrangement (within the meaning of section 401(m)(2)) shall, for purposes of paragraph (1), not be treated as an annual addition.".

(b) Section 404(a) of such Code (relating to deduction for contributions of an employer to an employees' trust, etc.) is amended by adding at the end thereof the following new paragraph:

"(11) SPECIAL RULE FOR CONTRIBUTIONS TO QUALIFIED SUPPLEMENTAL BENEFIT ARRANGEMENTS.—Notwithstanding the limitations under this section, there shall be allowed as a deduction for any taxable year an amount equal to the amount of the deductible employer contributions to a qualified supplemental benefit arrangement (within the meaning of section 401(m)).".

SEC. 3. (a) Except as provided in subsection (b), the amendments made by this section shall apply to taxable years beginning after December 31, 1982.

(b) The amendments made by section 2(a) shall apply to years beginning after December 31, 1982.●

By Mr. MOYNIHAN:

S. 3033. A bill to suspend until September 30, 1984 the duty on the radio

portion of certain clock radios; to the Committee on Finance.

CLOCK RADIO IMPORT DUTY

Mr. MOYNIHAN. Mr. President, I rise today to introduce legislation to suspend until September 30, 1984, the duty on the radio portion of certain clock radios.

For nearly 20 years, all clock radios imported into the United States have been assessed two different duties: One for the clock component and one for the radio component. This bill will correct this cumbersome and expensive procedure by suspending duty until September 30, 1984. I would emphasize that there is no domestic production of the clock radios covered by this legislation.

This legislation is identical to section 135 of H.R. 6867, the House omnibus tariff bill. I am confident that when the Senate considers companion legislation, we will include a provision identical to the bill I am introducing today.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3033

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subpart B of part 1 of the Appendix to the Tariff Schedules of the United States (19 U.S.C. 1202) is amended—

(1) by adding at the end of the headnotes to such subpart the following new headnote:

"6. For the purposes of item 911.95, the term 'entertainment broadcast band receivers' means receivers designed principally to receive signals in the AM (530-1710 KHz) and FM (88-108 MHz) entertainment broadcast bands, whether or not capable of receiving signals on other bands such as aviation, television, marine, public safety, industrial, and citizens bands.:; and

(2) by inserting in numerical sequence the following new item:

"911.95	Entertainment broadcast band receivers valued not over $40 each (however provided for in schedule 6), incorporating timekeeping or time display devices, not in combination with any other article, and not designed for motor vehicle installation.	Free....	No change.....	On or before 9/30/84".

By Mr. CRANSTON:

S. 3034. A bill to amend title II of the Social Security Act to provide that the combined earnings of a husband and wife during the period of their marriage shall be divided equally and shared between them for benefit purposes, so as to recognize the economic contribution of each spouse to the marriage and assure that each spouse will have social security protection in his or her own right; to the Committee on Finance.

SOCIAL SECURITY EQUITY ACT OF 1982

Mr. CRANSTON. Mr. President, I am today introducing S. 3034, the proposed social security equity of 1982. This measure is aimed at correcting the inequitable and inadequate treatment of women under the social security system. It is similar to a proposal, H.R. 1513, introduced last year by Representative MARY ROSE OAKAR, who is the chair of the House of Representative's Select Committee on Aging's Task Force on Social Security and Women and has been a tremendous leader in the effort to reform the social security system in a manner that would adequately and equitably deal with the needs of older women.

OLD AGE AND POVERTY

Mr. President, to understand the need for reform, it is important to understand the conditions of poverty and dependency which face millions of older women in our society.

It is not an overstatement to say that the problem of poverty in old age is primarily a problem for women; 72 percent of the elderly in this Nation who live in poverty are women. Most of them live alone and majority of these women—60 percent—rely upon social security as their sole source of income. In contrast, 46 percent of unmarried male social security recipients and 29 percent of married couples receive no other income. Not only are women more likely to be totally dependent upon social security, their benefit levels are substantially below benefits received by men. The average social security income for all aged women in 1978 was $2,527 compared to $3,390 for men. The result is that 38 percent of unmarried women receiving social security benefits live below poverty whereas only 15 percent of the unmarried male recipients and 13 percent of couples live in poverty. One principal difference is that most elderly women—63 percent—are alone in old age.

In contrast, 75 percent of elderly men live with a spouse. Thus, men are likely to live in retirement with a combined social security benefit; women are likely to live only on their own inadequate benefit resulting in the fact that 72 percent of the 4.4 million older Americans in poverty are women.

In every category—private pensions, asset income, earnings, and social security benefits—older women have dramatically fewer resources and less income in old age than older men.

Mr. President, there are, of course, many factors which contribute to the economic hardships which face women in their retirement years. A major cause is that the social security system fails to take into account the changing roles and needs of American women.

HISTORICAL PERSPECTIVE

Mr. President, much of the problem lies in the fact that the social security system was developed in an era when the role of women in our society was far different from what it is today. In the 1930's when the social security program was created the typical American family consisted of a man who was a full-time worker and his wife who was a full-time, lifelong homemaker. The labor force participation of married women was less than 17 percent and fewer than 1 in 12 marriages ended in divorce. The social security benefit structure was thus established on the concept of a lifelong couple with one wage earner and a dependent spouse.

The situation has dramatically changed over the past 50 years and the typical family of the thirties and forties is not the typical family of today. Women have become a major part of America's work force, enriching the world of work with their contributions and productivity, despite continuing wage discrimination and employment barriers. The percentage of married women in the work force exceeds 50 percent and it has been estimated that 90 percent of all women spend some portion of their lives in the work force, many of them moving in and out of the roles of wage earners and homemakers as the needs of their families change. It is no longer true that women are likely to be either lifelong homemakers or lifelong wage earners; these roles are combined and interchanged throughout a lifetime.

Similarly, we must recognize, like it or not, that the status of marriage has changed dramatically over the past 50 years. Today, one in three marriages ends in divorce.

Mr. President, despite these massive changes in our society, the social security system has continued to operate on the basis of a philosophy designed for an era when most women did not work and when most women were part of a lifelong marriage. Consequently, the current system works well only for that very small number of women whose family and work patterns have not changed from the thirties and fourties. For the vast majority of women and families that no longer fits into that pattern, the system fails to provide either adequately or equitably for their needs.

Under the current system, a woman can receive benefits as a covered worker based upon her own earnings record or she can receive benefits as a dependent wife, widow, or ex-wife of a covered worker, but she cannot receive both benefits. If she is entitled to both a worker's benefit and a dependent spouse's benefit, she receives only the higher of the two benefits and loses the other.

A dependent spouse benefit is equal to 50 percent of the benefit of the working spouse. Because many women have gaps in their work history due to absences from the workplace for child-

care responsibilities and generally have much lower earnings records, many find that their benefits as a dependent spouse are greater than the benefits they would be entitled to receive on the basis of their own work history. Thus, many married women who enter the work force and make contributions to the social security system find that their years of work and contributions make little or no difference in their benefit levels. They are no better off than if they had never worked and never paid into the social security system.

Mr. President, the inequities of the current system can be even more acute for those women who have been full-time homemakers and are displaced from the role either by divorce of the death of a spouse. After years of work as a homemaker in a marriage, a divorced woman may find herself without any work record of her own and eligible for social security benefits only as a dependent spouse. Although she may be of retirement age, she cannot receive any social security benefits unless the marriage lasted 10 years and then not until her former spouse reaches age 62 and retires. If he elects to continue working, she receives no benefits at all until he retires or dies. Even if she is able to receive a spousal benefit, it is likely to be woefully inadequate. The level of the dependent spouse benefit—50 percent of the primary benefit—was geared toward the notion of women whose marriages do not end in divorce and who will be able to rely upon a combination of their husbands 100 percent benefit and the additional 50 percent spouse benefit. The spouse benefit may well be insufficient to live on alone.

A widow is equally vulnerable under the present system. Unless she has been able to establish a sufficient social security account in her own name, she will be dependent upon the work and earnings record of her deceased spouse. However, her ultimate social security benefit will be calculated on the basis of his wage record at the time of his death, not the equivalent value of that level at the time she reaches retirement age. If she loses her husband 5 or 10 years before she reaches retirement age, his earnings records will be years out of date. Unable to build up sufficient credits in her own account and unable to add his credits to her account to the extent of her earnings after his death, she is likely to be left with a benefit level that condemns her to entering retirement in poverty.

The current system also discriminates against intact families with two-wage earners as contrasted with one-wage earner families. Under the benefit calculation formula, a two-earner couple is likely to receive less benefits at retirement than a one-earner couple with exactly the same lifetime earnings. Thus, one family with average monthly earnings of $1,000 and one-wage earner can ultimately receive higher benefits from social security than another family with the exact same average earnings, but with two-wage earners contributing to the total family income. This occurs because of the dependent spouse benefit and because of the formula which is used to calculate benefits. This also means that a survivor of such a two-earner family will also get less benefits than a survivor of a one-earner family.

Mr. President, it is time that we begin the task of revising the social security system to recognize and reflect the changing roles and responsibilities of both men and women in our society and provide for a more equitable recognition of their contributions to a family unit.

Marriage, insofar as economics are concerned, should be viewed as an interdependent partnership in which each spouse makes a contribution—either in the paid work force or as a homemaker or in some combination of roles—and both ought to accrue social security protection equally.

The view of female dependency which is a foundation of the present social security system belongs to a bygone era. Women today are achieving the status of equal partnership with men in every facet of our society. The social security system needs to be updated to reflect that partnership.

EARNINGS SHARING—A CONCEPT FOR TODAY'S MARRIAGE PARTNERSHIP

Mr. President, the proposal I am introducing today would incorporate the concept of earnings sharing into the social security system. Basically, marriage for social security purposes would be regarded as a partnership; in order to compute social security benefits all of the earnings of a married couple would be combined and divided equally between the spouses upon retirement or divorce. Each member of the couple would have established for him or her an individual social security account. Earnings acquired before or after a marriage would go into this individual account along with whatever share each member acquired during marriage. The concept of dependency would be replaced by the concept of equality.

Although this is a major change from the current social security system of benefit accrual, it is a principle which is now applied in virtually every jurisdiction with respect to other assets acquired during a marriage. Upon the termination of a marriage, these other assets are generally divided equally between the husband and wife. Interests in other pension programs are now generally considered part of the assets acquired during the marriage and are considered in the division of property between the couple upon the termination of the marriage. The same would be true under the earnings sharing concept in the social security system.

There have, of course, been numerous proposals made to deal with the inequities and inadequacies of the current system. The earnings sharing concept, however, has numerous advantages. It would eliminate the current discrimination against two-wage earner families. They would no longer receive less benefits than one-earner families with identical earnings records. It would recognize the value of the contribution of a homemaker and accord her with a social security account in her own right. Upon divorce or death of a spouse, a woman could build upon the separate account created for her during her years of marriage, rather than be forced to start from scratch in establishing a social security account. Likewise, credits from earnings she receives prior to marriage will be able to be added to her account accrued during marriage. The same, of course, would be true for the husband. Women who enter and leave the work force to fill the necessary child-rearing roles would no longer be penalized by gaps in their social security coverage.

Finally, in this time when the social security system is facing major fiscal problems, the earnings sharing proposal would not generate any additional costs. It would simply divide more equally social security benefits between men and women and thereby lift the standard of living for the millions of elderly women who would otherwise be condemned to live out their retirement years in poverty.

TRANSITION PROBLEMS

Mr. President, this proposal calls for major restructuring of the social security benefit system to respond to the changing role and needs of women. Obviously, changes of this dimension and scope must be phased in over time so that individuals can make appropriate plans for their retirement years. The legislation I am introducing provides that it would not be effective with respect to anyone over the age of 50 in 1984 when this proposal would become effective under this bill. Those then under 50 would begin having social security accounts established and computed under this proposal at that time. Because no one under age 50 could reach the minimum retirement age of 62 before 1996, no one under age 50 in 1984 would actually begin receiving benefits under this system until 1996 at the earliest. Different transition provisions are provided for individuals who might become eligible for social security disability benefits during this phase in. In no case, would a person who became disabled during this period ever receive less benefits as long as that disability

continued than they would be entitled to under the old system.

Transition periods often give rise to unanticipated inequities and further provisions may be needed to relieve any hardships which may occur during this period.

One major problem with a phase-in approach is that none of the benefits of the new system would be realized by the millions of elderly women now living in poverty; nor would it provide any relief for those women over 50 who are rapidly approaching retirement. There are several proposals for limited changes in the social security system designed to help preretirement women, and I am committed to exploring fully these limited changes to help deal with the problems of these women who will not benefit from this new proposal. Some interim modifications would include allowing a divorced spouse entitled to a dependent spouse benefit to elect to receive benefits when she reaches retirement age regardless of whether her former spouse elects to retire and indexing of a deceased spouse's wage base for purposes of computing a widow's benefit.

Mr. President, I think it is important to stress that the earnings sharing concept in the bill is premised upon the assumption that most married women will be in the work force for a major part of their lives. These two-wage earner families will receive benefits which fully reflect both contributions. Conversely, the one-wage earner family will receive benefits based on the actual earning records rather than that record plus a dependent spouse benefit. Hence, as part of the implementation of this proposal it will be important to apprise the public of the full effect and implications of this proposal with respect to its relationship to actual earnings. Then families will be able to plan both their work patterns and retirement expectations accordingly. At the same time, it is critical that we begin to take the steps that are essential toward reforming the system in a major way to deal with these problems so that future generations of women will be adequately and equitably treated under the social security system.

CONCLUSION

Mr. President, this is basically a relatively simple concept of equitably sharing benefits created during a marriage. The actual implementation of such a proposal will naturally entail a great number of problems and issues that must be resolved. I am convinced that the basic concept is correct and reflective of the role and needs of women in our society today, and should be adopted.

Implementation of this proposal would go a long way toward resolving the current inequities in the social security system for future generations. It would also substantially improve the adequacy of social security benefits for women who will reach age 62 at the end of this century. It is elderly women who are in the greatest need of assistance from social security and the most likely to suffer from poverty in their old age under the current system.

The social security system is vital to the security and well-being of millions of Americans—current retirees and prospective retirees. We have an obligation to protect this system, to make sure that it is fiscally stable and provides benefits in an equitable and fair fashion to those who rely upon social security in their old age. I believe that this proposal moves us a major step in that direction, and I look forward to continuing to work toward that goal.

I ask unanimous consent that the text of this bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3034

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Social Security Equity Act of 1982".

SEC. 2. Title II of the Social Security Act is amended by adding at the end thereof the following new section:

"SHARING OF EARNINGS BY MARRIED COUPLES

"SEC. 234. (a)(1) For purposes of determining the eligibility of an individual and the spouse of such individual for old-age and disability benefits and the amount of such benefits to which each is or may become separately entitled, the combined earnings of such individual and such spouse shall, to the extent that earnings are attributable to the marriage period of such individual and such spouse (as determined under paragraph (2)), be divided equally between them and shared in accordance with this section.

"(2)(A) Except as provided in subparagraph (B), for purposes of this section, the term "marriage period" means the period—

"(i) beginning with the first day of the calendar year in which the marriage of an individual and the spouse of such individual occurs, and

"(ii) ending with the last day of the calendar year preceding the earliest calendar year in which such individual or such spouse dies, they are divorced, or one of them files application for old-age or disability insurance benefits.

"(B)(i) No marriage period shall begin for any individual and the spouse of such individual if their marriage occurs after such individual or such spouse has filed an application for old-age insurance benefits.

"(ii) No marriage period shall include a period for which such individual or such spouse is entitled to disability insurance benefits or the waiting period (as defined in section 223(c)(2)) with respect to such benefits.

"(iii) A marriage period shall include the 'earliest calendar year' referred to in clause (ii) of subparagraph (A) for purposes of recomputations for that year under section 215(f)(2), in any case where an individual or the spouse of such individual dies or they are divorced, unless the survivor (where one of them dies) or either of them (where they are divorced) is remarried later in the same year.

"(b)(1) Except to the extent otherwise provided in subsections (c), (d), and (e), an individual and the spouse of such individual shall each be credited for all of the purposes of this title with wages and self-employment income, for each calendar year for which either of them is credited with any wages and self-employment income without regard to this section during their marriage period, in an amount equal to—

"(A) 50 percent of the combined total of the wages and self-employment income otherwise credited to both of them for that year if (at the close of the month for which the benefit determinations involved are being made) they are both still living, or

"(B) 100 percent of such combined total, up to but not exceeding the maximum amount that may be counted for that year without exceeding the ceiling imposed for that year under section 215(e), if (at the close of such month) one of them has died.

"(2) Nothing in this section shall affect the crediting of wages and self-employment income to any individual for any calendar year not included in a marriage period of such individual; but to the extent that wages and self-employment income are credited pursuant to this section the other provisions of this title specifying the manner in which wages and self-employment income are to be credited shall (to the extent inconsistent with this section) not apply.

"(3) Except where the context requires otherwise, for purposes of this section, the term 'spouse' includes a divorced, a surviving spouse, and a surviving divorced spouse.

"(c) Subsections (a) and (b) shall not apply with respect to the crediting of wages and self-employment income for any calendar year, in the case of any individual and the spouse of such individual, if—

"(1) as a result of the application of such subsections with respect to that year such individual or such spouse would cease to be a fully insured individual (as defined in section 214(a)); or

"(2) such individual or such spouse is applying for disability insurance benefits (or for the establishment of a period of disability) and as a result of the application of such subsection with respect to that year would cease to be insured for such benefits under section 223(c)(1) (or for such a period under section 216(i)(3)).

"(d) Subsections (a) and (b) shall not apply for purposes of determining the amount of the benefit payable to any individual for any month if—

"(1) the total amount of the wages and self-employment income credited to such individual for a marriage period, as determined without regard to this section, is higher than the total amount of the wages and self-employment income credited to such individual's spouse for that period, as so determined; and

"(2) such individual's spouse (taking subsection (a) and (b) into account) has not filed application for old-age or disability insurance benefits by the close of such month.

"(e) Notwithstanding any of the preceding provisions of this section—

"(1) benefits payable under subsection (d) or (h) of section 202 on the basis of the wages and self-employment income of any individual, and benefits payable under subsection (b), (c), (e), (f) or (g) of such section 202 (on the basis of such wages and self-employment income) to any person other than a spouse who has shared in or been credited with a part of such individual's earnings

under subsections (a) and (b) of this section, shall be determined as though this section had not been enacted if—

"(A) the application of this section has changed such individual's primary insurance amount from what it would otherwise have been; and

"(B) the crediting of wages and self-employment income to such individual and the spouse of such individual without regard to this section would increase the amount of such benefits; and

"(2) in the application of section 203(a) (relating to maximum family benefits) with respect to benefits payable on the basis of the wages and self-employment income of any individual, where all or any part of the wages and self-employment income of such individual and the spouse of such individual was credited to them in accordance with this section, the primary insurance amount of such individual (and the crediting of such wages and self-employment income) shall be determined in accordance with this section but the benefits payable to any other person on the basis of the wages and self-employment income of such individual shall be determined without regard to this section.

"(f) Notwithstanding any other provision of this title, no wife's, husband's, widow's, or widower's insurance benefit shall be paid to any individual for any month under subsection (b), (c), (e), or (f) of section 202, and no individual shall be entitled to any such benefit, unless—

"(1) the period of such individual's marriage (to the spouse or former spouse on the basis of whose wages and self-employment income such benefit is payable) ended before the effective date of this section;

"(2) such individual is under the age of 62 (and is otherwise entitled to such benefit);

"(3) such benefit is payable without regard to age and solely by reason of such individual's having a child in his or her care; or

"(4) the application of this section to such individual is prevented by subsection (c) or (d) (or by clause (i) or (ii) of subsection (a)(2)(B)).

"(g) For purposes of subsections (a)(2) and (d), an individual's application for old-age or disability insurance benefits shall be deemed to have been filed on the first day of the first month for which (by reason of the operation of section 202(j) or 223(b)) such individual is entitled to such benefits.".

SEC. 3. (a) Section 202(b)(1) of the Social Security Act is amended by striking out "The wife" and inserting in lieu thereof "To the extent permitted by section 234(g), the wife".

(b) Section 202(c)(1) of such Act is amended by striking out "The husband" and inserting in lieu thereof "To the extent permitted by section 234(g), the husband".

(c) Section 202(e)(1) of such Act is amended by striking out "The widow" and inserting in lieu thereof "To the extent permitted by section 234(g), the widow".

(d) Section 202(f)(1) of such Act is amended by striking out "The widower" and inserting in lieu thereof "To the extent permitted by section 234(g), the widower".

(e) Section 205(c)(5) of such Act is amended—

(1) by striking out "or" at the end of subparagraph (I);

(2) by striking out the period at the end of subparagraph (J) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(K) to reflect any changes in the crediting of wages and self-employment income which may be necessitated by section 234.".

(f) Section 215(b) of such Act is amended by adding at the end thereof the following new paragraph:

"(5) The determination of the wages and self-employment income to be credited to an individual under this subsection shall in all cases be made after the application of section 234.".

(B) the total benefits payable to all individuals on the basis of the wages and self-employment income of the individual upon whose disability such entitlement is based (determined without regard to the provisions of this Act) exceeds the total of benefits payable to all individuals on the basis of the wages and self-employment income of the individual upon whose disability such entitlement is based, and to the spouse of such individual, under the provisions of this Act;

the provisions of this Act shall not apply for the period during which the conditions of subparagraph (B) continue to be met and during which such individual (i) continues to be eligible for such benefit, or (ii) in the case of such an individual who continued to be eligible for such benefit until age 62, is entitled to an old-age insurance benefit.

SEC. 4. (a) Except as provided in subsection (b), the amendments made by this Act shall only apply to wages and self-employment income payable after December 31, 1983, to an individual who has not attained age 50 on or before such date, and only if—

(1) the spouse of such individual has not attained age 50 on or before such date; and

(2)(A) in the case of a benefit based upon the attainment by the wage earner of age 62, such individual and such spouse attain age 62;

(B) in the case of a benefit based upon the death of the wage earner, such death occurs after December 31, 1983 and the individual claiming such benefit attains age 62; and

(C) in the case of a benefit described in subparagraph (A) or (B) with respect to a divorced individual and spouse, the divorce occurs after December 31, 1996.

(b) In the case of a disability insurance benefit, and a widow's or widower's insurance benefit based upon disability—

(1) if an individual is entitled to such benefit before January 1, 1984, the provisions of this Act shall not apply—

(A) for the period for which such individual continues to be entitled to such benefit, and

(B) if such individual continues to be entitled to such benefit until age 62, for the period such individual is entitled to an old-age insurance benefit;

(2) if—

(A) an individual becomes entitled to such benefit after December 31, 1983, and before January 1, 1996.

By Mr. STEVENS (for himself, Mr. GORTON, and Mr. KASTEN):

S. 3038. A bill to admit a certain passenger vessel to the coastwise trade; to the Committee on Commerce, Science, and Transportation.

ENTRY OF A CERTAIN VESSEL INTO THE COASTWISE TRADE

Mr. STEVENS. Mr. President, today I am introducing a bill which would provide a Cunard America Line vessel, the *Cunard Princess*, with a waiver of section 27 of the Merchant Marine Act of 1920 to enable it to hire carriage in the coastwise trade for the purposes of transporting passengers between ports of the United States.

Mr. President, the United States has been unable to maintain a passenger carriage fleet due to the prohibitive cost of building such vessels in a U.S. shipyard.

My good friend, Senator INOUYE of Hawaii, last year introduced and secured passage of a bill that provides authority for two cruise ships that were taken out of the Jones Act trade to return to the U.S. fleet and participate in the cruise trade around Hawaii. I was happy to support Senator INOUYE's proposal and feel that we should stand behind efforts to rebuild a passenger vessel fleet under the U.S. flag in a manner that will provide American jobs and revenues to American companies as well as provide the service between ports of the United States.

Mr. President, no one understands better than I do the problems that confront the U.S.-flag passenger fleet. My home State of Alaska has operating through its waters over 40 cruise vessels of which none carry the U.S. flag. This is due to the prohibitive cost of building a new passenger vessel in the United States.

At present, the two vessels that I mentioned are the only U.S.-flag vessels operating in the coastal waters of the United States.

Mr. President, I could list a number of reasons why it is important to rebuild this U.S.-flag service. They include creating jobs for sea and shore personnel, generation of approximately $80 million annually per vessel in indirect services, development of the U.S. tourism industry, and further strengthening sealift capacity under the U.S. flag.

I should mention several restrictions that will apply following passage of this bill. This vessel will be limited to carriage of passengers solely, while including their accompanying baggage and personal property. The ownership requirements that exist in the U.S. law will be maintained, which means that the vessel will meet the U.S. ownership requirements of the Jones Act. Finally, the overhaul and maintenance work will all be performed in U.S. shipyards.

I urge the Senate to take this matter under serious consideration.

By Mr. THURMOND:

S.J. Res. 263. A joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week"; to the Committee on the Judiciary.

NATIONAL SURVEYORS WEEK

Mr. THURMOND. Mr. President, today I am introducing a joint resolution to authorize the President to

issue a proclamation designating March 13-19, 1983, as "National Surveyors Week."

This resolution recognizes the important contribution surveyors have made throughout the history of our Nation and focuses attention on the vital role the surveying profession plays in construction design, natural resource management, and protection of private property rights.

The history of surveying in the United States is very closely tied to the development of the Nation itself. Presidents Washington and Jefferson earned licenses to become county surveyors in the Colony of Virginia. In fact, Thomas Jefferson, who chaired a committee formed under the Articles of Confederation in 1784 to devise a plan for disposing of lands west of the Thirteen Colonies, is credited with developing the rectangular survey system still used today in 38 States and administered by the Bureau of Land Management. Abraham Lincoln and Millard Fillmore were also surveyors prior to their elections as President, and no less than two of our distinguished colleagues, the Senator from New Mexico (Mr. SCHMITT) and the Senator from Virginia (Mr. WARNER) have some surveying experience.

Today's surveyors utilize modern and sophisticated equipment and techniques to locate and define boundary lines; plan roads and highways, utilities, and railroad rights-of-way; navigate oceans, rivers, harbors, and the air; and locate and record natural resources.

The surveyor has special education, training, experience, and knowledge of the principles of mathematics, the related physical and applied sciences, and requirements of law for adequate evidence. Professional surveyors provide vital services that are critical to many aspects of the issues Congress addresses. Land surveying is utilized in land development and planning, natural resource management, and protection of property rights. Marine or hydrographic surveying is important to dredging and navigation, coastal barrier protection, and water resources. Engineering surveys are used to study and select sites for construction, utilities, and mining operations. Geodetic surveying, the precise positioning of points on the surface of the Earth and the determination of the exact size and shape of the Earth, is used by several Federal agencies for launching and landing long-range aircraft, missiles, and satellites.

The modern surveyor is a true professional whose judgment and expertise is needed by government at all levels and many fields in the private sector. I am pleased to offer this resolution and urge prompt action by the Senate.

Mr. President, I ask unanimous consent that this resolution appear in the RECORD immediately following my remarks.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 263

Whereas the Congress of the United States recognizes the valuable contributions of the surveying profession to history, development and quality of life in the United States of America;

Whereas the surveying profession requires special education, training, experience, and knowledge of the principles of mathematics, the related physical and applied sciences, and requirements of law for adequate evidence; and

Whereas since the early days of our Nation when many of our forefathers, including our first and third Presidents, were surveyors, the profession of surveying has continued to be uniquely qualified to determine and describe land and water boundaries for the management of our natural resources and the protection of private property rights; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is hereby authorized and requested to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week" and to urge the people of the United States to observe such week with appropriate ceremonies and activities paying tribute to professional surveyors and their contribution to society.

By Mr. HEINZ (for himself, Mr. THURMOND, Mr. CRANSTON, Mrs. HAWKINS, Mr. SPECTER, Mr. DECONCINI, Mr. HOLLINGS, Mr. CANNON, Mr. MATSUNAGA, Mr. KASTEN, Mr. BURDICK, Mr. DIXON, Mr. BAUCUS, Mr. DODD, Mr. CHAFEE, Mr. LEVIN, Mr. DURENBERGER, Mrs. KASSEBAUM, Mr. GORTON, Mr. D'AMATO, Mr. DOLE, Mr. HAYAKAWA, and Mr. BOSCHWITZ):

S.J. Res. 264. Joint resolution to designate the week of March 13, 1983, through March 19, 1983, as "National Children and Television Month"; to the Committee on the Judiciary.

NATIONAL CHILDREN AND TELEVISION MONTH

Mr. HEINZ. Mr. President, on behalf of myself and my distinguished colleagues, Senators THURMOND, CRANSTON, HAWKINS, SPECTER, DECONCINI, HOLLINGS, CANNON, MATSUNAGA, KASTEN, BURDICK, DIXON, BAUCUS, DODD, CHAFEE, LEVIN, DURENBERGER, KASSEBAUM, GORTON, D'AMATO, DOLE, HAYAKAWA, and BOSCHWITZ, I am introducing a joint resolution to designate the week of March 13 to 19, 1983 as "National Children and Television Week."

In establishing a "National Children and Television Week," I hope to stimulate a national awareness and understanding of the issues involved in children's television programing. There are many groups and individuals dedicated to improving the quality of children's programing, whose efforts to involve educators, parents, and network executives, help children make more of their television viewing experiences.

Television is more than an innocuous form of entertainment; 98 percent of American homes have at least one television set; it teaches, molds, and influences our children. Children and adolescents watch an average of 22 to 27 hours of television every week. And, if there were any doubt about the massive impact of television viewing on children, a comprehensive report by the National Institute of Mental Health erases it. NIMH's report, "Television and Behavior," emphasizes that television viewing can foster imaginative play and socialization skills, cultivate good health care, and as parents already know, influence the eating and buying habits of children. The report also confirms the negative effects of violence on children.

If we take a look at the history of children's programing. Their heroes have moved from "Howdy-Doody" to "Wonder Woman" and the "Dukes of Hazard." The world has changed and television has changed with it. However, children have not changed—perhaps they exhibit a pseudosophiscation now, but preschoolers still cannot distinguish between fantasy and reality; children still depend on adults to help them interpret their environment; and adolescents, despite their apparent rebellion, need and want the guidance of adults.

A young child's universe at one time existed solely of his family and his immediate environment. Now it includes a host of TV characters and worlds. Children once imitated their parents, and now also imitate what characters they see on TV. Parents now not only have to watch what they themselves do and say, but they also have to monitor what their children watch and hear on television.

Consequently, children's television programing has become one of the most controversial aspects of the broadcasting medium.

Children are not born with critical viewing skills; they lack organizational, integrative, and interpretive skills. We have a duty to monitor and discuss with children what they watch, but we also have a duty to seek and stimulate excellence in TV on our children's behalf.

A number of groups and individuals strive to make television for children what it should be, a vehicle for promoting the well-being of our children and their families. Groups such as the National Council for Children and Television, the NEA, PTA, ACT, WATCH, PBS, CTW, and television writers, producers, and executives deserve recognition for their excellent work.

Mr. President, I am especially pleased to be joined in sponsoring this

important joint resolution by so many of my colleagues, who share my concern about our Nation's children.

Mr. President, I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 264

Whereas television can create an intellectual and emotional environment which can play a decisive role in shaping individual development and perception;

Whereas parents and other adults should be able to look to television to provide children with true pictures of the world and positive models for behavior;

Whereas many dedicated groups and individuals strive to improve the quality of television programing viewed by children and their families; and

Whereas this Nation has a continuing responsibility to provide appropriate, stimulating programing for children and adolescents: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 13, 1983, through March 19, 1983, is designated as "National Children and Television Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate activities supporting television programs which are attentive to the needs and interests of children.

By Mr. DENTON (for himself, Mr. BYRD of Virginia, Mr. HELMS, Mr. JEPSEN, Mr. MATTINGLY, and Mr. NICKLES):

S.J. Res. 265. A joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism"; to the Committee on the Judiciary.

NATIONAL YEAR OF VOLUNTARISM

Mr. DENTON. Mr. President, with my distinguished colleagues, Senators HELMS, BYRD of Virginia, JEPSEN, NICKLES, and MATTINGLY, I introduce a Senate joint resolution to designate 1983 as the "National Year of Voluntarism." The designation will demonstrate our support for the efforts of private citizens and private enterprise to seize the priceless opportunities that now exist for voluntary activity.

This joint resolution will reinforce the call of our country's leaders for a renewal of the spirit of voluntary action among the American people. Indeed, our country was built and continues to prosper because of the efforts of individuals working together in the common struggle for life, liberty, and the pursuit of happiness. A National Year of Voluntarism will remind our people that each of us must continue to be concerned for the well-being of all, and that all of us must see our civic and human duties as including assistance to our less fortunate compatriots. The Congress has an economic, social, and moral obligation to encourage private individuals and organizations to become more involved in helping those with special needs.

The National Year of Voluntarism is part of the effort to restore to our country those characteristics that made America great, unique in all the world and in all history. The characteristics of the American system have little to do with geography or resources, wealth or ethnic composition. Our Nation is fundamentally and strikingly unique because it has a pluralistic political system, an economy based on and driven by the individual desire for self-improvement, and a legal system rooted in the Judeo-Christian ethic as manifest in the Ten Commandments and the mandate to "Love thy neighbor as thyself."

I summarize this formula as "free enterprise times compassion." Without both free enterprise and compassion, it is not the American way of life.

By "free enterprise" I do not mean just an entrepreneurial economy. I mean as well the freedom to use personal enterprise to choose and practice one's religion, to express one's views, to select and enjoy one's leisure pursuits, to choose and work at one's vocation.

By compassion, I mean the tradition of preserving, respecting, and developing the individual, a fundamental concern for the well-being of each person.

The designation of a National Year of Voluntarism will bring national attention to the essential role that compassion must play in our country. More than ever, business and industry are called upon to serve the public interest as well as private profit. Individuals also must heed the call to voluntary action. There is a wealth of untapped resources among our private citizens. A 1979 Gallup poll found that 70 percent of Americans are willing to participate in community service projects. It is estimated, however, that only 25 percent of Americans do volunteer work. I am confident that, if more people perceive that their work and help are vital, they will become involved. That is one of the major aims of the Action agency and the President's Task Force on Private Sector Initiatives.

President Reagan has eloquently expressed the challenge we face:

We have an unprecedented opportunity in America in the days ahead to build on our past traditions and the raw resources within our people. We can show the world how to construct a social system more humane, more compassionate, and more effective in meeting its members' needs than any ever known.

It is my sincere hope that the Senate will join this effort by proclaiming 1983 as the National Year of Voluntarism.

By Mr. CRANSTON:

S.J. Res. 266. A joint resolution on the Declaration on Prevention of Nuclear War; to the Committee on Foreign Relations.

DECLARATION ON PREVENTION OF NUCLEAR WAR

Mr. CRANSTON. Mr. President, last Friday an extraordinary event took place. At the invitation of the Pontifical Academy of Sciences, leading scientists from more than 30 countries met in Rome to consider the dangers of nuclear war. These scientists included the presidents and leaders of the national academies of science of many countries, including the United States and the Soviet Union. They issued a unanimous declaration on the prevention of nuclear war.

I ask unanimous consent, that the text of the declaration appear in the CONGRESSIONAL RECORD at the conclusion of my remarks.

This declaration was the culmination of careful study, beginning with a meeting convened last February in Vienna by Cardinal Konig of Austria. The effort was initiated by Father Theodore Hesburgh, president of the University of Notre Dame, who saw the need to bring the light of science to bear on the issue of nuclear peace, for the benefit of the leaders of religion and of government and of people everywhere.

The scientists met again at the Royal Society in London and then at the Pontifical Academy last June. The meeting in Rome last week has been said to be the most stellar and respected assembly of scientists ever held on a public issue. Last Friday, Pope John Paul II went to their closing meeting to hear, receive, and welcome—and underscore the importance of—this declaration.

In November, Cardinal Konig is inviting leaders of all the world's major religions to Vienna to meet with the scientists to consider the declaration and its moral implications for the whole human race.

I say this to my Senate colleagues: I call your attention to the appeal in the declaration to national leaders "to take the initiative in seeking steps to reduce the risk of nuclear war."

I urge you to read the declaration and to consider the specific steps proposed in it.

Whether you or I agree with all or just some of the findings and recommendations in this declaration, I believe they are of transcendent importance. So I invite you to join me in sponsoring the following joint resolution.

The text of the joint resolution follows:

S.J. RES. 266

Whereas leading scientists from more than 30 countries, including presidents of the scientific academies in the United States and many other nations, have met in Rome in an assembly convened by the Pontifical

Academy of Sciences to consider the unprecedented threat of nuclear war;

Whereas these leading scientists on September 24, 1982, unanimously issued a Declaration on the Prevention of Nuclear War outlining the overwhelming dangers of nuclear destruction, including the possible annihilation of all civilization;

Whereas this Declaration, as the culmination of careful study of the threat facing the world, proposes a succession of steps to curb the development, production, testing and deployment of nuclear weapons systems, and to reduce them to substantially lower levels with the ultimate aim of their complete elimination; and

Whereas the Governments of the United States and the Soviet Union have never joined to make all-out, determined, creative effort that must be undertaken to prevent nuclear war: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress of the United States—

(1) declares and affirms that a central goal of United States international security policy should be to achieve a mutually verifiable agreement for the curbing of the development, production, testing and deployment of nuclear weapons and for their reduction and ultimate elimination so that no such weapon is ever again used on the face of the earth;

(2) requests the President of the United States to give special and urgent consideration to the facts presented and the specific steps recommended in the attached Declaration on Prevention of Nuclear War, and by March 1, 1983, to report to the Congress and to the American people whether he accepts, in whole or in part, the findings and recommendations in this Declaration, and, further, to report the reasons for such acceptance or rejection.

DECLARATION ON PREVENTION OF NUCLEAR WAR, SEPTEMBER 24, 1982

(Presented to His Holiness the Pope by an assembly of Presidents of Scientific Academies and other scientists from all over the world convened by the Pontifical Academy of Sciences.)

I. PREAMBLE

Throughout its history, humankind has been confronted with war, but since 1945 the nature of warfare has changed so profoundly that the future of the human race, of generations yet unborn, is imperilled. At the same time, mutual contacts and means of understanding between peoples of the world have been increasing. This is why the yearning for peace is now stronger than ever. Mankind is confronted today with a threat unprecedented in history, arising from the massive and competitive accumulation of nuclear weapons. The existing arsenals, if employed in a major war, could result in the immediate deaths of many hundreds of millions of people, and of untold millions more later through a variety of aftereffects. For the first time, it is possible to cause damage on such a catastrophic scale as to wipe out a large part of civilization and to endanger its very survival. The large-scale use of such weapons could trigger major and irreversible ecological and genetic changes, whose limits cannot be predicted.

Science can offer the world no real defense against the consequences of nuclear war. There is no prospect of making defenses sufficiently effective to protect cities since even a single penetrating nuclear weapon can cause massive destruction. There is no prospect that the mass of the population could be protected against a major nuclear attack or that devastation of the cultural, economic and industrial base of society could be prevented. The breakdown of social organization, and the magnitude of casualties, will be so large that no medical system can be expected to cope with more than a minute fraction of the victims.

There are now some 50,000 nuclear weapons, some of which have yields a thousand times greater than the bomb that destroyed Hiroshima. The total explosive content of these weapons is equivalent to a million Hiroshima bombs, which corresponds to a yield of some three tons of TNT for every person on earth. Yet these stockpiles continue to grow. Moreover, we face the increasing danger that many additional countries will acquire nuclear weapons or develop the capability of producing them.

There is today an almost continuous range of explosive power from the smallest battlefield nuclear weapons to the most destructive megaton warhead. Nuclear weapons are regarded not only as a deterrent, but there are plans for their tactical use and use in a general war under so-called controlled conditions. The immense and increasing stockpiles of nuclear weapons, and their broad dispersal in the armed forces, increase the probability of their being used through accident or miscalculation in times of heightened political or military tension. The risk is very great that any utilization of nuclear weapons, however limited, would escalate to general nucelar war.

The world situtation has deteriorated. Mistrust and suspicion between nations have grown. There is a breakdown of serious dialogue between the East and West and between North and South. Serious inequities among nations and within nations, shortsighted national or partisan ambitions, and lust for power are the seeds of conflict which may lead to general and nuclear warfare. The scandal of poverty, hunger, and degradation is in itself becoming an increasing threat to peace. There appears to be a growing fatalistic acceptance that war is inevitable and that wars will be fought with nuclear weapons. In any such war there will be no winners.

Not only the potentialities of nucelar weapons, but also those of chemcial, biological and even conventional weapons are increasing by the steady accumulation of new knowledge. It is therefore to be expected that also the means of non-nuclear war, as horrible as they already are, will become more destructive if nothing is done to prevent it. Human wisdom, however, remains comparatively limited, in dramatic contrast with the apparently inexorable growth of the power of destruction. It is the duty of scientists to help prevent the perversion of their achievements and to stress that the future of mankind depends upon the acceptance by all nations of moral principles transcending all other considerations. Recognizing the natural rights of humans to survive and to live in dignity, science must be used to assist humankind toward a life of fulfillment and peace.

Considering these overwhelming dangers that confront all of us, it is the duty of every person of good will to face this threat. All disputes that we are concerned with today, including political economic ideological and religious ones, are small compared to the hazards of nuclear war. It is imperative to reduce distrust and to increase hope and confidence through a succession of steps to curb the development, production testing and deployment of nuclear weapons systems, and to reduce them to substantially lower levels with the ultimate hope of their complete elimination.

To avoid wars and achieve a meaningful peace, not only the powers of intelligence are needed, but also the powers of ethics, morality and conviction.

The catastrophe of nuclear war can and must be prevented. Leaders and governments have a grave responsibility to fulfill in this regard. But it is humankind as a whole which must act for its survival. This is the greatest moral issue that humanity has ever faced, and there is no time to be lost.

II

In view of these threats of global nuclear catastrophe, we declare:

Nuclear weapons are fundamentally different from conventional weapons. They must not be regarded as acceptable instruments of warfare. Nuclear warfare would be a crime against humanity.

It is of utmost importance that there be no armed conflict between nuclear powers because of the danger that nuclear weapons would be used.

The use of force anywhere as a method of settling international conflicts can entail the risk of military confrontation of nuclear powers.

The proliferation of nuclear weapons to additional countries seriously increases the risk of nuclear war and could lead to nuclear terrorism.

The current arms race increases the risk of nuclear war. The race must be stopped, the development of new more destructive weapons must be curbed, and nuclear forces must be reduced, with the ultimate goal of complete nuclear disarmament. The sole purpose of nuclear weapons, as long as they exist, must be to deter nuclear war.

III

Recognizing that excessive conventional forces increase mistrust and could lead to confrontation with the risk of nuclear war, and that all differences and territorial disputes should be resolved by negotiation, arbitration or other peaceful means, we call upon all nations:

Never to be the first to use nuclear weapons;

To seek termination of hostilities immediately in the appalling event that nuclear weapons are ever used;

To abide by the principle that force or the threat of force will not be used against the territorial integrity or political independence of another State;

To renew and increase efforts to reach verifiable agreements curbing the arms race and reducing the numbers of nuclear weapons and delivery systems. These agreements should be monitored by the most effective technical means. Political differences or territorial disputes must not be allowed to interfere with this objective;

To find more effective ways and means to prevent the further proliferation of nuclear weapons. The nuclear powers, and in particular the superpowers, have a special obligation to set an example in reducing armaments and to create a climate conducive to non-proliferation. Moreover, all nations have the duty to prevent the diversion of peaceful uses of nuclear energy to the proliferation of nuclear weapons;

To take all practical measures that reduce the possibility of nuclear war by accident, miscalculation or irrational action.

To continue to observe existing arms limitation agreements while seeking to negotiate broader and more effective agreements.

Finally, we appeal:

1. To national leaders, to take the initiative in seeking to reduce the risk of nuclear war, looking beyond narrow concerns for national advantage; and to reject military conflict as a means of resolving disputes.

2. To scientists, to use their creativity for the betterment of human life, and to apply their ingenuity in exploring means of avoiding nuclear war and developing practical methods of arms control.

3. To religious leaders and other custodians of moral principles, to proclaim forcefully and persistently, the grave human issues at stake so that these are fully understood and appreciated by society.

4. To people everywhere, to reaffirm their faith in the destiny of humankind, to insist that the avoidance of war is a common responsibility, to combat the belief that nuclear conflict is unavoidable, and to labor uncreasingly toward the failure of generations to come.

PARTICIPANTS IN CONFERENCE ON NUCLEAR WAR—PONTIFICAL ACADEMY OF SCIENCES, 23-24 SEPTEMBER 1982

E. Amaldi, Italy; I. Badran, Egypt; A. Balevski, Bulgaria; A. Bekoe, ICSU; F. Benvenuti, Italy; C. Bernhard, Sweden; O. Bikov, USSR; B. Bilinski, Poland; C. Chagas, Brazil; E. De Giorgi, Italy; B. Dinkov, Bulgaria; G. hambraeus, Sweden; T. Hesburgh, USA; H. Hiatt, USA; D. Hodgkin, PUGWASH; S. Hsieh, Taipei; A. Huxley, England; S. Iijima, Japan; S. Isaev, USSR; P. Jacquinot, France; W. Kalweit, GDR; M. Kapi, Pakistan; S. Keeny, USA; K. Komarek, Austria; F. Konig, Austria; J. Labarbe, Belgium; J. Lejeune, France; L. Leprince-Ringuet, France; R. Levi Montalcini, Italy.

ADDITIONAL COSPONSORS

S. 27

At the request of Mr. DOLE, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 27, a bill to amend the Internal Revenue Code of 1954 to make permanent the allowance of a deduction for eliminating architectural and transportation barriers for the handicapped and to increase the amount of such deduction from $25,000 to $100,000.

S. 1342

At the request of Mr. ROTH, his name was added as a cosponsor of S. 1342, a bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax.

S. 2357

At the request of Mr. LUGAR, the names of the Senator from Alabama (Mr. HEFLIN) and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 2357, a bill to prohibit export restrictions that interfere with existing contracts for the exportation of such commodities.

S. 2466

At the request of Mr. HATCH, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 2466, a bill to amend the Tariff Schedules of the United States to provide for rates of duty on imported roses consistent with those maintained by the European Economic Community on imports of roses from the United States and other nations.

S. 2619

At the request of Mr. TSONGAS, the name of the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 2619, a bill to amend the Energy Security Act to extend the financing authority of the Synthetic Fuels Corporation to include projects for district heating and cooling and for municipal waste energy recovery, and for other purposes.

S. 2702

At the request of Mr. ANDREWS, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 2702, a bill to amend section 8(a) of the Small Business Act to treat businesses owned by Indian tribes as socially and economically disadvantaged small business concerns.

S. 2816

At the request of Mr. STAFFORD, the names of the Senator from Florida (Mrs. HAWKINS), the Senator from Indiana (Mr. QUAYLE), and the Senator from Maryland (Mr. SARBANES) were added as a cosponsors of S. 2816, a bill to amend chapter 89 of title 5, United States Code, to require nondiscriminatory health benefits plans for Federal employees.

S. 2901

At the request of Mr. DOLE, the name of the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 2901, a bill to establish a National Commission on Neurofibromatosis.

S. 2918

At the request of Mr. CHAFEE, the names of the Senator from Texas (Mr. TOWER), the Senator from Illinois (Mr. PERCY), the Senator from Nevada (Mr. CANNON), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of S. 2918, a bill to permit the investment of employee benefit plans in residential mortgages.

S. 2919

At the request of Mr. LUGAR, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 2919, a bill to help insure the Nation's independent factual knowledge of Soviet bloc countries, to help maintain the national capability for advanced research and training on which that knowledge depends, and to provide partial financial support for national programs to serve both purposes.

S. 2948

At the request of Mr. DOLE, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 2948, a bill to promote the development of nonanimal methods of research experimentation, and testing, and to insure humane care of animals used in scientific research, experimentation, and testing.

SENATE JOINT RESOLUTION 188

At the request of Mr. INOUYE, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of Senate Joint Resolution 188, a joint resolution to authorize and request the President to designate March 1, 1983, as "National Recovery Room Nurses Day."

SENATE JOINT RESOLUTION 190

At the request of Mr. BURDICK, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of Senate Joint Resolution 190, a joint resolution to authorize and request the President to designate "National Family Week."

SENATE JOINT RESOLUTION 200

At the request of Mr. GLENN, the name of the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of Senate Joint Resolution 200, a joint resolution to designate October 1982 as "National Car Care Month."

SENATE JOINT RESOLUTION 225

At the request of Mr. EAGLETON, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of Senate Joint Resolution 225, a joint resolution to provide for the designation of the week beginning on November 21, 1982, as "National Alzheimer's Disease Week."

SENATE JOINT RESOLUTION 231

At the request of Mr. JOHNSTON, the names of the Senator from Pennsylvania (Mr. HEINZ), the Senator from Washington (Mr. JACKSON), the Senator from Texas (Mr. BENTSEN), the Senator from South Carolina (Mr. THURMOND), the Senator from Florida (Mr. CHILES), the Senator from Maryland (Mr. MATHIAS), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of Senate Joint Resolution 231, a joint resolution to authorize and request the President to designate the week of October 11, 1982, through October 17, 1982, as "National Get High on Life Week."

SENATE JOINT RESOLUTION 237

At the request of Mr. CHILES, the names of the Senator from California (Mr. CRANSTON), the Senator from

Hawaii (Mr. INOUYE), the Senator from Rhode Island (Mr. PELL), the Senator from Oklahoma (Mr. BOREN), the Senator from Connecticut (Mr. WEICKER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Texas (Mr. BENTSEN), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of Senate Joint Resolution 237, a joint resolution designating November 14, 1982, as "National Retired Teachers Day."

SENATE JOINT RESOLUTION 244

At the request of Mr. WARNER, the names of the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as "Public Employees Appreciation Day."

SENATE JOINT RESOLUTION 246

At the request of Mr. LONG, the names of the Senator from Alabama (Mr. DENTON), the Senator from Ohio (Mr. GLENN), the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of Senate Joint Resolution 246, a joint resolution to authorize and request the President of the United States to issue a proclamation designating the first week in October for the calendar years 1982, 1983, and 1984 as "National Port Week."

SENATE JOINT RESOLUTION 249

At the request of Mr. KENNEDY, the names of the Senator from Montana (Mr. BAUCUS), the Senator from Nevada (Mr. LAXALT), the Senator from Illinois (Mr. PERCY), the Senator from South Carolina (Mr. THURMOND), the Senator from Georgia (Mr. NUNN), the Senator from Ohio (Mr. GLENN), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 249, a joint resolution to provide for the designation of the month of October 1982 as "National Spinal Cord Injury Month."

SENATE CONCURRENT RESOLUTION 122

At the request of Mr. BURDICK, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of Senate Concurrent Resolution 122, a concurrent resolution relating to the processed product share of U.S. agricultural exports.

SENATE RESOLUTION 239

At the request of Mr. WARNER, the name of the Senator from Delaware (Mr. ROTH) was added as a cosponsor of Senate Resolution 239, a resolution disapproving the proposal to defer budget authority for Veterans' Administration health-care facility construction while the Administration "considers alternative methods for providing readily available quality medical care for eligible veterans."

AMENDMENT NO. 3621

At the request of Mr. METZENBAUM, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of amendment No. 3621 proposed to House Joint Resolution 599, a joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes.

AMENDMENT NO. 3629

At the request of Mr. STAFFORD, the names of the Senator from Connecticut (Mr. WEICKER) and the Senator from Maryland (Mr. MATHIAS) were added as cosponsors of amendment No. 3629 intended to be proposed to H.R. 5203, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act.

AMENDMENT NO. 1310

At the request of Mr. METZENBAUM, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a consponsor of unprinted amendment No. 1310 proposed to House Joint Resolution 599, a joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes.

AMENDMENT NO. 1376

At the request of Mr. THURMOND, the name of the Senator from Oregon (Mr. PACKWOOD) was added as a consponsor of unprinted amendment No. 1376 proposed to S. 2420, a bill to protect victims of crime.

AMENDMENT NO. 1384

At the request of Mr. SCHMITT, the names of the Senator from Delaware (Mr. ROTH), and the Senator from Illinois (Mr. DIXON) were added as cosponsors of amendment No. 1384 proposed to S. 2375, a bill to extend by 5 years the expiration date of the Defense Production Act of 1950.

SENATE RESOLUTION 491—RESOLUTION RELATING TO DIFFERENTIAL EXCHANGE RATES IN MEXICO

Mr. DECONCINI submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 491

Resolved, That it is the sense of the Senate that the President should pursue all available diplomatic means to persuade the Government of Mexico to eliminate the system of differential foreign exchange rates it has recently instituted.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. DECONCINI. Mr. President, I am today submitting a sense of the Senate resolution calling on the administration to take advantage of diplomatic opportunities that now exist to seek the elimination of the system of dual exchange rates the Governemt of Mexico has recently instituted. Under that system, payments for essential imports and for external bank debts are converted at a rate of 50 pesos per dollar. The exchange rate for all other types of transactions is set at 70 pesos per dollar.

Now, Mr. President, anyone familiar with the full dimensions of the Mexican financial crisis can appreciate why that government would find such a structure useful or at least convenient. Economizing on the use of scarce foreign exchange reserves is understandably attractive under the circumstances. The flow of essential imports—however defined—must obviously be maintained, if economic growth and stability are to be restored. And with the highest external debt in the world—$80 to $85 billion—Mexico must, of course, be solicitous of the good opinion of its principal creditors, especially the private banks.

Having said this, though, the inescapable fact is that exchange rate differentials are fundamentally unsound. There is, in the long term, no economic justification for them. Indeed, they are counterproductive, inasmuch as they inevitably create distortions and dislocations. But—most important—differential exchange rates are inherently unfair. They discriminate on the basis of politically expedient criteria among foreign nationals with legitimate economic interests.

The Mexican case is a perfect example. What the current dual exchange system means in practice, Mr. President, is that those firms and/or individuals who can somehow get their products on the list of essential imports along with the international bankers, have an almost 30-percent advantage in terms of real economic resources. More to the point, individuals and firms who are not so favored, in effect are required to subsidize those who are by roughly this amount.

This is simply unfair and we should do all in our power to persuade the Mexican authorities to reevaluate their policy in this regard.

It is my understanding that the administration has raised this problem privately with the Mexican Government. I believe adoption of this amendment will help to strengthen the U.S. negotiating position on the issue and I hope my colleagues will join me in assuring its early passage.

SENATE RESOLUTION 492—RELATING TO CERTAIN CLAIMS INVOLVING THE SENATE

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 492

Resolved, That the Sergeant at Arms of the Senate, in accordance with regulations prescribed by the Attorney General and such regulations as the Committee on Rules and Administration may prescribe, may consider and ascertain and, with the approval of the Committee on Rules and Administration, determine, compromise, adjust, and settle, in accordance with the provisions of chapter 171 of title 28, United States Code,

any claim for money damages against the United States for injury or loss of property or personal injury or death caused by the negligent or wrongful act or omission of any Member, officer, or employee of the Senate while acting within the scope of his office or employment, under circumstances where the United States, if a private person, would be liable to the claimant in accordance with the law of the place where the act or omission occurred. The Committee on Rules and Administration may, from time to time, delegate any or all of its authority under this resolution to the Chairman. Any compromise, adjustment, or settlemant of any such claim not exceeding $2,500 shall be paid from the contingent fund of the Senate on a voucher approved by the chairman of the Committee on Rules and Administration.

SEC. 2. The Committee on Rules and Administration is authorized to issue such regulations as it may determine necessary to carry out the provisions of this resolution.

SENATE RESOLUTION 493—AUTHORIZING THE PRINTING OF PRAYERS BY THE CHAPLAIN OF THE SENATE

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution, which was placed on the calendar:

S. RES. 493

Resolved, That there be printed with an appropriate illustration as a Senate document, the prayers by the Reverend Edward L. R. Elson, S.T.D., the Chaplain of the Senate, at the opening of the daily sessions of the Senate during the Ninety-sixth and Ninety-seventh Congresses, together with any other prayers offered by him during that period in his official capacity as Chaplain of the Senate; and that there be printed and bound four hundred additional copies of such document for the use of the Joint Committee on Printing.

SEC. 2. The copy for the document authorized in section 1 shall be prepared under the direction of the Joint Committee on Printing.

SENATE RESOLUTION 494—RELATING TO RHODES TAVERN

Mr. MATHIAS submitted the following resolution, which was referred to the Committee on Energy and Natural Resources:

S. RES. 494

Whereas Rhodes Tavern, dating to 1799, is the oldest District of Columbia and National Register of Historic Places landmark, requiring preservation if possible, between the White House and the Capitol, and the last remaining example of the urban design standards for downtown Washington recommended by city planner Pierre L'Enfant and promulgated by Presidents George Washington and Thomas Jefferson;

Whereas citizens met at Rhodes Tavern, the city of Washington's first town hall, 1800-1808, to petition for an elected local government and representation in Congress soon after Congress withdrew the local franchise in 1801, and other meetings which resulted in the establishment of the first public schools, theater and marketplace in the city of Washington;

Whereas Rhodes Tavern was a polling place in the first municipal elections in the city of Washington on June 7, 1802;

Whereas Rhodes Tavern is associated with the civic life of James Hoban, White House architect, numerous Presidents and Members of Congress and is the only surviving early congressional boardinghouse;

Whereas Rhodes Tavern is the only building to remain on the inaugural route from the day that President Jefferson began the tradition of the inaugural parade;

Whereas the city of Washington needs a central landmark that for posterity will symbolize its local and national historic origins, continuity, and identity, and since Rhodes Tavern is of unquestionable historic value: Now, therefore, be it

Resolved, That the Senate expresses its strong interest and concern in preservation and restoration, for the benefit and inspiration of present and future generations, of Rhodes Tavern, a building of unique historical significance located in the District of Columbia near the White House, opposite the Treasury Department Building at the northeast corner of Fifteenth and F Streets, northwest; and encourages every effort be made by the National Trust for Historic Preservation, the National Capital Planning Commission, the Commission of Fine Arts, the Mayor and Council of the District of Columbia, and interested local and national organizations for the onsite preservation of Rhodes Tavern and its restoration to its original condition, or as near thereto as possible.

SEC. 2. The Secretary of the Senate shall transmit copies of his resolution to the National Trust for Historic Preservation, the National Capital Planning Commission, the Commission of Fine Arts, the Mayor and Council of the District of Columbia.

AMENDMENTS SUBMITTED FOR PRINTING

NONANIMAL METHODS OF RESEARCH

AMENDMENT NO. 3630

(Ordered to be printed and referred to the Committee on Labor and Human Resources.)

Mr. DOLE submitted an amendment intended to be proposed by him to the bill (S. 2948) to promote the development of nonanimal methods of research, experimentation, and testing, and to assure humane care of animals used in scientific research, experimentation, and testing.

● Mr. DOLE. Mr. President, today I am submitting an amendment to S. 2948, which would delete the mandatory accreditation requirement for research labs. Instead the Secretary of Health and Human Services would do a study of not more than 1 year to determine the impact of mandatory accreditation on research labs.

Following the study, the Secretary will issue mandatory regulations for implementing the lowest cost phases of accreditation and would establish goals and procedures for implementing the higher cost aspects of accreditation such as structural changes.

If the Secretary determines that accreditation costs are too high, he can waive the germane regulations. This amendment will satisfy the concerns of those who feel that costs of mandatory accreditation to research facilities will be too high. Yet it insures that proper and reasonable steps will be taken toward accreditation.

I also have two technical amendments. The first defines the term "large numbers of animals" and the second would delete language relating to the research background of the nonmember on the Animal Studies Committee.●

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT AMENDMENTS

AMENDMENT NO. 3631

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself and Mr. WEICKER) submitted an amendment intended to be proposed by them to the bill (H.R. 5203) to amend the Federal Insecticide, Fungicide, and Rodenticide Act.

AMENDMENT NO. 3632

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself and Mr. CRANSTON, Mr. PROXMIRE, Mr. WEICKER, Mr. MATHIAS, and Mr. BAUCUS) submitted an amendment intended to be proposed by them to the bill H.R. 5203, supra.

AMENDMENT NO. 3633

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself and Mr. CRANSTON, and Mr. WEICKER), submitted an amendment intended to be proposed by them to the bill H.R. 5203, supra.

AMENDMENT NO. 3634

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself, Mr. MATHIAS, and Mr. WEICKER), submitted an amendment intended to be proposed by them to the bill H.R. 5203, supra.

AMENDMENT NO. 3635

(Ordered to be printed and to lie on the table.)

Mr. STAFFORD (for himself, Mr. LEAHY, and Mr. WEICKER), submitted an amendment intended to be proposed by them to the bill H.R. 5203, supra.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY AND RELATED AGENCIES APPROPRIATIONS ACT, 1983

AMENDMENT NO. 3636

(Ordered to be printed and lie on the table.)

Mr. RIEGLE submitted an amendment intended to be proposed by him to the bill (S. 2956) making appropriations for the Departments of Com-

merce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

Mr. RIEGLE. Mr. President, I am introducing today an amendment that would enable the Economic Development Administration (EDA) to continue providing business loans during the fiscal year that begins today.

As you know, Mr. President, the Regan administration has tried for almost 2 years to terminate EDA. Businessmen as well as State and local officials from across the country have protested and have pointed out to Congress that EDA grant, loan, and guarantee assistance has been vital to the expansion of employment and business in many distressed areas.

In response, Congress provided about $200 million to support EDA activities at a reduced level in fiscal 1982. Included in that amount, was authority to provide $30 million in business development loans. Unfortunately, when fiscal year 1982 ended at midnight last night, the administration had approved only $14.2 million in business loans; $15.8 million of the authority provided by Congress expired under existing law.

The House and Senate versions of the State, Commerce, Justice Appropriations Act, 1983 include $198.5 million for FDA programs; $168.5 million of that amount would be an appropriation of new budget authority; $30 million would be provided by making available funds in the economic development fund. However, no funds are now provided for business loans.

When the full Senate considers the State, Commerce, Justice Appropriations Act, I intend to offer an amendment that would make available from the revolving fund an additional $15.8 million for business loans in fiscal 1983.

This amendment would simply insure that business loan funds, which Congress has already appropriated, would remain available after the close of fiscal 1982. My amendment requires no fiscal year 1983 budget authority and no increase in fiscal 1983 outlays above the amounts that Congress has already decided to provide and has already anticipated in the first budget resolution for fiscal year 1983.

I know from direct experience that thousands of jobs could depend upon continuing to make these loan funds available, and I urge my colleagues to join in support of this amendment.

Mr. President, I ask unanimous consent to have the text of the amendment printed at this point in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 3636

On page 18 line 10 strike "$30,000,000" and insert: "$45,800,000, of which $15,800,000 shall be available for new business loans".

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee will conduct a hearing on, "The Current Petroleum Marketing Practices and Their Impact on Small Business" on Tuesday, October 12, commencing at 10 a.m., in room 2541 Dirksen Federal Building, 219 South Dearborn Street, Chicago, Ill. For further information, please contact Jack Gleason of the Small Business Committee staff at 224-3794.

Mr. President, I would like to announce that the Senate Small Business Committee will conduct a second hearing on, "Obstacles to Exporting Faced by Small Businesses" on Thursday, October 21, 1982, commencing at 1:30 p.m., in the Spokane City Council Chambers, Spokane City Hall, 808 Spokane Falls Boulevard, Spokane, Wash. Senator SLADE GORTON will chair the hearing. For further information, please contact Anne Sullivan of the Small Business Committee staff at 224-3188.

SUBCOMMITTEE ON URBAN AND RURAL ECONOMIC DEVELOPMENT

Mr. WEICKER. Mr. President, I would like to announce that the Subcommittee on Urban and Rural Economic Development of the Senate Small Business Committee will conduct a second hearing on "The Future on Small Business in the Face of Urban Crime," on Monday, October 18, 1982, commencing at 10 a.m., in hearing room B of the Legislative Office Building of the State Capitol, Albany, N.Y. Senator ALFONSE D'AMATO will chair the hearing. For further information, please contact Mike Haynes of the Senate Small Business Committee at 224-5175.

Mr. President, I would like to announce that the Subcommittee on Urban and Rural Economic Development of the Senate Small Business Committee will conduct a third hearing on "The Future of Small Business in the Face of Urban Crime," on Monday, November 15, 1982, commencing at 10 a.m., in San Francisco, Calif. The location of the hearing room will be announced at a later date. Senator ALFONSE D'AMATO will chair the hearing. For further information, please contact Mike Haynes of the Senate Small Business Committee staff at 224-5175.

ADDITIONAL STATEMENTS

SOCIAL SECURITY DISABILITY REVIEW

● Mr. DURENBERGER. Mr. President, I am deeply concerned with the growing problems in our Social Security Administration's disability review process. Recent items in the Philadelphia Inquirer illustrate the problems beneficiaries are experiencing as a result of our present review process. The items support legislation introduced by my colleague from Pennsylvania, Senator HEINZ that would correct some of the present inequities within the system. I would like to commend Senator HEINZ for his contribution and leadership in this issue of disability review.

I ask the Senate to acknowledge, as the Philadelphia Inquirer has, the contribution of Senator HEINZ by printing these articles in the RECORD.

The articles follow:

[From the Philadelphia Inquirer, Sept. 24, 1982]

DISABILITY REFORMS ARE A SHAM

To the Editor: the Social Security Administration, as you recently reported on Page One, has announced "reforms" in its reviews of disability cases. They are a sham.

The decision not to send thousands of new cases to a number of state disability determination agencies for reviews during the month of September simply acknowledges that many states, like Pennsylvania, already have enormous backlogs. Tens of thousands of cases are piled up in the "in" boxes of state agencies that never would have been touched because of lack of staff.

The Social Security Administration, like the rogue elephant it has become, is still going ahead with plans to dump 600,000 new cases upon states for review this year. It must surely know that this flood will guarantee tens of thousands of unfair, superficially processed cessations of benefits. As experience has shown, this will also be followed by a reversal rate of 67 percent after appeals, which are settled months later, after needless suffering and more suicides.

What needs to be done immediately is to adopt Sen. John Heinz' idea in Senate Bill 2730, which calls for a complete halt to all cessations of benefits except in clear-cut cases until January 1983. This will allow sufficient time to correct the structural inequities in the system, and thereafter the spacing out of reviews over a much longer period of time.

The second "reform" of having face-to-face interviews with beneficiaries, to avoid publicized terminations of beneficiaries in iron lungs, is also inadequate because these interviews will occur only with local Social Security district office staff. They will not be held with the state disability adjudicators, who are the real decision-makers who will continue to review issues such as pain and the severity of mental and physical impairments without ever seeing the beneficiary.

The announced function of merely explaining the process to reduce "anxiety" is a clever public relations trick. The trick is to fend off the more important reform: precluding state agency adjudicators who sit in their Kafkaesque cubicles from making life and death decisions about people they never meet.

Beneficiaries have real reason to continue to feel anxious. They know that an arbitrary and punitive determinations process has not been materially altered.

It falls to Congress, in particular through the excellent proposals already introduced in the Senate by Sen. Heinz and others, to protect disabled people from the very agency established to maintain their safety-net.

SIEGLINDE SHAPIRO,
Pennsylvania Coalition of Citizens with Disabilities, Philadelphia.

[From the Philadelphia Inquirer, Nov. 18, 1982]

WIELDING AX IS NO WAY TO TRIM DISABILITY ROLLS

Her name was Kathleen Mitchell McGovern. She was 40 years old. For the past nine years, she had been in and out of hospitals, diagnosed as a paranoid schizophrenic. Because of her illness, she had been receiving $297 a month in Social Security disability payments.

Last January, she received a letter from the Social Security Administration, advising her that on the basis of "the medical evidence in your file . . . your condition would not prevent you from working." In May, an administrative law judge sent her a form letter that she interpreted to mean that her benefits were going to be cut off.

A few days later, Kathleen Mitchell McGovern, who had shown suicidal tendencies, was found dead in her room on Fifth Street near Reed in Philadelphia.

An unusual case? Last November, a former machine shop foreman, the father of three, killed himself with a shotgun outside the Social Security office in Lansing, Mich. He left a note to his family, saying, "They cut my Social Security. They are playing God. I can't live on welfare." A month later, an Iowa man with diabetes, heart problems and eye trouble, unable to work as a truck driver, killed himself after a year of trying to get disability benefits.

In yet another instance, a Michigan man, diabetic, a stroke victim and "blind for all practical purposes," according to a Social Security doctor who had given him a 15-minute examination, had his benefits cut off and died of a heart attack while appealing the decision.

Plainly, this is not what the Congress intended in 1980 when it directed the Social Security Administration to review the status of disabled beneficiaries at least once every three years.

Congress' goal, reasonable enough, was to trim the $18 billion a year disability program by removing from the rolls those able to work, not those unable. Coming into office, however, the Reagan administration interpreted the directive as a mandate to take an ax to the disability program and slash it wholesale. It has done so with such misplaced zeal that two-thirds of those whose benefits have been terminated have had them reinstated upon appeal—but appeals that have lasted for many months, during which the individuals have been deprived of the benefits owed them.

"The reviews," as Sen. William Cohen (R., Maine) declared, "have created chaos and inflicted pain that Congress neither envisioned nor desired when it enacted what was intended to be a sound management tool."

Now, reacting to congressional criticism, the Social Security Administration has announced a moratorium on new cases in a dozen states, including Pennsylvania, New Jersey and Delaware. That's a beginning, but it's not enough. In effect, the Social Security Administration is only telling states, snowed under by reviews, not to embark on any new ones until they dig themselves out.

What is needed is a comprehensive reform, as spelled out in legislation introduced by Sen. John Heinz (R., Pa.), Sen. Cohen and other senators on both sides of the aisle.

Such a reform must include, at a minimum, a requirement that disability payments are not to be cut off merely on the say-so of a bureaucrat who looks at the recipient's file. It must include face-to-face interviews, by the decision-makers, before any decision to terminate is made. Individuals must not have their benefits cut off before they have had a hearing before an impartial administrative law judge. The burden of proof that benefits should be discontinued must shift from the recipient to the government.

No one will quarrel with the aim of removing from the disability rolls those who are not eligible, but the way to get at them is not by swinging an ax that chops off the great majority who are truly disabled and worthy of help.●

TAIWAN RELATIONS ACT

● Mr. SYMMS. Mr. President, I ask that the following article from the summer issue of "International Security Review," entitled, "Divided China: The View From Taipei," by James C. Y. Soong, be printed in the CONGRESSIONAL RECORD. This article presents a very balanced discussion of the Taiwan Relations Act under both the Carter and the Reagan administrations. Although the article was written in early spring 1982 prior to the United States-People's Republic of China communique in August, it remains a highly relevant expression of the views of the Republic of China about relations with the United States. I believe that the Soong article contributes some important perspectives to the continuing controversy in the United States about the United States-People's Republic of China communique of August.

The article follows:

DIVIDED CHINA: THE VIEW FROM TAIPEI

(By James C. Y. Soong)

President Jimmy Carter's decision on December 15, 1978, to recognize communist China and terminate diplomatic and military ties with the Republic of China on Taiwan (ROC) carries in its wake far reaching strategic, political, economic, legal, and moral consequences. While the benefits accruing to the United States from its recognition of the Chinese communist regime remain speculative, some of the costs are quite concrete.[1] The U.S. Congress, in a bipartisan move to mend the damage done to the Republic of China's security and international political standing, and also to reaffirm American national interest in this part of the world, decided to intervene to at least partially restore the situation which had existed prior to the derecognition of the ROC government. Congress was also annoyed by the Administration's failure to consult Congress before taking such a momentous step.[2] Thus by its recognition of Peking solely on Peking's terms, the Carter Administration not only created ripples in the Taiwan Straits but also added to the general difficulty President Carter's foreign policies were having with the Congress. It was in this context that the Congress decisively rejected the arrangements proposed by President Carter for maintaining future relations with the ROC. The bill (S. 245) which was submitted by the Carter Administration set the guidelines for continuing commercial, cultural, and other relations between the people of the United States and the people of Taiwan. Unfortunately, however, it said nothing about the future security of the Republic of China, nor what U.S. policy would be toward helping preserve the independence and territorial integrity of its long-term ally. This omission, to which Congress strongly objected, was undoubtedly intended to avoid adverse reaction from Peking.

After weeks of heated and sometimes emotional debate between Administration representatives and Members of Congress, the Senate by a 90-6 vote and the House of Representatives by a 345-55 vote passed the Taiwan Relations Act (TRA) on March 29, 1979. The TRA (Public Law 98-6) contains provisions greatly superior to those of the original bill submitted by the White House. The improvement is particularly evident in Section 2, reaffirming continuing American interest in and concern for the security of Taiwan. It is significant that Section 2 defines America's interests in the security of Taiwan in rather broad and flexible terms. Some analysts have said this would give the United States a number of options in the event of a crisis threatening the security of Taiwan. Others have contended that the ambiguous wording of the security provisions might not have a deterrent effect on Peking, which has adamantly refused to renounce the use of force against Taiwan. That the security provisions have invoked wide speculation indicates that some major problems involved in the security of the ROC have not been resolved.[3]

Nevertheless, through the intervention of the Congress, a serious political crisis was averted in U.S.-ROC relations following the switching of American recognition from Tapei to Peking. The friendship between our two countries was preserved by the intent of the Congress and a large segment of the American people to place the new relationship between the two former allies on the right track. In the words of former Senator Jacob K. Javits, Republican of New York, most Members of Congress were prepared to scrap the arrangement with Peking unless the TRA contained an American obligation to help safeguard security and to assist the ROC to maintain defense capability. Put briefly, the Taiwan Relations Act established the basic principle and spirit that substantial relations between the United States and the Republic of China should continue without interruption and that formal recognition of communist China by the United States should not in any way jeopardize the existing relationship between Washington and Taipei. The significance of the TRA must be understood in this context. President Carter belatedly recognized this fact. Accordingly, although clearly he did not favor the passage of the Taiwan Relations Act, he did not veto it or even actively oppose it. Indeed, it seems likely that he realized that he had underestimated American feelings of friendship for the Republic of China and the Chinese people.[4]

THE TAIWAN RELATIONS ACT DURING THE CARTER ADMINISTRATION

In such "enabling legislation" as the Taiwan Relations Act, however, Congress

---

Footnotes are at the end of article.

only stipulates the guiding principles and authorizes the President to prescribe such rules and regulations as he may deem appropriate to carry out the purposes of the Act.[5] Hence, the effective implementation of the TRA rests largely on the good faith of the Executive Office. Although Congress has the authority to monitor the implementation of the TRA, during the Carter Administration it was presented with a series of faits accompli which ran counter to both the letter and spirit of the Act. Failure to consult the Congress was undoubtedly due to the fact that decisions were made by a handful of high officials in the executive branch who were overly sensitive to any adverse reactions from Peking.[6] Thus, while both in substance and in spirit, the Taiwan Relations Act provides the legal basis for the Executive Office to carry on strong and substantial relations between the United States and the Republic of China, excessive sensitivity to even the slightest sign of protest from Peking led the Carter Administration to avoid even the appearance of a strong commitment to the legislation governing the relations between our two countries. Since the President is the chief executor of the Taiwan Relations Act, his action or inaction became crucial in facilitating or impeding implementation of the Act. This was especially important with regard to implementation of the security provisions.

President Carter's signing of the Executive Order on June 22, 1979 for implementation of the Taiwan Relations Act formally laid the legal basis for the new U.S.-ROC relationship. This arrangement for conducting "unofficial" U.S. relations with the ROC is unique in the annals of American diplomacy. Although the TRA provides a framework for strong and substantial relations between Washington and Taipei, the president and his chief advisers where determined not to impair the broad strategic and other "parallel interests" Washington had established with Peking. Given this viewpoint, it is not surprising that the American government took a series of actions in 1979 and 1980 which, in my opinion, were harmful to the security situation in East Asia and which naturally caused deterioration in relations between our two governments. For example:

Washington imposed a one-year moratorium on negotiation of arms sales to the ROC through 1979 despite the fact that the U.S.-ROC Mutual Defense Treaty remained in force during that year. When on January 3, 1980, the State Department announced the approval of arms sales to the ROC, it sanctioned only 6 of the 18 defense items that the ROC had requested. The remaining items were denied or a final decision was deferred until some unspecified time. The items denied to the ROC included sophisticated weaponary indispensable to update its aging arsenal: an advanced jet fighter to replace existing F-104s, F-5As, and F-5Es, the Harpoon missile, the Standard air defense missile, and armored personnel carriers.[7] The decision not to provide these items stemmed in large part from the Administration's determination to avoid a rebuff from Peking. The Senate Foreign Relations Subommittee on East Asian and Pacific Affairs, in a June 1980 fact-finding report, indicated that such an overriding concern over Peking's reactions conflicted with the intent of the Taiwan Relations Act.[8]

The American government terminated the U.S.-ROC Air Transport Agreement, signed on December 20, 1946, in Nanking, although the agreement was amended on December 20, 1950, and October 22, 1969, to apply only to the territory of Taiwan. Washington could have entered into an air agreement with Peking without terminating the air agreement with Taipei and replacing it with a new "unofficial" agreement[9] This action violated Section 4(D) of the TRA, which specifically stated that all existing agreements and treaties concluded prior to January 1, 1979, would remain in force.

The Carter Administration did not protest when the International Monetary Fund and the World Bank decided to expel the ROC in order facilitate Peking's admission to those organizations. It may have been beyond the capability of the United States to prevent the expulsion of the ROC from the two international financial institutions. An indication of American concern, however, would at least have reassurd Taipei of the Administration's intention to support the ROC's status in international organizations. Section 4(D) of the TRA states that the United States should not support the exclusion or expulsion of Taiwan from continued membership in any international financial institution or other international organization. Thus the American decision not to contest the decisions of the Fund and the World Bank clearly contradicted Congressional intent as expressed in the Taiwan Relations Act.

The State Department intervened with a letter to the U.S. Olympic Committee with regard to the decision of the International Olympic Committee concerning the ROC's eligibility for the 1980 Olympic games. When the ROC Olympic Committee filed suit to enter the Lake Placid games in New York with its traditional emblems, the Justice Department was asked by the State Department in intercede in appellate proceedings on grounds that the "Taiwan issue" was political rather than legal.[10] The ROC Olympic team was subsequently prohibited from participating. This action by the State Department did not conform to the provisions of Section 4(D) of the TRA.

In January 1980 the Department of State instructed the U.S. Customs Office that no commodities bearing the label "Made in Republic of China" would be admitted into the United States after August 1, 1980. As protests arose on Capitol Hill and the media focused on the issue, the State Department first extended the effective date for the embargo to December 1, 1980, and eventually rescinded the ruling. The action by the State Department was not only unnecessary but had it been carried out, it could have disrupted commerce and caused considerable hardship to both manufacturers and American distributors.[11] The action constituted a violation of Section 4(A) of the TRA.[12]

Section 10(B) of the TRA provides that "The President is requested to extend to the instrumentality established by Taiwan the same number of offices and complement of personnel as were previously operated in the United States by the goverment authorities on Taiwan recognized as the Republic of China prior to January 1, 1979." Contrary to this stipulation, the Carter Administration allowed only nine offices of the Coordinating Council for North American Affairs (CCNAA) to operate in the United States. The ROC had 15 consular offices in the United States prior to Washington's recognition of Peking. The reduction in the number of ROC offices in the United States has caused inconvenience to American businessmen, who relied on their services[13] and also inconvenienced American citizens and others planning to visit Taiwan.

Other problems arose during 1979 and 1980. These included: reduction of the personnel of the American Institute in Taiwan (AIT) to 55—half the size of the previous U.S. embassy and consular staff—despite increasing commercial, cultural and other relations between the two countries; the State Department refused to allow ROC military personnel to receive "professional training" in the United States (this could seriously handicap the ROC's future military capability, including the development of its own modern weaponry and the operation of sophisticated weapons purchased from the United States; because the "unofficial" relations between the United States and the Republic of China were interpreted in an extremely narrow sense, officials of AIT and CCNAA were barred from official contact, and American official's were discouraged from visiting Taiwan even in a private and unofficial capacity; and finally, approval of visa applications to AIT by the U.S. consulate general in Hong Kong cause an unnecessary delay of one to three days. Japan, Indonesia, and some other countries which have established "unofficial" arrangements with the ROC authorized approval of visas by their offices in Taipei.

In congressional testimony on U.S.-ROC relations since implementation of the Taiwan Relations Act, officials of the Carter Administration said the new arrangement "unexpectedly worked well" and that earlier fears about the security of Taiwan were unfounded. They also said the ROC had not only survived the shock of derecognition but had continued to thrive and prosper. Administration officials and their supporters tried hard to convince Congress that Peking's "peaceful" intentions had greatly reduced tensions in the Taiwan Straits to the lowest level in the three decades.[14] They asserted that the growth in the U.S.-ROC bilateral trade and American private investment in Taiwan gave clear indication that the "unofficial" arrangement had worked "very smoothly."

It is true that economic relations after derecognition have prospered. U.S.-ROC bilateral trade reached $9.1 billion in 1979, an increase of $1.6 billion, or 23 percent, over 1978. American exports to Taiwan in that year increased 40 percent, while U.S. private investment in Taiwan increased by 15 percent. The ROC's total trade with 120 countries reached $31 billion in 1979, an increase of 31 percent over the previous year. Foreign investment in the ROC reached $329 million in 1979, an increase of $116 million over 1978, and went on to a record $465 million in 1980. Travel from Taiwan to the United States registered a 60 percent increase in 1979. U.S.-ROC two-way trade during 1981 totaled U.S. $12,928.7 million, an increase of U.S. $1.494.9 million, or 13 percent, over 1980.[15] It has been conservatively estimated that U.S.-ROC trade will exceed U.S. $250 billion in the decade of the 1980's. Taiwan's energy production will double in the next ten years, while its industrial production may increase seven-fold.[16]

But the ROC's continued progress in the economic field and growth of U.S.-ROC commercial relations are attributable to factors quite unrelated to the implementation of the Taiwan Relations Act. Among these are ROC governmental policies, which foster economic growth while at the same time reducing economic inequalities among the population. In addition, Taiwan has a highly competent, technically-oriented labor force inbred with the traditional work ethic. Thus the international business com-

munity retains its confidence in the political stability, investment environment, and continued economic progress of Taiwan.

The ROC's sustained economic development, however, will depend on its ability to upgrade its defense capability and assure stability in the Taiwan Straits. The need to improve the ROC's defense strength has been made more urgent by the absence of military ties between the United States and the ROC. This was precisely where the Carter Administration was lukewarm, reflecting Peking's strong opposition to American arms sales to Taipei. The only strong supportive remark about the U.S. commitment to the security of Taiwan came at a White House Conference of Journalists on February 10, 1979. President Carter said the establishment of diplomatic relations with Peking "does nothing to prohibit a future president or a future congress from interposing the American Pacific fleet between the island of Taiwan and the mainland of China or from even going to war, if we choose, to protect the people of Taiwan."

AMERICAN POLICY UNDER THE REAGAN ADMINISTRATION

During the U.S. presidential campaign of 1980, the Republican platform and the Republican candidate, Ronald Reagan, focused criticism on the foreign and defense policy of the Carter Administration and promised a new policy based on strength. The Republican platform adopted on July 15, 1980, while reaffirming America's new relationship with communist China, declared that:

"We delplore the Carter Administration's mistreatment of Taiwan, our long-time ally and friend. We pledge that our concern for the safety and security of the 17 million people of Taiwan will be constant. We would regard any attempt to alter Taiwan's status by force as a threat to peace in the region. We declare that the Republican Administration, in strengthening relations with Taiwan, will create conditions leading to the expansion of trade and will give priority consideration to Taiwan's defense requirements.[17] "

Mr. Reagan did not conceal his "special feelings" for the Republic of China. His remarks of August 25, 1980, favoring an upgrading of U.S.-ROC relations, caused an uproar in Peking. His desire to implement both the spirit and the letter of the Taiwan Relations Act undoubtedly reflected the majority sentiment of the American people. Mr. Reagan's goodwill toward the ROC has been widely publicized.

Secretary of State Alexander Haig indicated the Reagan Administration's new foreign policy approach when he emphasized the need for credibility, flexibility, reliability, and consistency in the conduct of American diplomacy. With regard to the U.S.-ROC relations, Secretary Haig said Washington would not allow Peking to exericse a veto over American obligations and commitment to the Taiwan Relations Act. During Haig's visit to mainland China in June of 1981, the Secretary of State reaffirmed the U.S. commitment to sell arms to the Republic of China. Haig and his Chinese communist counterpart "agreed to disagree" on this issue. At a recent meeting with Chinese communist Premier Chao Tzu-yang at the Cancun Summit in Mexico, President Reagan reiterated his Administration's determination to carry out U.S. obligations to the ROC. The American chief executive bluntly told Chao that he rejected any idea of playing the "China card" or the "Moscow card."

It would be unrealistic to anticipate major changes in U.S. "China policy" under the Reagan Administration. The strategic and other factors which led three previous American presidents to establish the "Peking connection" are still present. Communist China will remain a factor in U.S. global strategy, especially as the Reagan Administration faces undiminished Soviet expansion worldwide. It is within the context of complex global geopoliticis that we must consider the dilemmas and policy options of the Reagan Administration with regard to its obligations to the ROC. The dilemma is that the Administration wishes to maintain the present relationship with Peking while fulfilling its commitment to the ROC. That commitment is embodied in public law—the Taiwan Relations Act.[18]

To cope with the dilemma and formulate policy options to improve the Washington-Taipei partnership will require courage and creativity on the part of the Reagan Administration as well as the Congress, which is the creator and guardian of the Taiwan Relations Act. President Reagan has indicated that his Administration will implement the TRA both in letter and spirit. Few people doubt his sincerity. The mood in Congress inclines toward a close U.S.-ROC relationship. There are indications that both the White House and Congress will consult closely to ensure that U.S.-ROC relations remain on a steady course. Close cooperation and sufficient consultation between the White House and Capitol Hill—lacking in the Carter era—would certainly be conducive to implementation of the TRA in a positive and creative way. It would allow the Executive to deal with the ROC strictly on the basis of American national interest. This is especially important with regard to the implementation of the security provisions of the TRA, which the previous Administration carried out only half-heartedly.

A poll taken in June 1981 among members of the U.S. Senate by the Washington-based American Council for Free Asia showed at least 51 senators on record in favor of selling FX (F-16-J79) aircraft to the ROC. Six senators were opposed to the sale, 32 were listed as undecided and 11 either did not express an opinion or did not respond to the poll.[19] During his visit to Taiwan in August of 1981, Representative Clement J. Zablocki, chairman of the House Foreign Affairs Committee, expressed confidence that the Reagan Administration would recommend such military supplies as were needed by the ROC and that Congress would approve.[20] Senator John Glenn, a member of the Senate Subcommittee for East Asian and Pacific Affairs, also reflected this mood of Congress when he said at a Taipei press conference on August 31, 1981, that "We want to continue our efforts on the Senate Foreign Relations Committee to see that the Taiwan Relations Act is implemented and that all provisions of it are carried out."[21] These are encouraging signs. How the Executive Office and Congress will eventually translate their good intentions into concrete actions remains to be seen.

Even in the post-Carter era, some Americans have continued to view implementation of the Taiwan Relations Act and U.S.-ROC relations within a complex strategic and geopolitical context. For example, several members of the House Foreign Affairs Subcommittee on East Asia and the Pacific held a series of hearings attended by State Department and Defense Intelligence Agency officials, then wrote a letter to President Reagan indicating that sale of advanced FX jets to the ROC would be a "mistake" and could seriously damage U.S. relations with Peking. The letter also stated that witnesses at the hearings agreed that military tensions in the Taiwan Straits were "at an all-time low" and that communist China had no present or immediately foreseeable intention of trying to resolve the Taiwan problem by force.[22] These are familiar and unconvincing arguments reminiscent of the Carter era. The merits of such arguments have been challenged by many qualified military and political analysts.[23] Of course, opponents of selling modern weapons to the ROC will continue to make their voices heard. We can only wait and see how much weight their opinions will have on decisions of the White House and the Congress., If the Reagan Administration and Congress stick to their pledge that Peking will not have a veto over implementation of the Taiwan Relations Act, there is no reason for pessimism.

The upgrading of the ROC's defense capability is one of the principal tests for the Reagan Administration. Other areas of U.S.-ROC relations needing improvement include: (1) a more flexible definition of "unofficiality' in order to improve and strengthen the relationship; (2) allowing ROC military personnel to receive professional and technical training in the United States to ensure the continued modernization of ROC military research and development; (3) permitting U.S. officials to visit Taiwan in a private capacity so they will be better informed on the ROC situation; (4) allowing the CCNAA to maintain the U.S. offices prescribed in Section 10(B) of the TRA so as to facilitate services to U.S. businessmen, tourists, and others; and (5) elevating the substantial relationship between the U.S. and the ROC to a more mutually satisfactory level.

BEYOND THE TAIWAN RELATIONS ACT

In an interview with Marvin Stone, editor of U.S. News & World Report in Taipei in September 1981, President Chiang Ching-kuo said that mutual trust is gradually being restored between the Republic of China and the United States, and that this improvement is expected to continue.[24] In the year and a half since President Reagan entered the White House, there have been signs of an improved U.S.-ROC partnership. This optimism is reinforced by President Reagan's determination to restore American leadership to the free world and to help troubled allies and friends of the United States. The government and civic leaders of the Republic of China are reassured by President Reagan's farsighted understanding of the danger of communism, which he has described as an aberration in the history of mankind. President Reagan's statement that communist China is not an ally of the United States, and that he rejects any idea of playing the "China card" or the "Russia card," could signal the beginning of a new direction in the Administration's China policy.

Relations beween the United States and communist China have yet to be fully "normalized" after three years of diplomatic ties. It is no secret that communist China has not normalized relations with many countries with which it has had diplomatic relations for a long time. Peking's inability—or lack of sincerity—in fully normalizing relations with the members of ASEAN, Japan, India, the Netherlands, and other countries provides cases in point. According to The New York Times, communist China

sought Secretary Haig's visit in June of 1981 to clarify the Reagan Administration's policy, lest there be "retrogression" in Washington-Peking relations.[25] But even after Secretary Haig's visit to Peking and the meetings between President Reagan and Chinese communist leaders in Mexico and in Washington, Peking's media have continued to complain about the shortcomings in the Washington-Peking relationship. Peking considers the U.S. commitment to the Taiwan Relations Act to be the greatest "obstacle" to satisfactory Washington-Peking relations.[26] It is clear that during Vice President Bush's recent trip to Peking that the communist leaders tried very hard to get the Reagan government to agree to cessation of arms sales to our country. We are, on the one hand, pleased that the United States has remained firm on this point. On the other hand, we have to say that we are disappointed that the Reagan Administration apparently hopes to foster closer relations with mainland China. And we do not understand why Washington still denies us an air-superiority fighter to maintain peace in the Taiwan Straits.

In considering policy options to strengthen the U.S.-ROC relationship, the Reagan Administration must look beyond the arrangement set forth in the Taiwan Relations Act and explore the opportunities as they present themselves. The positive role of the Republic of China in East Asia and the Western Pacific, and an emerging Asian-Pacific community that could have great significance for U.S. strategic, political, and economic interests in this part of the world, must be considered in assessing the U.S.-ROC partnership. The Asian-Pacific region has emerged as the new economic center of the world; its trade volume with the United States has begun to surpass that between Western Europe and America. In the decades ahead the free nations of the Asian and Pacific region are expected to play a greater role in international commerce, banking, communication and transportation. This will usher in a new era for the U.S.-Asian-Pacific partnership and change the economic, strategic, political and cultural map of the world. It will also present new challenges and opportunities for American policy.

Few would dispute the contributions of the Republic of China in helping create stable conditions in the Asian-Pacific region. So it is that Japan, Australia, New Zealand, the ASEAN countries, and other noncommunist nations of the region have considered it important to maintain mutually beneficial and substantial relations with the ROC even in the absence of diplomatic relations. The ROC has become one of the principal trading partners of ASEAN since the late 1970's. The harmonious relationship between the ROC and these countries must be attributed to the fact that their governments have not defined their "unofficial" relations with Taipei in a narrow sense.

As the free area of Northeast Asia and the Western Pacific undergoes a great transformation, it is necessary to reassess the role of the United States. This will include changes in the U.S.-ROC relationship going beyond the Taiwan Relations Act. Among the questions that need to be examined are these: (1) What policy will the United States adopt in light of the emergence of a U.S.-Asian-Pacific partnership and what will be the place of the ROC? (2) What will be the role of the ROC in the emerging U.S.-Asian-Pacific community to serve the best interests of both the ROC and the United States? (3) What should be the policy of the United States to strengthen the international status of the ROC and provide for the increased role of the ROC in the emerging U.S.-Asian-Pacific partnership? (4) Does the Taiwan Relations Act provide enough options to cope with regional changes in the next decade?

To raise these questions is to recognize the challenges as well as the opportunities in working toward a more viable U.S.-ROC partnership in the changing environment of this part of the world. Thorough implementation of the Taiwan Relations Act in letter and spirit would unquestionably lay the foundation for future readjustments and policy options required by the circumstances. The TRA should not be considered an end-product of U.S. policy. Politics is the art of the possible. It will require creativity, courage, and imagination to place the U.S.-ROC partnership in a much larger perspective. In this regard, it is important that the United States should not let others dictate its relationship with the ROC nor exercise a veto over American policy.

It is sad but true that, as has been said often in the past, nations do not have permanent friends but only permanent interests. In the final analysis, therefore, what we do here in the Republic of China on Taiwan will have a great bearing on our relations with the United States and other countries as well. We intend to continue to demonstrate that it is in America's national interest to maintain close relations with us. We are a strong and viable society, rapidly becoming a very significant economic partner of other free nations. The United States should not remain closely associated with us out of past sentimental ties; rather, we are now and will continue in the future to contribute significantly to the kind of world which the United States hopes will finally emerge in East Asia.

It cannot be denied that developing ties with Peking may confer certain tactical advantages on Washington in its struggle with the Soviet Union. What should be borne in mind, however, is that these alleged advantages are ephemeral—they cannot alter the fundamental reality that the communist and free world nations are pursuing antithetical goals. In contrast, our relations with America rest on the firmer ground of a shared vision of the future.

SECRETARY JAMES WATT

● Mr. LAXALT. Mr. President, just recently I had the opportunity to deliver some good news to President Reagan. Some recent polling back in my home State of Nevada indicated that his approval rating out there was 69 percent. Not bad, I told him, considering the tough decisions he has been making. However, despite the President's popularity, I had to level with him and tell him that he is running second to his own Secretary of the Interior, Jim Watt.

Those of us back here who are smothered by the eastern press tend to get the impression that the Secretary is a terrible political liability for the President. We keep hearing that Jim Watt is on his way out the door. Frankly, I am convinced that such talk represents little more than the wishful thinking of the liberal press and the chablis and brie crowd.

Jim Watt has been in Nevada this week campaigning for our Republican ticket. Let me tell you something: If he is a political liability, I only hope that I have such liability when I seek reelection.

The response that the Secretary received was tremendous. His message was straight and to the point. This administration is committed to restoring

balance to Federal management of natural resources and blending our human and natural resources to restore America's greatness. That message strikes a responsive chord in Nevada.

During his stay in Nevada, Secretary Watt addressed the National Public Lands Council. I insert the Secretary's remarks to that group to be printed in the RECORD.

EXCERPTS OF REMARKS BY SECRETARY WATT

Man, there is a lot of great country out here.

I keep reading in the liberal press about how Jim Watt is destroying the environment, but I checked personally and found that the rivers are still flowing, the wildlife is abundant, the sun is still shining, the Rockies are still standing.

I also have been reading about how Jim Watt is giving away the public lands and how the wide open spaces are disappearing. I keep searching for evidence that this is happening, but I can't find it.

Earlier this month I was up in Alaska and I flew over tens of millions of acres still ruled by grizzlies and caribou. One of our national parks up there—some 12 million acres—recorded a total of 226 visitors last year.

Last weekend I was in central Wyoming, and yesterday I was up in Elko with Nevada's great Governor, Bob List.

So I have seen some magnificent country this past month and especially this past week.

You may know that I grew up in Wyoming and spent many a day working on the family's homestead. Hauling hay and water to the cattle in times of drought. Dragging cattle out of snowdrifts and mudholes at other times.

Not that I had to face anywhere near the day-to-day trials and tribulations that my family had in settling the land.

But I had enough of a sampling of that life to appreciate the land and the necessity for us to care for that land so that it can continue to provide for us. Farmers and ranchers have to be the ultimate in conservationists. You can't exploit the resources of the land and then move on in this era. You have to care for the land today or you won't be in business tomorrow. So those of us whose families have owned and worked the same land, or leased the same land, for generation after generation are the practical, proven and successful conservationists.

Farmers and ranchers know that you have to manage resources to protect them.

Some of the Johnnies-come-lately to the environmental ethic confuse preservation with conservation. They think that the only way to protect the environment is to lock away the land so that it cannot be used—except by those with the time, money and good health to trample the wilderness in expensive hiking boots.

Some land should be locked away and protected from extensive public use, but those of us who have lived on the land and lived with the land know that most of the public land of America can be and must be for multiple use.

We believe in management—in sound management which promotes wise economic use of resources, which requires fair allocation of the resources, and above all, which protects the land and the environment.

Today I want to talk about our land management philosophy and several of our programs.

First, the President's asset management initiative.

Your program yesterday focused on this initiative. I want to emphasize some points and make sure we have cleared up some misunderstandings.

It is an asset management program.

It is not a privatization program.

We are not talking about any massive transfer of the public lands from the Federal Government to the private sector.

At various times in our history, the Federal Government has held title to about four-fifths of the Nation's gross area. Up to 1980, about 1.1 billion acres had been transferred to individual citizens, business, and non-Federal Government organizations—including 287 million acres which were homesteaded and 328 million acres granted to States.

Our new program is extremely small potatoes in comparison. It will not make a real dent in the one-third of the Nation still owned by the Federal Government. It certainly will not make much of a dent here in Nevada where the Feds control 60 million acres—87 percent of the land in the State.

Our goals are to improve management of the land and real property of the United States Government by:

1. Making thorough inventories of what we have so we know what it is we are supposed to manage.

2. Getting rid of that property which does not serve legitimate public purposes and that which is overly expensive to manage.

3. Using the revenue from the sale of these excess properties to help pay a portion of the national debt.

4. Through this process, to sell inefficiently managed Federal lands to States, or other government agencies, or to private parties, where that will result in higher and better use of the land.

You've all heard the examples of unneeded expensive properties which the Federal Government holds, which would be better utilized in private ownership. Let me point out some other examples of situations we need to correct.

In beginning the inventory ordered by the President, the BLM has discovered that we apparently own 8,000 or so acres in the State of Oklahoma rather that the 6,000 acres we used to think we had. One of the parcels of land we own in the Panhandle area is 2 and one-half feet wide and one mile long. It serves no good Federal purpose. Someone has suggested we sell it to a farmer who wants to grow spaghetti. This is only one of many odd, useless pieces of land we should dispose of.

We want to rid ourselves of small hard-to-manage parcels of land situated in the middle of large private land holdings—small parcels we may be leasing out for less revenue that it costs us to process the paperwork. Where we are going to dispose of such parcels, I believe we should give adjoining or surrounding property owners a fair opportunity to acquire the land. We are aware of the concern by some ranchers, and we do not want to do anything which will create intolerable situations for you.

Better management of public lands also can be achieved through consolidation of scattered tracts and checkerboard lands. It is difficult for Federal, State and private land managers to provide efficient management of such scattered land and its resources.

We want to provide breathing space and growing room for federally landlocked communities.

There has been some criticism of the asset management program by those who feel that we have some secret scheme going. Two points should be made here:

First, the Interior property being offered in the first round under the program is simply that property already identified under FLPMA and other appropriate Federal laws as excess. All Interior managed land in this first round already was headed for transfer or sale. And any future lands cannot be offered until after we have completed hearings and other public involvement procedures required by FLPMA. We are required to consider State and local planning, required to consult with State and local officials, required to seek public comment. It's the law!

Second, so far we have concentrated mainly on identifying those lands which will not be put up for sale. To date we have eliminated almost 400 million acres of Interior-managed lands which will be exempt. That 400 million is 13 times the size of Iowa. We will not sell any parkland, refuge land, wilderness or other conservation areas.

When we reach the point of asking "Should we consider selling this property?", then we will be seeking public involvement in the process. How can we discuss possible sales until we have possibilities to put on the table?

One thing we cannot do, however, is wait until we have completed a national inventory of every Federal acre before we move forward in this process. That would take decades, and would never be completed—we are constantly acquiring as well as disposing of land under various laws.

If you had a pickup truck you no longer needed for your ranch, you would not just park it and forget it. You would sell it once you had identified the truck as surplus to your needs.

That's what our asset management program is all about. Identifying what we have, what we need to keep, and what we need to get rid of so that we can use our limited resources in the better management of the Federal estate. Businesses do it, ranchers do it, and we do it in the wise management of our households. Why shouldn't the Federal Government do it?

Common sense management.

We're also bringing common sense management to the grazing program.

We have made it clear that from now on. grazing Environmental Impact Statements are to be prepared as instruments of analysis. The EIS is not to be the decision document itself.

This is in line with what we have been doing throughout the Department of the Interior to streamline the EIS process so that those with the responsibility for decisions will have the information needed in a usable form. We don't believe those drawing up the EIS should be making the decisions for us. That is a perversion of the process.

The new grazing EIS process is much fairer to the rancher by providing a fairer consideration of the permittees' or lessees' preference, previous year's licensed use, or average actual use.

This does not mean that we are going to forfeit our management responsibilities for grazing on the public lands. The BLM will still develop alternatives and where appropriate we will adopt alternatives.

What we are most interested in is results.

No grazing decisions will be issued which are based on one-point-in-time inventories.

We will monitor results to see whether forage is getting better or worse and made adjustments accordingly. Adjustments also can be made by mutual agreements.

Our range management and range investment programs were shaped in consultation with the people of the West who know these resources best. A special task force of western university economists advised us on how to ensure that the public funds available for rangeland investment are used in the most efficient and cost effective manner.

Under our new grazing policy we are moving rangeland management decisions to the district and area managers closest to the resource area. These managers are required to consult with individual operators, State and local agencies and other land users and the general public.

This is in line with our Good Neighbor policy of managing public lands in consultation with the people directly affected by our management decisions and actions.

It was this Good Neighbor spirit that gave birth to our water rights policy which recognizes the States' responsibility for administering nonreserved water rights on public lands. Several months after Interior implemented the policy, the Department of Justice issued an opinion extending the States' right provision to other land management agencies.

Our Good Neighbor policy has been overwhelmingly successful here in the West. That is because westerners understand that the many important policy changes we have instituted in the past 20 months are truly conservation measures which are in the best interest of both the people and the resources of the West.

Again, common sense management.

Management of resources to provide Americans with the food and fiber we need domestically and for the exports which are important to our economy.

Management of resources to provide the energy and minerals which are the basis for an industrial society, the basis for jobs.

Management of resources to strengthen our national security so that we will not have to rely upon unstable or even hostile foreign powers for energy or strategic minerals.

Management of resources to protect the environment.

Common sense management.

Common sense re-energizing of America.

President Reagan is re-energizing America. He has moved quickly to bring economic common sense to government; to return power to the States, the govenment closest to the people; to reduce costly bureaucratic red tape; to unleash the creative and productive power of the private sector; to bring balance to our natural resources program.

We must keep this drive going.

We must keep it going to bring America out of its current economic slump.

And we must keep it going to meet the tremendous needs of America in the coming decades and as we enter the 21st Century.

We do not have the luxury of sitting back and waiting; we must take action now if we are to remain a free and prosperous Nation as America approaches and enters the new century.

By the turn of the century, there will be some 40 to 45 million more Americans than there were in 1980. That means our country is going to grow in population almost as much in two decades as it did during its entire first century.

Our labor force will increase by some 24 million. There will be more than twice as many American workers as at the end of World War II.

We will need to build some 32 million new conventional housing units to provide for young people starting families and to replace deteriorating housing.

U.S. energy consumption in the year 2000 is expected to be 160 quadrillion Btus, twice the 1980 consumption. Coal production should double. We will need to increase total electric generating capability by 325-thousand megawatts, an amount equivalent to the Nation's total generating capacity as of 1970.

Even before the turn of the century we have to make massive repairs and replacement of infrastructure. For example:

Major repairs are needed on half of our 40-thousand mile interstate highway system and we must replace tens of thousands of miles of our State and local roadways;

Almost one-quarter million of the Nation's highway bridges are already deficient or obsolete;

An estimated one-half of our communities cannot expand because of water treatment systems that are at or near capacity; the aging muncipal water systems in many eastern cities are in critical need of repair; hundreds or perhaps thousands of existing dams should be repaired or replaced, many here in the West, where there also is urgent need to get on with the work of reclamation.

We desperately need to improve and expand public transit, our airports and waterways.

In our national parks, wildlife refuges and recreation areas, we must invest billions during these two decades to make up for past neglect, to protect the resources and to make it possible to meet the demands which will be put upon these areeas at the turn of the century.

One news magazine said it could cost an estimated $3 trillion to stop the decay and repair the ruin in our infrastructure.

People who believe in the "Brown-out" theory say it will be impossible for us to meet these demands. They say government's job now is the allocation of shortages.

I don't believe that we have come to that.

You don't believe that we have come to that.

President Reagan certainly doesn't believe we have come to that.

We believe that our new economic policies will get America moving again so that we will have the private capacity to meet these challenges.

We believe that the same blend of human and natural resources which made America great will restore America's greatness.

In all our natural resource programs—range management, predator control, wild horses, reclamation and on and on—we have restored balance to Federal management of natural resources.

We have listened to those of you who speak for the users of the public lands because you represent thousands of years of sound management experience. We have listened to State leaders such as Governor List. We have listened to responsible conservation leaders—those who truly care about resources, not those who only want to build membership rolls and organizational empires.

America was a hurting Nation when this Administration took control in January 1981. The hurt is still with us, but healing has begun.

Changes necessary to restore America to greatness are being made.

We are making these changes because people such as you demand change; because you support change; and because you know that these changes will work.

Thank you for your support and for giving me the opportunity to talk with you this morning.●

THE BECHTEL CONNECTION

● Mr. METZENBAUM. Mr. President, prior to the confirmation of Secretary of State George Shultz, I expressed concern that his former employer, the Bechtel Group, would have potential far-reaching influence in important policy decisions made by the Reagan administration.

This influence would stem from the presence in the administration of not only Mr. Shultz, but also two other former Bechtel executives, Secretary of Defense Casper Weinberger and Deputy Secretary of Energy W. Kenneth Davis.

I do not believe, as a matter of sound public policy, that any corporation, whether Bechtel, IBM, or AT&T, should have three persons in such critical—and interrelated positions—in the Government.

There are many ways the Bechtel influence can work. One is in the award of Government contracts or the granting of export licenses. A recent story by prize-winning reporters Joseph Albright and Andrew Alexander of the Cox Newspapers Washington Bureau offers graphic evidence of why I am concerned about the Bechtel influence in the Government.

The article, published in the Atlanta Constitution and other newspapers in the Cox chain, disclosed that Bechtel is seeking administration permission to build a nuclear fuel reprocessing plant in Japan.

It notes that both Mr. Shultz and Mr. Davis have vowed to recuse themselves from considering the application. But while that is reassuring, it in no way guarantees that their well-known involvement with Bechtel will not, even without any action on their part, influence the judgments of those who will make the decision. Indeed, there may be no way to be certain if there is such a subtle effect. And that is precisely why the situation involving Bechtel is of such concern to me.

Further, I would suggest that the very fact that two high-ranking officials must recuse themselves from considering a critical policy question ought to concern many Members of Congress. If our officials cannot be involved in some of the most pressing matters before them, what are they doing there? The question of nuclear fuel reprocessing ought to be decided at the highest levels of the Government. Yet, we have a situation where two individuals have opted out of that process.

In the next few months, there may well be several additional decisions affecting Bechtel. The Department of Energy, for example, has indicated an interest in allowing private firms to

run the Government's nulcear reprocessing plant in Barnwell, S.C., and DOE my also soon face a decision on who will receive the Government contract to run its uranium enrichment plant in Oak Ridge, Tenn. In both cases, Bechtel may be a prime candidate for the Government contracts.

I am determined to keep a close and watchful eye on the firm and its relationship with the Reagan administration. And I will closely monitor the performance of those Government officials with ties to the San Francisco construction giant.

The reporting by the Cox Washington Bureau suggests that the media are also focusing on the Bechtel connection. I commend them for it and I ask that the entire article be printed.

The article referred to follows:

BECHTEL SEEKS JAPAN NUCLEAR REPROCESSING PLANT

(By Joseph Albright and Andrew Alexander)

WASHINGTON.—The Bechtel group, renowned for its global engineering expertise and its Washington political connections, has asked permission from the Reagan Administration to explore building a large Japanese nuclear reprocessing plant capable of extracting 1,200 tons of plutonium a year.

If approved, it would be the first time the United States has ever allowed an American company to export the detailed chemical engineering technology required for the isolation of plutonium, the artificial element that can be used either for nuclear bombs or nuclear fuel.

Under 35-year-old atomic weapon energy statutes, no company can export sensitive nuclear technology without permission of the Department of Energy, the successor to the old Atomic Energy Commission. The law also requires that the State Department must concur in any export decision.

Secretary of State George Shultz, who until recently was president of the Bechtel Group Inc., will not participate in discussions of the case because he has formally disqualifed himself from hearing any specific matters involving Bechtel, State Department legal aide Knute Malmborg said Thursday. Malmborg said the question should be resolved by other senior department officials.

Kristy Machlanski, a Bechtel spokesperson in San Francisco, confirmed that the company wrote to the U.S. Department of Energy last December "asking whether it would be permissible for us to explore the business prospects in Japan."

The only known response was a letter to Bechtel from Deputy Assistant Secretary of State James Devine about four months ago saying the question was being studied.

Machlanski said Shultz "was aware that we had an interest in reprocessing work in Japan" prior to his nomination. He was not asked about the letter during the 13 hours of his confirmation hearing.

Bechtel outlined preliminary details of the proposed Japanese project last December in a letter from Harry Browne, a vice president of Bechtel National Inc., to John A. Griffin, director of the division of politico-military affairs of the Department of Energy.

According to informed sources, Browne explained in the letter that the company was interested in providing architect-engineering services to a Japanese firm that was planning to build a commercial-sized plant to reprocess spent—irradiated—fuel rods from Japanese nuclear power plants.

The new plant was described as a follow-on to the already-operating Tokai Mura reprocessing plant, a much smaller facility that was designed for Japan by French and British companies. As now envisioned, the new plant would have a capacity to separate 1,200 metric tons of plutonium from spent fuel, in contrast to the 210-ton nominal capacity of the Tokai Mura plant that went into operation in 1977.

The Bechtel letter came five months after President Reagan, breaking with the Carter Administration, announced that the U.S. government would no longer stand in the way of civilian reprocessing projects in foreign nations with advanced nuclear power programs "where it does not constitue a proliferation risk."

Tetsuhisa Shirakawa, first secretary for scientific affairs of the Japanese Embassy in Washington, said a private Japanese company, Japan Nuclear Fuel Service Company, is considering building that 1,200 ton plant to serve the reprocessing needs of Japanese nuclear power plants. The initial plans call for the facility to go into operation by 1990, but no site for the plant has been chosen, he said.

"It is too premature to discuss whether the Bechtel Corp. will be involved in the project," said Shirakawa, noting that the private Japanese owners may choose to replicate the technology in the existing Tokai Mura plant rather than importing any new technology.

Since the 1960s the U.S. government has made no effort to keep secret the basic chemical steps required to dissolve highly irradiated uranium fuel rods and to separate out the reusable plutonium from the intensely radioactive strontium, cesium and other nuclear waste isotopes created while the fuel rods were generating heat to make electricity.

But while the general principles are widely known, the detailed engineering requirements of a large, heavily shielded reprocessing plant are not freely available abroad.

Officials at the Department of Energy confirmed that the Bechtel letter was under consideration. But James Dewar, an official assigned to the matter, declined to comment on grounds that "there is no formal request from Bechtel."

A Department of Energy spokesperson, Carol Dawson, said that Deputy Secretary of Energy W. Kenneth Davis, a former Bechtel executive, would not take part in any discussions on the issue because he has formally recused himself from all matters involving Bechtel.

Japan has signed the nuclear Non-Proliferation Treaty pledging to refrain from developing nuclear explosives and agreeing to accept international inspection on all its nuclear facilities.

Officials said Japan hopes to recover plutonium for use in future breeder reactors. In theory, a plant that yields 1,200 kilograms of plutonium a year could provide enough plutonium to make at least 120 nuclear warheads.●

CHILD HEALTH DAY

● Mr. HATFIELD. Mr. President, I would like to bring to the attention of my esteemed colleagues of the Senate the fact that next Monday, October 4, has been designated Child Health Day. Our children's health is important now and in the future since the children of today become the active, adult members of society tomorrow. In honor of Child Health Day, I would like to recognize a group of individuals that contribute much to our children's health and well-being.

These individuals, who are greatly responsible for the quality of children's health in this country, are the school nurses in our elementary and secondary schools across the United States.

School nurses are highly trained professionals, applying their special knowledge to many facets of the education system. As an employee of a board of education, the schools nurse performs a variety of functions, ranging from analytical to administrative duties, all which enhance the total educational process of the student. The functions fall into three categories: health assessment, which is analysis of individual students' health and developmental histories; health education, providing direct health education and counseling to students, families and the community-at-large; and administrative, which includes maintaining student records, and participating in health-related policy formation at the school and district levels. A sample of a nurse's activities include: conducting standard tests for vision and hearing; coordinating school and community health activities; serving as a resource person for classroom teachers and administrators in health education; personal counseling for parents and children; organizing and assisting in implementation of immunization programs; and recommending and helping to modify present school programs to meet students' changing health needs.

The school nurse strengthens and facilitates the educational process by applying sound health concepts in the context of our schools. For this service to our children and the community, school nurses deserve recognition and the thanks of all of us.●

REMEMBERING ELEANOR ROOSEVELT

● Mr. CRANSTON. Mr. President, as we spend the waning hours of the 97th Congress striving for solutions to the tragedy of unemployment and poverty in our country, it is most fitting that we have set aside these moments to commemorate the forthcoming birthday anniversary of one of our Nation's most courageous advocates of human dignity: Eleanor Roosevelt.

During one of our country's hardest times, Eleanor Roosevelt brought courage and vision and compassion to the White House and throughout the country. She worked tirelessly to en-

courage equality and justice for everyone and to bring a lasting peace to the world. Her words and her works can be an inspiration for us today as we struggle to preserve the values of human rights and dignity—to insure that those unable to care for themselves are not left defenseless, that our senior citizens are not left alone to perish without any means of livelihood, that unemployment is kept at a minimum and those who cannot find work are not left adrift and without hope.

Mr. President, I would like to take this moment to join with my fellow Senators and citizens in remembering an outstanding humanitarian. And I would like to join you in recalling Eleanor Roosevelt's own words reflecting her concern for the world: "I wanted with all my heart a peaceful world, and I knew it could never be achieved on a lasting basis without greater understanding between peoples."

As Adlai Stevenson very justly said, "She would rather light a candle than curse the darkness. Her glow warmed the world."●

SOVIET EXPANSION IN SOUTHERN AFRICA

● Mr. SYMMS. Mr. President, a recent article by Cord Meyer, a former senior intelligence official of the CIA and a nationally syndicated columnist, should be studied by all who are interested in U.S. national security.

Namibia, a country about three times the size of my State of Idaho, with a population of only a million persons, is located on the southwest coast of the African Continent. It has deep water ports which could be used as bases for Russia's nuclear powered submarines to bisect the oil lifeline from the Middle East.

Moreover, Namibia has the largest uranium mine in the world and more than one-sixth of all the uranium reserves in the world. It also has vast mineral reserves of copper, tin, lead, silver, diamonds, lithium, cadmium, germanium dioxide, arsenic trioxide, oil and zinc.

Russia has been trying to seize control of Namibia for many years, through its usual device of financing, arming and supporting a local liberation group to do its dirty work. In this case, it is the South West Africa People's Organization (SWAPO), operating from bases in Marxist Angola just across the northern border of Namibia.

Namibia, a territory of the Republic of South Africa by reason of a 1920 League of Nations mandate, has been offered its independence. This depends upon a U.N. supervised election, so that Namibia's independence will be internationally acceptable and the new country will be recognized by other nations of the world.

The United States has been leading a group of Western countries—Canada, West Germany, England, France—in an effort to obtain a ceasefire and move toward a free and fair election. The United States, as well as South Africa, has insisted that the Cuban soldiers must be removed from Angola. The SWAPO terrorist leader refuses, on instructions from Moscow. If Soviet expansionism is able to gain another victory and drag Namibia behind the Iron Curtain, it will have accomplished another important step in its resource war to cut off the Western industrialized nations from the supply of strategic minerals in Africa and oil in the Mideast. It will be a grievous and irremedial foreign policy loss for the Reagan administration—which has enjoyed no victories to date, and is up against a losing game in Cuba, Central America, Afghanistan, and the Middle East, just to name a few.

Cord Meyer's article is worth study and reflection by all Americans who are interested in stopping Soviet expansionism in southern Africa. I ask that the article be printed in the RECORD.

The article follows:

[From the Washington Times, Aug. 6, 1982]

COMMENTARY—SOVIETS, CUBANS UNDERMINE NAMIBIAN ELECTIONS

(By Cord Meyer)

As the negotiations go down to the wire on the U.S. sponsored plan for settling Namibia's future through free elections under U.N. supervision, the Soviets and Cubans are trying to sabotage the entire undertaking by preventing any reasonable compromise for the mutual withdrawal of South African troops from Namibia and Cuban troops from Angola.

If Fidel Castro and Leonid Brezhnev can succeed in throwing this monkey wrench into the complex negotiating machinery that Assistant Secretary of State Chester Crocker has built, the Communist leaders can hope to save their strategic position in Africa. They can continue to train radicalized guerrillas for prolonged war in Namibia and South Africa.

Conversely, if the United States and the other Western powers with the indispensable help of the black frontline states can bring enough pressure to bear on South Africans and Cubans to go home, the way will be open for the peoples of Namibia and Angola to decide their own destinies.

So much is at stake in these last moves of the end game for southern Africa that Reagan officials are aware of the danger that the Soviets and Cubans might try anything from a palace coup to an assassination plot, if they thought the MPLA regime in Angola was about to request the departure of Cuban troops. In fact, there are already signs that the balance of power in Luanda is shifting against those MPLA leaders who want the Cubans out.

As first reported by the official Angolan radio, a number of black nationalist leaders in the government have recently been purged or threatened with dismissal, most prominently the secretary for production, Manuel Pacavira. These men who favor a U.N. settlement in Namibia and the removal of Cuban troops have been replaced by members of the Mestizo elite, who as Marxist "internationalists" are loyal to Moscow.

These personnel changes might be viewed as a purely internal affair, if it were not for clear evidence of Russian and Cuban intervention. For example, the Kremlin recently authorized the return to Angola of Iko Carreira, a prominent MPLA officer who has just completed a three-year training course for generals in the Soviet military academy. As the only Angolan officer with the rank of general, Carreira becomes the de facto military chief of the army and is likely to be reappointed minister of defense.

If they had not been sure of his loyalty, the Soviets would never have permitted the return at this crucial time of Carreira, a nearly white Mestizo. Presumably, he can be relied on to counterbalance the influence of the many black nationalist officers in the MPLA army who resent the Cuban troop presence and who are beginning to talk of an alliance with Jonas Savimbi's UNITA guerrillas as preferable to serving as Russian pawns.

For Castro, even more than for Moscow, the consequences of a Cuban troop withdrawal from Angola are disastrous. At a time when Cuba is in desperate need of hard currency, this expulsion of Cuban troops would be a severe blow. Castro would lose the $600 million that the Angolans now have to pay annually for the brotherly assistance of the 20,000 Cuban troops and 6,000 civilian advisers now in the country.

To the propaganda losses abroad of a highly publicized retreat would be added the morale effect at home of the stories told by disillusioned soldiers. Moreover, in the wake of the withdrawal from Angola, new questions would be raised in Africa about the role of the 15,000 troops in Ethiopia, and pressures would increase for their expulsion.

Rather than face these consequences, Castro has boldly moved to obstruct agreement on terms for the simultaneous withdrawal of South African and Cuban troops. After implying some weeks ago that he would pull out his troops whenever asked by the Angolan government, he took a much harder line in his July 26th speech in Cuba. He is now demanding that all South African troops be first withdrawn from Namibia behind the Orange River before it would be safe for Cubans to begin their departure. And he has added a new condition by demanding that all foreign assistance to Savimbi's guerrillas must first be terminated.

Since these Cuban conditions are unacceptable to the South Africans, Assistant Secretary Crocker is left with the difficult task of persuading the wavering Angolan President, Eduardo Dos Santos, to stand up against Soviet Cuban pressure. If the South Africans can remain silent, Crocker has a chance of convincing Dos Santos of the need for a more equitable schedule for mutual withdrawal.

Going for Crocker is the fact that by skill and fairness he has won the trust of the black front-line leaders and he might just succeed in stimulating such a unified African demand for reasonable Cuban withdrawal terms that Castro would have to agree.

Going against Crocker is the physical presence in Luanda of Cuban troops and KGB officers who can intimidate Dos Santos or remove him, if necessary.●

DR. ALEXANDER PARITSKY

● Mr. TSONGAS. Mr. President, I would again like to call to the attention of my colleagues the plight of Dr. Alexander Paritsky, a Soviet "refusenik." As you may remember, last year I raised the case of the Paritsky family on the Senate floor and spoke of the sad conditions and terrible struggle of the Paritsky family. A resolution calling for the release of Dr. Paritsky and an end to the harassment of the Paritsky family subsequently passed the Congress. Since that time, I have been actively involved in this humanitarian cause. I have participated in several press conferences with medical experts in Massachusetts, attempting to bring greater awareness to the struggle of the Paritsky family, but the Soviet Government has not relented to our call for Alexander's release.

My latest information indicates that the plight of the Paritsky family has considerably worsened. I have heard from several sources that Alexander Paritsky was recently held in solitary confinement for 2 weeks while serving his sentence of forced internal exile in Siberia. His living conditions have deteriorated and he has been unable to receive proper medical attention. He is also undernourished and lacks adequate clothing. Alexander's wife, Polina, has said that the prison will not even accept warm clothing brought in by relatives. Furthermore, Dr. Paritsky has a history of hypertensive crises and heart diseases. Without adequate treatment, the conditions under which the Soviet Government holds Dr. Paritsky could prove fatal. It is beyond me how he managed to survive even this long.

We have also been told that this wife Polina's access has been further limited, denying Alexander Paritsky's contact with one of his greatest life-sustainers, his family. There have been reports that Alexander does not receive his wife's letters, although he is reportedly able to write to her.

In light of these new developments in the continuing struggle of the Paritsky family, I ask my colleagues to again join me in calling upon the Soviets to provide proper medical attention to Dr. Paritsky, to again urge the Soviet Government to release Dr. Paritsky and his family from eternal exile and allow Dr. Paritsky, his wife, and their children to emigrate to the country of their choice. I urge my colleagues to join with me in this plea to end the tragic suffering and inhumane treatment of this courageous man and his family.●

A TRIBUTE TO HENRY L. AARON

● Mr. MATTINGLY. Mr. President, I rise today to pay tribute to and recognize the many accomplishments and abilities of Henry L. "Hank" Aaron, a man of impeccable character, an outstanding American, a superb baseball player, and a citizen from my State of Georgia.

Hank Aaron, with his unflamboyant manner as a baseball player, was seldom given his due as a hitter until it became evident that his extraordinary consistency was carrying him close to many lifetime marks.

His professional career began as a player for all-black teams in Mobile, Ala., and Indianapolis, Ind. At the age of 18 he signed with the Milwaukee Braves organization. At the age of 20 he reached the major league team and established himself as one of the greatest hitters and outfielders in baseball. As a right-handed hitter with unusually powerful wrists, Aaron won the National League's batting championship in 1956 and 1959 and its most valuable player in 1957. He led the league four times in home runs—1957, 1963, 1966, and 1967—and runs batted in—1957, 1960, 1963, 1966—and he received the Golden Glove Award for fielding in 1958, 1959, and 1960.

Mr. President, I would like to further point out that Aaron's achievements did not stop there. Over his 23 year career the records show that he has the most total bases 6,856 lifetime; most games played 3,298 lifetime; most runs batted in 2,297 lifetime; but the most noteworthy and outstanding accomplishment of his distinguished career was on April 8, 1974, when he hit home run No. 715 establishing a new lifetime record.

In August of this year after the required 5 years of retirement, the baseball writers and sportscasters voted overwhelmingly 406 out of a possible 415 for his induction into the Baseball Hall of Fame.

To further demonstrate the appreciation of Henry Aaron's contibution to America's favorite pasttime, the citizens of Atlanta, businesses, and individuals around the country raised funds to erect a bronze likeness of the all-time home run leader, displayed in front of the Atlanta-Fulton County Stadium, where the Braves play their home games. Mr. President, it is with a shared sense of pride that I join the Atlanta community and the State in honoring the dedicated career of Henry L. "Hank" Aaron.●

DR. HENRY ELLIS CHEANEY

● Mr. FORD. Mr. President, next month a distinguished educator and historian, Dr. Henry Ellis Cheaney, will formally mark the end of nearly a half-century of service to higher education in Kentucky.

Dr. Cheaney, who recently retired after 46 years on the faculty at Kentucky State University will be honored at a testimonial dinner in Frankfort on October 22. Many of his friends, colleagues, and former students are expected to attend and I want to express my appreciation to him for a long and successful career.

A professor of history at Kentucky State, Dr. Cheaney is a native of Henderson and a lifelong Kentucky resident. Dr. Cheaney earned his bachelor of arts degree from Kentucky State in 1936 and immediately joined the school's faculty. He remained on the faculty until his retirement at the end of the 1981-82 academic year.

Dr. Cheaney holds a master of arts degree in history from the University of Michigan and a doctorate of philosophy in history from the University of Chicago.

At one time or another, Dr. Cheaney literally has had a hand in nearly every aspect of university life at Kentucky State. By no means was his involvement limited to academics. He served as coach of the debate team, coach of the boxing team, director of college publicity, college alumni agent, and college chaplain.

Dr. Cheaney is a respected historian and he coauthored Kentucky's Black Heritage, a text used in the Commonwealth's public schools, and is now completing the definitive history of blacks in Kentucky since 1865.

He holds membership in the following organizations: American Historical Association, Southern Historical Association, Association for the Study of Afro-American Life and History, American Association of University Professors, Kentucky Association of Teachers of History, Alpha Kappa Mu Honor Society, Phi Beta Sigma Fraternity, the Kentucky Advisory Commission on Public Documents, member of the board of directors of the Kentucky Historical Society and of the University Press of Kentucky.

In 1981, he was awarded the A. Phillip Randolph Humanitarian Award, the highest honor accorded by the Phi Beta Sigma Fraternity, Inc., and, in 1982, he was honored with the Kentucky State University Distinguished Service Award.

Throughout his career he has touched countless lives in a positive way. He has had a powerful influence on the young men and women who attended Kentucky State. He dedicated his wisdom, talent, and self to the university. His many contributions to Kentucky State University and our Commonwealth are significant and they will be long remembered.●

MORE ALASKA HUNTING OPPORTUNTIES

● Mr. MURKOWSKI. Mr. President, my colleague from Alaska and myself introduced S. 2826, a bill to provide more hunting opportunities on lands closed by the Alaska National Interest Lands Conservation Act of 1980. We introduce the legislation with the purpose of apprising our colleagues of our

intent to move legislation during the 98th Congress which would amend the Alaskan Lands Act.

The bill would redesignate approximately 12 million acres of new national park lands as park preserves. The only difference between a park and park preserve is that sports hunting and trapping is allowed. No new uses, such as oil and gas exploration or road building, would be provided for in S. 2836. The land management would remain with the National Park Service. Game management would be conducted by the State of Alaska in conjunction with the Department of the Interior.

This is purely an issue of whether sports hunting which is seen as a legitimate wildlife management tool will be allowed on our lands. The October issue of Field & Stream contains an editorial that endorses the legislation introduced by Senator STEVENS, myself, and Congressman DON YOUNG. I ask unanimous consent that it appear in the RECORD immediately after my statement. This is an example of endorsements from hunting interests that I expect to see more of as this issue goes before the public. I hope we can act quickly next year in considering these amendments.

The editorial follows:

[From Field & Stream, October 1982]

THE RIGHT TO HUNT

Two identical bills were introduced in the United States Senate and the United States House of Representatives in August 1982 by Alaska Senators Ted Stevens and Frank Murkowski, and Alaska Congressman Don Young. These bills are of vital interest to all sportsmen—whether or not they are fortunate enough to hunt in Alaska.

The bills—S. 2826 and H.R. 6977—would open to hunting nearly 12 million acres of prime federally owned Alaska wilderness which was closed to hunting by Congress in 1980 as part of the Alaska National Interest Lands Conservation Act.

The legislation just introduced deals with the right to hunt, and therein lies its importance. The public lands in question had long supported sport and subsistence hunting. The lands were not closed for reasons of wildlife conservation, or to protect the habitat (mining, cutting, and drilling are not allowed on these lands), or for any other rational reason. They were closed because anti-hunting sentiment prevailed.

The lands to be opened include almost 7.5 million acres of prime Dall sheep habitat in Gates of the Arctic and Wrangell-Saint Elias Parks. These two areas, plus Katmai, Lake Clark, Denali, Kenai Fjords, Glacier Bay, and Aniakchak—a total of 11,780,000 acres—also provide good hunting for brown/grizzly bears, black bears, moose, caribou, and mountain goats.

Reopening these lands—which means amending the Alaska National Interest Conservation Act—requires an act of Congress. The legislation introduced by Messrs. Stevens, Murkowski, and Young would reclassify these areas from "Parks" to "Park Preserves." The only distinction is that hunting and trapping are allowed in Park Preserves, not in Parks.

The legislative campaign will begin in earnest in January 1983. This legislation will be the first major national confrontation on the subject of hunting, and it requires your continuing support.

The national lobbying campaign for this vital legislation will be spearheaded by the Wildlife Legislative Fund of America. Field & Stream will keep you updated on developments in this campaign to reopen some of the finest wilderness hunting in the world. For now, you should write your senators and congressman to support S. 2826 and H.R. 6977.

If you don't know the name of your senators and congressman, ask your local post office for a list, or contact the League of Women Voters (there's an office in most cities) or your local newspaper. You can write them at: U.S. Senate, Washington, D.C. 20510 and U.S. House of Representatives, Washington, D.C. 20515.●

VINE MEMORIAL BAPTIST CHURCH

● Mr. SPECTER. Mr. President, I wish to take this opportunity to commend the Vine Memorial Baptist Church, its pastor, the Reverend Senior James S. Allen, and its congregation on the celebration of its 50th anniversary.

In order to serve the spiritual needs of the community to foster fellowship, and to present a program of Christian education, the late Reverend Leonard George Carr met with a small group of devout Christians on September 15, 1932, and founded the Vine Street Baptist Church. As the membership of this institution increased, its vital contributions in the Philadelphia community became larger and more encompassing.

Today, the Vine Memorial Baptist Church sponsors such activities as a free child care clinic, daily vacation bible school programs, and a radio ministry. It has become indispensable not only to its congregation, but to the Philadelphia community as well.

Vine Memorial Baptist Church this month is celebrating its golden anniversary. I am proud to stand before the Senate to express my admiration, as well as congratulations, to this institution. Fortunately, it shows no signs of ceasing its important work. I know that Vine Memorial Baptist Church will continue its service with the spirit and dedication it has shown the Philadelphia community for the past 50 years.●

POSITION ON VOTE

● Mr. SASSER. Mr. President, on Friday, September 24, 1982, I was necessarily absent from the Senate during consideration of the bill H.R. 6956, the HUD-independent agencies appropriations bill for fiscal 1983, and for votes thereon. Had I been present, I would have voted for passage of the Armstrong amendment 1283, expressing the sense of the Senate with respect to human rights violations in connection with the construction of the trans-Siberian pipeline.●

THE INSANITY DEFENSE

● Mr. DURENBERGER. Mr. President, yesterday, we considered many of the problem areas in present criminal laws. One area we did not address was the insanity defense. Due to the topical nature of the insanity plea, and the fact there are many proposals pending in Congress to deal with this issue, I would like to call the attention of my colleagues to an article written by a distinguished scholar and a good friend of mine, Marshall Houts. The article is entitled "Let's Abolish the Insanity Plea Now." I am sure they will find it interesting and provocative. I ask that it be printed in the CONGRESSIONAL RECORD.

The article follows:

LET'S ABOLISH THE INSANITY PLEA NOW!

(By Marshall Houts, J.D.)

Right after the Jack Ruby trial eighteen years ago, I wrote an editorial entitled, "The Real Lesson of Jack Ruby," saying "It is this maudlin script, all 663 pages of its medical, psychological and psychiatric testimony, that screams out the real lesson of Jack Ruby, the clarion message that psychiatric testimony should never be permitted in the courtroom in criminal cases."

The Ruby jury was a superior jury; its members well-educated; they held responsible jobs and positions; if any group of laymen could handle the issue of "insanity," this jury should have been it; but "they suddenly found themselves excluded from any real participation by a babble of foreign tongues not subject to intelligible translation. They viewed a play within a play, the dialogue flowing and submerged in such phrases as focal paroxysmal discharge, larval seizures, weak ego structure, paranoid flavor of thinking, inadequate personality, paroxysmal burst, serial Theta discharge, ego dyscontrol, crofts, impinging the ego, ictal abnormality, doming, fugue state, aggressive and emotionally unstable, hypercondrical trends, episodic dysrhythmia, retrospective falsification, cyclothymic personality, agitation triggered an epileptic equivalent, mitten pattern, ruptured ego * * *."

My editorial continued: "When this lost group of bored and exhausted jurors was finally rediscovered in the wee small hours of a Saturday morning and sent on its mission, the wonder is not that they were out for such a short time, rather what took them so long * * *."

"I have the haunting feeling that a miscarriage of justice could have occurred in the Ruby case (I don't think it did) and will occur countless times in the future if we preserve the system and routine under which we now operate. It is the format that is at fault and not the performers within its framework * * *. The jury should never be saddled with the impossible onus of wrestling with the question of the defendant's mental status at the time the criminal act was committed * * *.

"We delude ourselves in an aura of wishful thinking when we castigate the M'Naghten Rule as the culprit and sublimely bask in our own self-righteousness by alleging that we have cured the malignancy by a poultice of Irrestible Impulse or Durham, Vermont or Currens, Smith, Brown, Jones or Williams. No rule will work that brings the psychiatrist into the court-

room; and this remains the real legacy of Jack Ruby * * *.

"We begin by abolishing the insanity defense in toto. This eliminates the need for the psychiatrist in the courtroom, for the only question before the jury will be one it can competently answer: Did the defendant commit the act complained of? * * *.

"We then rely heavily on the psychiatrist in two other phases of our procedure, both of which are out-of-court. If the defendant raises the question of his mental ability to stand trial, the court will order him examined by a panel of psychiatrists, who will have the authority to obtain psychological testing. We are interested only in his present mental status * * *.

"If the answer of the psychiatric panel is one of mental competence to stand trial, we proceed with the trial. If the jury finds the defendant not guilty, we are finished. If, on the other hand, the jury returns a guilty verdict, we then proceed to the psychiatrists once more; but again on an out-of-court basis. We are now at the punishment or treatment phase: What shall we do with our convicted criminal so that both his rights as an individual and those of society as a whole can best be served?

"Aye! That's the rub!

"It is here that the psychiatrists and psychologists can offer their greatest assistance to the judges who must ultimately evaluate the combined expert opinions and act upon them."

Sound familiar?

Something you read last week in Time, Newsweek, your morning paper, or watched on TV?

Only the names and numbers of the players have been changed. Today, we label it Hinckley instead of Ruby, Jones, Smith or French, repeat the same words, utter identical laments, and wait for public revulsion to cool off.

"The Real Lesson of John Hinckley" is exactly the same as "The Real Lesson of Jack Ruby": Psychiatric testimony should never be permitted in the courtroom in criminal cases.

How do we accomplish that goal without impinging the fundamental, historical rights of the accused, while giving peaceful citizens reasonable assurance that they will not be attacked in the sanctity of their own homes, on the streets, at work, in play or in the pursuit of happiness which used to be thought of as an inalienable American right? I suggest the following model statute to do just that:

ACT TO ABOLISH DEFENSE OF INSANITY

SEC. 1. Plea of Insanity Abolished.

In all criminal trials, the defense of insanity, whether called M'Naghten Rule, right-wrong test, rule of irresistible impulse, Durham Rule, American Law Institute (ALI) Rule, rule of diminished capacity, rule of substantial capacity, emotional distraction rule, or by any other name or combination, is hereby abolished.

The fact-finder, whether judge or jury, shall be asked to determine only the fact of whether the accused committed the criminal act compained of. Motive, the reasons why the accused committed the criminal act, or what caused his inability to control his conduct shall not be relevant in this determination of guilt or innocence.

SEC. 2. Insanity Plea May Be Raised As Part of Sentencing Procedures.

If the fact-finder determines that the accused committed the criminal act complained of, the convicted defendant may raise the issue of his sanity as part of the sentencing procedures, before the proper sentencing authority. He may then allege that mental illness or defect prevented him from forming the necessary criminal intent to commit the criminal act, or that it created in him an uncontrollable impulse to commit the act, or that it prevented him from conforming his conduct to the legal standards of the community.

These questions of the defendant's mental status at the time he committed the criminal act shall be taken into account by the sentencing authority to determine how the convicted defendant shall be dealt with, whether by medical treatment, imprisonment, or some combination of both, or otherwise.

The procedures followed by the sentencing authority shall be open, but may be formal or informal. It may call for and use any materials it thinks relevant; and it need not abide by the rules of evidence as required in a court trial.

SEC. 3. Minimum Sentence Must Be Served.

In any case where the defense of insanity is raised as part of the sentencing procedures, the defendant shall be held in some form of custodial care for at least the minimum sentence otherwise provided by law for the offense of which he stands convicted, so that a thorough, professional effort can be made to determine whether and when he can be returned safely to society.

SEC. 4. Determination of Mental Ability to Stand Trial Not Changed.

Nothing in this Act shall be construed to change in any way present law and procedures as they relate to the accused's mental ability to stand trial and participate effectively in his own defense.

Since Jack Ruby's trial in 1964, a number of states have changed their procedures for handling the insanity defense: "Guilty but mentally ill at the time of the crime" [Ind.]; "Guilty but mentally ill" [Mich.]; "Guilty but without the particular state of mind that is an essential element of the offense charged . . ." [Mont.]; "Guilty but insane" [some proposals]. A number of offerings are before the Congress, and are now the subject of Senator Arlen Specter's subcommittee hearings.

For the most part, they only play semantic games and do nothing to keep the psychiatrists out of the courtroom. Only outright abolition of the insanity plea will solve this bottom-line problem, and let us then use our psychiatrists affirmatively and where they can do real good: Helping us try to rehabilitate the convicted offender, mentally ill or otherwise, so that he has some chance of a future useful life within the framework of protection for society.

With those who will argue that this model statute does not deal adequately with the fundamental question of intent to commit the crime, I disagree. We take intent, or lack of it, into account in the sentencing phase rather than in the first courtroom step of determining guilt or innocence. This is where the whole idea of intent becomes totally relevant.

To those so-called civil libertarians who argue that the abolition of the insanity plea is "uncivilized," I ask: Is it compassionate to the accused to let his guilt or innocence be determined by little more than a flip of the coin, as is now the case when we bring psychiatrists into the courtroom to assert conflicting, paid opinions on the defendant's "sanity" at the time the act was committed? Is it not more sensitive to the accused's unfortunate lot to try to restore him to normalcy by proper treatment, using our psychiatrists outside the hostile, adversary environment of the courtroom where they admit they cannot function properly?

I also have no truck with those who say that the insanity issue is but "a tiny loophole in the law" and that the highly publicized case (Ruby and Hinckley) blow it out of all proportion. It's no tiny loophole to anyone caught up in the web of the legal madness of insanity, whether accused or victim; and even if it is a tiny loophole, it is one that shakes public confidence in our entire system of criminal justice in this country. Citizens are entitled to look at this whole mess and agree entirely with Dickens about the law being an ass.

The tumult and the shouting will likely die away before anything other than cosmetic changes in the insanity defense really take place. I hope my successor in title some eighteen years from now will remember Ruby and Hinckley when some other bizarre insanity verdict jars the nation.●

SAMUEL C. JACKSON

● Mr. MATHIAS. Mr. President, the death of Samuel C. Jackson this week was sad news for me, as I know it was for the many people who were priviledged to work with him as an outstanding corporate lawyer, a champion of civil rights, and a respected Government leader. Sam Jackson was a man of deep conviction and a source of wise counsel. He had much to give, and he gave freely of himself to his country and his fellow man. I am glad to have known Sam Jackson, both professionally and personally, and extend deep sympathy to his wife, Judy, and the members of her family.

I ask that an article from the Washington Post about Mr. Jackson's life be printed in the RECORD.

The article follows:

[From the Washington Post, Sept. 29, 1982]

SAMUEL C. JACKSON DIES; LAWYER, HIGH FEDERAL OFFICIAL

(By Richard Pearson)

Samuel C. Jackson, 53, a Washington lawyer who was respected for his knowledge of corporate law, a supporter of civil rights and minority causes, and a Republican from Kansas who held high office under presidents Johnson and Nixon, died of cancer Monday at Sibley Memorial Hospital.

Mr. Jackson, who had been a resident of Washington since 1965, was active in GOP politics on the local and national levels. Friends and associates said his approach to these endeavors, unlike some of his contemporaries, was to work from within organizations rather than meeting them in open confrontation.

Thus, in 1972, he helped organize and became chairman of the Black Council, a group of 40 top-level black government officials opposing a constitutional amendment to curb school busing. Because of his work through this organization and other activities, he was credited with having played a substantial role in persuading the Nixon administration to temper its opposition to school busing before the 1972 elections.

He also was a founder of the Council of 100, a national group of black Republican businessmen that has been influential in Republican politics.

In January 1981, President Reagan named him to the Blue Ribbon Commission on Housing, where he is said to have been an advocate of public housing programs.

As a resident of Washington, Mr. Jackson was a key supporter and campaign official for the Rev. Jerry Moore in 1974 when Mr. Moore, a Republican, first was elected to the D.C., City Council. In 1980, he was a D.C. delegate to the Republican National Convention and a backer of George Bush for the presidential nomination.

On hearing of his death, Vice President Bush said he was "deeply saddened by the loss of a good friend and an outstanding business and political leader who had done much for the Republican Party and to further the concept of two-party government among black Americans."

Benjamin Hooks, the national president of the NAACP, said, "It was my privilege to know and work with [Mr. Jackson] for almost 20 years. He was the type of black Republican that all blacks can be proud of. We shall miss this gallant warrior, especially at this critical time in our nation's history."

A speech Mr. Jackson made to a civic group in Reston in 1970 is characteristic not only of his independence as a Republican, but of his view of how to be effective in public life. He told this audience that he had decided to address them rather than attend a highly publicized rally organized by the Southern Christian Leadership Conference in Atlanta "because the problem is here in comfortable suburbia, white America."

"Just as enlightened leadership is essential at the local level," he said, "so will the frustration and division throughout the country be ended only by a national leadership whose commitment to social justice can clearly be seen in both its words and its deeds.

"People are dying in this country today. They die trying to make someone listen to them about the war, about proverty, about powerlessness, about injustice."

Mr. Jackson's own national service began in June 1965 when President Johnson appointed him one of the five original commissioners of the U.S. Equal Employment Opportunity Commission. He served three years. From 1968 to 1969, he was vice president of the American Arbitration Association and director of its Center for Dispute Settlement.

In 1969, President Nixon named him assistant secretary of Housing and Urban Development for metropolitan development, the third-ranking official in the department.

Mr. Jackson helped develop and implement basic policies for the federal government's housing and planning programs. He also served as general manager of the New Communities Development Corporation.

In 1973, he resigned to become a partner in the Wall Street law firm of Stroock & Stroock & Lavan. He practiced in its Washington office until his death. His specialty was corporation law.

Throughout his legal career, Mr. Jackson, like many of the best members of his profession, found time to serve community interests as well as those of his clients. He had been a national trustee of the NAACP special contributions fund since 1968 and was a former NAACP board member and a member of its national legal committee.

Other clients outside of his corporate practice included Operation PUSH, the self-help organization founded in Chicago by the Rev. Jesse Jackson, and the Church of God in Christ, of which he was general counsel and a lifelong member.

Mr. Jackson was born in Kansas and earned bachelor's and law degrees from Washburn University in Topeka. He served in the Air Force, directed the Topeka office of the NAACP and was deputy general counsel of the Kansas Social Welfare Department. He moved to Washington when Johnson appointed him to the equal Employment Opportunity Commission.

One of the first civil rights cases on which Mr. Jackson worked resulted in the landmark 1954 *Brown* v. *Board of Education* decision, in which the U.S. Supreme Court held that segregation in public schools was illegal.

Mr. Jackson's survivors include his wife, Judith, of Washington; two daughters, Brenda, also of Washington, and Marica Sandels of Topeka, and seven brothers and sisters.●

A TRIBUTE TO CECIL BRADDEN WORD

● Mr. HEFLIN. Mr. President, I rise today to mourn the loss of a great Alabamian and American, and a close personal friend.

For many years, Cecil Bradden Word was not only a prominent businessman in Scottsboro, Ala., but also a loyal citizen who placed a high priority on civil duty.

Cecil was president of W. J. Word Lumber Co., and director of the First National Bank of Scottsboro and the Alabama Chamber of Commerce when he recently passed away at the age of 76.

Always eager to serve his neighborhood, city, and State, Cecil played an active role in local politics, serving 7 years as a member of the Scottsboro City Council.

He served on the State Board of Education for 12 years, and, during his tenure, Cecil was instrumental in helping to establish Northeast Alabama State Junior College, on the Jackson-DeKalb County line.

Cecil was a driving force behind conservation efforts in Alabama serving as director of the Alabama Forestry Association, Southern Pine Association, and the Alabama Conservation Service. In appreciation for his outstanding efforts in this field, Cecil received the Alabama Conservation Service Award in 1974.

Cecil had a deep concern for the handicapped. He was a director of the Alabama Society of Crippled Children and Adults, and he served as Jackson County chairman of the Crippled Children's Association from 1944 to 1980.

Cecil was an honorary member of the Scottsboro firemen, the Scottsboro Lions Club, and the Scottsboro Jaycees. A life-long sports enthusiast, he was a member of the board of governors of the Alabama Sports Hall of Fame.

Cecil Word's many accomplishments, together with his years of work in public service and the high esteem in which he was held, serve as testimony that we have indeed lost a great American. He will be sorely missed by all who knew him, as the sadness of his passing is overshadowed only by the magnitude and noble nature of his accomplishments.

Mr. President, I ask that the newspaper articles from the Scottsboro Daily Sentinel and the Huntsville Times be inserted in the RECORD.

The articles follow:

[From the Huntsville (Ala.) Times, Sept. 21, 1982]

CECIL WORD DEAD AT 76

SCOTTSBORO.—Cecil Bradden Word, prominent Scottsboro businessman and leader of many local, state and regional organizations, died Monday at Huntsville Hospital at the age of 76.

The funeral will be Wednesday at 3 p.m. at Scottsboro First United Methodist Church with Dr. Morris Pepper, Dr. Rudder Knox and the Rev. Bill Alsion officiating. Burial will be in Cedar Hill Cemetery with Scollsboro Funeral Home directing.

Mr. Word, president of W.J. Word Lumber Co. here, served on the Scottsboro City Council from 1942 to 1949 and on the State Board of Education for 12 years. In the latter post he was instrumental in helping to establish Northeast Alabama State Junior College on the Jackson-DeKalb County line.

He was a past director of the Alabama Chamber of Commerce, Alabama Forestry Association, Southern Pine Association and the Alabama Conservation Service, and he received the Alabama Conservation Service Award in 1974.

He also was a past director of the Alabama Society of Crippled Children and Adults and served as Jackson County chairman of the Crippled Children's Association from 1944 to 1980.

Mr. Word was a member of the board of governors of the Alabama Sports Hall of Fame, director of the Alabama Safety Council, director of the First National Bank of Scottsboro since 1944, and charter member of the Scottsboro Quarterback Club. He was an honorary member of the Scottsboro Firemen, the Scottsboro Lions Club and the Scottsboro Jaycees.

Survivors include his wife, Mrs. Cecil Fox Word of Scottsboro; three daughters, Mrs. Betty Whatley of Huntsville, Mrs. Peggy Holland and Mrs. Stella Benson, both of Scottsboro; four brothers, Rupert Word, Hal Word and Robert Word, all of Scottsboro, and Claude Word of Manchester, Tenn.; a sister, Mrs. Ruby Branum of Scottsboro; 11 grandchildren and 1 great-grandchild.

[From the Scottsboro (Ala.) Daily Sentinel, Sept. 21, 1982]

CECIL WORD DIES AT 76

Cecil B. Word, prominent Scottsboro businessman and humanitarian died early Monday morning in a Huntsville hospital. He was 76.

Mr. Word was President of the W. J. Word Lumber Company of Scottsboro, and was a partner in other building supply firms in Rainsville, Fort Payne, and Manchester, Tennessee.

He was a member of the Alabama Sports Hall of Fame Board of Directors, and was recently reappointed to that Board for another nine years by Governor Fob James.

He was personal friends with many outstanding sports figures.

Mr. Word had headed Word Lumber Company for over 50 years. The firm celebrated its 90th Anniversary this past summer.

He also served on the Alabama Board of Education for several years, and the Crippled Children's Clinic in Birmingham.

Funeral services will be conducted at 3 p.m., Wednesday at First United Methodist Church, with Dr. Morris Pepper, Dr. Rudder Knox, and Reverence Bill Allston officiating.

Burial will be in Cedar Hill Cemetery with Scottsboro Funeral Home directing. The body will lie in state at the Church from 2 to 3 p.m., Wednesday. Visitation at the Funeral Home will be after 2 p.m., Tuesday.

Surviving are the wife, Mrs. Cecil Box Word, three daughters, Mrs. Betty Whatley of Huntsville, Mrs. Peggy Holland and Mrs. Stella Benson, both of Scottsboro, eleven grandchildren, one great-grandchild, one sister, Mrs. Ruby Branum of Scottsboro, and four brothers, Rupert Word, Hal Word, and Robert Word of Scottsboro, and Claude Word of Manchester, Tennessee.●

JAPANESE GOVERNMENT RESTRICTS U.S. CIGARETTE IMPORTS

● Mr. HELMS. Mr. President, the Wall Street Journal of yesterday, September 30, carried a timely article describing the manner in which the Japanese Tobacco & Salt Corp. (JTS) intends to undermine U.S. cigarette sales in Japan. The JTS is a government-owned monopoly that maintains exclusive control over distribution of all tobacco products in Japan.

Urban C. Lehner, the Wall Street Journal's correspondent in Tokyo and the author of the article, obtained a document from the JTS that provided firsthand evidence in Japanese of attempts to reduce sales of foreign products.

Among the steps ordered by the JTS to limit foreign cigarette sales were curb the stocking of imported cigarettes in vending machines and remove displayed point of purchase (POP) promotion items for imported cigarettes in prominent locations.

Reportedly, many Japanese retailers have told representatives of American cigarette manufacturers that JTS salesmen tear down posters and other promotional materials for foreign cigarettes. However, these same retailers are reluctant at best to publicly state these actions by the JTS because they depend on the JTS for licenses to do business and for a continued supply of tobacco products. The Brown & Williamson Tobacco Corp.'s representative in Tokyo, Mr. Joel Silverstein, says, "there is no way your principal competitor (JTS) is going to help you."

A JTS spokesman in response to press announcements of the JTS document claimed, "it is unlikely" that JTS representatives would tear down promotional material or change brands in vending machines "without the retailers consent."

Quite frankly, Mr. President, when one considers the very large surplus that Japan has in their merchandise trade account with the United States, it is difficult to understand the need or reason for this kind of trade practices.

The world recognizes, as do the Japanese, that the United States market is essentially open to all Japanese products for which they are competitive in this market. It remains a point of concern in our relations with Japan that the United States does not receive equitable treatment in terms of access.

The Japanese cigarette market is a $5 billion market of which foreign cigarettes only have a 1.4 percent share. United States brands are very popular in Japan and, with reduced restrictions on consumption, could realize sizable increases in dollar sales. "If American-made cigarettes were allowed to gain just 10 percent of the Japanese market" according to a Philip Morris representative, "the imbalance in trade could be reduced by half a billion dollars."

Mr. President, I ask that a copy of Mr. Lehner's article in the Wall Street Journal be printed at the end of my remarks along with a copy of a letter I have written to Prime Minister Suzuki on this subject.

The material follows:

[From the Wall Street Journal, Sept. 30, 1982]

How Japan Tries to Shut Out Foreign Goods

(By Urban C. Lehner)

A document from a Japanese government-owned corporation has surfaced in business circles here that provides rare, firsthand evidence in writing of Japanese attempts to shut out foreign products—something foreign businessmen and officials have long alleged but have rarely been able to prove. Indeed a broader look at the controversy underlying the document provides a case study of the kind of elaborate web of restrictions the Japanese can weave when they're determined to have their domestic market to themselves.

The document came out of the Japan Tobacco & Salt Corporation (JTS), a government-owned monopoly that exercises exclusive control over all tobacco-products distribution in Japan. U.S. officials and the three American tobacco makers who sell here through the JTS have long believed and have at times formally complained to the Japanese government that the monopoly tries to obstruct foreign cigarette sales.

The document could well become a *cause celebre* in the ongoing efforts of the U.S. and Europe to persuade Japan to open its market to foreign products. The Japanese government has been trumpeting the claim that it's doing everything possible in that respect. But the document, a six-page battle plan detailing how one of JTS's local offices in Tokyo was to carry out its sales and promotion activities last July, specifically orders steps to squelch foreign cigarette sales.

"Curb stocking of imported cigarettes in vending machines," the document says at one point, indicating further that no foreign brands should appear in small machines containing fewer than 10 columns of cigarettes.

RETAILERS WON'T TESTIFY

"Remove displayed POP (point-of-purchase promotion) items for imported cigarettes in prominent locations," it says. (The American makers say many Japanese retailers have told them that JTS salesmen tear down posters and other promotional materials for foreign cigarettes. But they say the retailers won't testify to that because they depend on the JTS for licenses to do business and for a continuing supply of tobacco products.)

A JTS official involved in drawing up the battle plan confirmed that the document is authentic. A JTS spokesman declined direct comment because he hadn't seen the document. But he said "it's unlikely" that JTS would tear down promotional material or change the brands in vending machines "without the retailers" consent.

The document emerges at a time when officials in Washington are showing increasing displeasure at what they regard as Japanese foot dragging in carrying out earlier promises to open their market. The Japanese government earlier this year announced two packages of measures aimed at removing obstacles to foreign products, and missions of Japanese Dietmen have come to the U.S. to tout the measures. But U.S. officials say most of the measures that Japan announced with such fanfare have yet to be carried out. And a reading of the JTS document and talks with the American tobacco companies suggest that in the case of the JTS at least, new "impediments" are being thrown in the path of imported tobacco products every day.

Promoting the success of cigarette sales here is especially important to Washington, because cigarettes are one product that U.S. officials believe could easily make a significant dent in Uncle Sam's enormous ($18 billion last year) trade deficit with Japan. Cigarette sales come to a staggering $5 billion a year here, and U.S. cigarettes have proved very competitive in other foreign markets. Moreover the JTS, sole manufacturer of Japanese domestic cigarettes, is hardly a tower of business strength; there are moves afoot in the Japanese government to dismantle the monopoly because of its inefficiency.

"If American-made cigarettes were allowed to gain just 10 percent of the Japanese market," argues Philip Morris International, one of the American makers, in a position paper, "the imbalance in trade would be reduced by half a billion dollars."

But as it stands, foreign cigarettes claim only 1.4 percent of the Japanese market. They're hindered in getting a bigger share by innumerable legal restrictions—even forgetting about such underhanded measures as those outlined in the JTS document. For example, under Japanese law and JTS regulation, foreign cigarette makers:

May sell their products through only 20,035 of the 247,801 Japanese retailers licensed to sell tobacco products. (As one of the measures announced earlier this year, that number is scheduled to rise to 40,041 by next March 31 and to all of the retailers by March 31, 1986. But the American makers say JTS is carrying out the measure in a way designed to minimize foreign sales as long as possible.)

Sell their products subject to a 35 percent tariff and to a tax and pricing formula, which combined with the tariff causes for-

eign cigarettes to sell at a retail price 60 percent above domestic Japanese brands. That's true even though the price of American cigarettes when they land in Japan is about the same as the factory price of the Japanese cigarettes.

Are sharply limited in their ability to advertise and test-market their products.

Must distribute their products solely through their chief competitor—the monopoly JTS. "There's no way your principal competitor is going to help you," says Joel Silverstein, Japan representative for Brown & Williamson Tobacco Corp., another of the American makers.

John Sandor, who runs Philip Morris's operations locally, complains that JTS never seems to have enough of Philip Morris's products in stock to meet orders from retailers. For example, he says, when retailers order Lark, Japan's best-selling foreign brand (Japanese smokers favor "charcoal filters" like the one Lark features), "The monopoly will normally indicate that a sufficient number aren't in the warehouse and a competing domestic product in the case of Lark, Cabin—will be partially substituted."

The JTS internal document suggests that the monopoly uses a variety of subtle tricks to hold down foreign sales. For July in Tokyo's Sumida ward, the document ordered special emphasis on sales of five domestic brands. One of them was Marlboro (though a Philip Morris brand, it has been produced by JTS under license here for over 10 years). According to Tsuyoyuki Asaka, one of the JTS officials who helped draw up the document, Marlboro was chosen because it's considered an effective domestic "rival brand to counter imported brands."

Then there are the not-so-subtle tricks, like tearing down or stopping the posting of foreign posters, advertising displays or the electrically lit "light boxes" placed on top of a vending machine displaying the name and logo of a brand. R. J. Reynolds Tobacco International, a subsidiary of R. J. Reynolds Industries Inc., complained several months ago to the new ombudsman's office that JTS salesmen were telling retailers they weren't legally allowed to display promotional material for foreign brands. The case was settled when JTS agreed to inform retailers in writing that such materials could be displayed.

Then in early August a retailer in Tokyo's Shibuya section informed an American maker that a JTS salesman appeared to have taken away the retailer's "light box" atop the vending machine. But when Japanese government investigators acting on a complaint from the maker that didn't name the retailer, blanketed the area to interview retailers, no one mentioned the JTS. Missing light boxes were blamed on other causes—one was said to have blown away in a typhoon. The moral the investigators drew was that Americans make reckless allegations without proof.

U.S. officials and cigarette makers drew a different conclusion: Retailers are so vulnerable to the JTS pressure, explicit or implicit, that they can't afford to testify against the monopoly. There is at least some evidence that JTS doesn't shrink from using pressure to get its way with retailers.

Some retailers themselves make the same point. "Sure there's pressure (not to use foreign cigarette posters)," says Hinako Nakajima, a tobacco-shop owner in Nagoya. "The government hasn't abolished the monopoly system." Asked if JTS salesmen have ever forcibly removed posters from her shop, she will say only "please don't make me answer that question."

BLITHELY UNCONCERNED OFFICIALS

David Guilfoile, R.J. Reynolds's Japan country manager, says Reynolds's agents talk at least once a month to a large percentge of the 4,300 retailers in Tokyo licensed to sell foreign brands, "and the most common problem is the retailer will say, I can't allow you to put up that (poster or light box) because the JTS will get upset." Mr. Guilfoile says Reynolds hesitates even to complain about such abuses to the government because "we end up getting the retailer we're trying to develop as customers into trouble."

Japanese officials, for their part, seem blithely unconcerned with the tobacco question. Before one of the Dietmen's missions went to the U.S. a few months ago, one of the Dietmen was asked about tobacco at a special press conference for foreign correspondents. He replied that Japan's cigarette maker was "completely free" and thus there was nothing to discuss with the U.S. government.

Nonetheless, in the second package of measures the Japanese did come up with some tobacco concessions. They agreed that the U.S.-Japan "study group," which had been scheduled under the November 1980 Japan-U.S. tobacco agreement to be formed by March 31, 1983, will convene instead next month, an acceleration of six months. It isn't clear what scope the study group will have, however. U.S. officials say the Japanese have agreed to put the tariff question "on the agenda" but haven't agreed to negotiate a lower tariff.

It also isn't clear how meaningful the other concession in the second package—the increase in the number of retail outlets—will prove in the short run. U.S. officials and makers complain, for example, that all the outlets the Japanese have unilaterally selected to be included in the increase to take effect next March are outside the two regions of Japan where 60% of the foreign cigarettes are currently sold. That means the foreign makers won't be able to get more bang out of the sharply limited television advertising dollars they're allowed to spend, which by necessity are concentrated in those two regions.

"That isn't the way you'd do it if you were operating in the spirit" of opening the market, Mr. Silverstein contends.

U.S. SENATE,
COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, D.C., September 24, 1982.

Hon. ZENKO SUZUKI,
Prime Minister of Japan, Tokyo, Japan

DEAR MR. MINISTER: I take the liberty of writing directly to you on a matter of serious concern to the future of trade relations between our two nations.

For some years, the U.S. tobacco industry has sought the opportunity to compete in Japan in a fair and equitable way. Despite repeated representations by U.S. Government authorities and the industry, highly discriminatory practices remain in force—a punitive tariff system, as well as severe restrictions on the distribution of U.S. manufactured cigarettes by the Japan Tobacco and Salt Public Corporation.

The combined effect of the import duty and price formula (which includes a 56.5 percent domestic tax) significantly hampers market penetration by effectively raising the duty rate to 103 percent on the U.S. product. Consequently, our market share amounts to a paltry 1.4 percent—extremely low by any comparable Free World standard.

It is my belief that import tariff on cigarettes in Japan should be eliminated. As long as U.S. cigarette companies are prohibited from manufacturing within Japan, there is no legitimate reason to impose a tariff against a primary U.S. industry.

Regarding the matter of distribution, I would like to draw your attention to the fact that while the JTS has recently agreed to increase distribution on imported products, they claim it will take until 1986 to fully implement distribution. Frankly, I feel this is more a matter of will than ability, and respectfully suggest that you give the matter serious consideration with a view to shortening or eliminating this period entirely.

My primary interest in this matter is to ensure that the U.S. and Japan will both continue to prosper through free trade. You are also no doubt aware of the fact that I represent North Carolina, where the tobacco industry is a vital economic matter and a Proud Tradition.

Sincerely,

JESSE HELMS,
Chairman●

NATIONAL PORT WEEK

● Mr. HEFLIN. Mr. President, I am delighted to join with the distinguished Senator from Louisiana, (Senator LONG), in sponsoring Senate Joint Resolution 246, which would designate the first week of October as National Port Week.

For more than 300 years, the seaports of the United States have been, in countless ways, an integral cornerstone of the Nation—the first population centers, the gateways to expansion, the essential building blocks of first local, then State and regional econmic development.

For farmers and manufacturers, ports have been the points of embarkation to the trading markets of the world. To millions of newcomers to America, they have been havens of comfort, safety, and promise.

In every war in which our Nation has ever engaged, our port system was a vital, if often ignored, element of overall defense strategy. I say often ignored because seaports are taken for granted—they are always there, always ready to be of service, and not noticed except on those rare occasions when that service is suddenly not available.

Those services, and the seaports which provide them, should not be taken for granted, however, for if the American port system were to ever shut down, the national economy would grind to a sudden stop, and the Nation itself would shut down. In times of conflict, United States and allied forces overseas would be isolated, without supplies and reinforcements, except for the thin trickle that might be flown in by air. Those of us who participated in World War II realize this importance. It is true today, just as it was then.

Overall, it has been stated that 1 out of every 7 American jobs in manufacturing depends upon our export performance, and that performance is, naturally, dependent on the ability of our seaports to handle their volume of foreign trade.

Our deep water ports are indeed a major national industry—they provide employment for some 1,250,000 persons. In addition, the Commerce Department has estimated that the present volume of American import and export tonnage will double over the next 20 years, reaching more than 600 million tons annually.

Clearly, the economic importance of our seaports to the United States speaks for itself.

There is yet another reason that our seaports are important to our country. As we have all seen through the events of the past decade, our Nation is only as secure as our energy security.

To the extent that we are able to provide our allies with a reasonable and reliable source of coal, they will become less vulnerable to economic and military blackmail by foreign energy suppliers. We must recognize that few greater threats to peace exist than the dangers that are born of energy instability.

As we well know, coal is the energy source of the future. We can, and, in fact, we ought to supply a substantially large portion of the world's energy needs. It is predicted by the International Energy Agency that the United States will have to export 100 million tons of coal by 1990, and 300 million tons by the year 2000 to meet world energy needs. These goals are hopelessly unreachable without the continued growth, expansion, and prosperity of our ports.

I would be sadly remiss if I did not mention the outstanding port located in my home State of Alabama, Mobile. Alabama has tremendous agricultural resources, and nearly one-tenth of the coal in the United States is located here, in coal reserves with a life expectancy of about 1,000 years. Needless to say, Mobile will play a vital role, for years to come, in the continuing contributions seaports make to our country. It is certainly a city of which all Alabamians are proud.

Mr. President, I have mentioned here only a few of the reasons that ports are of vital interest to the United States; the litany could go on almost endlessly.

I am honored to be a cosponsor of this resolution, for I think it is far long overdue for us to properly recognize the contributions ports make to our country. I hope each of my colleagues will join in cosponsoring this resolution, and we can all celebrate "National Port Week."●

JOHN W. MEGOWN, OF MARION, IOWA

● Mr. GRASSLEY. Mr. President, John W. Megown, of Marion, Iowa, has long been one of Iowa's finest authorities on the vital issues of agriculture. He served 11 years as chairman of the Iowa Agriculture Promotion Board of the Iowa Department Commission and for several years produced the syndicated "Food for Thought" radio show broadcast around North America from over 700 radio stations. Recently, he was nominated by the Reagan administration to serve on the Agricultural Technical Advisory Committee on Trade of Grain and Feed.

Mr. Megown has long actively supported the development of new markets and uses for farm products. I would like to share with my colleagues the keen insight that this gentleman holds for the potential of moving ahead in these areas. The following is a copy of a speech Mr. Megown presented at the Annual Fall Festival of the Iowa Poultry Association. I believe my colleagues will find his thoughts very interesting and helpful.

The remarks follow:

PROBLEMS AND POSSIBILITIES FACING AGRICULTURE DURING THE 1980'S

(By John W. Megown)

"Twenty-Four Turbulent Months" was the title of a book that was published in June of 1980. It consisted of a collection of one hundred of my "Food for Thought" radio commentaries, news backgrounders and interviews.

The period covered was April of 1978 to April of 1980, and this we all know was a very turbulent and topsy-turvy period for America's farmers and agri-business people.

As I began to put together today's speech, I looked through this book once again, and it was like reliving recent agricultural history. It brought back both good and not-so-good memories.

The first commentary, which was broadcast only on WMT-Radio in Cedar Rapids, was entitled, "Bureaucrats Are Listening." In it, I pointed out that the bureaucrats in Washington were apt to take note of what farmers think, if they were willing to speak out about their problems. And this, they certainly learned to do in recent years. And I'm glad they did!

Later, I talked about some of agriculture's new allies, like the Consumer Alert Council and the Great Plains Legal Foundation. These two organizations were of great help to us with several issues.

Time after time, the controversial cholesterol issue was discussed, and new research was presented showing that eggs and red meat are actually the "good guys." Included was an interview with Dr. Margaret Flynn of the University of Missouri.

One of the other early interviews was with Doug Getter, Research Director of the Iowa Development Commission. The IDC's gasohol marketing study was only 3 weeks along, but it already looked like gasohol would be a big success. Today, some 30 percent of all gasoline sales in Iowa fall into the gasohol category!

Several of my commentaries and interviews were related to the great nitrite controversy. We won this battle, but it was very time-consuming and expensive!

This should be remembered as a classic case of some Federal bureaucrats in the USDA and FDA becoming completely carried away with their authority, and hurting American agriculture unnecessarily.

The USDA's ridiculous and unfounded regulation on the use of nitrite in bacon cost the livestock industry well over $5 million. The direct cost to taxpayers for USDA enforcement of the 1978 regulation has been almost $1 million.

The positive effect of the nitrite fiasco is that America's farmers learned how to defend themselves against unreasonable regulations. They learned how to work together and to communicate the facts to Congress and the public.

The antibiotics-in-feed issue also received considerable attention, and it looks like it will keep reappearing from time to time; with some consumer activists trying to ban their use.

I also talked about the future of the family farm, about the need for more innovative farm financing, about inheritance taxes, about the problems young farmers were having in getting started, and about the problems caused by overregulation. I also talked about how the USDA was rapidly moving away from its traditional role of serving America's farmers.

Interestingly, the pendulum has apparently swung almost completely back to the per-Carter era at the USDA . The September 5 issue of the Sundy Des Moines Register carried a front-page story entitled, "USDA Focus Shifts Back to Farmers." George Anthan started his story this way, "President Reagan, in fulfilling his 1980 campaign pledge to return control of the U.S. Department of Agriculture to farmers, may have sown the seeds of the venerable agency's ultimate destruction."

He pointed out that the political power of American farmers has fallen, along with their numbers. He said that experts across the country agree that if the USDA is to maintain some semblance of influence in Washington and continue to represent the interest of farmers, "It must broaden its scope and at least give equal billing to the 97 percent of American's who aren't farmers."

The biggest bone of contention appears to be in the area of nutrition, food, and consumer programs—the areas that caused agricultural people so much concern during the Carter years. Some of the consumer and dietary activists feel that these programs are now being deemphasized—and maybe they well should be! I, for one, got very tired of some of the bureaucrats, like Carol Tucker Forman, telling me what I should, or should not, eat!

I am very glad that I had the opportunity to do the "Food for Thought" radio shows. Doing them provided me with a unique vantage point to observe what was happening to agriculture in America. Each week I was able to talk to millions of listeners, and to try to set the record straight about an issue.

Some of the problems I commented on are no longer burning issues—like the nitrite mess and overregulation—but some others—like the cholesterol controversy and the farm animal welfare movement are still with us—and others are appearing as we move deeper into the 1980's.

Some of these other problem areas, include: The erosion of our soil; the decline in farm exports; the energy cost-supply situation; the negative effects of high interest rates; the lack of sufficient cash flow for many farmers; the decline in total number

of farms; the declining proportion of medium-size family farms; the great difficulties faced by young people trying to get started farming; and the continuing attacks by social and dietary activists—one of the worst being the animal welfare issue.

All of these problems will constitute developing threats to America's agricultural industry. The 1980's will be a time of unparalled challenge to all of us involved with agriculture and food production.

A young lady from near Iowa City by the name of Mary Wall won the 1981 Iowa Farm Bureau Essay Contest. Here's what Mary had to say about the present decade, "the 1980's are a decade of challenges, challenges to find alternative energy sources, fight inflation and obtain world peace. The 1980's represent noteworthy challenges for agriculture. We must feed the increasing population, make a profit and yet not lose or destroy the soil for future generations."

In that single paragraph Mary spelled out very clearly what the 1980's are all about for America's farmers.

The total number of U.S. farms will decline significantly by the year 1990, from 2.48 million in 1978 to only 2.09 million in 1990. There will be a large proportion of small farms, an ever-increasing proportion of large farms, and a declining proportion of medium-size farms.

It was on the medium-size farm—the family farm—that this country was built.

For your information, the medium-size farm has a gross income in the range of $20,000 to $99,999.

The USDA now predicts that almost two-thirds of agricultural production will come from the largest 50,000 farms by the year 2000. Al Swegle, farm editor of the Cedar Rapids Gazette, told me that an economist at Kansas State University had told him that there would be only about 200,000 farms by the turn of the century. That sure does supply some food for thought, doesn't it?

Yes, things are changing rapidly down on the family farm, and many of the changes are making it much harder for farmers to prosper and even survive—and much harder for younger people to get started in farming.

A USDA study says that "the number of new farmers under 35 years of age will shrink from 475,000 from 1964-74 down to 284,000 from 1994-2004, a 40 percent drop in numbers.

Last year, Vernie Glasson, director of national affairs, American Farm Bureau Federation, told a House subcommittee that "the backbone of U.S. agriculture—the farms that depend solely on income from sales of commodities—is now substantially threatened by inflation and failure of national monetary and fiscal policies."

Mary Wall, in her essay, had this to say about the survival of the family farm, "preserving the family farm is a problem that has been getting more and more attention. Higher production costs are driving some of the family farms out. Family farms are what this country was brought up on and their importance shouldn't be overlooked."

It would now appear that survival will be the overriding challenge of the 1980s. All other issues and problems will relate directly to the farmer's ability to survive.

It would also appear that agricultural production costs will continue their escalating spiral in the months ahead, but at a slower rate.

In 1981, Warren Melles, a Northrup King vice president, looked back over the previous 7 years at what had happened with production costs.

The whole price of diesel fuel rose 370 percent. A $1,500 fuel bill in 1974 was up to $5,500.

Country bankers charged 12-percent interest on production borrowing in January of 1974; 7 years later it was about 17 percent—a 42 percent jump.

If a farmer needed $25,000 in working capital in 1974, he needed at least $50,000 in 1981. So besides needing twice as much money, farmers has to pay 42 percent more for it.

Corn sold for $2.62 per bushel in 1974. The price was only $3.25—7 years later. Soybeans rose from $5.92 per bushel to $7.29. Just for those two crops, prices increased by a meager 23 percent.

Here's a footnote to this: In September of 1982, corn is selling at only about $2.25 per bushel and soybeans are about $5.50 per bushel.

American industry averages a return on investment of about 16 percent. But the average U.S. farmer in 1981 eked out a living with an average return of only about 3.6 percent.

Net income for U.S. farmers is projected at about $19 billion in 1982, down a whopping 24.3 percent since 1981, according to the USDA.

So, even with inflation in production expenses slowing somewhat and livestock prices showing improvement, the farm income situation is not good this year.

It would appear that production expenses will increase only 2 percent over 1981. In 1981, they rose 9 percent.

One of the negative factors involved with the current farm income situation is the decline in farm exports. It looks like exports will decline this year by 8 percent; the first decline since 1969.

There are some serious problems and maybe some interesting possibilities associated with our agricultural exports.

We obviously have a serious overproduction problem. All through the 1970's, farmers expanded production, increasing the amount of land under cultivation from 289 million acres in 1972 to 413 million today.

They expanded production because our Government urged them to do so. When OPEC decided in 1973 to raise oil prices, it forced us to sell more grain abroad to earn dollars to help pay for the high-priced imported oil.

Then later, came the Carter grain embargo, which indicated to our foreign customers that we were not a very reliable supplier of grain.

Another problem involves foreign subsidies. Other nations routinely subsidize agricultural overproduction, and these subsidies make it very tough for U.S. agricultural producers who want to develop export markets.

The poultry industry, and particularly the egg producers, are very much aware of how this works and how it hurts us. The European Economic Community recently increased its egg subsidies 1 cent. The subsidies now total 11½ cents per dozen eggs.

United Egg Producers has petitioned the USDA seeking relief from unfair trade practices of other countries.

We'll all want to watch this closely for developments to see how the USDA handles this problem. It could establish precedents.

To quickly review this, some of the biggest problems relating to exports seem to be overproduction (which keeps our prices too low to be very profitable), being known as unreliable supplier, and the use of some unfair trade practices by foreign competitors (from our viewpoint).

Some of the possibilities with exports include: (1) Better organized and coordinated efforts to promote and export all types of agricultural commodities, like the "Farm Marketing Board" recently proposed by UEP president Al Pope; (2) the trading of commodities for oil and other things we need, or, as some call it, bartering; (3) in the case of Iowa exports, the establishment of an international office in Asia, like the one we have in West Germany; (4) the promotion and export of more processed agricultural products, thus adding greater value to our agricultural products and increasing employment in this country.

Our State and Federal Governments, as well as our State and national agricultural commodity organizations, are going to have to become much more committed to developing and maintaining our foreign markets. Our greatest possibilities during the 1980's lie in the international market.

That's enough about exports. Let's go on to another problem—the farm animal welfare issue. I'll just hit this briefly because it will be covered in detail later today.

I first heard about this in October of 1980, and did a commentary on it in December of that year. During a speech in June of 1981, I asked for a show of hands by people who had heard about it. Only six people out of about 200 had heard of it. The problem is that still too few people understand the implications.

My point today is, "Don't become too complacent about the farm animal welfare issue, because if you do, it might cost you plenty!"

For example, American egg producers would be faced with a cost of $800 million to convert to standards of caged layer equipment recently adopted by the European Parliament Agriculture Committee.

"If, under pressure from the animal welfare lobby, laws should be passed requiring mandatory requirements similar to those recommended for Europe, the cost would be catastrophic for the American producer," said a Feedstuffs article dated June 28, 1982. It went on to point out that there would be little chance for these costs to be absorbed by increased egg prices.

You might wonder why I am warning you about complacency. Well, I am very concerned that the low-keyed tactics of the animal welfarists are lulling many aggies to sleep, and this is exactly what they want to do.

Here's a very good example of how some key policy makers are still unaware of what this movement is all about.

During President Reagan's recent trip to an Iowa farm, a farmer asked him about this issue. Here's the reply, as reported by the Cedar Rapids Gazette, "Somebody mentioned something about that to me, but at the time it didn't register with me," the President said. "I don't remember such a thing being a problem. What is it? Is this a new regulation?"

Right now, many people feel that this isn't really a serious problem, and that it will go away.

If we aren't ready to combat their future challenges with the facts, we could easily lose this one to the farm animal welfare activists.

Speaking of activists, we're also going to continue to have to face their challenges in regard to the diet-health issue.

Earlier this year, a committee of the National Academy of Sciences issued a report

recommending that we eat less food high in saturated and unsaturated fat in order to reduce intake from the present 40 percent to 30 percent of calories. This was in relation to cancer risks.

This was just one more in a long line of dietary reports coming out of Washington, starting back in January 1978, when Senator George McGovern's dietary goals' report was issued. It advised people to eat less meat and to cut down on eggs and butter fat. This was the beginning of the cholesterol controversy.

This type of thing is what the famous scientist, Dr. Thomas Jukes, calls "coercive nutrition." He refers to the process by which some bureaucrats, some dietary activists and some Members of Congress have been attempting to impose their recipe as to exactly what Americans should eat and not eat.

For your information, the egg industry escaped untouched in the latest NAS report. But, again, I must say, "Don't become too complacent. The next report just might do you some harm, like the first one did."

One of the top leaders in the poultry and egg industry suggested to me the need for much closer cooperation between the poultry and egg people and the dairy and red meat producers in developing the facts about food products and the diet.

I do want to compliment the UEP on their brochure, "Diet & Health: Answers to Consumer Questions." It illustrates a positive approach to solving a difficult problem.

Speaking of positive approaches, I want to briefly touch on another important possibility. This is the area of promotion and development of new markets and new uses for farm products.

In 1970, the Iowa Development Commission started the "Fine Iowa Meats" program, which continues to be very successful. Later, we developed the "Iowa Chop".

Because of this experience, I believe very strongly in promoting agricultural food products and in conducting research to adapt them to new uses, and to seek out new markets.

One of the most intersting new possibilities in this area involves the use of egg whites in pizza. Work at Cornell University has shown that new pizza dough can be made using up to 85 percent egg albumin and about 13 percent flour, among other ingredients.

They call it "egg pizza," but maybe it should be called "Lo-Cal" or "light" since it contains two-thirds fewer calories than the traditional flour-based pizza.

It tastes as good and is as chewy as any conventional pizza, and it doesn't become soggy, even if reheated in a microwave oven.

I would think one, or more, of the pizza chains would leap at the chance to offer a low calorie pizza.

What is now needed is more applied research of this type to develop new food technology to help develop new markets for eggs and poultry.

Since the Federal Government is reducing its research budgets, it's going to be up to the commodity organizations to finance the needed research.

I understand that the egg producers are in the middle of a national referendum to determine if they will increase the assessment for the American Egg Board by 2½ cents per 30-Dozen case.

It is not my place to tell any of you how to vote, but I do urge you to study the proposal very carefully. You could be deciding on the industry's future and your own.

As I have traveled around the country, I have talked to several poultry and egg people, as well as some farm media editors. We bounced some wild ideas off the walls about how to promote the consumption of poultry and eggs.

Al Swegle of the Cedar Rapids Gazette suggested a chain of delicatessens offering only egg and poultry dishes. Someone else came up with the idea of an "eggiteria," serving all sorts of the basic, as well as the exotic egg delicacies.

Someone came up with the slogan, "Eggs aren't just for eggheads." When I asked for an explanation, he said, "Many highly informed people already know that eggs can help reduce cholesterol. Now, we have to get the story out to everyone."

The suggestion that intrigued me the most, I call the "Reese's pieces precept." It goes this way: If you are willing to put your product in front of a large audience in a clever and/or attractive way, and to spend the money necessary to continue and to broaden its exposure, you just might be very successful.

This was certainly the case with Reese'e pieces due to their exposure in the movie, "E.T." The continuing well-designed promotion has made this candy one of the best known and an all-time best seller.

Too seldom today are attractive foods, like baked chicken or roasted turkey, or eggs benedict or mouth-watering omelets, shown in movies or television shows. These days, we see people gobbling junk foods or unappetizing fast-food meals.

Maybe a concerted effort should be made with movie and TV producers and directors to urge them to utilize attractive egg and poultry foods in scenes where people are dining. If this is accomplished, then you can build a promotion based of it.

The purpose of discussing these unusual promotional possibilities is to stimulate each of you to think of exciting new ways to market your products. Then, working together, you can use them to sell more poultry and eggs.

My purpose today has been to supply you with some food for thought about agriculture in general and about your own industry. Hopefully, I have set the stage for some of the other speakers.

I want to end this by quoting one of your fellack of confidence. If each of us could develop a little more confidence, we could turn the economy around."

Thank you for listening.●

INTERNATIONAL WEHRKUNDE CONFERENCE

● Mr. GLENN. Mr. President, for almost two decades, the International Wehrkunde Conference in Munich, Germany, has provided a forum for original thinking on issues of concern to the North Atlantic Treaty Organization. Our congressional delegations, led by the distinguished senior Senator from Texas, have been fortunate, indeed, to have had the opportunity to participate in these gatherings.

Mr. Geoffrey E. Pattie is a regular at the Wehrkunde conferences, and his presentations are always a major attraction since they provide valuable insights into the problems confronting the alliance. Mr. Pattie was elected to the British Parliament in 1974 where he is vice chairman of the Conservative Parliamentary Defence Committee.

In a paper he presented at the 19th International Wehrkunde Conference in Munich, February 13-14, 1982, Mr. Pattie describes the conspicuous failure by NATO and its member governments to convey to the Western World a convincing picture of the alliance's deterrent strategy. This failure in turn has led to a lack of public support for NATO, and, if continued, could result in eroding the very foundations of NATO itself. Mr. Pattie is particularly convincing in his description of NATO as the only credible peace movement.

I ask that Mr. Pattie's paper "Public Opinion and Alliance Strategy," be inserted in the RECORD.

The paper follows:

PUBLIC OPINION AND ALLIANCE SECURITY

(By Geoffrey E. Pattie)

A distinguished strategic analyst has suggested: "Security, like electricity, must be on hand when you need it. But also like electricity, it is almost impossible to store, and every generation must make its own."[1] It is axiomatic that no security policy can be sustained for very long within the free societies of the West without the general support of the populations concerned.

Quite apart from the pressures exerted on governments of democratic societies by the discipline of the ballot box, the maintenance of the security policy of a nation hinges critically upon the willingness of at least some of its people to carry it out—in the most tangible form, the members of its armed forces. If a nation's populace were not well disposed toward its security policy, it is unlikely that sufficient men and women would be found willing to serve in its forces. Apart from the inclinations of the potential recruits themselves, the social pressures against military service would be enormous if the security policy did not command a broad measure of acceptance by the population at large. These considerations are, of course, more pressing for a nation with all-volunteer forces, but the United States' experience of draft-dodging in the Vietnam era shows that conscription cannot automatically guarantees the effective means to carry out a security policy if public support falters.

Vietnam holds other lessons. In speaking of the necessity of "broad support" for a security policy if it is to be sustained, one must remain mindful that the support of a simple numerical majority of the population-at-large is not always enough. Relatively small groups of extremely vociferous dissenters can sometimes succeed in challenging a policy to the extent of rendering it unsustainable. This latter point is particularly relevant, and worrisome, in the context of the current debate over the role of nuclear weapons in NATO's strategy.

OPINION TRENDS IN THE ALLIANCE

The United States International Communication Agency (USICA) sponsored an opinion poll in July 1981 in five West European countries (the Netherlands, West Germany, France, the United Kingdom and Italy). The summary of the poll's findings reported: "Support for NATO continues to predominate in West Germany, the U.K. and the Netherlands. Italians are almost evenly divided between NATO and neutrali-

[1] Professor Laurence Martin in the 1981 Reith Lectures (BBC Radio).

ty, while a French plurality, in a reversal since March, prefers neutrality to 'belonging to the Western Alliance'."

On the face of it, these findings could be described as positive from NATO's point of view. But the figures are less reassuring. Of those polled, support for NATO membership ran at 56 per cent in the Netherlands, 64 per cent in the FRG, 59 per cent in the United Kingdom and 49 per cent in Italy (the figure for France is excluded in this context). And, perhaps even more significantly, the poll found that neutralist sentiments, although held by minorities (except in France), appeared to have increased between March and July 1981. That rise was on the order of 10 per cent, except in the FRG, where it ran at 4 per cent.

Thus, while the poll showed general support for NATO in the countries polled, those in favor of Alliance membership were by no means a large majority in any country, and neutralist sentiment seemed to be on the increase. In order to better grasp the roots of the problem, it is useful to consider some of the other findings of this poll. Majorities in Italy (65 per cent), the United Kingdom (64 per cent), France (58 per cent) and the Netherlands (54 per cent) preferred that their governments did "everything possible to stay out of disputes between the United States and USSR, even if they involved their country's important interests." West Germans were divided on the issue, with 41 per cent preferring to stay out of superpower disputes and 45 per cent wanting their government to side with the United States.

Among neutralists, a number of separate strands of thought emerged. Lack of confidence in NATO's ability to defend Western Europe was one of several factors strongly related to a preference for neutralism over NATO. Others were the desire to avoid superpower disputes, the belief that deployment of modernized long-range theater nuclear forces (LRTNF) made a Soviet attack on Europe more likely, a desire for unilateral force reductions and a preference for capitulation rather than making war.

Underlying all these currents of thought in the neutralist position seems to be one simple belief: that NATO's strategy of deterrence will not succeed in keeping the peace. It is only on the supposition that deterrence is likely to fail that one can believe, for example, that the presence of Pershing-2 and cruise missiles in Europe will make an attack on it more likely, or that superpower confrontation, which would draw the European members of the Alliance into conflict, is in some way inevitable.

This, of course, begs the question whether a policy of neutralism is in any way more likely to avert oppression or to preserve Western freedoms. However, before considering how it is that we have reached the sorry state in which such large numbers of the populations of NATO's European members nurture such grave misgivings about the Alliance's strategy, it is useful to touch at least briefly upon a related, but separate, problem of public opinion within the Alliance as a whole.

Increasing attention has been focused in the informed media on both sides of the Atlantic on "the health of the Alliance." The attitudes expressed in discussion of the topic, quite naturally, differ in Europe and the United States. Some European commentators who express doubt over the continuing cohesion of the Alliance cite in evidence what they portray as an overbearing (or naive) U.S. Administration determined to impose its own vision as to the best way forward on a reluctant Europe. By contrast, some in the United States believe that the European members of the Alliance have "gone soft" and are no longer willing to accept the risks and burdens involved in the collective commitment to mutual defense. Some even go so far as to question whether it is still worthwhile for the United States to continue to make such a predominant contributin the defense of Europe.[2]

In the eyes of the less informed, and particularly in those of a number of "peace" movements which have sprouted in Europe in recent years, the United States now seems to be preparing to fight and win a nuclear war against the Soviet Union—and to do so, initially at any rate, within the European continent. And in the European "peace" movements the December 1979 decision to modernize NATO's long-range theater nuclear forces is seen as striking evidence of such plans, ensuring that the superpower confrontation will be resolved by proxy in the cockpit of Europe.

Reaction in the United States to such protestations is understandably aggrieved. The LRTNF modernization program is designed precisely to achieve the reverse of what is claimed by these critics: it is intended to avoid any "decoupling" of the American strategic guarantee; it was requested by the Europeans, and not forced upon them.

The problem of public opinion within the Alliance, then, seems to be at least twofold. There are doubts in Europe as to whether the Alliance's policies are the best way of preventing war on that continent, together with doubts as to the intentions of the United States. And there is a potential trans-Atlantic split, with some in the United States fearing that Europe has lost the will to contribute significantly to its own defense, and is therefore no longer worth defending.

U.K. OPINION ON NUCLEAR WEAPONS

There is no doubt that one of the major causes of concern within the publics of the European members of the Alliance has been fear of a nuclear arms race in general and in particular of a nuclear war confined to Europe. The upsurge in anti-nuclear sentiment in Europe resulted in large part from the December 1979 decision; in retrospect we must conclude that the public presentation of the rationale for this decision was less than a conspicuous success.

Some experience in the United Kingdom may be cited to provide some pointers as to how the Alliance might improve public perceptions of its policies in general. An October 1981 opinion poll in the United Kingdom for *The Observer* reported that 53 per cent of those questioned believed that U.S. bases should be removed from their country. Yet, in the same poll more than two-thirds (67 per cent) of those questioned favored the retention by the United Kingdom of an independent nuclear deterrent. In considering these results, it is worth bearing in mind that the most prominent anti-nuclear campaigning organization in the United Kingdom has had two major planks to its platform: unilateral disarmament by the U.K. and closure of American nuclear bases in the country (including the abandonment of plans for the stationing of cruise missiles in the U.K.).

As always, different polls yield different results. Another poll in the U.K. in November 1981 (commissioned by the BBC) reported that only 31 per cent of those questioned believed that U.S. nuclear weapons should be stationed in the United Kingdom, but that 52 per cent believed the United Kingdom should retain her nuclear deterrent.

The conclusion that can be drawn from the results of these polls is that, while the anti-nuclear campaigners have directed their attacks against both American bases in the country and Britain's nuclear deterrent, their views are reflected by a larger proportion of the population in the first case than in the second. The United Kingdom's own nuclear weapons are more acceptable to its population than those of the United States.

Such a conclusion may seem less than surprising: it is perhaps entirely understandable that one tends to put more trust in one's own armed services than those of an ally, however long the association with that ally might have been. And yet, even if understandable, such a reaction to the presence of U.S. nuclear-capable forces in the United Kingdom—and indeed on the territories of the other European members of the Alliance—is disturbing.

A number of factors no doubt underlie the swelling anti-American sentiment in Europe. First, there is the fact that those who point out the dangers we face are never the most popular of friends, particularly when their prescription is that we should, collectively, spend more of our scarce resources in order to prevent the potential dangers from ever becoming actual. Second, and intimately connected with this, is the heritage of the free countries of the West. As Laurence Martin has said: "Conditioned by its ideals to feel guilty about the use of force, democratic opinion is addicted to crusades: if not against some foreign foe, on whom we project all the blame for our being in conflict, then against the idea of armed force itself."[3] In its role as the leader of the Western Alliance, the United States finds itself, however unwillingly, cast in the role of the villain. It is the United States that comes to be seen to stand for a policy in favor of the use of armed force.

THE NUCLEAR FACTOR IN PUBLIC OPINION

Yet, these somewhat parochial and instinctive anti-American reactions are not the sole determinants of public opinion within the Alliance. It must be recognized that there has been a lamentable failure to put across to the publics of the Alliance the *purpose* of nuclear weapons within the deterrent strategy.

A major stumbling block to the successful presentation of this strategy is the basic paradox of deterrence itself—that in order successfully to deter war, one must make clear to the potential aggressor that one has both the means and the resolve to withstand any aggression on his part. The primary role of nuclear weapons, as of any weapons in the armory of a defensive alli-

[2] A particularly strident example of this tendency is contained in an article by Justin Galen in Armed Forces Journal International, November 1981, entitled "Theater Nuclear Weapons and the Crisis in Europe's Leadership." A typical passage is "We [the United States] do not exist as a nation to help the Prime Minister of Germany maintain his coalition; to help Belgium and the Netherlands decide on their respective national identities; or to protect the British Labor Party from its more lunatic left wing. We do not exist to try to help you make up for the failure to explain to your students, your clergy and your political activists the reasons for the NATO Alliance, and how they can best sustain your deterrence and defense."

[3] Martin, op. cit.

ance, is the contribution they can make to deterrence. The use to which they would be put in any conflict resulting upon the failure of deterrence is essentially secondary. But the paradox of deterrence, when considering nuclear weapons, is made the more stark simply by the appalling destructive power they could unleash. It is therefore very tempting to allow emotion to becloud thinking when considering the role that nuclear weapons play in NATO's deterrent posture. And it is upon this emotion that the anti-nuclear movements play.

There is no difference in principle between the role of nuclear weapons and of any other weapon in the deterrent strategy of the Alliance. In order not to have to use them, we need to keep a potential aggressor persuaded that we are both ready and willing to use them. In order that they should be able to do this, governments must at the very least make it clear that they have not ruled out the possibility of the use of nuclear weapons in any circumstances. In consequence, their servicemen must be equipped, trained and prepared to use nuclear weapons. When they receive a properly authenticated order to release their nuclear weapons, they must do so. Were they to waver, or to be thought likely to waver, the deterrent effect of those nuclear weapons would be in danger of being lost.

At the same time, it must be recognized that the adoption of the strategy of deterrence, carrying with it as it does the preparedness to use nuclear weapons in the defense of the Alliance, is very easily misrepresented in public. A salient example is the December 1979 decision to modernize the Alliance's long-range theater nuclear forces by the introduction of Pershing-2 ballistic missiles and ground-launched cruise missiles (GLCMs) in Europe. In light of the fact that this decision, and its subsequent characterization by its opponents to the publics of the European members of the Alliance, seems to have been one of the major causes of the recent upsurge in anti-American and anti-nuclear sentiment within the Alliance, it cannot remotely be described as a public relations success for the NATO nations. What went wrong?

The nomenclature of the long-range "theater" nuclear force modernization program was perhaps entirely understandable from the point of view of the experts concerned with the development of the program itself. It must be remembered that this program was largely a response to European fears about the "decoupling" of the American guarantee from the European theater. In retrospect, however, the characterization of the program as a modernization of the long-range nuclear forces to be deployed within the "theater" of the continent of Europe has been less than happy. For those within Europe who are not familiar with the jargon of the strategic analysts, the term "theater" carries the wrong connotations. The "theater" involved embraces the western parts of the Soviet Union, the remainder of the Warsaw Pact and the European members of NATO; it excludes the North American members of the Alliance. The impression gained currency that the LRTNF modernization program was a way for the United States to use the "theater" of Europe as a battlefield in which a conflict with the Soviet Union might be contained.

The second and related problems the NATO European countries encountered in communicating the LRTNF modernization program to their publics lay in the failure to explain sufficiently that the retention of the ability to strike the Soviet homeland with nuclear weapons from Europe was an essential part in the Alliance's capability to respond flexibly, and did not in some way represent a surrogate for a strategic exchange. Again the opponents of NATO's nuclear policy made capital. They claimed that the United States and the Soviet Union would attempt to export a nuclear war beyond their own countries—they would hope to fight it in Europe by proxy without involving their own homelands. Cruise and Pershing missiles were characterized as "first-strike" weapons. By some opponents the modernization program was entitled "Eurostrategic," and the implication of an American intention to fight a "limited nuclear war" in Europe was underlined.

The Alliance has learned perhaps some part of the lesson from this episode. The LRTNF program is now called the "Intermediate Nuclear Force" program. European members of the Alliance are beginning to make some progress in getting across the message to their constituencies that, far from being an easy way of allowing the superpowers to fight a sub-strategic nuclear war within Europe, the modernization program is designed precisely to ensure that the Soviets do not believe that such a war is conceivable, let alone one which could be won.

Nevertheless, we must recognize that any progress in explaining the rationale behind the LRTNF (INF) modernization program has only been to recapture some of the ground that was lost. The question remains as to why so much ground was lost in the first place.

SOVIET PROPAGANDA AND DISINFORMATION

Without doubt, the Soviet propaganda machine has been instrumental in driving wedges between the countries of the Alliance. In freedom of the press, television and other media resides one of the most precious values of the Western world. Yet, this freedom brings with it some major problems. In a recent article smuggled out of the closed Russian city of Gorky, the exiled dissident Andrei Sakharov characterized the pluralistic nature of Western democracies as both a strength and a weakness when confronted by the totalitarian, expansionist East. He noted: "How easily pro-Soviet propaganda initiates massive, one-sided campaigns against the basing of American rockets in Europe at a time when in this part of the world a breach of the military balance, including nuclear missiles, is quite obvious."

There is no doubt that the "peace" movements in Europe have gained substantial public support. This would not have been secured without the extensive coverage that they have received in the media of the Free World. The West, by contrast, has no opportunity to put its own view before those living behind the Iron Curtain.

Sakharov, more than most, has good reason to know the techniques of propaganda and distortion practiced by the Soviet leadership. And the government of the Alliance should remain constantly mindful of the huge resources that the Soviets devote to securing broad coverage of their views in the free media of the West.

A prominent funnel for these efforts is the World Peace Council (WPC) based in Helsinki. This is the leading Soviet-controlled international front organization, the activities of which were endorsed by President Brezhnev at the 26th Soviet Communist Party Congress in February 1981. The WPC was founded in Paris in 1949 as the World Committee of Partisans for Peace. In 1951 it was expelled from Paris by the French Government for "fifth-column activities." It moved first to Prague and then to Vienna, until banned by the Austrian Government in 1957 for "activities directed against the interests of the Austrian State," although it continued to operate in Vienna until 1968 under cover of the International Institute for Peace (IIP). In 1968 it moved to Helsinki, leaving the IIP behind in Vienna as a WPC subsidiary. The WPC is perhaps too transparent a front organization. It is now generally known among informed observers that it is "in the hands of the International Department of the Central Committee of the Soviet Communist Party."[4]

The WPC's campaigns against Western defense efforts have been relentless. In the 1950s it led the opposition to the rearmament of the Federal Republic of Germany. In March 1950 the WPC launched the first Stockholm Appeal demanding an absolute ban on the atomic bomb—a ban which the Soviet leadership had effectively prevented in 1948 by opposing a resolution in the United Nations General Assembly for total nuclear disarmament under international auspices, while continuing its own nuclear weapons program.

The text of the New Stockholm Appeal, launched in June 1975 under the slogan, "To make detente irreversible, stop the arms race!," indicated its one-sided nature: "The arms race, the stockpile of weapons in the hands of the imperialists, incite and encourage the forces of aggression, militarism and fascism, colonialism and racism. . . ." In 1977 the WPC mounted a major campaign against the deployment by NATO of modernized LRTNF. Subsequently the Nordic Peace Conference in Aalborg, Denmark, in May 1981 (convened by the Danish WPC affiliate), advocated tht Scandinavia become a nuclear weapons-free zone, a proposal which the Soviet delegate said his country and its allies "would fully support."[5] That avowal lost some of its luster with the incursion of the nuclear-armed Whiskey-class submarine into Swedish waters in 1981.

Notwithstanding its role as a thinly disguised instrument of Soviet propaganda and disinformation, the World Peace Council still manages to operate with some effect. Thus, the WPC secured extensive coverage in the Western media for such items as the "appeal" by five NATO ex-generals calling for arms control negotiations and questioning the need for the NATO LRTNF modernization program. The fact that three of these generals had formal connections with the WPC did not receive equal coverage.

Another communist front organization is the World Federation of Trade Unions, which organizes meetings such as the "World Trade Union Conference on Socio-Economic Aspects of Disarmament" that convened in Paris in December. But there are also covert weapons in the Soviet propaganda armory. The expulsion from Denmark in November 1981 of Vladimir Merkulov, a Second Secretary at the Soviet Embassy in Copenhagen, drew attention to extensive Soviet involvement with peace organizations in that country—an involvement that was particularly directed toward those opposing Denmark's NATO membership and favoring a "Nordic nuclear-free zone." Following similar activities in the Nether-

[4] India Today, January 1-15, 1980.
[5] Peace Courier, June 1981.

lands, in April 1981 the Dutch Government withdrew the residence permit and press card of the Tass representative, Vadian Vasilyevich Leonov. According to an interview, Leonov, believed to be a KGB officer, said that his most important task had been maintaining contact with leading personalities in the Dutch anti-nuclear movement.[6]

Many other examples could be cited of Soviet propaganda campaigns which take advantage of the free media of the West. The Soviets clearly are determined to lose no opportunity to put forward views in their favor on the whole range of security issues facing the world. The media of the West provide them with an ideal vehicle for the dissemination of these views. At the same time, total state control of their own media insulate the populations of the communist countries against the echoes of the themes propagated in the West.

Against this background, it is relatively easy to see how the Soviets have achieved such a substantial propaganda advantage vis-a-vis NATO. A number of their claims have been taken up by the anti-NATO and anti-nuclear movements in Western Europe, and the growth of anti-Americanism has certainly been fostered by the agitation emanating from Moscow and its sympathizers. But we must also be alive to the problems of public presentation which the Alliance has itself caused, or allowed to be caused, within the media of the West.

THE PROBLEM OF DIFFERENT PERCEPTIONS IN THE ALLIANCE

Thus far, we have looked at the less than perfect way in which the Alliance has put forward its own policies, particularly its nuclear policies, and the potential and means which Soviet propaganda can call upon to exploit the differences. But it is not only in the "set-piece" presentations of NATO policy that the Alliance's case has been less than well served. Attempts by commentators, official and unofficial, to explain the Alliance's policies to its populations do not always result in resounding success.

A significant number of cases where such attempts have gone awry result from insufficient attention being paid to the dynamics of public opinion throughout the Alliance. In the more than three decades of the Alliance's existence, surely we should have learned the lesson that public perspectives, and public reactions, differ markedly among countries separated by the Atlantic.

To the average American citizen, the Soviet Union may seem a remote, mysterious and sinister nation which seems determined to match, if not outstrip, American power and influence throughout the world. The Warsaw Pact, and Eastern Europe in general, appear as no more than a collection of puppet states under Soviet domination.

To a citizen of the Federal Republic of Germany, by contrast, the Warsaw Pact is composed of a number of countries with which his country has had extremely long historical associations—sometimes amicable and sometimes inimical ties, but always contact of some sort. The citizen of the Federal Republic is also very conscious of his own country's geographical position. He knows that if the Soviet Union were even to contemplate aggression against NATO, his country would in all probability witness scenes of terrible destruction.

The West German citizen's confidence in NATO's strategy of deterrence may not be reinforced by such items as the recent CBS television program, "The Defense of the United States," in which soldiers were portrayed planning the number, and yield, of the nuclear weapons that might be used against a picturesque Bavarian village which has, presumably, been overrun by Warsaw Pact troops. His confidence may, indeed, be shattered when the camera moves away from the model of the Bavarian village the soldiers are using in their exercise to a scene of the actual village, including young children in the school playground. He may well gain the impression that NATO, and the United States in particular, fully intend to turn his country, and that of his neighbors in the German Democratic Republic, into a nuclear wasteland. He decides he wants no more of a security policy which encourages such a possibility.

In the eyes of the average American citizen, by contrast, the soldiers in that same film may have been doing no more than showing proper military preparedness—preparedness which is necessary if deterrence is to be maintained. That same American may regard the citizen of the Federal Republic as having "gone soft." He may ask: Is it worth continuing to pay the price of defending such people?

The contrast may be overdrawn from a single example; nevetheless, the main point to be made is that, recognizing the paradox upon which deterrence is based, we should take more care to put over the message of the Alliance in terms appropriate for the particular audience addressed at any one time. At the same time, mindful of the power of modern means of mass communication and of the enormous interest the media have shown and will doubtlessly continue to show in matters of nuclear policy, we should remain constantly aware that a message designed for one specific audience cannot be guaranteed to receive no further circulation.

Let us take a hypothetical case. A senator from the southern United States, speaking in the sort of language he believes will make the issues plain to his constituents, may say that the U.S. Administration is determined to ensure that the Soviet Union could not prevail in any war, conventional or nuclear. For that reason, steps were being taken to ensure that the United States could make an effective response to an attack at any level. At about the same time, a minister in a West European government makes a speech saying that all war, worst of all nuclear war, is horrific, and our aim must therefore be to take every possible step to prevent its occurrence.

Now, it is quite possible that the media will pick up both of these statements, and headlines could well appear alleging that the United States is preparing to fight and win a nuclear war and that the publics of the European members of the Alliance are being lulled into a false sense of security by their own governments. And, as we have so often experienced in the recent past, European ministers will have to spend a great deal of time and effort explaining that the two statements are entirely consistent: that the United States senator was saying that the U.S. Administration was determined to show the Soviet Union that it could not hope to gain anything from starting a war and that the cost to itself would be unacceptable—and that in this way the United States and the Alliance as a whole are mounting a deterrent to war.

Such a "damage-limitation" exercise in public relations may have some success, but experience suggests that on each occasion that the publics of the European members of the Alliance are exposed to such sensational headlines, some irretrievable damage is done. And on each occasion, anti-nuclear and anti-American sentiments in Europe are increased, and the anti-nuclear campaigners are given further encouragement in their endeavors. Such disarray and alarm are fully exploited by the Soviet Union and its allies.

SOME BASIC GROUND RULES OF PRUDENCE

It needs to be made clear that what is being advocated here is not some sort of supranational Alliance mechanism by which the policy of deterrence can be explained in context, and in measured terms, to the publics of the member nations. Each government obviously has a duty, indeed a right, to present its policies, and those of an Alliance of which it is a constitutent part, to its own people in its own way. Nevertheless it is encumbent upon all supporters of the Alliance, in whatever country, to take the utmost care before making speeches and policy statements—first, to ensure that these are set firmly against the background of Alliance policy as a whole, and, second, to pay due regard to the sensitivities of their partners. Even a small matter such as the precise timing of an announcement can have significant repercussions on public reactions.

Above all, there is an increasing need for the European and American members of the Alliance to be careful to take full account of the likely impact on public opinion on both continents of statements primarily designed for consumption in only one. This may seem a simple enough precept, but it is one that admittedly is very difficult to put into practice. One need only look at the variations in public perceptions within nations, for example, to realize how many potential sensitivities can be involved in a given issue. In the United Kingdom, for example, a significant number of Scotsmen who live near the Clyde submarine base are less than happy about the basing of Britain's strategic deterrent force in their vicinity.

Similarly, the utmost care must be practiced in answering questions about Alliance policy, particularly with regard to nuclear weapons. As has already been noted, the media are only too keen to seize upon one isolated sentence—one phrase even—which can, out of context, provide a headline-grabbing story. Despite the fact that such stories almost always distort the sense of the remarks, they nevertheless make news, sell newspapers and generate severe headaches for those whose task it is to justify, explain and defend the policies of the Alliance. As a politician himself, this writer is naturally reluctant to admit that politicians could be the main culprits in this respect. Indeed, while accepting that on occasion the political presentation of the Alliance's policies has not always been as deft as would be ideal, it needs also to be pointed out that senior military men have not always proved to be the best exponents of the strategy of flexible response and of the role that nuclear weapons play within that strategy.

Mention of the role of the military invokes yet another dimension of the problem; namely, the failure of the Alliance and its members in explaining adequately the doctrinal aspects of NATO's possession of nuclear weapons to the fighting men who, should deterrence ever fail, would be called upon to use them. And in attempting to convince public opinion of the soundness of

[6] Reported in Reformatorisch Dagblad, July 15, 1981.

NATO's security policy of deterrence—within which rests the firm conviction that in a nuclear war there would be no winners—we may have neglected to ensure that the military personnel who might actually have to be called upon to operate nuclear delivery systems grasp the role that those weapons play within the deterrent strategy as a whole.

In explaining the Alliance's strategy, both to the populations within the Alliance and to those who serve on their behalf in the armed services, we face another major hurdle. The problem is succinctly reflected in the following statement in the United Kingdom Government's Defence White Paper of 1981: "An enormous literature has sprung up around the concepts of deterrence in the nuclear age. Much of it seems repugnant." [7] The political authorities in the Alliance have to be able to explain NATO policies in terms that are readily understandable by the layman and that demonstrate that the leaders, too, share the concern at any prospects of war and its horrors. This is not easy, but the effort must be made in order that the "peace" movements do not come to be seen to embody a monopoly of concern for humanity.

The very idea of using nuclear weapons is, of course, appalling, and those who cry "Better Red than Dead" no doubt have at the forefront of their minds the devastating horror which the use of nuclear weapons would invoke. The third course—of maintaining deterrence while seeking to reduce arms, both nuclear and conventional, on both sides—is unfortunately less eye-catching. Yet we have in recent months witnessed initiatives by the United States on arms control: in particular, President Reagan's "Zero Option" proposal has shown to the world that the United States and the Alliance are intent upon ensuring mutual security between East and West at lower levels of armaments, especially nuclear armaments. Notwithstanding Soviet and Soviet-inspired counter-propaganda, this initiative has been recognized as sincere throughout the world. It has helped to demonstrate to the publics of Europe, and of the Alliance as a whole, that NATO's policy is not based on unrealistic concepts of fighting and winning a nuclear war against the Soviet Union.

The stated intention of the United States to seek negotiations to achieve a significant reduction in strategic arms on both sides has been a further reassurance to public opinion in the Alliance. Taken together, these initiatives have demonstrated clearly that NATO is determined to achieve arms control rather than an arms race. Every step must be taken to continue this improvement.

NATO AS A PEACE MOVEMENT

To recapitulate: the upsurge of an anti-nuclear and anti-American sentiment within the publics of the NATO nations is perhaps the most important problem confronting the Alliance today. And the fact that the opponents of NATO's current strategy are still in the minority gives little cause for comfort; we have seen in the past how strident minorities can undermine aspects of a nation's security policy.

Soviet propaganda has no doubt played its part, but the Alliance itself must take the major share of the blame in that it has signally failed to communicate to its peoples the basic aim of its strategy of deterrence—the maintenance of peace as well as freedom. Above all, the Alliance has failed to convey the message that every part of its security policy, and every weapon in its armory, be it nuclear or conventional, is designed with the aim of contributing to deterrence and preventing war—and that the Alliance sees a military balance as a basis for arms control, not as the starting-line for an arms race.

Even after thirty-three years of the Alliance, member nations are still not sufficiently attuned to the contrasting effects on public opinion in different countries which apparently innocent statements may perpetrate. We must take more care to think before we speak, particularly when we are to speak about nuclear weapons. But we must continue to speak on matters of security policy: we need, through the process of public education, to try and recover some of the ground we have lost. If we do not succeed, we may find that we have lost the foundation of the security policy which has kept the peace in Europe for over thirty years.

I should like to end with a suggestion, which is not put forward entirely in a spirit of frivolity. We must make it clear that NATO is the only credible peace movement. To this end, we could do far worse, when opening any speech or article about nuclear deterrence, than borrow the opening of Vice President George Bush's recent address to the Massachusetts Institute of Technology. He began his remarks: ". . . I am here to announce our policy on nuclear war. We're against it." [8]●

[7] "Nuclear Weapons and Preventing War," Statement on the Defence Estimates 1981.

[8] "Restoring the Nuclear Balance of Power in the European Theater," Address by Vice President George Bush at the Massachusetts Institute of Technology, Cambridge, Mass. Oct. 30, 1981.

IMPRO PRODUCTS AGAINST USDA

● Mr. GRASSLEY. Mr. President, I rise to ask that a recent court decision be inserted in the CONGRESSIONAL RECORD. That decision is Impro Products against USDA which was rendered by the U.S. District Court in the District of Columbia on September 2, 1982.

The plaintiff in this case, Impro Products, challenged the validity of a test conducted by the U.S. Department of Agriculture during 1966-67. This test was used as the basis for the denial of a license for Impro to market a product, "Whey Blend," throughout the United States. The court found that USDA deviated from the mutually agreed upon outline for the tests by using different procedures and seeking different goals. The tests were not conducted in a controlled environment and some of the records were found to be inaccurate and incomplete. As a result of these tests, USDA found that Impro's product did not result in increased milk production, as Impro had claimed. Unfortunately, these test results were later published in the American Journal of Veterinary Research and copies of this article were released by USDA to interested parties, including nonscientists. As a result of this court decision, Impro successfully stopped USDA from further disseminating this information adjudged by the court to be false and misleading.

Why do I bring this 16-year-old controversy to the attention of my colleagues? One reason is to assist USDA in their efforts to correct the misinformation they previously distributed about Impro's product. Another reason to focus on this controversy is to stess the need for careful agency research and testing of products. Not only was my constitutent involved in a long and expensive court battle to protect its rights, USDA was forced to devote precious resources to defend their test results rather than devote them to a positive use which would benefit all farmers.

We should redouble our efforts to encourage all Federal agencies to be aggressive in protecting the health and welfare of our citizenry, yet we should insist that these determinations by Federal agencies be grounded in accurate scientific tests.

The following is the text of the district court's decison as well as a copy of the memo that USDA is circulating in conjuction with the court order:

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

Civil Action No. 81-1284

IMPRO PRODUCTS, INC., PLAINTIFF, *v.* JOHN R. BLOCK, SECRETARY OF AGRICULTURE OF THE UNITED STATES, DEFENDANT

MEMORANDUM AND ORDER

In this action plaintiff originally challenged the validity of a test conducted in 1966-67 by the Department of Agriculture (USDA or Agriculture) to assess the efficacy of certain animal biologics produced by the plaintiff and as to which plaintiff sought a license to distribute in interstate commerce. Since the action was filed, extensive discovery has been conducted by both sides and numerous pretrial motions have been presented and decided. By a series of earlier rulings, the issues have been refined and narrowed [1] to a sole remaining issue *viz.* whether a certain article, prepared by scientists at Agriculture, published in the August, 1970 issue of the American Journal of Veterinary Research (AMVR Article or Article), and released by Agriculture to any inquiring party, accurately reports the results of that test.

A hearing was held July 12-16, 1982 to clarify the underlying factual issues. The parties have submitted extensive briefs including proposed findings of fact and conclusions of law. The matter is now ripe for decision.

Upon consideration of the submissions of the parties and the relevant portions of the record herein, the Court concludes that the AMVR does contain several false or misleading statements, and that the release of the article by Agriculture in its present form constitutes arbitrary and capricious action and an abuse of discretion.

[1] See *Impro Products* v. *Block*, C.A. No. 81-1284 (D.D.C. Apr. 7, 1982), *further disposition* (D.D.C. May 5, 1982), *further disposition* (D.D.C. June 25, 1982), *further disposition* (D.D.C. July 9, 1982), *further disposition* (D.D.C. July 28, 1982).

I. BACKGROUND

The background of this case has been discussed in some detail in our earlier rulings, *See* Rulings cites fn. 1, *supra*, and therefore only a brief review is required here.

Plaintiff is a manufacturer of products used in connection with animal and human health. In 1965, it applied to Agriculture for a license, under the Virus, Serum and Toxins Act of 1913, 21 U.S.C. §§ 151-158 ("VST Act"), for a product which later became known as "Whey Antibody Blend" ("Whey Blend"). Whey blend is produced from the milk of cows, the udders of which have been infused with specific disease antigens. Plaintiff claims that injection of the product 5-7 days prior to freshening [calving] will improve the health and milk production of cows.

After reviewing plaintiff's application, the Veterinary Biologics Division of Agriculture ("VBD") issued plaintiff a temporary license to market Whey Blend. That license expired in September, 1967. To date Agriculture has denied all further applications for a license to market Whey Blend submitted by plaintiff. Plaintiff has never challenged the denial of its license applications.

After plaintiff applied for a license, scientists with the USDA's Agriculture Research Service ("ARS") became interested in plaintiff's products. Upon review of plaintiff's application, they concluded that the data supporting plaintiff's claims of increased health and milk production were inadequate. They determined that, in the interest of scientific research, and to facilitate further evaluation of plaintiff's license application, ARS would conduct a controlled scientific study of the efficacy of the Whey Blend.

The ARS scientists met with plaintiff's representatives on several occasions and developed a project outline, or protocol, defining the goals and methods to be used in the test. (Plaintiff's Exhibit 249-1, 249-2, 249-3). The protocol stated that the objective of the test was "to determine whether or not injection of 55 c.c. of [Whey Blend], 5-10 days prior to calving, will increase milk production." *Id.* at 1. Approximately 500 cows, divided into two groups with relatively equal milk production capacities, were to be used in the study. One group was to be given a placebo, while the other would be administered Whey Blend. The effects on milk production and the health of the cows were to be recorded. The test data was to be gathered and analyzed as quickly and efficiently as possible.

The test began in October, 1966 and was completed in December, 1967. The procedures actually utilized in the test varied somewhat from those outlined in the protocol. The number of cows was reduced from 500 to 400. The cows were derived from nine distinct herds. Each herd was divided into 2 groups, with relatively equal milk production capacity. In four herds, the Whey Blend was tested against 0.9% NaCl, a scientifically accepted placebo. In the remaining herds, the Whey Blend was tested against natural whey, derived from the milk of the subject herds. The comparison of Whey Blend to natural whey was added to the test to determine if the whey produced from udders infused with antigens, the method by which the Whey Blend is produced, would increase milk production more than natural whey.

The goals of the test, as conducted, also deviated from the project outline. During the course of the study, the ARS scientist decided to evaluate the effect of the Whey Blend on the breeding efficiency and general health maintenance of cows. They did so by gathering data concerning instances of mastitis, retained placenta and other aspects of the test cows' health. (Testimony of Dr. Plowman, Hearing Transcript 405-415, Testimony of Dr. Smith, Hearing Transcript 525-526). ("H.Tr. —").

No change in the schedule for injecting cows with Whey Blend was made, despite the fact that the recommended times for injection to produce these health benefits, differed from the recommended injection times for increasing milk production.

The test did not attempt to approximate the accuracy and controlled conditions of an experiment conducted in a laboratory. Rather, it was conducted as a field study which attempted to evaluate the efficacy of the Whey Blend when used "under the same conditions that would be used in the future by dairymen." (Testimony of Dr. Plowman, H.Tr. at 349). Therefore, although the plaintiff's instruction recommended that Whey Blend be administered by a veterinarian, the dairymen whose herds were used in the test were asked to inject their cows with the Whey Blend. The responsibility for recording the data essential to the test, *viz.* time of injection, time of calving, milk production yields, etc., was left to these same dairymen.

The dairymen did not pay meticulous attention to detail in the conduct of the test. Some of their records were incomplete, while others were inaccurate. More importantly, the recommended time for injection was not closely followed. Fewer than one-third of the cows in the study were actually injected with the Whey Blend during the recommended 5-10 day period prior to calving. (Plaintiff's Exhibits 263 p. 6; 265; 267-D; Testimony of Dr. Smith H.Tr. 557-560).

The test, as conducted, did not support plaintiff's claims of increased milk production. The test data, as analyzed by the ARS scientists, failed to demonstrate a significant increase in milk production attributable to the Whey Blend. Nor did the test results show any increase in breeding efficiency or improvements in the general health of the cows.

The results of the test were summarized in an article authored by the ARS scientists and published in the August 1970 issue of American Journal of Veterinary Research. *Am. J. Vet. Res.*, Vol. 31, No. 8, pp. 1485-1488 (August, 1970). (A copy of the article is appended to this Order.) The article reviewed the materials and methods utilized in the test and concluded: "Under the conditions of the experiment, the whey antibody preparation did not cause any increase in milk production. There was no evidence that the preparation reduced the occurrence of mastitis, retained placenta, or uterine infection; nor that it reduced the average number of services per conception." *Id.* at 1488.

Copies of the article have regularly been released by Agriculture to any interested parties. Since 1971, Agriculture has responded to inquiries regarding plaintiff's products by sending the inquiring party a copy of the article, together with a statement that plaintiff has no license to sell the Whey Blend in the interstate market. Although the article was published in a scientific journal intended for use by persons well versed in veterinary science, Agriculture has not restricted release of the article to scientists. Copies of the article have been sent not only to veterinarians and state agricultural offices, but also to dairymen and distributors of agricultural products.

Plaintiff contends that the article contains numerous false and misleading statements, and that release of the article by Agriculture has injured its business. Thus, plaintiff requests that we enjoin Agriculture from the further release of the article.

For the reasons stated below, we agree with the plaintiff that, because it contains false and misleading information, further release by Agriculture of the article in its present form must be prohibited.

II. DISCUSSION

The authority under which Agriculture tested the Whey Blend and released the test results is codified at 7 U.S.C. § 430 as follows:

"The Secretary of Agriculture may purchase in the open market from applicable appropriations samples of all . . . serums . . . or analogous products, . . . sold in the United States, for the detection, prevention, treatment, or cure of diseases of domestic animals, test the same, and disseminate the results of said tests in such manner as he may deem best."

This generous grant of authority permits Agriculture considerable discretion in the manner in which tests of animal biologics are conducted. In an earlier ruling, we held that this authority was sufficiently broad as to foreclose judicial review of the methodology utilized in conducting such tests. *Impro Products v. Block*, C.A. No. 81-1284 (D.D.C. July 28, 1982). Thus, plaintiff may not challenge the propriety of Agriculture's actions in conducting the test on grounds that Agriculture deviated from the agreed protocol. Agriculture was free to conduct the test in any manner it deemed fit. It was not bound by the project outline developed prior to the conduct of the test. *Id.*

Although plaintiff may not challenge the manner in which the test was conducted, it may challenge the manner in which the test results were disseminated. The standard of review applicable to such a challenge is whether the release of the test results is "arbitrary, capricious, or an abuse of discretion." *Id.* at 6. Although our review under this standard is limited, the release of inaccurate information cannot be justified even under this deferential standard. While Agriculture's discretion in the release of test results is broad, it is not free to release information which is false or misleading.

We find the article contains several statements which we deem false or misleading. For example:

(1) The most glaring inaccuracy refers to the manner in which Whey Blend was administered to the subject cows. The article states that "[i]n accordance with instructions provided by the manufacturer, each treated cow was innoculated subcutaneously with 50 ml. of the whey antibody preparation 5 to 7 days before the anticipated date of calving." *Am J. Vet. Res.*, Vol. 31, No. 8, p. 1486 (August, 1970). This statement is in error in two aspects. First, the manufacturer's instructions recommended injections not only 5 to 7 days prior to calving, but also again during the lactation period whenever milk production was below normal. None of the cows in the test were reinjected when milk production was below normal. Thus, the Whey Blend was not administered "in accordance with" manufacturer's instructions as the article states. Second, and more importantly, fewer than ⅓ of the treated cows were acutally injected 5 to 7 days prior to calving. Thus, the statement that "*each treated cow* was innoculated . . . 5 to 7 days before the anticipated date of calving" (Emphasis added) is clearly inaccurate.

In an attempt to justify these inaccuracies, Agriculture argues that variations in the time and manner of injection do not impede the effectiveness of the Whey Blend. Whatever the merit of this argument,[2] the fact remains that the article does not accurately report the manner in which the treated cows were administered Whey Blend. If the ARS scientists assumed that the time of injection was unimportant, the article should have so stated.

(2) The article also reports inaccurately that the test methodology was developed in conjunction with the plaintiff. It states "[t]he design of the experiment was agreed to by the representatives from Impro Products, Inc., and Veterinary Biologics Division, ARS, USDA." *Id.* at 1486, fn. c. While it is true, as noted above, that plaintiff agreed to the preliminary project outline, that outline was not followed during the course of the test. Agriculture was free to deviate from the agreed upon protocol during the course of the test. However, once it chose to alter the test procedures and goals without plaintiff's agreement, it was not free to report that the "test design was agreed to by [plaintiff]."

(3) The article does not reveal that the data from two distinct herds was combined in the final data analysis. The test was performed on 8 private cooperator herds and on the ARS herds at Beltsville, Maryland. At the time of the study, the Beltsville facility had two distinct herds: the North Herd and the Breeding Herd. When the test data was analyzed, the data from these two herds was combined. This combination of data is significant for two reasons. First, there is general agreement amongst the scientists involved here that between-herd comparisons are not valid in tests such as this. Yet, the combination of data from the North Herd and the Breeding Herd effected such a between-herd comparison. Second, the combination masked evidence of the effectiveness of the Whey Blend. The data showed that Whey Blend provided a significant increase in milk production in the Breeding Herd. But, when the data from the two herds was combined, the increase in the Breeding Herd was offset by the decrease in the North Herd. Thus, the apparent benefit of the Whey Blend to the Breeding Herd was never revealed or discussed.

(4) The article does not reveal that crossbreeds were used in the study. The use of crossbred cows is significant because they are generally considered unpredictable and are rarely used as subjects in tests such as the instant test. Moreover, there are no Mature Equivalent Factors ("ME Factors") for crossbreeds.[3] Although no accepted ME Factors are available for crossbreeds, the ARS scientists translated the milk production levels of the crossbreeds in the study to their expected mature production levels. The factors utilized in this translation were developed by the ARS scientists from their own data on crossbreeds. Concededly, the ARS scientists were free to use crossbreeds in the study and to utilize milk production factors generated from their own data, but the use of crossbreeds and the application of such self-generated factors should have been noted when the test results were released.

Agriculture attempts to justify these misleading statements by noting that the article was published in a scientific journal, intended for use by an audience acquainted with the problems inherent in scientific research. In its view, a scientist reading the article, aware of the difficulties involved in a field study, would expect some deviation from the protocol and problems with data analyis. The Scientist-reader would evaluate the content of the article in light of these difficulties. In short, the scientist would read into the article the problems inherent in a field study and would evaluate the results of the study accordingly.

Whatever the merit of this argument, it has no force where the article is released to laymen. A scientist may be able to evaluate a study in light of its deficiencies, but we do not believe a layman is equipped to do so. A layman does not have a working knowledge of the problems inherent in scientific research. A layman most likely will accept the results of the test as reported, without qualification based on the difficulties involved in the study. Thus, when a report of a scientific study is released to a layman, extra care must be taken to ensure that the methodology and results of the study are accurately reported.

III. CONCLUSION

The AMVR article does not accurately report the results of the study. Thus, its continued release must be prohibited. Agriculture is free to release the results of the test to the public, but it must do so in a manner which fairly and accurately recounts the methodology and the problems involved in the study and the conclusions reached therein.

IV. ORDER

In accordance with the foregoing, it is this day of September, 1982

Ordered that the United States Department of Agriculture is hereby enjoined from releasing copies of the article, published in the August 1970 issue of the American Journal of Veterinary Research, *Am. J. Vet. Res.*, Vol. 31, No. 8, pp. 1485-1488, discussing the test of plaintiff's product conducted by the Veterinary Research Service in 1966-67; and it is

Further ordered that any report of the test released by Agriculture must contain a fair and accurate account of the problems involved in the conduct of the test, including, but not limited to: the variations in time of injection from the manufacturer's suggested time of injection, the use of crossbred cows in the study, and the apparent benefit of the product evidenced in the Breeding Herd data; and it is

Further ordered that each side shall bear its own costs; and it is

Further ordered that this action is hereby dismissed.

U.S. DEPARTMENT OF AGRICULTURE,
Washington, D.C., September 30, 1982.

Subject: Impro Products, Inc., Plaintiff v. John R. Block, Secretary of Agriculture of the United States. Civil Action in the U.S. District Court for the District of Columbia.

To: H. C. Cox, Regional Administrator, WR; P. J. Fitzgerald, Regional Administrator, NCR; R. F. Barnes, Acting Regional Administrator, SR; G. E. Vanden Berg, Acting Regional Administrator, NER; and T. J. Army, Deputy Administrator, NPS.

The judge in the above trial has ordered "that the United States Department of Agriculture is hereby enjoined from releasing copies of the article, published in the August 1970 issue of the American Journal of Veterinary Research, *Am. J. Vet. Res.*, Vol, 31, No. 8, pp. 1485-1488, discussing the test of plaintiff's product conducted by the Veterinary Research Service in 1966-67; and it is further ordered that any report of the test released by Agriculture must contain a fair and accurate account of the problems involved in the conduct of the test, including, but not limited to: the variations in time of injection from the manufacturer's suggested time of injection, the use of crossbred cows in the study, and the apparent benefit of the product evidenced in the Breeding Herd data; and it is further ordered that each side shall bear its own costs, and it is further ordered that this action is hereby dismissed." (The title of the article is "Whey Antibody Preparation: Effects of Prepartum Injection on Milk Production in Dairy Cows.")

This memo is to inform you of the order and to instruct you to comply with it. Please distribute this instruction.

JOHN R. VICTOR
(For T. B. Kinney, Jr., Administrator).

[Appendix A]

WHEY ANTIBODY PREPARATION: EFFECTS OF PREPARTUM INJECTION ON MILK PRODUCTION IN DAIRY COWS

(J. W. Smith, Ph. D.; C. A. Kiddy, Ph. D.; R. D. Plowman, Ph. D.; W. D. Schultze, Ph. D.; N. W. Hooven, Jr., M.S.)

SUMMARY

The efficacy of inoculating cows with a whey antibody preparation just before they calved was evaluated in 8 private cooperator herds and in the herd at Beltsville, Md. The cows in each herd, due to calve between October, 1966, and March, 1967, were allotted to 2 groups according to lactation number and milk yield. In each herd, 1 group was given 50 ml. of the whey antibody preparation and the other was designated control. In 4 of the herds, the control group was given 50 ml. of 0.9 percent NaCl solution, and in the other 5 herds, the control group was given 50 ml. of whey obtained from bulk milk from the herd at Beltsville, Md. According to Dairy Herd Improvement Association (DHIA) production records and to the health and breeding information recorded by the dairymen, there were no significant differences between the cows given whey antibody preparation and controls. There was no indication that the whey antibody preparation increased milk production or reduced health problems.

Colostrum contains high concentrations of antibodies which provide the newborn calf with some protection against disease organisms in the first few weeks of its life. Speculation and controversy have arisen

[2] Throughout this litigation, the plaintiff has maintained that the time of injection is critical to the effectiveness of the Whey Blend. Nevertheless, some variation in the time of injection apparently is acceptable. Plaintiff agreed to an expansion of the injection time period from 5-7 days to 5-10 days when the project outline was developed. However, in plaintiff's view, any additional deviation in the injection time frame will diminish the effectiveness of Whey Blend. (Testimony of Robert Collins, H.Tr. 30-31).

[3] The milk production capacity of cows varies with age. A ME Factor is a factor utilized to translate a cow's present milk production capacity to that it will achieve when it reaches maturity—its years of maximum production. The factors are essential for analyzing data in a milk production study.

over the proposal that milk from cows immunized by intramammary infusions might be used orally to treat specific diseases in individuals past the neonatal stage of life. There is general agreement that specific antibodies appear in a cow's milk in response to infusion of her mammary gland with antigens. The controversy is: where are the antibodies produced and can such antibodies be absorbed from the intestine of adults and subsequently provide passive protection against disease organisms.

Theoretically, specific antibodies derived from milk could provide protection against a specific organism when the antibodies are injected, as opposed to being fed. Thus commercial products were developed. The product used in this study was produced by infusing the udder of healthy, pregnant cows with bacterial antigen. Beginning 3 weeks prior to parturition, each cow was given a 5-ml. intramammary infusion once a week until one week after parturition. Individual cows may have been given antigen derived from one or more heatkilled organisms. The colostrum from the inoculated cows was discarded and, beginning 5 days after parturition, approximately 400 kg. of milk was collected from each cow. Whey was prepared and was pooled with whey from other cows; this was clarified and bottled for distribution. The products were made available for injecting cows to protect them against, or to treat, a number of diseases and to increase lactation milk yield. The product used in the study reported here was derived from cows inoculated with a mixture containing *Staphylococcus spp., Streptococcus spp., Pseudomonas sup., Aerobacter aerogenes, Proteus spp., Klebsiella pneumoniae,* and *Escherichia coli.* The manufacturer's printed material indicated that use of the preparation resulted in increases in milk production as great as 1,00 kg./year. The data provided by the manufacturer in support of this statement were inadequate; it was apparent that other factors may have been responsible for the increased milk yields attributed to the product. All of the data seemingly concerned herds in which the product was administered by veterinarians treating specific herd problems. In several instances, all cows in a given herd were treated, and the total change occurring during the ensuing year was attributed to the product. In a few herds, comparisons were made between treated and untreated cows in the same herd. In some of these herds, cows which had retained fetal membranes, breeding difficulties, mastitis, or other conditions resulting in low milk production were treated before their next lactation. Other cows in the same herd were considered controls. Efficacy of treatment then was evaluated on the basis of production changes in succeeding lactations for both groups. Since cows in the treated group had problems in the preceding lactation, they were almost certain to have improved milk production, more than the control cows, in the subsequent lactation. Since there were not controlled experiments, the present study was done as a large/scale field evaluation on using the whey antibody preparation to increase milk production.

MATERIALS AND METHODS

The whey antibody preparation was provided by the manufacturer for testing. In accordance with instructions provided by the manufacturer, each treated cow was inoculated subcutaneously with 50 ml. of the whey antibody preparation 5 to 7 days before the anticipated date of calving. Two control groups were defined. In the 1st group of herds, control cows were inoculated with 50 ml. of saline solution (0.9 percent NaCl); in the 2nd group of herds, control cows were given 50 ml. of filtered whey obtained from milk produced by the herd in Beltsville, Md. (herd 8). The object was to compare the results of using the commercial product with those using sham treatment (saline solution) and those using a naturally occurring whey preparation. The 3 inoculums were supplied to the cooperating dairymen in bottles labeled with only the numbers 1, 2, or 3 for saline solution, filtered whey, and commercial whey antibody preparation, respectively.

Each cooperating dairyman was visited by at least one of the authors and on the basis of the DHIA records and breeding information, cows in each herd were allotted to 2 comparable groups. In making these allotments, cows due to calve between October, 1966, and March, 1967, were paired as closely as possible on the basis of number of lactations, production in the previous lactation, and date of expected calving. First-lactation heifers were paired by sire and expected calving date. One of the groups was selected at random to be given the whey antibody preparation (inoculum 3), and the other was designated control (given either saline solution or filtered whey). Each dairyman was provided a list of the cows assigned to each treatment number, a supply of the inoculums, and sterile disposable 50-ml. syringes and needles. The cooperating dairymen were instructed that they were evaluating 2 of 3 products, 1 of which was a commercially available product that might increase milk production. However, the dairymen were not given the identities of the inoculums. Each dairyman was instructed to administer 50 ml. of the designated inoculum subcutaneously 5 to 7 days before a given cow calved and to record the date and the number of the inoculum (1, 2, or 3) which was administered. Each dairyman was also provided with forms for recording abnormalities such as dystocia and mastitis.

Production information was obtained from DHIA records. The comparisons are based on 305-day mature (ME) production. Records of cows which were not given the designated injections or which were removed from the herd before milking at least 150 days were deleted before the data were analyzed. Production records for all cows removed from the herd for any reason after 150 days' lactation were extended to a 305-day basis, using DHIA extension factors. Complete lactation records of less than 305 days were used without extension. One of the herds in which the controls were given saline solution was sold and transferred from the area before the study was completed. Because of this, production records of 32 saline solution-inoculated cows (av. 239 days' lactation) and 32 whey antibody preparation-inoculated cows (av. 241 days' lactation) were extended. In addition, records of 4 saline solution-inoculated cows (av. 178 days' lactation) and 4 whey antibody preparation-inoculated cows (av. 188 days' lactation) were extended because individual cows were removed from the herd. In the herds in which controls were given filtered whey, records of 7 filtered whey-inoculated cows (av. 239 days' lactation) and 15 whey antibody preparation-inoculated cows (av. 216 days' lactation) were extended.

During the experiment, it was suggested that we evaluate the breeding efficiency of the respective groups. This evaluation was based entirely on data from the herd records prepared by the dairymen.

RESULTS

The number of cows and the 305-day ME production for each group are shown (Table 1). The differences in production in herds for the groups given saline solution vs. those given whey antibody preparation and groups given filtered whey vs. those given whey antibody preparation were not significant, as determined by analysis of variance. Valid direct comparisons cannot be made between controls given saline solution (inoculum 1) and those given filtered whey (inoculum 2) because the groups were in different herds. Status of health and reproduction data are summarized (Table 2). The recorded instances of mastitis, retained placenta, and uterine infection were slightly higher in the cows treated with whey antibody preparation than in either the controls given saline solution or the controls given filtered whey. The differences were very small, however, and must be considered as chance occurrences. The services per conception for cows which conceived were very similar for whey antibody preparation-treated cows and controls in each comparison.

TABLE 1.—COMPARISON OF MILK AND FAT PRODUCTION FOR COWS INJECTED WITH 0.9 PERCENT NACL. WHEY, OR WHEY ANTIBODY PREPARATION

Herd	No. of cows	Mean 305-day me (kg.)	
		Milk	Fat
0.9 percent NaCl:			
1	42	6,265	237
2	19	6,005	252
3	19	4,457	225
4	48	6,552	248
Group means		6,081	241
Group total	128		
Whey antibody preparation:			
1	45	6,275	234
2	18	6,087	258
3	22	4,477	200
4	41	6,789	261
Group means		6,101	240
Group total	126		
Whey:			
5	13	6,871	265
6	9	6,451	241
7	17	6,118	235
8	20	7,205	268
9	14	7,027	163
Group means		6,716	255
Group total	73		
Whey antibody preparation:			
5	11	6,473	256
6	9	5,796	216
7	23	5,742	215
8	20	7,380	285
9	14	7,019	252
Group means		6,512	246
Group total	77		

TABLE 2.—SUMMARY OF HEALTH AND REPRODUCTIVE INFORMATION FOR COWS INJECTED WITH 0.9 PERCENT NACI, WHEY, AND WHEY, ANTIBODY PREPARATION

Item	0.9 percent NaCl vs. whey antibody preparation	Whey vs. whey antibody preparation
Number of cows having:		
Mastilis	23 vs. 24	24 vs. 26.
Retained ploncics	4 vs. 4	1 vs. 5.
Utarine infection	1 vs. 3	4 vs. 5.
Reproductive performance:		
Number of cows diagnosed pregnant:	102 vs. 106	83 vs. 59.
Average number of services per conception.	2.15 vs. 2.21	1.75 vs. 1.78.

DISCUSSION

Similarity of production averages in the group given saline solution vs. the group given whey antibody preparation and in the group given filtered whey vs. the group given whey antibody preparation clearly indicates that there were no differences which could be attributed to treatment. Statistical analysis confirmed this conclusion. On theoretical grounds, the results are not surprising. Although passive immunization is of proved value in treating some diseases, it is usually on the basis of specific antibodies for particular pathogens. In the present experiment, antibodies against a collection of specific pathogens isolated in one area at one point in time were used in anticipation of possible infection of the treated cows. The failure of the whey antibody preparation treatment to influence production or affect health status, as measured in the present experiment, could be attributed to 1 or more of the 3 main reasons:

(1) Pathogens encountered by the treated cows were not reactive with any of the antibodies in the whey antibody preparation.

(2) Whey antibody preparation was absorbed and eliminated from the body too soon after it was injected to be effective.

(3) Antibody content of the whey antibody preparation may have been too low to be effective. In the present experiment, an attempt was not made to determine what was in the whey antibody preparation. The product was accepted as presented and was assumed to contain antibodies.

Under the conditions of the experiment, the whey antibody preparation did not cause any increase in milk production. There was no evidence that the preparation reduced the occurrence of mastitis, retained placenta, or uterine infection; nor that it reduced the average number of services per conception.

SENATE STEEL CAUCUS PRODUCTIVE GROUP

● Mr. RANDOLPH. Mr. President, it was my responsibilty to join with other colleagues in founding the Senate Steel Caucus. I commend Senator HEINZ, our present chairman and the other members of the Steel Caucus, on the effecting effort they have contributed in the caucus since its inception in 1977. I have been activly involved in our activities on behalf of the American steel industry, and over the years, our caucus, which now numbers 47 Senators, has helped begin the process of revitalization for our Nation's steel industry through its predominant impact on the development of our country's steel policy.

I recall when the caucus was first founded: we were instrumental in persuading President Carter to call to the White House the key leaders of the industry—labor and management—as well as House and Senate leaders—to consider carefully the crisis in the industry and to develop a program for action. That effort ultimately produced the Solomon Report and the Trigger Price Mechanism.

In the years since Senator HEINZ and caucus members have been extensively involved in all issues important to steel, we have often met and negotiated with the Environmental Protection Agency. We have proposed changes in tax policy. We have developed a loan guarantee program vital to Wheeling-Pittsburgh Steel, among others. We worked successfully with the Steel Tripartite Advisory Committee, and have made a strong request with the administration for its restoration. We also have tackled the tough import problem.

Senator HEINZ was one of the first to work for legislation to change our trade laws and strengthen our Buy Amercian laws to require aggressive enforcement against unfairly imported products, such as steel. I commend his efforts in 1979; America now has new laws to fight dump and subsidized imports.

We have continued to closely monitor the import dilemma. As the weaknesses of the trigger price mechanism became apparent in 1980 and 1981, Senator HEINZ fought for a strengthened TPM and then for greater administration initiative in enforcement. In the fall of 1981, Senator HENIZ and caucus members asked the Commerce Department to take the unprecedented step of initiating complaints against European producers instead of waiting for the domestic industry to begin the action. The Department took the caucus' advice, and at our meeting of November 5, 1981, made the historic announcement that it would self-initiate cases.

Cases have developed and been superseded by broader petitions filed by the industry. The caucus has maintained its vigilance in monitoring the law, the import data, and administration actions to insure that the strongest possible enforcement posture is maintained within the parameters of the law.

Two of our most active years in the life of the Steel Caucus, Mr. President, have occurred during the chairmanship of Senator HEINZ in 1981 and 1982. I have been happy to serve in those years, as associate chairman, and to have chaired the caucus in its formulative period, starting in 1977. Its membership is at the highest point ever. The caucus has held nine meetings and has taken strong actions to pursue its objectives. But beyond the written record, it is also important to note with unwritten record the many individual efforts each active caucus member, particularly Senator HEINZ, has taken to press the administration in different ways, many of them private, to act forcefully to defend the American industry's interests. And we have made some progress in that regard.

Mr. President, the administration initially maintained a strong position against European dumping and subsidizing and pressing the European Community hard for an agreement. Unfortunately, they accepted one which was far too weak, and which the American industry has had the good sense to reject. They have, however, made the effort and have continued their efforts to toughen that agreement, with the caucus pushing them all the way. We will continue to push them, Mr. President, until health has been restored to the American steel industry and the unemployed have been put back to work. The caucus is united on that objective under the leadership of Senator HEINZ and Senator GLENN. With them, and others, we will continue and strengthen our efforts.

Mr. President, I ask that a list of Steel Caucus activities including those of Senator HEINZ on steel matters during this Congress, be printed at this point in the RECORD.

The list follows:

STEEL CAUCUS ACTIVITIES

MEETINGS

February 5, 1981.—Industry leaders.

May 20, 1981.—Treasury Under Secretary Norman Ture on tax policy.

October 7, 1981.—Industry leaders.

November 2, 1981.—Industry leaders.

November 5, 1981.—Secretary and Under Secretary of Commerce.

February 10, 1982.—Industry trade experts with Caucus staff.

May 17, 1982.—Executive committee staff with EPA.

June 16, 1982.—On closing of the Crucible plant, Midland, Pa. (with House Caucus).

August 11, 1982.—Secretary and Under Secretary of Commerce.

ACTIONS

July 23, 1980.—Caucus leadership letter to President on steel policy issues.

October 14, 1980.—Caucus leadership letter to President on including specialty steel in Trigger Price Mechanism.

November 14, 1980.—Caucus letter to President on including specialty steel in Trigger Price Mechanism.

October 6, 1981.—Caucus leadership letter to IRS on evasion of Trigger Price Mechanism.

October 15, 1981.—Caucus leadership letter to Secretary of Commerce urging self-initiation of trade complaints.

October 29, 1981.—Heinz letter to Secretary of Commerce on conditions in specialty steel industry.

November 18, 1981.—Heinz/Gaydos letter to Secretary of Commerce on self-initiation of trade complaints.

December 10, 1981.—Caucus leadership letter to U.S. Trade Representative urging acceptance of specialty steel section 301 petition on unfair trade practices.

December 14, 1981.—Heinz letter to International Trade Commission in support of steel industry trade complaints.

January 5, 1982.—Heinz hearing on specialty steel problems, Brackenridge, Pa.

January 13, 1982.—Heinz meeting with U.S. Trade Representative on section 301 petition.

February 3, 1982.—Heinz testimony at International Trade Commission on steel unfair trade complaints.

February 26, 1982.—Heinz meeting with U.S. Trade Representative on section 301 petition.

April 13, 1982.—Caucus letter to President urging restoration of Steel Tripartite Advisory Committee (21 signers).

April 13, 1982.—Heinz testimony before U.S. Trade Representative's 301 Committee in support of specialty steel petition.

April 28, 1982.—Heinz letter urging retroactive imposition of penalties on steel imports (to Commerce).

May 13, 1982.—Heinz/R. Byrd floor amendments to retain tough limitations on procurement of foreign specialty steel.

May 24, 1982.—Heinz letter urging retroactive imposition of penalties on steel imports (to Customs Service).

May 26, 1982.—Heinz introduction of resolution urging prompt action against unfair steel imports (S. Con. Res. 100—26 sponsors).

June 22, 1982.—Senate passage of resolution.

June 30, 1982.—Heinz letter urging retroactive imposition of penalties on steel imports (to Commerce).

July 26, 1982.—Heinz introduction of two bills providing import relief to the specialty steel industrial (S. 2770, S. 2771).

July 27, 1982.—Caucus letter to Secretary of Commerce urging continuation of strong stand on steel imports (23 signers).

August 4, 1982.—Heinz letter urging retroactive imposition of penalties on steel imports (to Commerce).●

IT IS NOT AN ATTEMPT TO END FOOD STAMPS

● Mr. HAYAKAWA. Mr. President, I would like to call the attention of my colleagues to a most instructive article written by the distinguished chairman of the Committee on Agriculture, Nutrition, and Forestry, Senator JESSE HELMS of North Carolina.

The article, which appeared in the Washington Post last weekend, outlines some very good reasons why the Congress should adopt legislation passed by the Senate earlier this year to establish a State option block grant for nutritional assistance. Under the proposal, a State could opt to receive its food stamp allotment for the year in the form of a block grant. The State would then be responsible for determining the mode of operation of the program, the benefits levels, and eligibility. Along with this responsibility would come the incentive, currently not in existence, for States to run a cost-efficent program.

All too often, those of us who point to the failures of existing programs are characterized as wanting to abolish such programs. This was the case with a recent Washington Post editorial which prompted Senator HELM'S response. Interestingly enough, since the Senate passed the Helms proposal, it can be inferred that the Post was charging the U.S. Senate with trying to abolish the food stamp program. This is an incredible charge to say the least.

Furthermore, unless improvements are made to loosely run and wasteful programs, such programs will be threatened by the voters. A recent nationwide poll showed that of all Federal programs, food stamps is among the three which Americans would most like to see cut. Through Senator HELM'S innovative and constructive proposal, the food stamp program will be made more efficient; and thus more palatable to the public. Only with public support will this program be able to continue to deliver nutritional assistance the truly needy.

I have been honored and pleased to serve with Senator HELMS on the Agriculture Committee during my tenure in the Senate. This article is further testimony to his farsighted approach to the problems posed by the current food stamp program.

I ask that the article, "It Is Not an Attempt To End Food Stamps," be printed in the RECORD at the conclusion of my remarks.

The article follows:

[From the Washington Post, Sept. 18, 1982]

IT IS NOT AN ATTEMPT TO END FOOD STAMPS

(By Jesse Helms)

Contrary to The Post's assertion ["Nickels and Dimes From the Poor," editorial, Aug. 12], I have not advocated the elimination of the food stamp program. I have been and continue to be, concerned about certain characteristics of participation in the program and by the skyrocketing of costs from $2.1 billion to $11.3 billion during my nearly 10 years in the Senate.

A few points:

The dollars "saved" through the budget reconciliation process represent less than 5 percent of projected program costs during the next three years.

Approximately one food stamp household in four contains able-bodied individuals. It has long been my view that such households should be required to perform public service work—"workface"—in exchange for their benefits.

Unlike Medicaid and AFDC, food stamp benefits are 100 percent federally funded. Hence, there has been little incentive for states to operate cost-efficient food stamp programs.

According to verified data from the Department of Agriculture, at least 10.5 percent of all food stamp benefits were overissued last year; thus, over $1 billion was lost to fraud.

Almost one American in 10—that is, 22 million people—are receiving food stamps each month.

Countless state and local officials have reported to me over the years that they believe they could do a better job of administering a nutritional assistance program. Does The Post doubt this? If so, why?

Last year, Congress enacted a mandatory block grant for the Commonwealth of Puerto Rico, which took effect July 1 of this year. Under the legislation, Puerto Rican officials were left to determine the eligibility, benefit levels and other considerations surrounding their $825 million annual appropriation.

That prompted the state option block grant that I introduced earlier this year—subsequently approved by the Senate. Under this option, a state would be permitted to receive for the upcoming fiscal year the same percentage of funding that it received for the year ending March 31, 1982. My home state of North Carolina, for example, received approximately 2.78 percent of total food stamp funds (excluding Puerto Rico funding) during that period; thus North Carolina could opt to receive 2.78 percent of the fiscal year 1983 appropriation as its allotment for nutritional assistance.

The Senate bill contains protections to ensure (1) proper auditing of funds, (2) that discrimination is prohibited, (3) that funds may not be used for construction purposes, and (4) other safeguards. The state would be granted the flexibility to establish the criteria for eligibility, benefit levels and so forth that were appropriate within the state. It would require that the funds be used for low-income nutritional assistance.

The Post's editorial suggested that states would replace food stamps with cash, but there is no requirement in the bill that states adopt cash as the method of payment to recipients. While that is the method employed by Puerto Rico, the matter is entirely subject to state option. Other options would surely include a state form of food coupons and the direct distribution of commodities. But each participating state would make that decision for itself.

It is important to note that many experts believe there is a negligible difference in total food purchase/consumption whether you distribute cash or food stamps. Already many food stamps are not used for food, but are exchanged, almost as second currency, for non-food items. It is likely that recipients who use food stamps for food would continue to use cash for food, when and if a state opts to use cash.

The proposal is unique in several respects. Participation is totally optional at the discretion of each state. The funding formula is such that neither block grant states nor those remaining in the food stamp program would be discriminated against. Funding for nutritional assistance—whether in the form of food stamps or through a block grant—would continue to be provided by the federal government. As with all sound federalism programs, those states with exemplary programs likely would be emulated by other states. Experimentation likely would result in improved administration and assistance to the poor.

In providing nutritional assistance to needy Americans, we need not be bound by the methods of the past. Certainly we have a duty to prevent, in any proper way, a ripoff of the taxpayers who, after all, are being forced to foot the bill.●

THINKING ABOUT NATIONAL DEFENSE

● Mr. GLENN. Mr. President, last month we spent long hours on this floor in consideration of the defense authorization bill. We even managed to touch—although all too briefly—on serious issues of national defense.

Reconstructing our debate, it seems to me that the most serious discussion centered around the authorization for nuclear aircraft carriers. But the true issue was not just the carriers. The carriers were a symbol of a fundamental question of whether we should be purchasing greater numbers of cheaper and technologically simpler weapons.

At first blush, this is an argument of great appeal. But it falls apart on careful analysis. This Nation could make no greater mistake than to embrace uncritically such an approach. The advocates of this "smaller-is-simpler-is-cheaper-is-better" school fail to stack their recommendations up against the

most crucial measure of validity; namely, the nature of the opponent's armed forces. Almost totally lacking from reformist arguments is the stark fact that the Soviet Union has been embarked on the greatest peacetime arms buildup since the days of Hitler's Germany. And the results of this buildup are being seen in improved quality as well as increased quantity of sophisticated weapons.

While American critics of practical advanced technology oppose the F-15 and F-18, and advocate a return to a simple "fair weather" fighter, the Soviets are fielding massive numbers of all weather fighters capable of engagements at extended ranges. And while we hear claims that conventionally powered small aircraft carriers will be better able to survive on the high seas of the future, the Soviets are busy building large-deck carriers that are nuclear powered.

One of the best and most articulate arguments I have read to date on the "Quality versus Quantity" issue has been written recently by Dr. William Perry. Dr. Perry was one of the most distinguished and thoughtful men to serve as the Under Secretary of Defense for Research and Engineering. He points out the basic fact that the reason that the Soviet Union has been able to field so much high-quality weaponry is not that U.S. procurement is in the hands of simpletons in the Pentagon, but simply that the Kremlin has been—and still is—spending twice as much on equipment as is the United States.

I highly recommend Bill Perry's article to my colleagues and their staffs. I ask that Dr. William Perry's article, "Fallows' Fallacies" be inserted into the RECORD.

The article follows:

[From International Security, May 4, 1982]

FALLOWS' FALLACIES

(A review essay by William Perry)

("National Defense" by James Fallows"

James Fallows' book, "National Defense," has much to recommend it. First of all, it is lucidly written. I appreciated his prose style as I read the book; I envied it as I committed to writing my own ideas on defense. More importantly, Fallows sets a high goal—to focus the defense debate on issues that are significant, to discuss what American defense objectives should be, and what policies and programs can most efficiently achieve these objectives. This is a refreshing change from the narrow debates on specific weapons, or from the partisan cries that the United States is spending too little or too much on defense. Unfortunately, the substance of the book is not equal to its literary merit. Fallows' treatment of defense problems often fails to grasp the key underlying issues; as a result, the solutions he offers tend to be simplistic.

The best part of "National Defense," in my view, was the first chapter, where Fallows presents the "realities" on which his analysis—or any analysis—of defense issues must depend. This is an excellent beginning and the "realities" he chooses—U.S. economic limits, the unpredictable nature of the "threates" an American defense must accommodate, and the importance of intangible qualities (weather, human error, etc.) in warfare—all are significant and his treatment of them effective. Inasmuch as his analysis flows from these "realities," it is clear that his conslusions can only be as good as his perceptions of which realities are significant. Inexplicably, he left out two major realities which have a driving effect on the whole defense issue, and this omission in his first chapter flaws the analysis which follows in subsequent chapters.

He omits the fundamental point that the effectiveness of U.S. forces must be measured realtive to those of the Soviet Union. American forces may face less challenging tasks, but the United States must design them so that they could prevail in combat with the forces the Soviets actually have or are likely to have in the future. It is misleading to imply that one fighter airplane is better than another because it is simpler or cheaper if it could be readily defeated by its counterpart Soviet fighter. The reality is that modern Soviet fighter aircraft are complex and effective fighting machines (probably more complex and costly than their U.S. counterparts) and could not be successfully engaged by the simpler aircraft envisaged by Fallows in later chapters of his book.

Fallows also omits the fundamental point that the defense competition between the United States and the Soviet Union is profoundly influenced by the fact that the Soviet Union has remarkably cheap labor compared to America's affluent society. A number of critical facts flow from this. One is tha the United States spends more than half of its defense budget on manpower while the Soviets—with twice the manpower—spend only a fourth of theirs on manpower. As a result, they can devote half of their budget to equipment procurement while we devote less than a quarter of ours to equipment. This leads us then to a "reality" of overriding importance—that even with equal defense budgets, the Soviets can—and do—spend twice as much on equipment procurement as the United States. This fundamental and overwhelming advantage—which has led to the Soviets' outproducing the United States in quantities of military equipment—seems to have escaped Fallows' attention while he searches for devils in the U.S.'s inefficient procurement system. God knows, our procurement system could stand improvement (so could that of the Soviets, I suspect), and every new administration sets out to make those improvements with an abundance of helpful suggestions from journalists and Congressmen. But it is incredibly myopic to suggest that this is the reason the Soviets build two to three times as much military equipment as the United States when the real reason is staring us in the face.

Fallows then describes the failures of the "managerial" approach to defense, citing its one-dimensional analysis which leads to an overreliance on technology and an underemphasis on the intangibles of leadership and esprit. The distinguishing feature of modern American defense, he says, has been the pursuit of the "magic" weapon since research and engineering came to "dominate" the Pentagon. He argues that the technological imperative leads the United States to put more and more useless gadgets on its weapons at a greater and greater cost leading to fewer and fewer weapons. He compares the United States unfavorably with the Soviets who, he believes, build large quantities of simpler and cheaper but effective weapons. This situation is allowed to continue, argues Fallows, because people in the Pentagon and the defense industry have been "corrupted" by the "culture of procurement." He gives many horror stories that have resulted from this corruption: the TOW (anti-tank) missile "is likely to litter the ditches of the first battlefield where it is really used"; the F-15 "is a costly unmaintainable system"; the Trident submarine is "a senseless step down in effectiveness"; the XM-1 tank is a "cripple"; modern command and control systems are "useless when they don't work and may be actually harmful when they do." But these are mere glancing blows. He devotes an entire chapter to case histories of the M-16 rifle and F-16 aircraft. The M-16 "was perverted by bureaucratic pressures into a weapon that betrayed its users in Vietnam." The F-16 was designed as an "austere" airplane which the Air Force bureaucracy modified, leading to "defects and compromises which raised costs and degraded its performance as a fighter."

These three chapters just summarized, "Managers," "Magicians," and "Two Weapons," correctly point out the overemphasis on one-dimensional cost-effectiveness analysis, and the underemphasis on leadership qualities. Fallows' major point is that the United States uses technology to offset its numerical inferiority, but that this costly technology is the very reason for American numerical inferiority. The United States has fewer tanks and planes than the Soviet Union "because American planners have chosen to build fewer." He says, "Are they building 2,000 tanks a year to our 1,000? If planners concentrated on building a tank for $800,000 instead of $2 million, then it would cost $1.6 billion to match the Soviet output and $3.2 billion to double it." This argument is at the same time wrong and naive. It is wrong because it implies that the Soviets outproduce us because they build cheaper weapons. In fact, most of their modern weaponry (e.g., MiG-27 aircraft, T-64 tanks, SS-18 missiles, Typhoon submarines, Typhoon missiles) are at least as complex and expensive as their U.S. counterparts. The Soviets build twice as many units because they spend twice as much on equipment procurement. That may not make as good a story, but it is a fact. Secondly, the argument is naive because it simply fails to consider how the United States would man the 4,000 cheap tanks a year he envisions, or that the operating and manning costs of those tanks would far outweigh their building costs. In fact, his "solution" would only aggravate the problem which led us to numerical inferiority of equipment—namely, the high cost of American manpower relative to that of the Soviets.

Fallows then pivots to a discussion of the "employees"—the officers and men (and women) of the armed services. He argues that the effectiveness of the U.S. military depends on "bonds within the military and between the military as a whole and the nation it represents." These bonds, he believes, have been imperiled by the managerial ethic in the military—a lack of professional values. Most seriously, the nation undermines these bonds by its "willful blindness to the failures of the volunteer force." He describes the intangible but critical role of leadership in the military and its erosion by "careerism" with its related emphasis on managerial values. He believes that the all-volunteer force is a disaster. It has led to "civilianization" of the military services and

it has led to "an army of the poor" which is not representative of the citizenry and is viewed by citizens with "indifference, shading into contempt." He calls for a return to the draft and describes ways it might be implemented.

This entire section is provocative and thoughtful, and makes a real contribution to the national debate on defense. In Fallows' treatment of personnel issues, unlike his treatment of procurement issues, he seems to have perceived their real complexities and offered constructive views of how to deal with them.

Fallows then turns to the "theologians," who study and plan America's nuclear (strategic) forces, concluding that "no one really knows what he's talking about." He gives a brief summary of the arguments made by various advocates for the different ways of modernizing American strategic forces and describes some of the problems in achieving strategic arms control.

This chapter includes a 9-page discussion on missile accuracy and bias which is confused and confusing and which ends with the suggestion that the whole issue of surprise attack is academic because it could be avoided by going to "launch-on-warning." This detailed treatment of missile accuracy followed by an almost casual endorsement of "launch-on-warning" is inexplicable. If any subject in the nuclear field is worth a critical view, it is the dangerous and destabilizing notion that we (and the Soviets, presumably) should put our respective nuclear forces on a launch-on-warning "hair trigger." In this same chapter, he recommends augmenting American strategic forces by building slow, low-flying airplanes to avoid radar detection. To support this, he observes that the U.S. air defense command never tracked the low-flying A-1 aircraft between the late-1940s and early-1960s; but Fallows fails to recognize that "look-down" radars developed in the 1970s are now quite capable of tracking such airplanes. The objective he seeks, however, can be accomplished by "stealth" aircraft, which he does not mention, possibly because the public announcement of stealth occurred shortly before his book was released for publication.

Fallows ends his book with a chapter on the changes that are needed to (1) restore the military spirit; (2) stop the progression toward more costly and complex weapons; 3) apply hard-headed reason to nuclear issues; and 4) establish the condition for "cohesion" in defense choices. The first objective, he believes, requires a restoration of the draft. The second objective requires the United States to "exorcise the culture of procurement from the Pentagon," to introduce more competition in procurement, and to make it a criminal offense for military officers and defense officials (upon retiring) to accept a job with a defense contractor. The third objective would be enhanced, he believes, by limiting or banning missile tests so that the leaders of the superpowers could not be sure how accurate their missiles were. The fourth objective is elusive, he agrees, but it is important to keep discussions of defense from coming "unmoored from the facts," at the expense of attention to real military values.

Aside from fundamental deficiences already treated in the underlying assumptions of the book, there are several flaws in execution. The book suffers from an apparent imbalance in the sources used by the author. There flows throughout the book the points of view of the mavericks who "lost the argument." Every major defense system gathers a cluster of supporters and detractors who argue their cause during the decision process. When the decision is finally made, there are inevitably "winners" and "losers." Some of the losers then make a career out of arguing that their point of view was correct—every problem experienced during the program execution phase is represented as vindication of their judgment. I would not argue that every weapon decision made in the Defense Department was correct, nor that the mavericks who fought the decisions have no wisdom to impart. (I have been one myself on occasion.) But I cannnot accept that all the wisdom lies in the mavericks, nor that the decisions are always made by boobs. (I have made a few of them myself, so I may not be totally objective.) (It is difficult to read Fallows' chapter without concluding that all the decision-makers in the Pentagon are stupid or, to use his word, "corrupt." For example, Fallows' view on fighter aircraft is a restatement of the case made by Franklin Spinney, which was briefed repeatedly in the Pentagon. Every major decision-maker heard it and at least some of them rejected it for reasons that they thought had some intellectual basis. That basis, not presented anywhere in Fallows' book even in outline form, is presented in substantial detail in a number of defense reports available to Fallows. Harold Brown's Defense report articulates the necessity for a "countervailing strategy" in the face of Soviet numerical superiority. Fallows does not refer to this report except to quote approvingly one paragraph which simply repeats a paragraph of Spinney's report. My own Posture Statement [1] discusses in some detail the reasons for Soviet numerical superiority and the strategy for dealing with it. This report seems to have escaped Fallow's attention even though he considered the "Research and Engineering division of the Pentagon the power center for decisions about new weapons . . ." (page 19). He did mention my views on two occasions in the book, both times stating (incorrectly) what someone said I had said, rather than bothering to quote me, although my opinions on these subjects are documented in thousands of pages of Congressional testimony, four volumes of Posture Statements, and countless interviews.

The United States is faced, as Fallows asserts, with a serious problem because the Soviets produce more than twice as much military equipment as does the U.S. But the problem is more difficult that Fallows apparently realizes and therefore the solution is not as simple as he suggests. There has been a "technology inflation" since World War II, as indicated by the data Fallows presents. Fighter aircraft, for example, have increased in cost about six percent per year the last three decades, excluding inflation. But performance of military significance has increased proportionally to the cost increase. That is, the extra cost was not being used for "bells and whistles," as suggested by Fallows; it was used to achieve real military capability. Perhaps even more important is a point entirely missed by Fallows—that the Soviets have followed this same cost-performance curve, although a few years behind the United States in many weapons (for instance in fighter aircraft). Therefore, if the United States elects to get off this rising cost-performance curve as a way of reducing equipment cost, we would soon be surpassed in performance by the Soviets. This leads to a problem which I perceive as basic and which Fallows does not perceive at all: the Soviets have not achieved their numerical advantage because they have opted for simple cheap equipment; they have achieved it by spending twice as much on military equipment as the United States spends, so they can overwhelm the U.S. with numbers while at the same time try to compete with the U.S. with numbers while at the same time try to compete with the U.S. in performance. The Soviets do not have to trade off between quantity and quality; because of their cheap manpower, they are able to choose both. And that poses what Leonard Sullivan, Jr. has aptly called America's "Quantity/Quality Quandary." The United States has a quandary because we are not able to trade off between quantity and quality. We cannot lower our quality because the Soviets are trying to compete with us in quality—they already are equal to us in some areas and are not far behind in others. Therefore, lowering U.S. quality would lead us to become inferior in performance in addition to being outnumbered. At the same time, the United States cannot increase its quantity significantly because of the high cost of American manpower relative to the Soviets'. This quandary is real and any purported solution to American defense problems must deal with it.

Fallows, however, largely ignores the Quantity/Quality Quandary, arguing simply that the United States should build cheaper equipment and more of it. He seriously underestimates the performance level of modern Soviet equipment, and therefore does not realize that the simpler weapons he advocates would be markedly inferior in performance to their Soviet counterparts. And he overlooks the very substantial cost to the United States of manning larger larger quantities of equipment, which would only aggravate the problem that caused the numerical disadvantage in the first place.

I take the Quantity/Quality Quandary seriously, but I cannot describe a simple solution to this quandary, nor a certain one. The conditions in the Soviet Union that cause it—cheap labor, high priority for the military, and high priority for technology—are not under our control. I can describe some actions open to the United States which are not solutions. Cutting the cost of American equipment in half, as advocated by Fallows, is not a solution, for reasons I have described. At the same time, increasing the performance of American fighter aircraft, tanks, and ships is not a solution. The United States is already designing these systems close to the "knee" in the cost-performance curve. Therefore, from where we now are, large increases in unit cost would give us only small improvements in performance, which would not measurably offset the two-to-one numerical disadvantage the United States faces.

The United States, as I see it, has only three ways of dealing with the Quantity/Quality Quandary. First, we should take maximum advantage of the geopolitical factors in our favor—geography, allies, economic strength, and political stability. Armament cooperation in NATO, for example, is exceedingly difficult to implement, but necessary. If the United States is to offset the Soviets' advantage of cheap labor, we must

[1] See, for example, The Fiscal year 1981 Department of Defense Program for Research, Development & Engineering, Statement by the Honorable William J. Perry, Undersecretary of Defense for Research & Engineering, to the 96th Congress, First Session, 1980 (Washington, D.C.: USGPO, 1980).

exploit the relative advantage of having allies who are economically strong and technically advanced.

Second, we should take advantage of our better motivated and better trained manpower. Fallows points out all too clearly that we are not doing that today—that we are failing to exploit one of our greatest potential advantages. Turning that around is perhaps more important than anything else the United States can do to upgrade its defense capability. Fallows makes an important contribution by describing American problems with military personnel so that the layman can understand them; he also gives us the outlines of possible solutions. Third, we should use our technological advantage selectively to offset Soviet numerical advantages by finessing them whenever that is possible.

That does not mean trying to use American technology to build a tank 20 percent or 50 percent better than the Soviets' tank. This is a hopeless task, since their tanks have good performance characteristics and they have four times as many as the United States. It means trying to finesse the Soviet tank advantage by developing ultra-effective anti-tank weapons, which our superior microelectronics capability permits us to do. It also means leapfrogging over the Soviet air defense advantage by introducing highly effective stealth technology and countermeasure technology into U.S. aircraft and missiles. And it means offsetting the Soviet numerical advantage in submarines by developing ultra-sensitive detection systems, which our superior computer capability allows us to do. This, in addition to quieter American submarines, gives the United States a significant tactical advantage over Soviet submarines, since we can detect them at several times the range at which they detect us.

But technology, besides giving the United States a vital edge in performance, also offers the U.S. its best hope for increasing equipment reliability and decreasing equipment cost. In particular, the selective application of microelectronics technology can achieve both of these desirable results. Anyone who has operated a hand-held calculator and is familiar with the electromechanical desk calculator it replaced realizes that the difference is not just a performance advantage. Ease of operation, ease of maintenance, reliability, and durability are all significantly improved in the modern microelectronic calculators. The same comparison can be made between mechanical watches and electronic watches, or between tube radios and transistor radios. Interestingly, most applications of microelectronic technology are "transparent" to the user. A Ph.D. in electrical engineering, for example, is not required to successfully play a video game, even though these games incorporate very sophisticated technology. And the notion that technology per se increases equipment costs has no basis in reality; it is complexity, not technology that is the culprit. It is electromechanical equipment that is rising in cost, not microelectronics equipment. For example, a car purchased in 1950 for $1,000 would cost $10,000 today; houses have gone from $10,000 to $100,000. Almost every category of our consumer purchases have experienced a tenfold increase in the last few decades—except electronics. In the 1950's a black and white television set cost more than $500; the equivalent set today can be purchased for $100. Even the more sophisticated color set can now be bought for approximately $500. Similarly, the cost of a calculator has been reduced from $1,000 for the electromechanical model down to $10 for the solid state model. And computers have gone from $1 million to a few tens of thousands for one with an equivalent capability. Electronics is the only field where costs have been decreasing by factors of 10 to 1,000 in the last few decades, and it is clear that the judicious application of microelectronics is the key to reducing defense costs, while at the same time increasing performance.

In summary, Fallows raises significant questions on important issues, but generally misses the mark on treating these issues. His treatment of defense management is flawed because of inadequate research and because of a failure to grasp the fact that the Soviet Union numerical advantage is caused by the Soviet's cheap manpower, and not by the ineptness in the American procurement process. His treatment of nuclear forces does not make a useful contribution but confuses the issue by sloganizing.

In his treatment of the role of technology in defense, he raises the right question but draws the wrong conclusion because he treats complexity and technology as synonymous. This lack of insight confuses the whole book. The real question is how to use technology selectively to gain the benefits of cost reduction as well as the benefits of improved performance. On a more positive note, his treatment of personal problems raises important questions on the adequacy of the all-volunteer force and frames the issue for useful debate.

While I believe that Fallow's book is fatally flawed, I concluded that more in sorrow than in anger. He has gotten started on an important subject, he asks some of the right questions, and he has a lucid style. In short, he has the potential for writing a meaningful book on defense which could make a significant contribution to the American national debate. This is not such a book, but I hope he tries again.●

INTERDEPENDENCE AND EAST-WEST RELATIONS

● Mr. GARN. Mr. President, I would like to bring to the attention of my colleagues an interesting article written by Jock Finlayson and Paul Marantz.

This article, entitled "Interdependence and East-West Relations," provides useful insights into East-West economic relations and the degree to which they have an impact on Soviet foreign policy. Ten years of experience with the economic policies of détente would seem to support the authors' thesis that interdependence falls far short of providing the West with a useful tool to counter Soviet foreign policy adventurism.

I think it is particularly important to note the implications for the U.S. national security policy of the following observations:

In short, then, the entire Soviet experience, from prerevolutionary days up to the present, reinforces the tendency to view power—and especially military power—as the essence and the lifeblood of politics. In Soviet eyes, recent changes in the international arena—the growing interconnectedness of the members of the global village—in no way alter this fundamental truth.

The Soviets recognize the essential importance of military strength in the conduct of foreign policy. It certainly behooves us to keep this point in mind as we work our way through the final steps of reviewing the administration's national security budget request.

Mr. President, I ask that Messrs. Finlayson's and Marantz's article be printed in the RECORD.

The article follows:

INTERDEPENDENCE AND EAST-WEST RELATIONS

(By Jock Finlayson and Paul Marantz)

This article examines the relevance of the concept of interdependence for an understanding of contemporary Soviet foreign policy. International relations scholars increasingly are adopting an analytical perspective that tends to discard many of the precepts associated with the older, "realist" model of world politics. We ask: To what extent are the assumptions and approaches used by analysts employing an "interdependence" framework useful to the study of Soviet foreign policy and East-West relations? More specifically, we are interested in discovering to what extent Soviet foreign policy might be constrained by that country's economic relations with the West.

We will first examine briefly the concept of interdependence and then discuss five major reasons for believing that interdependence has not served as a serious constraint on Soviet foreign policy: (1) the low level of Soviet economic interchange with the West; (2) the absence of Western unity in dealing with the Soviet Union; (3) the unitary nature of the Soviet state as reflected in the weakness of Soviet interest groups; (4) the continued Soviet belief in the utility of military power and force; and (5) the nature of Soviet foreign policy priorities.

That the world is becoming increasingly interdependent is a basic assumption of much contemporary political analysis. One reflection of this belief among students of international relations is that traditional peace and security issues have been replaced by the politics of international economic and environmental relations as the most popular topics for scholarly inquiry. As a result of this trend—which grew more noticeable through the 1970s—the major intellectual questions addressed by the discipline of international relations appear to have changed, or, at the very least, to have greatly increased in number.[1]

There can be little doubt that interdependence, particularly economic interdependence, has grown for many countries since the late 1940's.[2] Increased econmic interconnectedness is manifested by larger foreign trade sectors in national economies, frequent and massive movements of capital, heightened mutual sensitivity of exchange and interest rates, rapid diffusion of technological knowledge, and other indicators.[3] These trends are especially apparent for the Western countries, some of which now derive close to half their GNP from international trade.[4]

For many scholars, this growing international interdependence challenges the validity of the older, "realist" model for the study of world politics. According to these scholars, an important change in the very nature of the international political system has occurred during the past thirty-five years. As one skeptical observer has noted,

[1] Footnotes at end of article.

much of the interdependence literature claims that: "interdependence is more than a quality or condition that can be measured by looking at transaction flows. Interdependence involves a new type of international politics that cannot be understood or described by using the concepts and categories of traditional international relations analysis." [5]

Scholars sympathetic to the interdependence approach to world politics argue that heightened mutual sensitivity, especially in regard to economic trends and forces, has transformed the agenda of world politics, and that the former hierarchy of issues—with security imperatives at the top and economic issues classified as "low politics"—should no longer obtain, either for the policymaker or the political analyst.[6] Thus, a central assumption of Morgenthau and the realist school is held to be vitiated by much of the contemporary reality of world politics.

Closely related to this proposition is the view that military force is no longer a viable policy instrument for many realms of interaction in international politics. As a result, it is increasingly difficult to ascertain which states have how much effective power in particular issue areas, especially since the overall balance of military power is an unreliable indicator of relative influence. Stanley Hoffmann suggests that the "elusiveness" of power in the modern era makes effective application of it more problematic than the realist model assumes.[7] One scholar goes so far as to argue that the defining characteristic of the contemporary world is "the paradox of the impotence of power—the limited ability of nation states, even the most powerful, to make direct and efficient use of power, be it military, technological, or economic, to serve their interests." [8]

Another proposition put forth by the interdependence school is that it is becoming far more difficult for states to define their national interest because of the influence of transnational and transgovernmental actors.[9] "Multiple channels" now connect most societies to one another and the outside world generally, and thus another assumption of the realist model—that states are "coherent units"—must fall by the wayside.[10] This fact takes on added significance in the light of the growing political prominence of economic issues as sources of global conflict.

In short, the interdependence literature suggests that much of the contemporary reality of world politics calls for a radical change in the traditional assumptions concerning the nature of international relations. It is argued by a growing number of scholars that for many aspects of international relations, a model of "complex interdependence" is more valid for depicting and analyzing reality. Interestingly, the assumptions that underlie such a model are almost exactly the converse of those associated with the realist approach: in the world of complex interdependence, "multiple channels" connect societies, and nonstate actors wield enormous influence; no clear hierarchy of issues exists; power ceases to be fungible across issue areas to a large degree; and military force loses much of its effectiveness both as a policy instrument and as an indicator of relative influence in world affairs.[11]

Two of the leading exponents of the interdependence approach, Robert Keohane and Joseph Nye, have cautioned that a model of "complex interdependence" is not appropriate for the study of all aspects and relationships in international relations.[12] Nonetheless, despite these prudent warnings, the concept of an "interdependent world" and its associated assumptions appear to have moved to the center of the discipline, as is reflected, for example, in the tenor of many undergraduate textbooks in international relations.[13] This poses the question of whether global interdependence is sufficiently pervasive to warrant discarding the realist approach as the central model for the analysis of world politics. In particular, it is worth asking how useful the assumptions, models, and prescriptions put forth in the interdependence literature are for understanding East-West relations, surely the most important "relationship" in contemporary world politics.

The belief that increasing international interdependence and the growing importance of global economic issues more generally would serve as constraining influences on Soviet foreign policy was one of the central assumptions of the Western policy of détente in the first half of the 1970s. Henry Kissinger of course played a key role in articulating and advocating the doctrine of détente. It is difficult to know just what Kissinger actually believed during this period, but it is quite clear that he took it upon himself to "sell" détente to an often skeptical public. Kissinger explicitly stated that closer Western economic relations with the Soviet Union would enhance the prospects for moderation in Soviet conduct. In a widely quoted statement before the Senate Foreign Relations Committee in 1974, he suggested: "Over time, trade and investment may leaven the autarkic tendencies of the Soviet system, invite gradual association of the Soviet economy with the world economy, and foster a degree of interdependence that adds an element of stability to the political equation." [14] More specifically, Kissinger spoke optimistically of using economic ties "as a tool to bring about or to reinforce a more moderate orientation of foreign policy and to provide incentives for responsible international behavior." [15]

Thus, the concept of "linkage" was born. According to this view, by multiplying the number and heightening the intensity of the Soviet Union's economic connections with the West—that is, by increasing Soviet economic interdependence with the external world—fundamental changes in the behavior of the Soviet political beast could gradually be elicited. This belief that closer integration of the Soviet Union into the international economic system would have salutary consequences in terms of East-West political relations exercised an enormous influence on many Western observers of international affairs.

Samuel Pisar, prominent international legal expert specializing in East-West trade, suggested that expanded economic ties presaged major alterations in the Soviet social system itself:

"If they are prepared to build automobiles, highways, filling stations, parking lots, motels and roadside restaurants, it is in our interest to help them along. With time, they can be expected to become a more mobile, more complex and more peaceful society. The benefits of our cooperation will go to their system's midriff rather than to its biceps." [16]

Nor were certain American business leaders slow to recognize the political import of greater East-West economic interdependence. The chairman of the board of the company producing Pepsi-Cola could barely contain his optimism and went so far as to claim that "the opening of the Soviet market to a product like ours is very significant in terms of what the headline writers call détente." [17]

More generally, it appears that many international relations scholars came to interpret détente and growing East-West economic linkages as aspects of a trend toward a radically changing international system. Building on some of the major assumptions concerning complex interdependence outlined earlier, these scholars suggested that all states, including the most powerful, would be increasingly constrained by the strengthening of "new forces" unleashed by the modernization of international economic and social relations. Central to this orientation was a perception that states were losing some of their status as the major actors in world politics and that security issues and dilemmas were less and less important in international affairs. The emphasis, on the part of Kissinger and other leading Western policymakers, on détente in East-West relations and increased interdependence among all states fit perfectly into the perspective of these scholars and in fact exerted some influence over their thinking.[18]

From the vantage point of the 1980s, many of these expectations seem rather naive or at the very least inordinately optimistic. Yet it is always easier to appear wise after the fact. We should not forget that even though the hope that growing East-West economic ties would induce Soviet moderation has not been fulfilled, there were nonetheless good reasons for cautiously entertaining such hopes in the early 1970s.

At that time, it was becoming increasingly apparent that growing deficiencies in the Soviet economy could not be ignored by that country's leadership. Declining growth rates, chronic agricultural shortages, and an inadequate pace of technological innovation demanded some action. Apparently, only two stark alternatives existed. Either fundamental domestic economic reform would have to be instituted or the Soviet Union would have to turn to the West as the source of badly needed goods, technology, and capital.

The latter alternative clearly was not without risk for the Soviet leadership, but the former was even more unpalatable to them. Their fear was that economic decentralization and liberalization would soon lead to unwanted demands for political liberalization. For them, this was the clear lesson of the 1968 events in Czechoslovakia. Thus it appeared to Western analysts that the Soviet leadership had little choice but to increase its economic dependence upon the West.[19]

The rapid growth in East-West trade in the late 1960s and early 1970s lent further support to this view. The Soviet Union eagerly sought massive credits, Western assistance in the building of mammoth factories, and Western participation in the development of the energy resources of Siberia. Crop failures in 1972 and 1975 forced the Soviet Union to import huge amounts of grain. In addition, the Kremlin's decision to increase significantly the amount of meat available to Soviet people meant that there would be an indefinite reliance upon the West for the feed grains that could not be produced in sufficient quantity in the Soviet Union (because of climatic and other factors).[20] The Soviet Union's ninth Five-Year Plan, for 1971-1975, envisaged a 35 per cent increase in foreign trade, yet the actual

figure achieved was 186 per cent (reaching a level of approximately $70 billion in 1975).[21] The Soviet Union's previous disengagement from the world economy appeared to be coming to an end.

Most striking of all, there were strong indications that the Soviet leadership's desire for Western technology, as an alternative to unacceptable economic reform, was already causing it to adopt a more conciliatory policy. Linkage was not just a hypothetical construct, but a growing reality—or so it seemed at the time. In search of most-favored-nation status from the United States, the Soviet Union allowed an unprecedented increase in Jewish emigration beginning in 1971. In 1973, more than 34,000 Jews were allowed to leave the Soviet Union, far more than the total number for the entire period of 1950 to 1970.[22] In 1973 the Soviet Union also bowed to international protest, swallowed its pride, and abandoned a punitive exit tax that had been imposed upon departing Jews the previous year.[23]

The treatment of dissidents was also clearly influenced by foreign public opinion. When the National Academy of Sciences in the United States threatened to cut off scientific exchanges with the Soviet Union, the growing campaign of vilification against Andrei Sakharov was abruply terminated.[24] Scores of dissidents (Solzhenitsyn being the most prominently) who otherwise would have wound up in Siberian exile were allowed to emigrate to the West instead. Most dramatic of all, while the world held its breath, the Soviet Union ignored the United States' 1972 escalation of the Vietnam conflict (which included the bombing of Hanoi and the mining of Haiphong harbor) and went ahead with the planned Moscow summit meeting of Nixon and Brezhnev.[25]

The period of 1972 to 1973 was the high point of East-West détente, and it appeared to many that the Soviet Union's ever-growing economic dependence upon the West was likely to induce further moderation in the years to come. Yet, as we are only too aware, this is not what came to pass. The invasion of Afghanistan, the Soviet Union's unprecedented use of Cuban troops in Angola and Ethiopia, the continuation of the steady Soviet military build-up despite its deleterious effect on Western opinion, and the heightened repression of dissidents all demonstrated just how unconstrained Moscow was by its economic ties with the West. What had gone wrong? In particular, what does the Soviet Union's bold and assertive behavior of the mid and late 1970s suggest about the utility of the interdependence perspective for the understanding of East-West relations?

We are definitely not dealing here with interdependence theory as it might apply to the relations between developed Western states or to North-South relations. Whatever its inadequacies for explaining East-West relations, the concept may still have value in other issue areas. Moreover, as we will argue below, the problem is not so much that interdependence theory was disproved by the deterioration of East-West relations as that it was never really put to the test. The preconditions for genuine interdependence had not been met even at the apogee of détente in the early 1970s. The crucial fact is that the Soviet Union never had a high level of economic dependence upon the West, and consequently it did not have that much to fear from the disruption of East-West economic relations. The incentives for modernization were relatively weak. Had they been stronger, had Soviet dependence on the West been greater, it is not inconceivable that Soviet behavior might have been more effectively circumscribed—though, as we indicate below, there are good reasons for believing that the leadership would never have allowed such a situation to develop.

THE LIMITS OF INTERDEPENDENCE

First and foremost, it must be acknowledged that the Soviet Union never allowed itself to become significantly dependent upon the West economically. In the early 1970s, many Westerners were mesmerized by the pace (in percentage terms) at which East-West trade was growing or by the absolute dollar amounts, which, since they ran to tens of billions of dollars, seemed immense. What was forgotten was that as large as this trade might seem to be or promise to become eventually, it still represented only a small amount for the Soviet economy with its GNP of some 1,200 billion U.S. dollars.[26]

For example, Samuel P. Huntington, who served on the staff of the National Security Council during 1977-1978, vigorously argued for a coordinated Western policy that used trade as a bargaining lever to induce greater Soviet restraint. In support of this policy, Huntington noted that the Soviet Union relied on the West as the source for approximately $18 billion worth of machinery that it imported during the mid 1970s.[27] This amount seems quite large until it is realized that it constituted only about 3 to 5 per cent of total Soviet investment in machinery during this same period.[28] While it is exceedingly difficult to arrive at precise figures for the contribution of Western technology to Soviet growth, two Western economists have suggested that the importing of this Western machinery would have had only a marginal impact, potentially increasing the growth of the Soviet GNP by less than 0.1 per cent per year.[29]

Soviet foreign trade increased rapidly during the 1970s. Nonetheless, as a percentage of Soviet GNP it was still only in the 5 to 8 per cent range at the end of the decade.[30] (By way of contrast, for the major trading nations of Western Europe such as West Germany, the United Kingdom, and Italy, the comparable figures are approximately 40 per cent.)[31] Moreover, Soviet trade with the developed Western countries compromises less than one-third of its total foreign trade.[32] What this means is that even by the late 1970s, total Soviet imports from the West constituted less than 1.5 per cent of its GNP. Thus, Soviet insularity and relative autarky may have diminished, but Soviet dependence upon the West, as measured in concrete economic terms, was not very high.

It is true that dependence is not just an objective, quantifiable phenomenon, however; it has a subjective dimension as well. For example, the leaders of a particular nation may think that they are deriving more benefit from an economic relationship than they actually are, and for this reason they may value that relationship (and fear its disruption) more than they should. Or they might value a relationship because they believe that the future payoff will be much greater than the initial rewards.

It appears that this was indeed the case with the Soviet leadership in the early 1970s. What many in the West warned against, the Soviet leaders optimistically anticipated: the possibility that the introduction of advanced Western technology, often embodied in large factories built from start to finish under Western supervision, would enhance the quality, sophistication, productivity, and diversity of Soviet industry.[33] The Kremlin hoped that the most useful components of Western technology would be disseminated throughout the Soviet economy and would thus enable Soviet industry to overcome its backwardness and inefficiency. This perception that Western technology was especially important to economic progress in this era of "scientific and technological revolution" was, then, a not insignificant factor contributing to Soviet moderation in the early 1970s.

By the latter part of the decade, however, Soviet hopes—and Western fears—concerning the impact of Western technology on the Soviet economy were seen to be in need of drastic revision. While some benefits were certainly achieved, the overall results were rather modest. It turned out that the basic structural features of the Soviet economy could not be altered easily. When Western technology was introduced into the Soviet Union, it operated with far less efficiency than it did in Western Europe or North America. (The efficiency of the same technology in the Soviet Union generally was less than 40 per cent of that achieved in the West.)[34] Moreover, this new technology could not easily be disseminated from one factory to another. For many years, the main problem in the Soviet Union has not been the level of scientific knowledge, for this is often quite high, but the difficulty of shifting new technology from the laboratories and scientific institutes to the factory bench. This problem was not solved by the introduction of Western technology.[35] Thus there can be little doubt that the results of the opening to the West were disappointing to the Soviet leadership. For this reason, the Soviet sense of dependence on the West, which was never very great even in the early 1970s, was further diminished by the end of the decade. This low level of economic dependence on the West, both in a concrete economic sense and in terms of Soviet perceptions of the anticipated economic benefits, was one reason Soviet foreign policy was not seriously constrained.

A second reason Soviet foreign policy was relatively unconstrained is that the leadership did not believe that the West had either the will or the ability to use East-West economic ties as an effective lever for pressuring the Soviet Union. Based upon both past experience and Marxist-Leninist ideology, the Soviet view has long been that the policies of Western governments would respond to the demands of powerful capitalist interests that put the quest for immediate profit before considerations of long-term political strategy. Rivalry and competition between the capitalists of diferent nations would allow the Soviet Union to play off one nation against another and would preclude united action by the West.

It must be admitted that there is a good deal of truth to this view. With all the talk in the West during the 1970s of Soviet dependence upon East-West trade, it was often forgotten that trade and dependence form a two-way street. What was evolving was not just Soviet dependence on the West, but interdependence, whereby at least some Western countries were at least as dependent upon trade with the Soviet Union as the Soviet Union was on trade with the West. The prime example of growing economic dependence upon the Soviet Union is West Germany, and this clearly has been one of the factors motivating the rather restrained German response to the Soviet invasion of Afghanistan and the imposition of martial

law in Poland, which in turn has caused serious strain in relations between the United States and West Germany.

West Germany has become the Soviet Union's largest non-communist trading partner. It exports large quantities of machinery to the Soviet Union, and this has made specific sectors of the German economy especially dependent upon trade with the Soviets. It has been estimated that some 50,000 German jobs are a direct result of exports to the Soviet Union.[36] At the present time, approximately 16 per cent of Germany's natural gas is imported from the Soviet Union, and if the massive pipeline connecting Western Europe to the Yamal Peninsula is built, this figure could reach 30 per cent by the late 1980s.[37] Expressed as a percentage of the German and American GNPs, Soviet-German trade is more than ten times as great as Soviet-American trade.[38] All this obviously creates a strong economic incentive for the Germans to try to preserve what is left of the tattered remains of détente.

This economic interest in détente is further reinforced by the special circumstances of Germany's political position. Détente is pursued as a domestically popular alternative to the receding dream of a reunified Germany and as a means of improving the conditions for the hard-pressed people of East Germany. In a relaxed international climate, the security of West Berlin is strengthened, increased emigration from East Germany is permitted, living conditions improve in the East, and family visits between the two Germanies (which have numbered some 15,000,000 in recent years) are more numerous.[39] East-West relations as seen from Bonn are clearly quite different from Washington's perspective, and the Soviet Union can continue to assume that in the absence of an especially threatening Soviet move (such as an invasion of Poland), the possibilities for a coordinated Western economic policy are very limited.

Even with this Western disunity, the Soviet Union would still need to exercise restraint if it were highly dependent upon any one Western nation, such as the United States, for particularly important imports. However, such dependence does not appear to exist. Most of what the Soviet Union buys from the United States is also available from other Western nations. Even the oil-drilling equipment that the Soviet Union needs to import in order to prevent a sharp decline in its petroleum production can be obtained elsewhere.[40] The one commodity that the Soviet Union needed from the United States is grain, but because the Soviet Union assumed—as did most knowledgeable Western observers—that a grain embargo was precluded by the strength of the farm lobby in the United States, this situation did not confer any significant leverage upon the United States.[41] In short, Soviet perceptions of Western irresoluteness and disunity—perceptions that were often quite accurate—further vitiated the political consequences of Soviet economic reliance upon the West.

Yet another factor that has worked to diminish the constraints of interdependence is the highly centralized nature of political power in the Soviet Union. In elaborating their model of "complex interdependence," Keohane and Nye have suggested that in the analysis of at least some issue areas it is no longer productive to view the state either as a coherent entity or as the sole international actor. This may very well be the case for Canadian-American bargaining over fisheries or in the negotiations over the law of the sea, but it is difficult to apply this perspective in Soviet foreign policy.

The Soviet state is in little danger of being "dissolved" from either above or below.[42] While Soviet policymakers are not totally insulated from the changing content of the international agenda (for example, the emergence of the North-South dialogue, the debate over the law of the sea, the pressures of resource scarcity), they are still relatively unencumbered by transnational pressures when framing their policies. The Soviet Union is not a member of the International Monetary Fund or the General Agreement on Tariffs and Trade. Foreign multinational corporations have only a minimal presence on Soviet soil. The Soviet Union has turned a largely deaf ear to the North-South dialogue, and it has tenaciously clung to its own narrowly self-interested positions on such matters as world population policy, international food resources, and the demands of the Third World for more favorable terms of trade.[43]

Even though Soviet society has become more differentiated and heterogeneous in the post-Stalin period, interest groups remain exceedingly weak, and the Soviet state is still very much a coherent unit. Even the most optimistic observers of the Soviet scene can find little more than the most tentative stirrings of incipient pluralism. For all the change that the world has witnessed in recent decades, no one is likely to dispute the proposition that the Soviet state of the 1980s is far more coherent and unitary than were the major Western states in the 1950s (when the "billiard ball" approach of the realist school of international relations was generally considered the most useful one).

Proponents of détente have often argued that a prologed relaxation of international tension would alter the parameters of Soviet policymaking. Peter Peterson, former U.S. secretary of commerce, has stated that one of the objectives of increased Soviet-American trade is "to build in both countries a vested economic interest in the maintenance of an harmonious and enduring relationship."[44] Similarly, Giovanni Agnelli, chairman of the board of Fiat, stated in Foreign Affairs that "experience tells us that the growth of trade strengthens forces and individuals inside Soviet society which are recognizably committed to détente with the West and to peaceful policies."[45]

It is perhaps possible that during a time span of some decades—as opposed to a briefer period of a few years—such a tendency might to some extend manifest itself. Buy thus far little movement or change has occurred. No doubt the Soviet political system is now more penetrable than it was even a decade ago. The jamming of Western radio broadcasts has been curtailed, and foreign broadcasts are now a major source of information for the Soviet people. More than 250,000 Soviet citizens have been allowed to emigrate, and their letters and telephone calls to relatives still in the Soviet Union have become an important factor lessening Soviet insularity. The increased presence of Western tourists, businessmen, and journalists has a similar effect, and Soviet workers in factories built by Western firms (such as the huge Kama River truck factory or the Togliatti car factory) are able to see with their own eyes the superiority of Western technology, workmanship, and even higher wage levels.[46] Nonetheless, whatever long-term impact this may eventually have on Soviet attitudes, the immediate political consequences of this very partial opening of Soviet society are minimal.

Developments such as these certainly do not necessitate the search for a new paradigm to explain Soviet foreign policy. On the contrary, political power in the Soviet Union still remains tightly concentrated at the top, and the leadership is quite able to ignore the wishes of various subgroups in Soviet society. For example, as a result of the turmoil in Iran in 1978-1979, shipments of natural gas from Iran to Soviet Georgia and Armenia were cut off. Alternative sources of supply were unavailable, and the Armenians and Georgians froze through one of the coldest winters in decades.[47] Yet in framing policy toward Iran, the Soviet leadership did not have to give great weight to the "votes" of these people. Clearly the position of the Soviet state and Soviet foreign policy vis-a-vis the shivering people of Armenia and Georgia is not remotely comparable with the position of the U.S. government vis-a-vis aggrieved fishing interests in the New England states (which have forced a renegotiation of the Canadian-American fisheries agreement).

This is not to say that the Soviet leadership is totally unmindful of popular welfare. The recent events in Poland are a vivid reminder to the Soviet Union's rulers that economic stagnation and distress can have serious political consequences. But Soviet consumers are a patient and long-suffering lot, and as long as certain minimal expectations are met, the Soviet leadership can be confident that public order will be maintained and that they will have a relatively free hand in the framing and execution of foreign policy.

Even without powerful pressures from below, there certainly can be important differences of opinion within the Politburo on foreign policy questions. We know of past instances of profound differences, and even now in all probability some members of the Politburo lean toward restraint while others are attracted to a harder line.[48] Compared with the other major international actors, however, the Soviet state is still highly cenralized and tightly organized, and the scope for interest-group politics—especially on matters of foreign policy—is extremely limited. Even if some groups with a vested interest in détente do exist, their ability to influence Soviet foreign policy is minimal.

This, then, is yet another reason the Soviet Union's increased involvement in the international economic system has not seriously constrained the conduct of Soviet foreign policy. If such groups as Soviet consumers, intellectuals, scientists, the foreign trade bureaucracy, sectors responsible for the production of consumer goods and foodstuffs, young people seeking access to foreign travel, among others, had a greater impact on Soviet policymaking, then the economic cost of occupying Afghanistan, expanding into Africa, or escalating the arms race would be a weightier factor in Soviet policy deliberations. As long as Moscow retains its present degree of centralization and authortarian control, however, the moderating effects of interdependence will be severely limited.[49]

Another factor that lessens the impact of interdependence on Soviet foreign policy is the Soviet view of the role of force in international politics. According to some of the more optimistic Western proponents of the interdependence paradigm, force is losing much of its previous utility. The definition and measure of power is becoming more elusive, and even the world's superpowers are

said to be finding it more difficult to apply their power in a politically meaningful manner (as Washington discovered in Vietnam, in dealing with Iran over the hostages, and in its inability to affect the course of the war between Iran and Iraq).

For many in the West, the elusiveness and recalcitrance of power has been accepted as a fundamental feature of the international system of the last quarter of the twentieth century. The crucial point, however, is that this perception is not shared by the Soviet leadership. For the Kremlin, the use of force—or at least the ability to threaten credibly its use—is the linchpin of Soviet power. It lies at the heart of Soviet leaders' perceptions of the country's past, present, and future. In the eyes of the Soviet leadership, the Soviet Union has become what it is today largely because it successfully built up and effectively utilized its military establishment. As they look at past events, the central lesson they draw is not of the irrelevance of force, but of its absolute indispensability. It was Soviet military might that allowed that country to defeat Hitler's armies and to expand Soviet power throughout Eastern Europe in the 1940s, to crush resistance in Hungary and Czechoslovakia in the 1950s and 1960s, and to spread Soviet power to Angola, Ethiopia, South Yemen, and Afghanistan in the 1970s. To find graphic proof of the importance of military power, one need only look at the African continent, where recent Soviet successes contrast dramatically with Soviet impotence (because of the lack of long-range transport capabilities) during the Congo crisis of 1960.

Paradoxically, the blossoming of détente in the mid 1970s served to strengthen rather than undercut this perception. If in the West the development of détente has often been viewed as reflecting the declining importance of military power in world affairs, the Soviet perspective has been just the reverse. The official Soviet view is that the United States came to accept détente only because it was compelled to do so by the growing might of the socialist camp. The Soviet Union's attainment of strategic parity is viewed as having had a sobering impact on U.S. political leaders, forcing them to acquiesce in the Soviet Union's growing role in international affairs. The thawing of East-West relations in the 1970s is thus seen as just one part of the dividend accrued by the Soviet Union on its costly investments in the military sphere.[50]

So too does the role of military power loom large in the Soviet leadership's nervous contemplation of the future. The Soviets see the possession of a massive military establishment as vital to the achievement of Soviet goals—both defensive and offensive—in the years ahead: the deterring of China, the discouraging of active opposition to Soviet hegemony in Eastern Europe, the counterbalancing of U.S. military mighty, and the pursuit of a greater Soviet role in the Third World. As Soviet weaknesses along the other dimensions of power become increasingly pronounced, the enhancement of the military establishment becomes the Soviet Union's single most important means of maintaining its status as a global superpower.

Economically, the productive capacity of the Soviet Union and its allies remains vastly inferior to that of the developed West. (For example, the combined GNP of the United States, Japan, and the European Economic Community (EEC) is approximately three to four times that of the Soviet bloc.)[51] In addition, the trends of the 1980's (with decling growth rates, continued technological backwardness, potential energy shortages, and possible consumer unrest) are highly unfavorable to the Soviet Union.[52] Ideologically, the Soviet Union has lost its mystiques as the supposed homeland of international revolution, and the attractive force of Marxism-Leninism has been very much diminished, to the point that it holds little genuine appeal even to radicalized groups in the West and the Third World. Politically, Soviet diplomacy has often been inept and heavy-handed, and the Soviet Union has alienated many of the key states vital to its international standing (for example, China, Japan, and Egypt). By process of elimination, this leaves military power as by far the most reliable and productive means of maintaining and extending Soviet global influence.

In short, then, the entire Soviet experience, from prerevolutionary days up to the present, reinforces the tendency to view power—and especially military power—as the essence and lifeblood of politics. In Soviet eyes, recent changes in the international arena—the growing interconnectedness of the members of the global village—in no way alter this fundamental truth.

Put another way, it can be said that the traditional hierarchy of issues in international politics—with security concerns at the top and economic problems at the bottom—is not breaking down for Soviet leaders, whatever changes may be taking place in Western scholarly and policymaking circles. On the contray, for the Soviet leadership other objectives (whether regulating the law of the sea, increasing consumer satisfaction in the Soviet Union, or keeping Armenians and Georgians warm) take a definite backseat to the central goal of maintaining and expanding Soviet world power. Thus, even if the Soviet leadership has fully anticipated all the harmful economic consequences of its military occupation of Afghanistan, this probably would not have deterred them from going ahead. From their perspective, the costs imposed by the cut-backs in East-West trade, the American grain embargo, the expense of fighting Afghan insurgents, and the loss of foreign exchange as a result of the partial boycott of the Olympics are minor in comparison with the political and strategic stakes involved.

The Soviet leadership has a highly competitive view of international relations. It believes that the forces of American imperialism are tirelessly seeking to strengthen their positions throughout the world and that the Soviet Union must do the same. This competitive view of international politics leads, in turn, to a strong tendency to put short-term gains and interests ahead of more long-term perspectives. In recent decades, the Soviet regime has moved away from the narrow zero-sum perspective of the Stalin period, but Soviet foreign policy is still characterized by opportunism and the eager exploitation of targets of opportunity.

Whether it be nuclear proliferation, the population explosion, the lack of a world agricultural reserve, international terrorism, or the taking of American hostages in Iran, there is little evidence of Soviet willingness to subordinate the prospect of making immediate gains to collaborative efforts to strengthen world order. Nor should this come as a surprise to the West. After all, the Soviet Union sees itself as an emerging global power that has only just begun to find its deserved place in the international hierarchy. The international status quo is not acepted as legitimate by the Soviet Union, and the United States is viewed as having at present an illegimate excess of power (as in areas close to Soviet borders, such as the Midddle East and Japan).[53] Instability, disorder, hunger, and unsatisfied grievances are welcomed by the Soviet Union since they threaten the status quo and provide a potential entry wedge for the expansion of Soviet influence.

On occasion, Soviet spokesmen do pay lip service to the rhetoric of global interdependence.[54] But most of these statements are clearly made for foreign consumption.[55] The dominant theme of Soviet pronouncements is that the concept of interdependence is a transparent sham, concocted and peddled by bourgeois ideologues in an attempt to shore up the existing international system and to mask the continuation of imperialist exploitation of the Third World.[56]

For many in the West, the emergence of world interdependence, the global village, the "technetronic age," represents a golden opportunity for humanity, a chance to replace the irrational rigidities of the Cold War and the economic wastefulness of the arms race with a new commitment to the genuine needs of mankind. In contrast, the Soviet leadership has much to fear from a fundamental shift in the rules of the game. Genuine global interdependence would, at the very least, put the Soviet Union at a severe disadvantage in the competition for world power, since Soviet economic might is vastly inferior to the West's, and its rigid state-run enterprises are no match for the restless, ever-expanding multinational corporation.

We are currently living in a period in which the spotlight is on Latin America. During my 16 years in the Senate, I cannot recall a time when so many different Latin American issues have been so continually on our agenda. We have dealt with important regional issues before—such as the Panama Canal Treaties—but never before have we seen the variety and complexity of the political, security, and economic questions that require our attention today.

The Hemispheric issues that we are concerned about today in Congress can be considered in three separate but related categories.

First, the attention of the Congress is focused on the evolving crisis in Central America.

Second, Congress must be sensitive to the tensions created in United States-Latin American relations in the aftermath of the Falklands/Malvinas war.

And third, the economic crisis being faced by Latin America's most economically powerful countries is a new cause for considerable concern.

I will discuss all three of these issues in turn.

CENTRAL AMERICA

Beginning with Central America, internal strife continues despite American efforts to bring peace to the region. I fear that, unless our efforts are successful soon, violence may spread across borders and engulf the states of the region in wars with one another. We must, therefore, rededicate our efforts to find peace, but with as much firm and quiet diplomacy as possible.

Carried to its logical extreme, genuine interdependence would eat away at the closed nature of the Soviet system as it presently exists. One has only to list some of the potential consequences of a close intertwining of the economies of East and West to

appreciate the basis for Soviet anxieties: (1) The Soviet Union would become less autarkic and more vulnerable to Western economic pressure. (2) The ideological commitment of the Soviet people would be weakened by their increased exposure to people and ideas from the West. They would become better informed about the disparity between the Soviet and Western standards of living, and they would learn more about Western political institutions and social conditions. (3) The pressure for major Soviet economic reform, to make the Soviet Union more competitive in world markets, would be intensified. Demands for fundamental political change would increase, thus calling into question the existing distribution of political and economic power in the Soviet Union. (4) The Soviet economy's vulnerability to the effects of Western economic cycles would be increased. (5) The Soviet Union, through its increased trade with the West, would be helping to buttress the economic and political systems of its capitalist adversaries. (6) As the countries of Eastern Europe expanded their trade with the West, Eastern European dependence upon the Soviet Union would be lessened, and Western influence in the Comecon countries would grow. (7) The sharpness of East-West cleavages would be blurred, thereby providing increased scope for independent Eurocommunist parties and further eroding what is left of the Soviet Union's revolutionary image in the Third World. (8) The Soviet Union would be at a disadvantage in the Third World to the extent that economic development (with its need for advanced technology, access to Western markets, and demands for better terms of trade) assumed priority over local and regional conflict.

Clearly, all this adds up to a situation in which the Soviet Union has little reason to value and work toward a world of genuine interdependence. The Soviet leadership would like the benefits of increased trade with the West without accepting any of its costs or constraints. It would seem that thus far they have been highly successful in achieving precisely this result.

CONCLUSION

The major arguments of this paper have been: first, that the conduct of Soviet foreign policy in the late 1970s and early 1980s has not been significantly constrained or moderated by the growth of the Soviet Union's economic ties with the West; second, that one of the main reasons for this is that even with the rapid increase in East-West trade in the 1970s, the overall level of Soviet economic interchange with the West has remained relatively low; and third, that even if the Soviet economy had been more closely interconnected with the international economic system, the constraining influence of these economic ties would still have been relatively limited because of such factors as the disunity of the West, the relative weakness of interest groups in the Soviet Union, the Soviet leadership's continued belief in the utility of military power, and the determination of that leadership to secure what they see as the Soviet Union's rightful share of global power. On this basis, it was concluded that the model of "complex interdependence" does not have a great deal to offer to students of East-West relations.

Direct economic constraints on Soviet foreign policy arising from the Soviet Union's commercial ties with the West are likely to remain quite weak for the foreseeable future. Nevertheless, one potential development in the years ahead should be mentioned: the possible consequences for Soviet foreign policy of the increased ties between Western Europe and the nations of Eastern Europe, such as Poland, Hungary, and Rumania. The Soviet Union and the United States, as two of the world's largest and most populous nations, each possessing a vast diversified resource base of continental scope, are able to remain comparatively detached from the world economy. This is why Soviet foreign trade as a percentage of GNP is much lower than the comparable figures for its Comecon allies, just as foreign trade is much less significant for the United States than it is for the nations of the EEC.

Therefore, the place to look for the impact of economic relations on foreign policy is in the conduct of countries other than the Soviet Union and the United States. As we have noted above, West Germany's policies are already being influenced by its well-developed economic ties with the Soviet bloc. Similarly, countries such as Poland and Hungary are becoming increasingly vulnerable to any disruption of their economic relations with the West.

Moreover, it can be conjectured that the economic ties between the countries of Eastern and Western Europe will eventually exert at least some influence on Soviet calculations and conduct. Various mechanisms and linkages suggest themselves: (1) In a time of deteriorating East-West relations, East European leaders, fearful of the consequences of a new cold war for their economies, will urge the Soviet Union to pursue a moderate policy. (2) Even if the direct costs for the Soviet Union of a disruption of East-West trade would be quite manageable, the economic consequences for the nations of Eastern Europe would be far more serious. The Soviet Union would have a strong interest in avoiding this situation, fearing that economic dislocation in Eastern Europe could easily trigger either a political explosion or the initiation of political reforms unacceptable to the Soviet Union (as in Czechoslovakia in 1968 or in Poland during 1980–1981). (3) Should a major disruption of East-West trade severely damage the economies of Eastern Europe, the Soviet Union would be called upon to bail them out, and this it can ill afford to do given its own economic difficulties. (4) While growing Eastern European dependence upon the West creates dangers for the Soviet Union, the corresponding Western European dependence upon Eastern Europe also opens up opportunities for Soviet foreign policy. Western dependence on trade with Eastern Europe gives the Soviet Union greater scope for trying to drive a wedge between the United States and its allies. Yet to take advantage of this opportunity, the Soviet Union must act with a certain degree of moderation, and it would have to maneuver carefully and take into account European sensitivities. Thus, what in one sense is an opportunity for the Soviet Union is also a complicating factor adding complexity to its choice of policy options. All this suggests, then, that to the extent that the constraints of interdependence do affect the Soviet Union and the United States in the future, the main mechanism may not be direct economic ties between the superpowers, or even their own economic dependence on the other camp, but their ties to their own allies who, in turn, are very much affected by the economic links between East and West.[57]

In appraising East-West relations, it is important to maintain a sense of balance and to avoid the extremes of bleak pessimism or unrealistic optimism. A brave new world of harmonious interdependence is clearly not on the immediate horizon, and for the foreseeable future, East-West relations will remain highly competitive. But this need not rule out efforts aimed at the gradual improvement of U.S.-Soviet relations.

We have argued that the Soviet Union's economic ties with the West have not constrained and will not seriously constrain the conduct of Soviet foreign policy. Having said this, however, we do not mean that a complete absence of parallel interests exists between East and West, interests that may serve to promote a degree of restraint on the part of the Soviet Union. We have already mentioned the constraining factor of economic ties between Western and Eastern Europe. In addition, the Soviet Union has a strong interest in avoiding nuclear war, establishing some degree of crisis management (as in the Middle East), trying to prevent a full Sino-American rapprochement (especially in the military area), and avoiding an all-out arms race with an economically superior United States. Parallel interests exist alongside deeply divergent perceptions, interests, ideologies, goals, and domestic political systems, and it is for this reason that East-West relations are characterized by elements of both cooperation and conflict.

Judging by past experience, the level of East-West tension is likely to fluctuate widely in the years ahead. Even during the times of greatest East-West cordiality, however, it would seem that the realist model of international relations, with its stress on national interest, conflict, and the quest for power is a more effective tool than the interdependence perspective for comprehending and managing the complexities of this relationship.

mens, Jr., The U.S.S.R. and Global Interdependence (Washington: American Enterprise Institute for Public Policy Research, 1978). Our critique of the model of "complex interdependence" as applied to East-West relations should not be seen as an attack on the work of Keohane and Nye. On the contrary, their work is especially valuable in at least two respects. First, it represents one of the clearest and most cogent discussions of interdependence. Second, their analysis is exceptionally well balanced and thoughtful, and it explicitly recognizes the need for a diversity of approaches in the study of international politics. All they claim is that the perspective of "complex interdependence" may be more useful than the traditional realist paradigm in certain cases. Moreover, it is clear from their discussion that they recognize that the study of East-West relations—as opposed to relations among developed Western countries—is not one such case. The caveats of Keohane and Nye have often been ignored, and scholars and policymakers have at times overestimated the extent to which international politics in general, and Soviet foreign policy in particular, has been transformed by the growth in international economic transactions and the emergence of new economic-political issues.

Simple quantitative measures of dependence (such as foreign trade as a percentage of GNP) may not fully indicate the degree to which a nation benefits from its economic relations with other countries. By importing a crucial commodity that alleviates major bottlenecks in the productive process (for example, oil drilling equipment) or has a multiplier effect on production (such as chemical fertilizers), a great benefit may be achieved. Even taking these effects into account, most observers nonetheless conclude that Soviet imports of Western technology and goods in the 1970s had only a very limited impact on overall Soviet growth rates. See Hanson, "Western Technology in the Soviet Economy," pp. 28-30; Gary K. Bertsch, "West-East Technology Transfer," Problems of Communism (1980), pp. 74-78; and Mark E. [41] Soviet leaders clearly miscalculated in assuming that the U.S. government would not embargo grain shipments to the Soviet Union. In a broader sense, however, they were quite correct in minimizing the significance of such an action. This is indicated by the fact that: (1) the embargo was lifted unconditionally after less than sixteen months; (2) even while the embargo was in force, the Soviet Union was able to import more than thirty million tons of grain in 1980, an amount greater than that imported in any previous year. [49] Since the mid 1060s, many Western scholars have explored various aspects of an interest-group approach to the analysis of Soviet politics. While significant differences of opinion still exist on many questions, most Western observers would agree that: (1) Soviet interest groups (with the possible exception of the military) are significantly weaker than their Western conterparts; (2) those groups most likely to have an input into foreign policy decisionmaking are not those favoring moderation (such as the foreign trade bureaucracy or the scientific community), but rather more hardline elements such as the military, the KGB, and the ideologically conservative party apparatus. The seminal work on Soviet interest groups is H. Gordon Skilling and Franklyn Griffiths, eds., Interest Groups in Soviet Politics (Princeton: Princeton University Press, 1971).

[57] One should note that the relationship between heightened economic dependence and improved political relations may often be just the opposite of the one assumed by enthusiastic proponents of greater East-West trade. Far from promoting an improvement in relations, increased interdependence may impose an additional strain on relations. To the extent that one nation's fortunes are acutely and directly affected by another country's policies—internal or external—another cause for concern arises (for example, Western anxieties over potential Soviet oil shortages or the fears of international bankers provoked by Poland's faltering economy). A decoupling of the economies of East and West may thus be more conducive to better relations than increased interdependence. See Kenneth Waltz, "The Myth of Interdependence," in Charles Kindleberger, ed, The International Corporation (Cambridge, Mass.: MIT Press, 1970).●

RESULTS OF SURVEY OF AMERICAN NOBEL PRIZE WINNERS CONCERNING FEDERAL FUNDING FOR RESEARCH

AMERICA'S RISE TO SCIENTIFIC PROMINENCE

● Mr. GLENN. Mr. President, in the first quarter of the 20th century the most important sources of scientific and technological innovation in the United States were the industrial research laboratories run by private companies and occasionally affiliated with a university. These laboratories existed to develop new products and processes and to solve scientific and technical problems for the companies that sponsored them. This focus on specific products or processes plus the essential absence of any Federal support for basic research produced a situation wherein scientific progress was dominated by European activity. From 1901 to 1926, U.S. scientists won only 3 of the 69 Nobel prizes awarded in physics, chemistry, physiology, and medicine. During the same period the Germans won 19 prizes, the British won 10, and the French won 9.

Many refugee scientists escaping nazism and fascism prior to World War II helped to shift the focus of scientific activity toward the United States. Massive Federal expenditures for scientific reseach during the war coupled with the mobilization of scientific talent toward the resolution of problems at the scientific and technological frontier enabled the United States to emerge from the war as the unchallenged leader in electronics, telecommunications, atomic energy,

computer science, aviation, and medicine.

This success prompted the establishment of a civilian apparatus for the support of scientific research beginning in 1950 with such support rising spectacularly starting in the late fifties with the development of the space program. Advances in the American standard of living were being produced from the introduction of new technologies and new materials. An American techological revolution was being spearheaded by advances in optics, materials, information processing and transmission, semiconductor technology, and biomedicine that raised the U.S. standard of living to unprecedented heights.

THE DOWNTURN IN SUPPORT FOR SERVICE

More recently the picture has become somewhat disturbing. The U.S. ratio of R&D to GNP peaked in 1964 at 2.96 and generally declined throughout the 1970's reaching a low of about 2.2 in 1978, a decline of 25 percent. During the same period the R&D to GNP ratio in Japan and Germany rose substantially, with Germany's ratio in 1978 being 2.37. The estimated ratio for the Soviet Union for 1978 is 3.4, more than 50 percent higher than that of the United States.

We are also having science and engineering manpower problems. In recent years employment in science and engineering has grown at a lower rate (2.5 percent per year) than that of total U.S. employment and GNP (4 percent per year). In addition, there has been a decine in the percentage of scientists and engineers working in their profession. There are declining employment opportunities for young doctorate holders in academia. From 1973 to 1979 the proportion of doctoral scientists and engineers under 35 years of age in educational institutions declined by 30 percent.

Although support for basic research is frequently cited as an indicator of the national generosity toward research, the fact is that between 1969 and 1975 Federal constant dollar basic research funding declined at an annual rate of about 2 percent. From 1975 through 1979 basic research spending showed steady growth that averaged 4.4 percent annually in real terms. However, 1981 saw a return to a decline of support in real terms. It is important to note that the Federal Government is the primary supplier of basic research funds, providing 69 percent of the total support in 1979. The Government's support of basic research has been largely responsible for the increases in basic research funding since 1975. Thus the Federal sector has assumed major responsibility for supporting basic science as a means of producing a future knowledge base. It is apparent that the private sector, for various reasons, is unwilling or unable to pick up whatever slack might occur as a result of cutbacks in Federal support.

Our national laboratories are in difficulty and the research instrumentation in our universities has either reached or is rapidly approaching obsolescence. A major national effort would be required to alleviate this situation.

Finally, and perhaps most importantly, there is a growing scientific and technological illiteracy in our country. Shortages of qualified science and mathematics teachers at the precollege level have become critical. Student achievements are markedly down, and, except for a small upturn this past year, have been declining steadily for a period of 10 years. The declining emphasis on science and mathematics in our school systems is in marked contrast to other industrialized societies. Japan, Germany, and the Soviet Union all provide rigorous training in science and mathematics for their young people. Despite this, funds for science education through the National Science Foundation which were 20 percent of the NSF budget in 1970 have been eliminated in the President's fiscal year 1983 budget except for graduate fellowship funds.

THE IMPORTANCE OF BASIC RESEARCH AND FEDERAL SUPPORT

It is important that the American public and its leaders understand how vital science education, training, and basic research are to our national enterprise. Dr. Edwin Mansfield, a well-known economist at the University of Pennsylvania has shown that, all other things being held constant, the investment by a firm in long-term basic research is correlated to that firm's rate of productivity increase. In like manner our Government investment in basic research has produced similar dividends for the average U.S. citizen's standard of living. The development of the agricultural, aerospace, and nuclear industries, as well as advances in communications, fluidics, computers, and medicine have all come through the support of basic research by U.S. Government agencies. By one measure, in the biomedical area alone every dollar invested in research has won a return of $15. Non-health-related applications of biomedical research is boosting GNP by $37 billion annually. Yet, while the United States spends $300 billion annually on health care, some consider the expenditure of $1.5 billion on health related basic science to be excessive.

There are some who say that the problem is not support of basic research but rather getting research results to the stage of commercialization. It is frequently pointed out that the Japanese have managed their remarkable economic rise without spending a lot of money on basic research, money that they were able to save because the basic research community worldwide does not attempt to hide the results that it produces. Incredibly, the lesson that some people have gleaned from this is that we can afford to cut back on our basic research efforts as long as we provide additional incentives for the private sector to exploit research which has already been done for the purpose of bringing new products to the marketplace. In my view, following this short-term bottom-line advice would be a prescription for future economic disaster in the United States. If we are not as strong as we should be in the commercialization area, then we should certainly do what we can to shorten the time between discovery, application, and manufacture. But no industrialized country can long maintain a position of economic leadership only by feeding off the scientific discoveries of others. The most recent information suggests that the Japanese realize this and are now investing much larger sums of money in basic research than they ever have in the past.

Those who question the value of U.S. Government support for basic research and who suggest that the Government can cut back its efforts and turn the responsibility over to private industry should examine the historical record. Does anyone seriously want to go back to the situation we were in at the beginning of this century? Isn't it clear that cutbacks in the Federal effort will result in our handing the Europeans, the Japanese, and perhaps others, our mantle of leadership in this area?

THE GLENN SURVEY OF NOBEL LAUREATES

The value of the Federal basic research support effort can be measured in many different ways. Unfortunately, the communication of its benefits to the Nation have been submerged by simplistic political slogans that "Government is the problem," and by the publicity given to disparaging "awards" presented in speeches in the Halls of Congress, creating the mistaken impression that the expenditure of Federal money for basic research is a ripoff of the taxpayer. To help redress this imbalance I undertook a survey of the level and importance of Federal funding for the American winners of the Nobel Prize for physics, chemistry, physiology, and medicine during the years 1967-81, a 15-year period during which the United States has been clearly dominant in the winning of such prizes in contrast to its position at the beginning of the century. Forty-eight scientists—89 percent of those written to—responded. The results show that better than 83 percent of these Nobel Prize winners for science during the years 1967-81 had substantial direct support from the U.S. Government. Indeed, more than 60 percent of the respondees received 90 to 100 percent of the financial support

for their research from the Government. This category includes six scientists who are full-time Government employees. With only two exceptions, all the scientists who received substantial direct Federal support indicated that those Federal funds were vitally necessary to the work for which they received the prize.

While it is true that the winning of Nobel Prizes does not necessarily guarantee industrial or economic success, it is also true that significant industrial and technological applications, and improvements to human health and longevity, have come out of federally supported Nobel Prizes winning discoveries.

Below are listed selected examples of important applications that have stemmed from the research of some of the federally funded Nobel Prize winners covered by this survey. The list, both from the point of view of research as well as applications, is not meant to be exhaustive, but only illustrative.

Today's recombinant DNA industry is based upon the work done by several U.S. scientists who received Nobel Prizes in the years 1968, 1975, 1978, and 1980. Work on recombinant DNA has implications for producing vaccines, insulin, interferon, and hormones which are used in battling various diseases.

The discovery of the hepatitis B virus and the hepatitis vaccine—1976 Nobel Prize—has led, by one estimate, to the saving of several billion dollars in hospital and medical fees and time lost from work.

The development of the radioimmunoassay technique which uses radioactivity to detect substances in the body—1977 Nobel Prize—has led to the development of new and powerful medications.

Discoveries concerning the structure of antibodies—1972 Nobel Prize—and the body's immune process—1980 Nobel Prize—have led to better understanding of how the body fights infection with applications in the treatment of cancer and greater success in the transplant of organs.

Certain advances in the field of microelectronics have been made possible through the development of a theory explaining superconductivity—1972 Nobel Prize.

The mass production of hundreds of pharmaceutical and industrial chemicals has resulted from basic discoveries in the chemistry of boron and phosphorus—1979 Nobel Prize.

The extension of earlier work on lasers into the area of spectoscopy—1981 Nobel Prize—has found applications in the detection of pollutants, poison gases, and radioactive leakage in the atmosphere as well as the measurement of extremely small signs of surface corrosion on metals.

It should be pointed out that, beyond the question of specific applications, the international recognition accorded the United States through the winning of Nobel Prizes is important in its own right because it provides a stimulant to scientific, technological, and educational activity across the board through the motivation of science-minded young people and the national pride that we all feel from being first in the world.

The results of my survey show that the success of the United States in science clearly stems from the Federal Government's heavy involvement in the support of basic research—support that began when there was a consensus among the people and among America's leaders that basic research was fundamental to our country's long-term success.

Because some years normally must pass before international recognition of the value of a scientist's work becomes sufficiently widespread to make him or her eligible for the prize, we have yet to see the full impact of the downturn in basic research support during the 1970's on the awarding of Nobel prizes to Americans—or on the health of the U.S. scientific and technological enterprise. We can survive a series of stumbles. But we must not let our present economic difficulties cause us to lose our balance entirely. Basic research must be generously supported as an investment in our own future.

Our pursuit of excellence in science and technology is a reflection of our character as a people who believe in giving man the freedom and the resources to use his ingenuity to find a better way. That is an ideal to which our commitment should be steadfast.

ACKNOWLEDGMENT

I wish to commend the persons on my staff who suggested and carried out this project:

Dr. Leonard Weiss, my science and technology policy adviser; and Ms. Karen McCartan, an intern and student at Princeton University.

I ask that the results be printed in the RECORD.

The results of the survey follow:

RESULTS OF SURVEY OF AMERICAN NOBEL PRIZE WINNERS CONCERNING FEDERAL FUNDING FOR RESEARCH

Letters requesting data were sent to 54 Nobel Laureates representing all the living Americans who won the Prize in Physics, Chemistry, or Physiology and Medicine during the years 1967-1981. Twenty-nine scientists responded by letter, and nineteen responses were obtained by telephone. Six scientists did not respond. The total response rate was 89 percent.

Scientists were asked if they had received federal support in the course of their research that led to their receipt of the Nobel Prize, and if so, to offer a brief summary of the type of support received. Furthermore, they were asked to indicate the importance of the role that federal financial support played in the conduct of their research.

Respondees fell into two distinct categories: Those who received at least half their research support from the federal government and those who received little or no direct support.

TABLE 1.—STRENGTH OF FEDERAL SUPPORT [1]

	Substantial direct support (50–100 percent of funds from Government	Little or no direct support
Percent	83.3	16.7
Number	[2] [3] 40/48	[4] 8/48

[1] Summary of data on support from Federal Government for Nobel Prize winning research (for awards granted during the period 1967–81).

[2] Of this number, 29 scientists (60.4 percent of respondees) received from 90 to 100 percent of the financial support for their research from the Government. Among these are 6 scientists who are full time government employees; 4 are employed by NIH, and 2 are employed by the Veterans Administration.

[3] Besides the Government employees, this category includes 1 industrial scientist (at IBM) and 5 scientists working at independent, nonprofit research laboratories. The remainder are university scientists.

[4] Of the 8 scientists in this category:

(a) Four scientists were industrially supported; 3 work for Bell Laboratories (AT&T) the fourth works for General Electric. Two industrially supported scientists stressed that they received indirect Federal support through the use of federally funded facilities or through reliance on previously conducted research of other scientists who had been federally funded. Another scientist offered the opinion that he would be unable to duplicate his research today without Federal funds.

(b) Two scientists had carried out most of their prize-winning research prior to World War II when Federal funds for research were not available.

(c) One scientist started his prize-winning work before coming to the United States and continued it here as a "hobby."

(d) The prize-winning work of 1 scientist was indirectly related to his main research efforts (which were federally funded).

NECESSITY OF FEDERAL SUPPORT

Federally funded scientists were asked to evaluate the necessity of federal financial support to the conduct of their research. Thirty-eight of the forty scientists who received substantial direct federal support indicated that federal funds were vitally necessary to their work.

SOURCES OF FEDERAL FUNDS

Although scientists were not requested to do so, many federally funded respondees mentioned specific agencies as sources of their support. This information is tabulated below.

TABLE 2.—SOURCES OF FEDERAL FUNDS [1]

	NIH	NSF	DOD	AEC-DOE	PHS	V.A.
Total times mentioned: [2]						
Percent	62.5	30.0	32.5	7.5	7.5	5.0

Percent	15.0	10.0	5.0	2.5	2.5
Number	6/40	4/40	2/40	1/40	1/40

Note.—This categorization exhibits percentages of scientists who mentioned the given combined sources of federal funding.

U.S. SENATE, COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES,

Washington, D.C., May 5, 1982.

NAME,
Street Address,
City, State.

DEAR ——— ———:

I am quite concerned about the health of U.S. science and technology, both in the

present and for the future, and have been communicating my concerns to my colleagues and to the public at large (see enclosures). One important aspect of my concern is the financial support that the Federal Government provides in many areas of science and technology. Because the Nobel laureates have made significant contributions to science and medicine, I am asking those Americans who have received the prize in these areas over the last fifteen years to provide me with their perspectives on Federal support of science and technology. I would greatly appreciate receiving your views on this subject.

In addition, I would find it particularly useful if you would be willing to provide me with a brief summary of the Federal financial support which you received for the conduct of the research which led to your receiving the Nobel Prize. I believe that such information would provide both myself and the public with additional insights into the importance of Federal support for science and technology today and in the coming years.

Could you also include a statement as to whether you believe that Federal support was critical to the conduct of your work or whether sources of alternative funding were available or potentially available to you?

I share your interest in the strength of U.S. science and technology and look forward to hearing from you on this matter.

Best regards.

Sincerely,

JOHN GLENN,
U.S. Senator.

* Deceased.●

NOTICE OF DETERMINATION BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I place in the CONGRESSIONAL RECORD this notice of Senate employees who propose to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Edward Furtek of the staff of Senator GLENN to participate in a program sponsored by the Center for Strategic and International Studies of Georgetown University and the Konrad Adenauer Foundation to be held in Bonn and West Berlin, Federal Republic of Germany, from September 26 to October 2, 1982.

The committee has determined that participation by Mr. Furtek in this program is in the interest of the Senate and the United States.●

U.S. POPULATION

● Mr. PACKWOOD. Mr. President, I wish to report that according to the latest U.S. Census Bureau approximations, the total population of the United States on October 1, 1982, is 232,090,275. This represents an increase of 218,475 since September 1, 1982. Since this time last year, our population has grown by an additional 2,217,480.

In 1 short month we have added enough people to our population to more than fill the city of Corpus Christi, Tex. Over the past year, our population has increased enough to fill the city of St. Louis, Mo., more than four times.●

DEPOSITORY INSTITUTIONS AMENDMENTS OF 1982—CONFERENCE REPORT

● Mr. TSONGAS. Mr. President, I would like to take a moment to acknowledge all of my colleagues who gave their unanimous support of the Depository Institutions Amendments of 1982 as agreed to by the conference committee. This bill represents the hard work of many people over an extended period of time. The parties affected by this legislation have widely different interests, and treating all of them fairly and responsible has been a great challenge. I believe the members of the Banking Committees of both Houses are to be commended for their success in meeting that challenge in a forward-thinking and responsible manner.

All interests represented in this bill have been joined in a common acknowledgement that the financial industry is undergoing a period of great challenge. Technological change is dramatically altering the manner in which the American public takes care of its banking needs. While the industry tries to accommodate this changing technology, it has been struck as

has the rest of the economy by the trauma of high interest rates. The result is a changing competitive environment in which many institutions have been blocked in their efforts to respond by the burden of high interest rates.

The challenge confronted in constructing this legislative package has been to help these institutions in the short term so that they might make the long-term changes necessary to compete. At the same time, it tries to acknowledge the need for a changing financial industry in a fair and equitable fashion. The bill has not solved all of the problems. It does represent an important step in accepting the need for change and accommodating it in a responsible fashion.

Importantly, the bill contains strengthened instructions to the Depository Institutions Deregulation Committee to hasten the phaseout of regulation Q, the limit on interest paid on deposits. It calls upon the committee to adopt a more competitive deposit instrument with which banks and thrifts can compete for deposits with money market funds. These changes are important for the long-term health of both commercial banks and thrifts.

Removing the limits on interest paid on deposits is also important in another sense. The limits on interests paid to the depositor have been a barrier to incentives to save. At a time when our capital needs are so great, it makes no sense to retain a regulatory barrier limiting the return to savings.

The bill includes many provisions necessary to assist the many thrifts caught in a grim liquidity crunch. It calls for more flexibile authority for bank regulators to respond to the needs of institutions hard hit by poor earnings caused by the current high interest rates. It provides capital assistance to shore up the net worth of banks and thrifts to help them engage in a long-term restructuring of their lending activities. Most importantly for long-term health, the bill contains expanded commercial lending authority for thrifts. This is a major accomplishment. It is the key to allowing these institutions to make the management decisions necessary to find their niche in the changing financial marketplace.

I am particularly pleased that the conference has agreed to allow the participation of State-insured institutions in the capital assistance plan created by the bill. There are over 560 State-insured institutions in the United States. They hold the deposits of approximately 6½ million people totaling more than $22 billion. These institutions have their deposits insured by State insurance funds created by State legislatures. Such institutions exist in Massachusetts, Ohio, North Carolina, Maryland, Pennsylvania, and Rhode Island.

Failure to include these State-insured institutions would have represented a large hole in the safety net Congress is designing to assure the soundness of our banking system. By covering these institutions we avoid the risk of undermining public confidence in all types of deposit institutions if a panic were to result from the failure of an institution which could not participate in the program.

Some Federal regulators have objected to such participation by State-insured institutions. I feel the regulators' concerns are adequately addressed by the method adopted in this bill. The State insurance funds will continue to stand behind any losses incurred by the Federal insurance funds from the participation of a State-insured bank or thrift. Each State-insured institution will participate at the same cost as all other federally insured institutions.

I would also like to take this opportunity to thank the chairman of the Senate Banking Committee, Senator GARN, and the ranking minority member, Senator RIEGLE, for the manner in which they have conducted the crafting of this bill on the Senate side. It has been a truly bipartisan effort, and I feel they have been most responsive to the interests and concerns of other Members. I would also like to acknowledge the equally thoughtful treatment these concerns have received from the Members of the House.

This bill is still only a first step. There are many provisions not included here that were contained in the larger financial deregulation bill introduced in the Senate, the Financial Institutions Restructuring Act of 1981, introduced by Senator GARN, of which I am a cosponsor. The willingness demonstrated by my colleagues and the financial community to cooperate in passing this legislation makes me hopeful that we can continue the process. It remains crucial that we make the changes necessary to guarantee that the American public enjoys first-rate banking services, and that the entire economy has a reliable and efficient supply of credit to finance the many critical needs which exists.

I call upon all of my colleagues to begin work on the next step now.●

STATEMENT OF SENATOR PERCY ON LATIN AMERICA

● Mr. HELMS. Mr. President, the distinguished chairman of the Senate Foreign Relations Committee (Mr. PERCY), delivered an address on September 30, 1982, before the Inter-American Press Association in Chicago regarding U.S. relations with Latin America.

As chairman of the Western Hemisphere Subcommittee, I believe that the comments of the senior Senator from Illinois and his perspectives on Latin America would be of great interest to my colleagues. The Senator points out that we must work to reestablish relations that were frayed during the Falkland/Malvinas conflict. It is essential that we join other nations in helping to maintain the networks of constructive relationships that are necessary for peace.

I particularly hope that my colleagues will take note of Senator PERCY's stand against the stationing of Soviet nuclear weapons in Cuba, and in favor of resisting efforts by Cuba to extend its Marxist-Leninist political system in the hemisphere by force. Although some of us may disagree on the details of how to implement this worthy objective, I applaud the distinguished Senator's stand.

Like Senator PERCY, I too, wish to reaffirm to the Latin people my commitment to seek to preserve the independence and freedoms of all the countries of Latin America and insist that others do likewise. The United States has an opportunity to play a constructive role in helping these countries shape a better future.

I commend Senator PERCY's address to my colleagues' attention, and I ask that the text of his remarks be printed in the RECORD.

The statement follows:

ADDRESS BY SENATOR CHARLES H. PERCY

It is a pleasure and an honor to be with you tonight. I thank John McCutcheon of the Tribune for his cordial invitation to share with you some of my thoughts on relations in the Hemisphere and the role of Congress in U.S.-Latin American affairs.

It was 160 years ago that the United States Congress first became involved in a significant way in the affairs of Latin America. In 1822, Congress appropriated $100,000 to finance U.S. diplomatic missions to the newly independent nations of Latin America. Those missions resulted in the United States being the first nation outside of Latin America to recognize the independence of many of our fellow American states. A year later, President Monroe declared his now-famous Doctrine, which was intended to protect the independence for which Latin American nations had fought so hard. I wish we could find as productive a use for $100,000 in 1982.

During the past 160 years, U.S. relations with Latin America have gone through periods of excessive intervention and harmful neglect. Relatively speaking, however, I believe we have good neighbors and, compared with other parts of the world, we in this Hemisphere have had unique relationships.

Problems in the region are the result of differences over redistribution of once-concentrated political power and economic wealth, complicated by an aggressive Cuban foreign policy which seeks to use these new opportunities to spread its own repressive form of government. We in the Congress have sought to deal with both causes of this

bloody strife and, thus, bring peace to the region.

With regard to the first cause, Congress has supported political and economic reforms—especially in El Salvador—and has dealt successfuly with the foreign aid portion of the President's Caribbean Basin Initiative.

The first significant Congressional action concerning reform in El Salvador became Section 728 of the International Security and Development Cooperation Act of 1981, which made U.S. assistance to El Salvador contingent upon the Presidential certifications that El Salvador:

Is making a concerted and significant effort to comply with internationally recognized human rights;

Is achieving substantial control over all elements of its armed forces, so as to bring an end to the indiscriminate torture and murder of Salvadoran citizens by these forces;

Is making continued progress in implementing essential economic and political reform, including the land reform program;

Is committed to holding free elections at an early date, and

Is making good faith efforts to investigate and prosecute the murderers of six United States citizens in El Salvador.

I believe the United States has the right, and in this case the obligation, to set such conditions for foreign aid, just as a bank has the right to set conditions for loans. The President has made two such certifications thus far and several more are required. I also believe that these conditions have had a moderating impact in El Salvador. Progress is being made in many of these areas, and since this legislation passed Congress, elections have been held in El Salvador.

The second significant congressional action concerned the specific question of land reform in El Salvador. Earlier this year, the land reform program appeared to be endangered because of actions of the El Salvador Constituent Assembly. The Foreign Relations Committee decided to freeze aid to El Salvador at last year's level until it becomes clear that the land reform program is back on track. Since our Committee's action, and possibly because of that action, renewed progress has been made in the El Salvador land reform program. I believe that land reform is crucial if the people of El Salvador are to be convinced that the government provides them with a viable alternative to the Cuban supported guerrilla movement.

A third congressional action intended to deal with the economic problems of Central America was agreed to a few weeks ago when Congress voted to override the President's veto on the supplemental appropriations bill and thus voted to provide $355 million in economic aid to the Caribbean Basin. Consideration of this measure on the Senate floor provided a difficult decision for me because in order to assure that these vital funds reach the region in time, I had to offer an amendment to the appropriations bill which had the effect of limiting the jurisdiction of my own authorizing committee. I decided that the President's effort in this region was too important to be blocked by concerns over committee jurisdiction and so my amendment was adopted, paving the way for these funds to be released to the Caribbean Basin. The situation in the Caribbean is also extremely important to William Hewitt, our new Ambassador to Jamaica, who recenlty chose to give up his position as Chairman and Chief Executive Officer of John Deere and Company so that he could help the President implement these policies.

The major portion of the President's Caribbean Basin Initiative relating to trade and investment incentives also has my full support. It remains frozen in the Finance Committee, however, and I believe a strong personal effort on the President's part will now be required to enact that legislation.

Congress has also acted to restrain Cuba's efforts to use economic and political problems in Central America to its own advantage. In August, I introduced a Committee amendment reaffirming the United States' determination to prevent the stationing of Soviet nuclear weapons in Cuba and to resist efforts by Cuba to extend its Marxist-Leninist political system in the Hemisphere by force. My amendment modernized and updated another introduced by Senator Symms which I believed went beyond a warning to Cuba and constituted an authorization for the use of military force against Cuba. The Senate adopted the Symms amendment, but after an extended debate, also accepted by a vote of 97-2 the provision of my amendment making clear that Congress was not authorizing the use of force against Cuba at this time. In addition, the Committee has sent an additional warning to Castro by authorizing Radio Marti.

With this combination of economic assistance to the region and warnings to Castro in place, the United States must now encourage all legitimate parties in the Salvadoran conflict to begin good-faith negotiations for the purpose of bringing an end to the hostilities and achieving a peaceful and democratic solution to that conflict. I am particularly pleased at the Costa Rican initiative to open communications between the government of El Salvador and political forces aligned with the guerrillas, negotiations which show some signs of progress.

RELATIONS AFTER THE FALKLAND/MALVINAS CONFLICT

The second fundamental problem that we face is to re-establish relations that were frayed during the Falkland/Malvinas conflict. I supported the U.S. decision to denounce the initial use of military force by Argentina on the islands and in fact I helped manage the Senate resolution which almost unanimously declared that the United States could not stand neutral on this issue. The Senate took this position because of the strong belief that international disputes should not be settled by force. But I do recognize that our policy did damage relations with many Latin American countries. These relations are now in need of repair, but I believe the damage is limited and repair is possible. Many Latin leaders still recall the heroic efforts of former Secretary of State Alexander Haig to prevent bloodshed. In addition, Argentina's military leadership itself has recently rejected those who led Argentina to war. It is my hope that Britain will now be more accommodating on the question and that both sides can agree to reopen meaningful negotiations to find a speedy resolution to this territorial dispute.

The United States must seek to strengthen its relations with not just the governments, but also with the people of Latin America. To do this, I believe we must develop an adequate program of economic assistance to the region, provide sufficient but not provocative levels of military assistance to individual countries, and maintain our strong position against human rights violations from whatever source.

The Congress has taken action in all three areas to encourage better Hemispheric relations. With regard to foreign aid, in 1980 the Senate Foreign Relations Committee authorized the entire amount of the most recent Inter-American Development Bank replenishment—$2.8 billion in capital stock and $700 million for the Fund for Special Operations. When the Congress unwisely cut some of those funds, I successfully worked to restore all the cuts in 1981. At the same time, we have approved bilateral economic assistance to Latin America of roughly $400 million in fiscal 1982, not counting the CBI.

With regard to U.S. arms sales, the Reagan Administration is clearly prepared to provide Latin American countries with sufficient weapons to meet their legitimate needs. I believe, however, that some restraint must be exercised. The Declaration of Ayachucho and the Treaty of Tlatelolco are just two examples of Latin America's own desire not to become embroiled in a regional arms race. U.S. arms sales policy must be sensitive to this desire. Therefore, the Foreign Relations Committee carefully reviewed and some Senators were critical of the F-16 sale to Venezuela. I believe the proposed sale of F-16/79 aircraft to Peru—as reported in the press—will also be carefully reviewed.

Another aspect of U.S.-Latin American relations that will be particularly important in the coming years in human rights policy. United States concern over human rights is a fundamental aspect of our foreign policy and is clearly defined in our legislation. If used too bluntly, we have seen this policy become counter-productive. If used carefully, it can promote the democratic process and save lives. Legislation in this area should attempt to provide incentives for appropriate behavior; and that is what Congress did last year when it agreed to lift the arms embargoes against Chile and Argentina if the President determines that the human rights situation in those countries has significantly improved.

THE ECONOMIC CRISIS

I turn now to the third issue that I listed at the outset, the growing economic crisis among Latin America's most financially powerful countries. In the past month Americans have read not only about Latin American political issues in the front section of the newspaper, but also about Latin American financial problems in the business section. The economic crisis in Mexico came as a shock to many. Americans had only recently begun growing accustomed to the idea that Mexico was an oil-rich country on whom we were becoming rapidly dependent for our oil imports. Now we are suddenly faced with a neighbor that has run out of money.

The troubles in Mexico have called attention to the large amount of external debt held by the United States from the entire Latin American region. In fact, the United States holds a bit more than one-third of the $250 billion Latin Americans owe the rest of the world.

The major debtor countries are of course Mexico and Brazil, which each have debts of over $80 billion, of which in both cases roughly $20 billion is owed to the United States. Argentina owes another $37 billion in debts, of which about $10 billion is held by the United States. It is thus not surprising that our business community is con-

cerned. While some journalists have focused primarily on the exposure of our major international commercial banks, it is noteworthy that in the case of Mexico more than 1,000 United States banks have lent money to Mexico. Thus, any indication that Mexico might have trouble meeting its obligations will send tremors not only down Wall Street, but down the Main streets of many small towns across this country.

We obviously have a strong interest in making sure that no calamity occurs, not only because of our immediate financial interests, but, more importantly, because of our long-term interest in seeing Latin America become a more prosperous, politically stable region. The United States has always been a major source of capital for Latin America. In the early Sixties, the Alliance for Progress resulted in a major increase in assistance to other larger Latin American countries. As their economies grew stronger, we decreased concessional assistance, but, at the same time, commercial bank lending increased sharply. Meanwhile, we have concentrated our official assistance on the poorer Latin American countries, particularly in Central America and the Caribbean.

I certainly believe the United States must continue to provide both commercial lending, and, where necessary, concessional assistance to Latin American countries. Our Government must facilitate commercial lending and provide concessional assistance. For this reason I have strongly supported such institutions as the International Monetary Fund, the World Bank and the Inter-American Development Bank. While there may be differences of opinion as to whether the IMF always prescribes the right medicine for the patient, it is clear that without some tough internal economic measures such as those usually required by the IMF before agreeing to a standby, commercial lending will also dry up. And it is also true that institutions such as the World Bank and Inter-American Development Bank have played important roles in helping build the infrastructure and social institutions needed for sustained growth. During the past week, the Committee has held two hearings to probe the magnitude of these financial problems and to assess the ability of existing financial institutions to deal with these problems. I anticipate that there will be a series of consultations between the Administration and the Congress from now through the Spring as the Executive Branch formulates its position on how to increase the resources of the IMF and on the size of the Seventh Replenishment of the International Development Association (IDA VII).

There is, of course, another dimension to our economic relations, and that is investment. I realize foreign investment has been a controversial issue in Latin America. Latin American countries and United States companies suffered through some stormy times in the Fifties and Sixties, as both countries and companies tried to adjust to new conditions. Now, however, many countries in Latin America have learned that they can benefit substantially from foreign investment, and many American companies have adapted to new conditions and requirements of contemporary Latin America.

I believe that increased equity investment in Latin America, in which investors tie their future to the long-run future of their host countries, is one important alternative to the short-term commerical borrowing too many countries have relied on to finance long-term development objectives. For that reason I have urged that the Caribbean Basin Initiative sponsored by the President have a strong private sector focus. I strongly encouraged our Agency for International Development to respond positively to an initiative taken by the Chicago Board of Trade to work with AID in stimulating United States investment in the Caribbean region, and I am pleased that their project is being favorably received by AID.

CONCLUSION

All three of the themes that I have discussed this evening have a common principle, and that is the principle, recognized by the United States 160 years ago, of respect for the independence of all the Republics of the hemisphere. We seek to maintain the independence and freedoms of all the countries of Central America and insist that others do likewise. We must restore the confidence that existed between the United States and the independent nations of Latin America before the Falklands/Malvinas war. And we must assist with the economic and social development of Latin American countries so they may become full and independent partners in the world economic system.

In reviewing United States-Latin American relations, it is clear that our problems are many and complex. Yet solutions exist. I am relatively optimistic about relations in the Hemisphere because I believe steps are being taken to find these solutions.●

SALE OF FEDERAL LAND

● Mr. TSONGAS. Mr. President, yesterday the Conservation Law Foundation and two other environmental groups filed suit in Federal district court against the Reagan administration's massive new land sale program. This initiative by the administration is an attempt to change radically the Government's policy toward our public lands.

The program's purpose is to sell up to 35 million acres of Federal land, most of it to private interests. Discounted transfers to State and local governments and other eligible bodies would virtually cease. Proceeds for the land sales would be used solely to reduce the national debt.

This land grab could result in private ownership of a resource which is every American's heritage; the public lands. It will benefit developers and large land-owning interests. It will not benefit the average American who can now use public lands for recreation, camping, fishing, nature observation, and aesthetic enjoyment. Local communities will no longer be able to buy much-needed open space at affordable prices. And the proceeds will no longer be used to buy more parkland. Our limited resources are simply too scarce to squander for short-term monetary gain.

The program would be especially detrimental to Massachusetts and New England. Twelve New England parcels have already been targeted for sale, including 756 acres in Hingham abutting Wompatuck State Park and Whitney Woods. This is the 13th largest tract currently targeted and its sale could have an enormous detrimental impact on what is now a large undeveloped area easily accessible to many urban dwellers.

Neither the environmental, the cultural, nor the social impacts of this program have been analyzed. I urge the Reagan administration to undertake these essential analyses before proceeding with this drastic policy change.●

PROMOTION OF A. ERNEST FITZGERALD

● Mr. HATCH. Mr. President, the Air Force announcement yesterday to promote celebrated whistleblower A. Ernest Fitzgerald to the highest Government service level, that of GS-18, is to be applauded by all of us who firmly believe that truth in Government should always prevail. Air Force Secretary Vernon Orr assured me in meetings this spring, he would personally review this case. This he has done, and more. Significantly, he has had the courage to go beyond what was required and arrived at the conclusion that Mr. Fitzgerald's input into cost savings and accounting should be given the credibility clearly deserved. Secretary Orr did not simply do what was required, he promoted a valued expert to his proven position.

The Reagan administration, particularly Air Force Secretary Vernon Orr, is to be commended for this unmistakable signal it has sent thundering through Air Force's entrenched bureaucracy. This November will mark the 14th anniversary of Mr. Fitzgerald's battle with the military and civilian hierarchy, through four previous administrations, that have stubbornly and arrogantly refused to enforce or honor the findings of the Civil Service Commission and the courts to fully reinstate him to his post as Deputy for Management Systems, the chief cost-evaluation post.

In November of 1968, Mr. Fitzgerald properly testified before a congressional committee, identifying an estimated $1 billion in unnecessary cost-overruns by the defense contractor of the C-5A military transport. His offense of "committing truth" set in motion a frenzied reaction by those Pentagon officials threatened or embarrassed by the disclosure. First in illegal and secret investigation by the Air Force into Mr. Fitzgerald's character that ironically produced a clean bill of health. When that failed, a scheme was hatched to eliminate his job through a bogus reorganization that would conveniently result in the loss of one position; A. Ernest Fitzgerald's. That firing was found by the Civil Service Commission, in a 1973 ruling, to be "punitive, improper, and for reasons personal to him." That ruling prevailed in spite of outrageous

attempts by Air Force officials to influence the Commission's ruling.

These blatantly sordid events did not end with this civil service ruling. When Mr. Fitzgerald was reinstated it was in a considerably diminished capacity.

Mr. Fitzgerald fought back in a long series of civil suits which resulted in the court ordering the Air Force to fully reinstate him. Again, the military and civilian Air Force officials stubbornly chose to ignore a Federal judge.

Secretary Orr's personal intervention and thorough review has finally shocked open the Air Force's "blue curtain" revealing all the lead actors and bit players on record the past 14 years in covering up and perpetrating these improper and illegal activities.

Secretary Orr not only fully reinstated Mr. Fitzgerald, a few months ago, but has since found merit in promoting the most celebrated cost cutter to the highest level, clearly demonstrating the administrations' commitment to eliminating waste from Federal spending.

Mr. President, there is, however, one final matter that we should pursue to fully explain to the American public the saga of A. Ernest Fitzgerald. The court's orders, the Civil Service Commission's rulings, and Secretary Orr's reversal of previous Air Force conduct bring into focus serious questions regarding the Justice Department's judgment, during the same period, to competently or earnestly investigate allegations of conspiracy involving Government officials. Not until all of their actions are reviewed by a panel from this body or possibly a special prosecutor can this matter be judged truly closed. It is my hope that we can expect the same courageous commitment from the Attorney General as that demonstrated by Secretary Orr.●

BALANCED BUDGET

● Mr. MOYNIHAN. Mr. President, today the House of Representatives has defeated the proposal to amend the U.S. Constitution to require annual balanced budgets. My views on this measure, Senate Joint Resolution 58 as passed by this body last August 4, are well known. I did not then nor do I now consider it responsible or prudent.

We all share similar deep concerns about the need to restore fiscal discipline and reduce the deficits that threaten to strangle American economic growth. The only question is how best to achieve a goal we all share. Many of us have grave reservations about using the U.S. Constitution, our most basic political document, to advance an economic policy goal. Laws, administrations, and economic theories come and go. The Constitution must endure as a statement of individual rights and collective responsibilities applicable to all circumstances and all periods. The action by the House today will help keep it so.

Another concern commanded my attention as well in our debate on this measure. The proponents of Senate Joint Resolution 58, like us all, want to stabilize our economy. But evidence accumulated suggesting that their approach would, in practice, make economic growth and stability even more elusive. The Nation's most prominent economists have been nearly unanimous in their public opposition to Senate Joint Resolution 58, including 6 American Nobel laureates in economic science, 4 former chairmen of the President's Council of Economic Advisers, and 12 past presidents of the American Economic Association.

No edict of the Constitution, they point out, can override the natural rhythms of the business cycle. More than 100 years of economic analysis, however, has demonstrated that the Government can to some degree moderate the impact of these cycles. The mechanism is not perfect. But its application over the last 40 years has enabled our economy to avoid a devastating depression of the type which periodically gripped the Nation throughout the 19th century and in the first four decades of this century.

An OMB internal staff report to David Stockman in March of this year made this point succintly:

> An inflexible annual balanced budget policy rule may not be compatible with the business cycle "facts of life" which tend to produce automatic, large deficits during recessions . . . consensus opinion for several decades has held that recession-induced deficits are either desirable or at least tolerable.

In cooperation with the staff of the Joint Economic Committee last July, I arranged for one of the Nation's most prominent economic forecasting firms, Wharton Econometrics, to test this proposition. Permit me to remind this body once again of some of the results.

If Senate Joint Resolution 58 had gone into effect when President Reagan's tax and spending reforms were passed in July 1981, the United States today would be in the grips of a major depression.

The Nation's gross national product would have been reduced by some $423 billion this year and by another $566 billion in 1983—a 2-year loss of nearly $1 trillion to the American economy below the current recession-depressed levels.

The Nation's real GNP would have declined by 8.7 percent this year—in contrast to Wharton's projection without Senate Joint Resolution 58 of a 0.65-percent decline.

The Nation's unemployment rate this year would have averaged 13.6 percent—nearly 15,000,000 Americans, as a yearly average, jobless this year.

Americans' real disposable income would have plunged 6.3 percent this year under Senate Joint Resolution 58—instead of rising 2.5 percent, according to the most recent Wharton projection.

Wharton reported more disquieting news about the impact of Senate Joint Resolution 58. The steep economic decline triggered by the abrupt reduction in Federal expenditures necessary to achieve budget balance under the conditions of Senate Joint Resolution 58 would have significantly depressed Federal revenues, driving down the level at which budget balance would have had to have been achieved. Based on the Wharton Econometrics analysis, Congress would have had to reduce Federal operations by another $191 billion this fiscal year and by $207 billion in fiscal year 1983—reductions in addition to those already achieved under the concurrent budget resolutions for fiscal year 1982 and fiscal year 1983.

Congress would have faced two alternatives: make drastic reductions in the two largest programs—national defense and social security—or slash every other Federal program by an average 61.6 percent this year and 71.1 percent in fiscal year 1983.

The action by the House today, then, will help avert such calamity.

During the Senate debate of this measure, a new provision spsonsored by Senators ARMSTRONG, HOLLINGS, BOREN, and QUAYLE was added. This new section 6 would freeze the Federal public debt limit and stipulate that any future increase would require a three-fifths vote of all Members of both Houses.

I had the most serious reservations about this new provision, and asked whether it might not shake confidence in the U.S. dollar, endangering the stability of the world monetary and banking systems. So concerned was I about these prospects, that on August 9 I solicited advice on this matter from some of the Nation's leading economists. I wrote:

> In the course of Senate debate, one change was made in S.J. Res. 58. A new section 6, sponsored by Senators William Armstrong, Ernest Hollings, David Boren and Dan Quayle, freezes the federal public debt limit and stipulates that any future increase shall require a three-fifths vote of all members of both Houses.
>
> I spoke to this issue on the Senate floor August 4, and in these remarks (also enclosed) asked if this provision might not shake confidence in the dollar as an international reserve currency. Permit me to point out that only once in the last five years have both Houses of Congress raised the debt ceiling by a three-fifths vote. As you well know, however, exogenous events often force the Federal Government into unexpected new indebtedness. Simply put, we face the prospect that two or three times a year from here on out, the question will arise whether a three-fifths vote can be mustered in time to prevent a default on the

debt of the United States. Given that the Government's word and credit provide the only formal backing for the United States dollar, and given also that three-fourths of all western central bank reserves today are held in dollars, might not this provision pose a threat to the stability of the world money system? At the least, the recognition that, by virtue of a constitutional straitjacket, the Government's ability to meet all its obligations may be less certain than previously, could add a new "risk premium" to the interest rate for Treasury securities.

Do you agree that these are matters of concern? I would be most gratified to know you views.

Permit me to share with you their replies.

Prof. Kenneth J. Arrow, Nobel laureate in economic science and the Joan Kenney, professor of economics at Stanford University, replied that he considered section 6 "a compounding of an already serious mistake," and warned that:

The possibility that a debt increase will not be passed will certainly diminish the credit of the United States, removing one of the last remaining certainties in an uncertain world.

With Professor Arrow's permission, I submit his statement for the RECORD.

The statement follows:

STATEMENT OF KENNETH J. ARROW

The proposed consitutional amendment on budget balancing and spending limits will impose a straitjacket on economic policy. A constitution is intended to set conditions for a long time into the future, to control a future which is inherently unpredictable. We cannot tell now what conditions will prevail even a decade from now, let alone in the far future, and the specific limits imposed in the amendment may prove to be diastrous. The American Constitution has survived and adapted to a world vastly different from that of the Founding Fathers because they had the wit to avoid burdening it with high specific restrictions which merely impose the wisdom of the moment on future generations.

Actually, the severe constraints of the amendment will lead most likely to clever evasions rather than handcuffing. An expenditure may in many cases be described alternatively as a credit against a tax; indeed, a considerable volume of expenditures are so disguised now. We may find an increase in disguises of this type, which will only make rational budget-making even more difficult.

To the extent that the limits are effective, they will produce easily foreseeable conflicts. Consider indeed a very present situation, an increase in military spending judged desirable by at least many knowledgeable individuals. A spending limit means that any increase beyond the increase in national income will have to come at the expense of other programs, most likely social security and medical expenditures. Of course, if we really need more military expenditures, something else has to give. In principle, every other kind of expenditure, public or private, should be reduced somewhat. There is no reason to single out just those items which receive public support. More military expenditures should be as much at the expense of private consumptions of luxuries as at that of the old or the sick.

One of the worst consequences of the proposal is that an automatic political opposition to the satisfaction of new needs is created by the presently existing beneficiaries.

The balanced budget requirement is not seriously defended by any significant number of economists. Milton Friedman has expressed publicly an old view of his, that there should be deficits in recessions; it is certainly incorrect by anyone's standards to raise tax rates when collections are reduced by lowered incomes. It is quite clear that advocates of the balanced budget are really requiring that forecasts of revenues equal planned expenditures; the implication is that the forecasts will become simply whatever is needed to satisfy the formal requirement of a balanced budget, in short an invitation to deception.

The fact of the present budget imbalance when the government is the most fiscally conservative since Hoover's own budgetary history is a case in point. We cannot insure balanced budgets in recessions without severe damage to the economy; in fact, we probably cannot insure balanced budgets at all.

The need for an extraordinary majority to permit an increase in the debt limit, voted by the Senate, is a compounding of an already serious mistake. Since revenues are incompletely predictable, the need for additional debt can always arise. The United States government should not and in many cases cannot default on its obligations. But the possibility than a debt increase will not be passed will certainly diminish the credit of the United States removing one of the last remaining certainties in an uncertain world. Further, it exacerbates an existing problem; it opens the debt increase process to the possibility of political blackmail, as amendments are piled on to cover extraneous issues to pay for the votes needed to keep the government of the United States operating.

Mr. MOYNIHAN. Prof. Paul A. Samuelson, Nobel laureate in eonomic science and institute professor at the Massachusetts Institute of Technology, replied that:

The proposal for a three-fifths majority (to increase the debt limit) maximizes the danger to the future credit of the United States abroad and at home while achieving only a modicum of the needed tax and expenditure discipline.

With Professor Samuelson's permission, I submit for the RECORD his entire letter.

The letter follows:

MASSACHUSETTS INSTITUTE OF TECHNOLOGY, DEPARTMENT OF ECONOMICS,
Cambridge, Mass., August 17, 1982.

Senator DANIEL PATRICK MOYNIHAN,
U.S. Congress,
Washington, D.C.

DEAR SENATOR MOYNIHAN: I write to express concern over the risks for the nation that may be entailed by the proposal to require a three-fifths vote of all members of both houses of Congress to raise the federal debt limit.

I agree that devices are needed to enable Congress to control its own tendency toward fiscal imprudences. But in devising optimal new mechanisms, one must try to minimize the costs and contingent risks while maximizing the fiscal discipline. The proposal for a three-fifths majority maximizes the danger to the future credit of the United States abroad and at home while achieving only a modicum of the needed tax and expenditure discipline. A knowledge of American economic history over the last few decades reveals a number of occasions when, if this proposal had been in effect, serious consequences would have emerged for the stability of the exchange rate and of the money market. Risks like these should not be exacerbated wantonly. Only if the measure had fiscal merits assuredly large in themselves and demonstrably better than all alternatives—conditions that informed observers will find lacking in the new proposal—could Congress conscientiously accept the implied new riskiness.

As you know, Senator, the zeal to promote fiscal conservatism can backfire and actually undermine the stability of the financial system if that zeal is not controlled by an informed balance sheet of risks and benefits.

I would hesitate to state these warnings so emphatically were it not that consultation with a number of my experienced colleagues has confirmed that those across a wide spectrum of political views share these misgivings.

Sincerely,

PAUL A. SAMUELSON,
Institute Professor.

Mr. MOYNIHAN. Prof. Herbert A. Simon, Nobel laureate in economic science and professor at Carnegie-Mellon University, replied:

It would be irresponsible for the legislature to shackle itself, and all of us, by imposing additional crippling constraints on itself that would prevent it from dealing forthrightly with the problem of the day as they arise. In a crisis that could have most disastrous consequences.

I submit for the RECORD Nobel laureate Simon's entire letter.

The letter follows:

CARNEGIE-MELLON UNIVERSITY,
DEPARTMENT OF PSYCHOLOGY,
Pittsburgh, Pa., August 18, 1982.

Senator DANIEL P. MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR PAT: Thank you for your letter of August 9, and the enclosed pages from the Congressional Record. I support strongly your opposition to the proposed freeze on the federal public debt limit.

The first task of the United States government is to govern—to deal thoughtfully with the many problems that face us at home and in the world today. The Constitution contains numerous and adequate safeguards against the legislative and executive branches of our government exerting excessive control over our lives and freedom. It would be irresponsible for the legislature to shackle itself, and all of us, by imposing additional crippling constraints on itself that would prevent it from dealing forthrightly with the problems of the day as these arise. In a crisis, that could have most disastrous consequences.

With respect to the specific restraint in question, I should observe that the national debt is, in fact, no larger in relation to GNP than it was twenty years ago. What makes that debt embarrassing to the public economy of today are the high interest rates imposed on the government as a result of the misguided economic policies of the Administration and the Federal Reserve Board. Let's change these policies instead of water-

ing down the power of the legislative body to govern prudently.

Sincerely yours,

HERBERT A. SIMON.

Mr. MOYNIHAN. Prof. Gardner Ackley, former Chairman of the President's Council of Economic Advisers and current president of the American Economic Association, replied:

I believe that you are quite right to stress in your remarks to the Senate on August 4, the additional danger to the economic health and stability of the Nation's economy—and, as you point out, to the World economy—caused by the addition on the floor of the Senate before the passage of S.J. Resolution 58 of section 6, which would freeze the public debt limit, and require that any future increase in it should necessitate a three-fifths vote in each House of Congress.

I submit for the RECORD the remainder of Professor Ackley's wise advice.

The material follows:

Were the House to approve the Joint Resolution in this form, and were a sufficient number of States to ratify the Amendment, this additional provision could intensify the potential damage which the "balanced-budget-amendment" already carried to the national interest. We all know that problems associated with the necessary renewal of the Government's borrowing authority have, on occasion in the past, caused considerable embarrassment, as well as budgetary cost (from higher interest rates) and disturbances in financial markets, and have allowed individual members of Congress in effect to blackmail their colleagues on matters quite extraneous to the borrowing reqirement.

As you correctly point out, the occasion for new Federal borrowing can originate entirely independently of Federal legislation on expenditures and tax revenues—for example in borrowing by the States to pay unexpected costs of unemployment insurance. More generally, unexpected recession in the private economy might require added Federal borrowing quite apart from the rights of the States to borrow from the Federal Treasury, and even though all substantive provisions of the Amendment had been fully met.

The possible consequences of such an event—if a three-fifths vote were needed—are far more serious, indeed quite incalculable. And they are not limited to the United States but could, as you correctly indicate, involve the stability of the world economy.

As you know, I am one of a large number of economists who strongly oppose any form of balanced-budget Constitutional Amendment. I thereby strongly approved and welcomed your remarks in the Senate on July 30, opposing the Amendment in its earlier form. I believe that the points you made as to the damaging effects of such an amendment, and as to the invalidity of the arguments in its support, were sound and relevant, and I congratulate you for the eloquence of your opposition.

I, and most professional economists whom I know—who include at least six of the ten American Nobel Prize winners in economics, and at least 12 of the living ex-Presidents of the American Economic Association—firmly oppose such an Amendment in any form. I am not aware of any substantial support for such an Amendment among economists, and particularly among economists who specialize in Government fiscal policy and related matters.

Mr. MOYNIHAN. Prof. William Baumol, former president of the American Economics Association, replied that,

* * * it is the section 6 proposal which above anything else, constitutes a threat to the public interest and the health of the Nation's economy in the longrun.

With Professor Baumol's permission, I submit for the RECORD the rest of his insightful analysis.

The material follows:

The point is that without Section 6 the amendment may perhaps be interpreted as a vague admonition urging Congress and the Administration to do what they can to avoid budget deficits. But Section 6 really constitutes a straightjacket which can all but immobilize fiscal policy, for the amendment may effectively prevent any increase in the debt even when it is absolutely urgent for stabilization of the economy, or increase in debt is avoidable only by total dismantling of vital public services.

You are right in suggesting that this measure can leave the government helpless to deal with unforeseeable events which impose indebtedness upon it. This in turn can have serious effects upon the value of the dollar and can increase dramatically the amplitude and frequency of fluctuations in its exchange value. That in turn will cause problems for trade by hampering the use of the dollar as a reserve currency. It would cause all sorts of problems for the operations of the Treasury.

However, there is even more at stake. Despite all of the recent difficulties which have beset our economy and those of other countries, even a cursory glance at the GNP data from, say, 1900 to World War II, and comparison with the postwar figures will show how much superior the more recent performance has been. Long depressions have been replaced by relatively mild recessions of fairly brief duration, and economic growth has outstripped its past performance. In all of this fiscal policy has played an important role, a role which the amendment proposes to circumscribe severely or even to eliminate altogether. Surely, if one wished to limit the country's growth and prosperity, it would be hard to imagine a more effective measure.

Support of balanced budgets is no doubt attractive politically and permits one to proclaim allegiance to virtue and fiscal responsibility. But those who vote for it now will have cause to regret it later, and later generations will pay heavily for the illusory protection from the burden of debt that it promises them.

Warmest regards,

WILLIAM J. BAUMOL.

Mr. MOYNIHAN. Prof. Raymond F. Mikesell, the W. E. Miner professor of economics at the University of Oregon, replied that,

I can think of no great calamity, short of a world war, to the entire economic structure of the United States and of the world than for the U.S. Government to be unable to meet its debt obligations, even for a short time.

With Professor Mikesell's kind permission, I submit for the RECORD his entire letter.

The letter follows:

UNIVERSITY OF OREGON,
Eugene, Oreg., September 7, 1982.

Hon. DANIEL P. MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MOYNIHAN: Your letter of August 9, 1982 relating to the Balanced Budget Amendment arrived while I was on vacation, but I want you to know that I am in whole-hearted agreement with your statement and I appreciate your placing the Economists Open Letter opposing the amendment and our names in the CONGRESSIONAL RECORD for July 30, 1982.

I can think of no greater calamity, short of a world war, to the entire economic structure of the United States and of the world than for the U.S. Government to be unable to meets its debt obligations, even for a short time. Even the threat of such an event could be extremely harmful and might trigger a whole series of chaotic developments in the financial structure that would have serious consequences for savings, investment, and international transactions. You are quite right in suggesting that the passage of the Balanced Budget Amendment would pose such a threat.

Sincerely,

RAYMOND F. MIKESELL.

Mr. MOYNIHAN. Similar analysis and advice came from every economist from whom I have heard.

From Walter S. Salant, senior fellow emeritus in economic studies at the Brookings Institution:

THE BROOKINGS INSTITUTION,
Washington, D.C., August 23, 1982.

Hon. DANIEL PATRICK MOYNIHAN,
Washington, D.C.

DEAR SENATOR MOYNIHAN: I am writing in response to your letter of August 9 in which you asked whether the proposal of Senators Armstrong, Hollings, Boren, and Quayle, to add a new Section 6 to Senate Resolution 58 would not shake confidence in the dollar as an international reserve currency. This proposed Section, as you noted would freeze the federal public debt limit and require a three-fifths vote of all members of both Houses of Congress to authorize any future increase.

I agree that enactment of such a proposal might well have an adverse effect on the stability of the international monetary system, at least in the sense of making dollars a less desirable asset to hold than they would otherwise be. This adverse effect is not certain to occur but it certainly is a possibility. If it did occur, it would not be confined to official holdings of monetary reserves; the effect on private asset-holding would probably be even greater.

Probably the effect would be caused not so much by the proposed amendment to the resolution or even by the resolution itself as by the tendencies in American fiscal programs that make people think a constitutional amendment is necessary, i.e., by the persistence of large and growing budget deficits and the so-far-apparent failure of the U.S. Government to oppose this tendency successfully. To deal with the budget deficits and the consequent increases in the public debt by constitutional amendment does not overcome this failure. Rather, it confirms the unwillingness of the Congress to make a serious effort to overcome it. This, I think, is what could make Senate Resolution 58 and the proposed new Section 6 a threat to maintaining the dollar as a

component of official reserves and of private holdings of liquid assets. I oppose both.

Sincerely,

WALTER S. SALANT.

Similarly, from two distinguished professors of economics at the Massachusetts Institute of Technology.

Prof. Robert M. Solow wrote back:

MASSACHUSETTS INSTITUTE OF TECHNOLOGY,
Chilmark, Mass., August 26, 1982.

Senator DANIEL PATRICK MOYNIHAN,
Washington, D.C.

Thank you for taking up the cudgels against the Balanced Budget Amendment.

You are entirely right that the provision freezing the debt limit and requiring a three-fifths vote for its increase is both silly and bad. At best it will lead to creative accounting and convoluted financing, which is hardly the way to responsible fiscal policy. At worst, it could call into question the Government's capacity to meet its obligations, including interest payments on its own debt. Why should we take a step toward turning the United States into a banana republic at a time when there is no great demand for bananas?

Sincerely,

ROBERT M. SOLOW.

And Prof. Carl Kaysen of MIT, also the director of MIT's program in science, technology, and society, replied:

MASSACHUSETTS INSTITUTE OF TECHNOLOGY,
Cambridge, Mass., August 17, 1982.

Hon. DANIEL P. MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR PAT: I am responding to your letter of August 9th to all who signed the economists' letter on the balanced budget amendment. I am glad to express my concurrence in your concerns about the additionally disastrous effect of adding a federal debt freeze into the language of the amendment.

I will be happy to have you list me as opposed on any list you put into the Congressional Directory.

Cordially,

CARL KAYSEN.

And Prof. Paul Davidson of Rutgers University, also editor of the Journal of Post Keynesian Economics, replied:

JOURNAL OF POST KEYNESIAN ECONOMICS,
New Brunswick, N.J., September 13, 1982.

Senator DANIEL P. MOYNIHAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MOYNIHAN: I believe that your comments on both the Balanced Budget Admendment and the new Section 6 sponsored by Armstrong, Hollings, et al are exceedingly well taken.

Given the tremendous strains already imposed on both the U.S. and world economies by the Reagan Administration and the Federal Reserve, it is hard to believe that Congress could seriously consider the balanced budget as an important piece of legislation. It is as if Congress fiddles, while the world burns! Or even worse, Congress is attempting to throw gasoline on the conflagration.

It is little consolation that history will prove us right (as it did the 1028 economists whose letter to Hoover in 1930 was ignored).

Sincerely,

PAUL DAVIDSON.

Warning from men of such eminence, and on a matter of such dire importance, can be ignored only at the Nation's peril. I am gratified that the House of Representatives has taken proper notice and today put a stop to this dangerous nonsense.

Now we can all turn together to the serious and pressing business of restoring the Government's fiscal responsibility and this Nation's economic prosperity.●

UKRAINIAN INSURGENT ARMY

● Mr. LEVIN. Mr. President, October 14 will mark the 40th anniversary of the founding of the Ukrainian Insurgent Army (UPA) and is an important date in the history of the struggles of subjugated peoples for independence and statehood.

The UPA was created in response to a momentous event in the history of Ukraine. On June 30, 1921, in a move spearheaded by the Organization of Ukrainian Nationalists (OUN), Ukrainian nationalists boldly and with right and justice on their side, declared their independence and issued a proclamation of the restoration of independence. Defiantly throwing off the yoke of oppression, the UPA launched a national liberation struggle against Hitler's Germany on one front and Stalin's Soviet Union on another.

The UPA's struggle to recapture their independence was a light in the Ukrainian story that was bright but all too brief. It was darkened by the German occupation forces—the Proclamation of Independence was negated and the Ukrainians' proclaimed prime minister, Yaroslaw Stetsko, was forced into a concentration camp.

Later, the Red army took control and to this day, the Soviet Union maintains an oppressive government in Ukraine which persistently tries to obliterate all dreams of regaining independence. It saddens, and at the same time angers, freedom-loving people everywhere to see that where the Ukrainian spirit of independence once soared without restraint, it now is in the stranglehold of the Soviets—another "captive nation."

Mr. President, during the first half of October, the Ukrainian community throughout the United States will be commemorating the founding of the UPA and its heroic actions. In Michigan, the Southeastern Michigan Branch of the Ukrainian Congress Committee of America will mark the event with a special program on October 3. I lend my voice to the chorus in commemorating the 40th anniversary of the creation of the UPA and in honoring their outstanding courage and determination.●

SOVIET USE OF CHEMICAL AND TOXIC WEAPONS

● Mr. QUAYLE. Mr. President, the issue of Soviet use of chemical and toxic weapons continues to be very disturbing to me. One of the most perplexing aspects of this issue is the reluctance of most of the international community to call the Soviets to account for its gross violations of international law. Despite very substantial evidence of "yellow rain" attacks on defenseless Laotians and Afghans, even our own State Department appears to be unwilling to confront the Soviet Union.

The Wall Street Journal of Wednesday, September 29, 1982, contains an editorial, "How Much More Yellow Rain?", which I commend to the attention of my colleagues. The same issue has an article by Daniel Henninger and Manuela Hoelterhoff, "The Art of a People on the Run," which provides a poignant description of the H'mong people of Laos—one of the victims of Soviet "yellow rain."

Mr. President, I ask that these two articles be printed in the RECORD.

The articles follow:

[An editorial from the Wall Street Journal, Sept. 29, 1982]

HOW MUCH MORE YELLOW RAIN?

The 37th session of the United Nations General Assembly opened last week and the thorniest issue on its lengthy agenda is doubtlessly "yellow rain." The evidence continues to mount that the Soviet Union and its allies are committing atrocities using biochemical weapons in Southeast Asia and Afghanistan in violation of international law (see the nearby article on the horrors inflicted on the Hmong people). Yet many Western governments, which are said to have independently examined the charges, and a apparently even the State Department, would seemingly prefer to see the issue evaporate.

A notable exception is the Canadian government, which has just submitted a new report to the U.N. giving eyewitness accounts of "yellow rain" attacks on four villages in Laos last April. Four young Hmong men tell of a "yellow substance," dropped by planes, that felt "hot like chilles" on the skin. Victims showed the typical "yellow rain" symptoms—skin blistering, dizzinesss, convulsions and bloody diarrhea and vomiting. Eighty persons, including many women and children, died. The report includes color photographs of the survivors' skin lesions. Blood samples showed traces of the mycotoxins found in "yellow rain" but Canadian scientists said the results weren't conclusive. The samples were necessarily taken a number of days after the attacks, however, making it unsurprising that the results were inconclusive.

"The duration of time over which interviews have been taken—six years—and their consistency tends to substantiate the charges that some sort of chemical agent is being used in Southeast Asia," Canada's Department of External Affairs concluded. "This report underlines the urgent requirement to improve international verification and control procedures related to chemical and/or biological weapons use."

Help in obtaining medical evidence about "yellow rain" may soon be forthcoming from a medical team set up under the auspices of the Cambridge-based Institute for Foreign Policy Analysis. Led by a former U.S. Foreign Service officer who has worked

on "yellow rain," the team will screen, diagnose and treat victims. It plans to make the first systematic collection of medical data on the effects of mycotoxins—field research that the U.S. government has yet to do.

Meanwhile, valuable information on Soviet biochemical weapons use has emerged from Afghanistan. A Soviet Red Army deserter, now in the hands of the Afghan resistance, told a group of Western journalists earlier this month of seeing chemical weapon stockpiles at two major Soviet air bases in Afghanistan and identified three different types of agents. One, possibly "picric acid," affected the eyes, skin and respiratory system, and another was an asphyxiation gas. Both of these, he said, were fired from aircraft rockets and gave off a "dense, yellowish" cloud. The third agent, called "smirch," caused 100% mortality and had the peculiar effects of causing flesh to turn black and decompose rapidly and limbs to fall off. His descriptions of the effects of "smirch" tally with other reports from doctors working in Afghanistan with resistance fighters.

Despite the mounting evidence of gross Soviet violations of the Geneva Protocol of 1925 and the Biological Weapons Convention of 1972, the Reagan administration hasn't lived up to its *own* obligations under international law. Specifically, the 1972 treaty obliges the U.S. to charge the Soviet Union before the U.N. Security Council and to call an emergency meeting of the 111 signatories to the convention. But the State Department feels such steps are too undiplomatic. Instead, these officials are casting around for another country, say Sweden, to assume America's responsibilities.

State's behavior is hard to fathom, even if you take into account the natural tendencies of diplomats to seek accommodation rather than confrontation. The staff at the U.S. mission to the U.N. would at least like to put a mild resolution before the General Assembly calling on anyone who just might be using poison gas to stop. State apparently would prefer a statement congratulating the U.N. on its "fine work" on "yellow rain," a ploy that would seem more appropriate after we know whether the U.N. has done any fine work, or more to the point, wants to make any of it public.

By refusing to confront the Kremlin, the U.S. is plainly sidestepping its responsibilities under international law. It has offered no plausible explanation of this behavior other than an occasional hint that the evidence is not yet strong enough for an open fight. If more evidence is needed, the Soviets appear willing to supply it, since their attacks on defenseless Laotians and Afghans continue. We wonder how many more victims will be needed to compel the U.S. and its allies to take bolder action.

[From the Wall Street Journal, Sept. 29, 1982]

THE ART OF A PEOPLE ON THE RUN

(By Daniel Henninger and Manuela Hoelterhoff)

The artists who created the exhibition now at the Museum of Natural History in Denver came a long way to show their work. They walked down from the high mountains of Laos and through its jungles, floated on pieces of bamboo across the Mekong River, spend months or years in the refugee camps of Thailand, eventually climbed aboard planes and—some of them, at least—ended up in Denver. These refugee artists are the "yellow rain people." It is they who were initially attacked in Laos with the chemical and biological agents that the U.S. government has accused the Soviet Union of deploying in violation of two international treaties barring the use of poison weapons.

Their exhibition, "Hmong and Yao: Mountain Peoples of Southeast Asia," will be on view there through Oct. 10. More than 30,000 residents of Denver have attended. The work they are seeing is quite extraordinary.

The small exhibition rooms pulsate with dramatically colored, intricately patterned textiles. In their own country, the Hmong and Yao have no need for museum walls; they wear their art and have done so for centuries, stitching and embroidering garments with abstracted vegetable blossoms, peacock eyes, stars and snails. We see baby hats as delicately worked as a filigreed crown; skirts folded into a hundred pleats, belts that would serve nicely wrapped around a royal waist; and sophisticated wall hangings decorated with a maze-like pattern called "dreaming."

But the Hmong (the "h" is silent) have had little occasion for the comfort of dreams these last few years. Their art is on view in Denver because daily life for many Hmong has become a nightmare.

There are now some 50,000 Hmong people in the U.S. They are here because in 1962 they decided to ally themselves with the U.S. against the army of North Vietnam. The Hmong are the largest of many culturally distinct Lao mountain minorities. They have always feared Vietnam's historical claims to their land, so they fought with the French and later with the U.S., primarily interdicting movements of North Vietnamese materiel through Laos into the south. They also rescued U.S. pilots downed over Laos.

Like their U.S. allies, the Hmong lost. Unlike the U.S., the Hmong stayed. And sometime between 1975 and 1976, the Communists in Southeast Asia began to kill them.

VERY UNPLEASANT CONSEQUENCES

In the year since the U.S. raised the issue, "yellow rain" has to a certain extent become one factor in the abstract calculus of arms control. but the Hmong are the people who were sprayed with the stuff. And the "stuff" is not the sort of thing one buys at a garden-supply store to spray on the front lawn. After much research and argument, U.S. scientists have identified one of these biological weapons as an extremely lethal form of mycotoxin, a poison derived from plant fungus. The Hmong accuse the Communist Vietnamese and Laos of dropping clouds of it onto them from airplanes. When these toxins are inhaled, they attack the nervous system and body membranes, with consequences that are as unpleasant as one might imagine.

U.S. diplomats stationed in Southeast Asia continue to file reports of chemical and biological weapons attacks in Laos (the most recent occurred through this summer) and by Soviet forces against insurgents in Afghanistan.

Against this background of lurid and apparently unstoppable killing, one finds in Denver, Colo., the irony of an exhibition of beautiful and delicate folk art produced by a people on the run. The show itself exists because of the anger and frustration of an American journalist named Jane Hamilton-Merritt, who covered the Vietnam War from 1966 to 1972.

While visiting a Thai refugee camp in 1977, she heard reports that the Lao mountain people were being attacked and killed with chemical or biological agents. She interviewed the Hmong and photographed some of their worst external injuries. She returned to the U.S. thinking that a magazine or newspaper article would cause an uproar. She was wrong. Her story and her pictures were not published.

"I have to admit that at first I couldn't believe it either," Miss Hamilton-Merritt says now. "I couldn't imagine what it (the weapon) was." She called U.S. government agencies to ask about the symptoms she'd seen but got nowhere. She called cheiical companies, drug companies, biochemists at universities here and abroad. Finally she called some veterinarian researchers, who said her description sounded familiar. Miss Hamilton-Merritt says they told her: "We don't know anything about humans, but we know there is fungus, animals can eat and get sick."

She made the rounds of magazines, expecting to find one that would publish both her article and pictures. there were no takers. "I just never thought I would hit a dead end on this, she says. "I thought, "Who is going to record all this? I had notebooks and notebooks of Hmong testimony about the air attacks."

In desperation, she more or less tore a page out of the environmental movements' strategy manual: "I chose what I thought would be a non-threatening approach. And that was to offer a look at the art of an unknown people, whose art and very existance were in jeopardy. I knew that the Hmong art would be appreciated in this country because it's quite extraordinary."

The first exhibition of art by the Hmong and Yao people opended in November 1979 at the Bethel Galley in Connecticut. The show has been seen since at galleries and museums in Washington, D.C.; Calgary, Alberta; New Haven, Conn.; Martha's Vineyard, Mass.; Minneapolis and now in Denver. As designed by Miss Hamilton-Merritt, it is an exhibition that shows visitors images of great and remarkable beauty and of great and remarkable horror.

Particulary striking are the complex appliques done by the White Hmong (a tribal subdivision). Their color and maze-like designs hit the eye with psychedelic impact. The women who do these works map out the entire design in their heads, and the finished piece—which can take months to complete—can have an intellectual precision and technical splendor one doesn't always encounter in museums of modern art.

Only a few pieces are antiques. The harsh and arduous exit route means minimal luggage. Western relief workers in Thailand often foolishly encourage the Hmong and Yao to put on their Western shirts and leave behind their tribal dress. But in the camps, many Hmong continue to fashion their centuries-old designs.

One of the most spectacular pieces in the exhibition is a White Hmong wedding dress made in the Ban Vinai camp in Thailand. The elaborate, silver-looking necklace incorporates old French coins and tin from soda cans. Once the Hmong carried their wealth around their necks because they had no currency. Now they turn refuse into memories of silver.

The horror is only a few feet away in the show. In a corner at the end of the exhibition, one sees photographs of people who have been gassed and driven out. One picture shows an emaciated man holding up a small diary detailing yellow-rain attacks he witnessed. Another photograph shows par-

ents holding sick children who died long before the exhibition opened.

One of Miss Hamilton-Merritt's pictures probably accounts in no small part for her publication problems. It is of a baby who is being breast-fed. The baby is burned across its eyes and forehead in such a way that the child very much resembles a person who was burned at Hiroshima. Most people who see it turn away from the child.

Miss Hamilton-Merritt includes these photographs in lectures she gives in conjunction with the exhibition—often to the discomfort of sponsoring organizations. She is usually asked to eliminate particularly unsettling images. But the disturbing contrasts are most germane to Miss Hamilton-Merritt's undertaking: She is trying to say that some terrible thing is happening to the people of Southeast Asia and has been doing so the past three years by telling her story to one roomful of people after another. And in Minneapolis and Denver, she has had some effect.

SOVIETS ARE SOURCE OF WEAPONS

Next Tuesday a nonprofit gallery shop will open in Minneapolis to sell the Hmong's textile art. The shop is the work of Gloria Congdon and Lucy Hartwell, who became interested after seeing the museum show. "The gallery is an attempt to develop an outlet for the art, with the money going directly back to the women who make the textiles," says Gloria Congdon. Local businessmen have begun to find jobs for the Hmong. And one has put up money to publish a brief color catalog, which effectively depicts who the Hmong were and what they have become.

There is evidence of a similar pattern of community involvement emerging in Denver. The shop at the Denver museum has sold $7,500 of Hmong textiles.

Miss Hamilton-Merritt also found a publisher. In its October 1980 issue, Reader's Digest ran a long article on chemical-biological warfare in Southeast Asia after sending her back to Thailand to update the story. The Digest also published a follow-up article by her in August 1981.

Miss Hamilton-Merritt was by no means the only person chasing the story. In 1981, Sterling Seagrave published his book, "Yellow Rain," detailing the use of these agents in Southeast Asia. Barry Wain, a reporter for The Asian Wall Street Journal, described the plight of those fleeing Southeast Asia's new Communist governments in his book, "The Refused." And in September 1981, then Secretary of State Alexander Haig said in a speech in Bonn that the Soviet Union was the source of these forbidden weapons. In the wake of Mr. Haig's resignation, however, the government's yellow-rain initiative is in disarray.

Despite some measure of progress, Miss Hamilton-Merritt appears to live with this subject in a state of perpetual indignation and rage. "It has been most difficult," she says evenly. "The Hmong are not making it here." Besides Denver and Minneapolis, the Hmong have settled in Chicago; Seattle; Portland, Ore.; Boston; Providence, R.I.; and Orange County, Calif.

The Hmong now living in America have in many ways become another manifestation of this century's relentlessly absurd tragedy. They were once a tough, self-sufficient people, who rolled into the pit of Vietnam. They are now in the U.S., a preliterate and impoverished Asian mountain people whose women sit for hours with dazzling textile art slowly spilling from their hands. And they say they are here because the Communists' planes and helicopters showered them with a "yellow rain" that hurt and killed them. It all seems so unlikely. That, Jane Hamilton-Merritt says, is precisely the problem.●

PREVENTING A SECOND WAR IN CENTRAL AMERICA

● Mr. KENNEDY. Mr. President, I call the attention of my colleagues to a recent initiative of the Presidents of Mexico and Venezuela to prevent a second war in Central America.

For all too many months, we have seen the civil war in El Salvador cost untold lives and destruction as the policy of the United States remained steadfast in opposition to a negotiated political settlement. That war continues unabated, whether or not we see its evidence on the front pages of our newspapers.

There is now a growing danger of a second war in Central America, based on growing conflicts between Honduras and Nicaragua. There has been an unprecedented military buildup in Nicaragua. The United States has provided increasing military aid and support to Honduras—which in turn has not only supported the military in El Salvador but has aided and abetted more frequent and larger scale attacks across the borders with Nicaragua by military bands identified as former members of General Somoza's National Guard.

I have been deeply concerned by the military buildup and increasing repression and violations of human rights in Nicaragua, as in other parts of Central America, and I have expressed these concerns repeatedly to the Nicaraguan Government. Unfortunately, the actions of the Reagan administration have made it even more difficult to achieve political changes in Nicaraguan policies. Instead, this administration has pursued a hostile and self-defeating policy which appears to be aimed at the destabilization of the Nicaraguan Government. The instruments of that policy apparently now include attacks across the Honduran border.

The increased frequency of those attacks comes in the wake of a doubling of U.S. military aid to Honduras in 1982, a substantial increase in the number of U.S. military advisers assigned to Honduras, a joint U.S.-Honduran military exercise transferring a Honduran combat battalion close to the Nicaraguan border, and a proposal for expanding and improving runways in southern Honduras to permit larger, and presumably American, warplanes to land and refuel.

In the face of rising war fever in both countries, the Presidents of Mexico and Venezuela have written to the Presidents of the United States, Honduras, and Nicaragua urging a diplomatic alternative to the seriously growing risk of war. Their letter of September 15 stresses the need to jointly (explore) the paths that are still open in order to stop the actual and worrying escalation, the increasing tension and the general and dangerous expectations generated from its outcome.

It is important to understand that the proposal from Mexico and Venezuela is supported by numerous other Latin American governments and by many of our close NATO allies.

Presidents Herrera Campins and Lopez Portillo have demonstrated wisdom and statemanship in this initiative aimed at joint discussions and a diplomatic solution. I hope that the Reagan administration will seriously consider their recommendations, and respond quickly and positively. Not only might the process of dialog avoid the spread of violence and war in Central America, but it could also serve as the first opening to a political resolution of the Salvadoran conflict as well.

My concerns are reinforced by the recent allegations of a former senior Honduran military officer, Col. Leonides Torres Arias, that key members of the Honduran military leadership are intent on pursuing military actions against Nicaragua. These actions in turn have led the Nicaraguan Government to build up its forces further along the Honduran border, to declare a state of emergency within that country, and to express serious concern that a massive military invasion from Honduras may be forthcoming.

The elected civilian government of President Roberto Suazo Cordova will likely find its already difficult economic situation exacerbated by the increased resources being demanded by the Honduran military. And if Honduran military involvement in El Salvador and Nicaragua increases, there is little question that it would pose an additional threat to the barely year-old democratic government of that country.

An excellent account of the rising tensions in Central America appeared recently in the Wall Street Journal. I ask that both this account, by Lynda Schuster, and the text of the Mexican/Venezuelan announcement of their extremely important diplomatic initiative, appear at this point in the RECORD.

The materials referred to follow:

[From the Wall Street Journal, Sept. 28, 1982]

HONDURAS IS BECOMING A NEW BATTLEGROUND FOR CENTRAL AMERICA

[By Lynda Shuster]

TEGUCIGALPA, HONDURAS.—Just a year ago, all was serene here in this lovely capital, where buses jump the curb to take hairpin turns around narrow, cobblestone streets. Hardly a soldier was in sight, about the loudest noise breaking the sleepy mountain air was a car backfiring and people thronged downtown at night.

Today, the tension is razor-sharp. Police uncover a new terrorist hideout just about

every week, soldiers swarm the city and cause mammoth traffic jams with roadside checkpoints, telephones used by anyone with sensitive information are tapped, and downtown is deserted after dark.

The sudden changes here illustrate how Honduras is fast turning into the new battleground for a regional war in Central America. It had been mostly spared the political violence ripping through the area—a leftist revolution in Nicaragua and the continuing battles against leftist rebels in El Salvador and Guatemala. Political experts figured that Honduras didn't have the same problems as its neighbors because it doesn't have the same lopsided distribution of wealth or history of repression.

CRUCIAL GEOGRAPHY

It does have strategic position, however. Sandwiched among countries in turmoil, Honduras is being used more and more by the major players, the U.S. and Nicaragua. As a result, terrorism now afflicts its cities, and battles with leftists rage along two frontiers. The latest incident ended last Saturday, when leftist guerrillas, who had captured more than 100 officials and businessmen and held some of them hostage for eight days in San Pedro, Sula, flew out of the country after dropping their demands for the release of 60 prisoners, among other things. And as tension mounts, many here fear that the U.S. and Cuban-backed Nicaragua are sucking Honduras into a deadly showdown from which it can only emerge a loser.

"My country is being turned into the Lebanon of Central America, a battlefield where the superpowers can fight out their battles by proxy," says Carlos Roberto Reina, a politically moderate attorney, "but our army isn't strong enough to fight the Nicaraguans, and I wonder how willing the U.S. public would be to send in the Marines."

Mr. Reina is alarmed because the posturing between the U.S. and Nicaragua has taken on explosive proportions. Worried by the greatly expanded Nicaraguan army, the U.S. is asking Congress for millions of dollars to lengthen landing strips in Honduras for larger aircraft, and it is beefing up its presence here. At the same time, it is doing little to quash rumors of an impending CIA-backed invasion of Nicaragua, which the U.S. says is aiding Salvadoran rebels and is trying to infect the entire region with the Marxist virus.

HEAVY TOLL SEEN

In response, Nicaragua is using the U.S. presence and alleged threats of war to build up its army even more and to make frequent forays over the Honduran border to distract attention from its own growing political and economic problems. This brinkmanship as many see it, can lead only to war.

Besides the tragic human toll of such a confrontation, there clearly would be economic and political casualties as well. Honduras is the second-poorest nation in this hemisphere, after Haiti, and its economy can ill afford the effects of increased uncertainty, let alone the increased expenses of bankrolling a war. Just as worrisome is the effect of heightened militarization on the fledgling democratic government that took over last January after a decade of military rule.

To be sure, some people here, including the military, think a war is necessary because, they say, Honduras and the rest of Central America will never have peace with the Sandinists' Marxist government in nearby Nicaragua. But military experts here think that certain ranking officers also are eager for battle because it would greatly strengthen the army's hand. The civilian government already is being hampered in its efforts to find a political solution by the army's race to fortify borders.

"The higher up you go in this army, the more conservative you get," says a former army officer who is still very close to the military. "And the guys at the top want a war with U.S. help, because they aren't ready to go back to the barracks yet."

Like some other countries in this region, Honduras has a history of on-again, off-again military rule. In the 161 years since it became independent from Spain, Honduras has had 385 armed rebellions, 126 governments and 16 constitutions. But unlike its neighbors, this desolately beautiful country never cultivated the greedy, land-grabbing oligarchy nor the accompanying right-wing para-military goon squads that seem indigenous to the region. There are wealthy landowners here, of course, but this Ohio-sized nation of 3.7 million people is so wild and underpopulated that just about everyone has remained poor.

Therefore, there wasn't the same violent backlash by landowners here as in El Salvador when redistribution of mostly fallow lands was started back in 1973. Although only about 43,000 of the expected 150,000 families received land before the program fizzled out, "it's one of the things that has kep violence away from Honduras by lowering their pressure cooker," says Manuel Acosta Bonilla, a former treasury and economy minister. The other factor, he says, is the development of trade unions, which are among the strongest in the region.

So, Honduras seemed blessed, in a backward sort of way, when the lid started to blow in Central America, first with the 1979 Sandinist revolution in Nicaragua, then with escalating guerrilla wars in El Salvador and Guatemala. John Negroponte, the U.S. ambassador here, says the generals then in power looked the other way as guerrillas used Honduras to transport guns and supplies to El Salvador from Nicaragua across borders that he calls "sieve-like" (the Sandanists have repeatedly denied aiding the Salvadoran rebels). Mr. Negroponte says there was a "tacit understanding" by the Honduran government that all would remain peaceful here in exchange for unmolested passage by the guerrillas.

All that changed, however, when President Roberto Suazo Cordova was installed last January to replace the military government. The Honduran army started cracking down along the Nicaraguan and Salvadoran borders, presumably at U.S. insistence, and also helped the Salvadoran army in a sweep against rebels in the northeastern sector of that country. Soon after, rebels blew out part of a power station that left much of Tegucigalpa without electricity for 48 hours, and police started finding rebel "safe houses" full of guns, ammunition and leftist literature.

A Western diplomat here says the rise in urban terrorism is clearly a response to the Honduran army's new tough-guy approach. He says the guerrillas who used to have free transit through Honduras now are retaliating for the curtailment of their movements. The literature found in the safe houses indicates that the terrorists are "imported, not locally grown," the diplomat says. "These guys are trying to start a shooting war inside Honduras to destabilize it. They are well organized, sophisticated and dangerous as hell."

FEARFUL POPULACE

Whatever their aim, the terrorists have rattled people here. A mother of five who lives in San Pedro Sula shakes her head with relief that her daughter just left to study at a university in Florida. A young manager of a plastics plant in the north says he has just come back from Panama, where he made a "big" withdrawal from his dollar account. "It's all in here," he says, hugging a light-brown attache case. "Two tickets to New Orleans for my wife and son. And money—just in case. I guess we are getting a little scared."

It's even worse down by the Nicaraguan border. In Palo Verde, a tiny mountain hamlet of thatched mud huts and hungry-looking dogs, the sounds of trucks rumbling through Santo Tomas on the Nicaraguan side waft back over. Mercedes Madira says she woke up a few Saturdays ago to the crash of shells coming over from the Nicaraguan side at about 6 a.m. A bit later, she says, about 30 Nicaraguan soldiers charged into the village and kidnapped a resident.

"This happens all the time," she says in a toothless spray of Spanish. "We can't work, we can't eat and we can't live like this because we're scared. Something has to be done."

DIFFERING PERCEPTIONS

Both sides in the conflict are reacting to sharply differing perceptions. Honduras and the U.S. see a Nicaragua with about 28,000 full-time soldiers and up to 80,000 reserve militia, compared with Honduras's 17,000-man force. Nicaragua will spend about $125 million on defense this year, against Honduras's 1982 defense budget of $45 million. Nicaragua also has an estimated 2,000 Cuban and East European military advisers. And, according to Honduras and the U.S., it is hellbent on exporting its own brand of Marxism to the rest of Central America.

The Sandinists, on the other hand, see an ever-growing and ominous U.S. presence here. U.S. military assistance to Honduras doubled this year to $20.6 million, and the Reagan administration has asked Congress for $21 million for the expanded landing strips. The embassy here now has about 120 employees, inordinately large for a country this size. (An embassy insider says the departments that have increased the most are the Agency for International Development and the Central Intelligence Agency.) The 40 U.S. military "trainers," as the embassy calls them, are supplemented regularly with extras, and earlier this year, their numbers reached 96—far more than in El Salvador.

But what really agitates the Sandinists is the rumor of an impending invasion. It has been reported that President Reagan approved $19 million for a covert CIA operation to train an anti-Sandinist group to invade Nicaragua, although Carlos Flores Facusse, the minister to the Honduran president, denies that any counterrevolutionaries are at work inside Honduras. But well-placed Honduran and U.S. sources here keep whispering about a November or December invasion, and Ambassador Negroponte refuses point-blank to confirm or deny that the U.S. is financing anti-Sandinists in Honduras.

BORDER RAIDS LIKELY

But the former army officer says the 2,500 or so counterrevolutionaries said to be in Honduras are too few to invade Nicaragua. What they can do, he says, is to harass the Sandinists with border raids, as a group did recently in Choluteca Province. They

claimed that 35 people were killed or wounded in the Nicaraguan town of San Francisco del Norte.

He says high-ranking Honduran army officers have told him that the plan is to keep Nicaragua feeling so threatened that it comes down even harder on the growing internal opposition. In the most recent outburst there, at least three people were killed in a demonstration in the town of Masaya. The more repressive the Sandinists become, the greater the opposition, the former officer says. First you destabilize the Nicaraguans, then you get them to come charging over the border to divert attention from internal problems, and then you ask for U.S. troops to help, he says. (Gen. Gustavo Alvarez Martinez, the head of the Honduran armed forces has said he welcomes U.S. intervention if there isn't any other way to defend his country.)

While the U.S. embassy here declines to comment on the plan. Tomas Borge Martinez, Nicaragua's interior minister, recently said "a real state of war" exists along the Honduran border. And Benjamin Villaneuva, an economist here, believes that the military is trying to prepare Honduras psychologically for a war that he says the Nicaraguans are trying to provoke. He says it's just like 1969, when Honduras fought El Salvador over a soccer game. "I hear the same sort of patriotic stuff on the radio about we have to defend our freedom and liberty," he adds.

But Mr. Acosta Bonilla, the former minister, still sees options other than war. "Let's assume the Sandinistas are using the alleged presence of counterrevolutionaries to build up their army," he says. "Then why not go looking for them, kick them out if they are here, and get rid of Nicaragua's excuse for belligerence? Then we could see if they are sincere about trying to improve relations."

PEACE PLAN OFFERED

The Honduran government apparently tried that last March, when Foreign Minister Edgardo Paz Barnica introduced a six-point peace plan at the Organization of American States meeting in Washington. The plan called for regional disarmament and joint border patrols, among other things. Mr. Paz Barnica says that he got "good response" from other South American countries but that Nicaragua said it wanted a bilateral, not international, accord. (The Nicaraguan ambassador here, Guillermo Suarez Rivas, stresses, however, that his country wants to improve relations.) So far, nothing has come of the initiative.

A leading newspaper editor here says the government didn't push very hard for the peace initiative because it is afraid to annoy the army, "considering that Gen. Alvarez has already gone to war against Nicaragua," he says, with a wry smile. He thinks that the U.S. has a two-fisted, seemingly contradictory policy of pushing for democratic elections while shoring up the military—the result, he adds, of an incoherent foreign policy for the region. And this emphasis on the military, he believes, is hampering the transition to democratic rule in Honduras. "I think this civilian government doesn't want war, but I think it's powerless to do anything because the army and U.S. are pushing us into it," he says.

All this uncertainty is helping to squeeze the last gasps out of an already-ailing Honduran economy. Hit with lower prices for its main agricultural exports, a practically nonstop flight of capital out of the country and an almost-total cutoff in foreign credit, the gross domestic product will probably decline this year. Bankruptcies are rising, about 15% of the population is out of work, and Mr. Villanueva, the economist, sees little hope of attracting desperately needed foreign capital with the threat of war hanging over Honduras. "We can hardly survive in peace," he says, "but a war would be the end of us."

PRESS RELEASE ISSUED BY THE EMBASSIES OF VENEZUELA AND MEXICO IN WASHINGTON

The Embassy of Venezuela and Mexico in Washington inform that Luis Herrera Campins, President of Venezuela, and Jose Lopez Portillo, President of Mexico, have sent letters, jointly signed, to the President of the United States of America, Ronald Reagan, to the President of Honduras, Roberto Suazo Cordova, and to the Coordinator of the Junta for National Reconstruction of Nicaragua, Commandant Daniel Ortega, concerning the deterioration of Central America's situation.

In their letters the two Latin American Presidents emphasize the seriousness of the recent events that have taken place between Honduras and Nicaragua. The heads of state of Venezuela and Mexico also have reference to the need of jointly exploring the paths that are still open in order to stop the actual and worrying escalation, the increasing tensions and the general and dangerous expectations generated from its outcome.

In Washington, Marcial Perez-Chiriboga, Ambassador of Venezuela, and Bernardo Sepulveda, Ambassador of Mexico, delivered today the letter addressed to President Reagan.

WASHINGTON, D.C., *September 15, 1982.*●

RILEY CHILDERS, A TRUE PUBLIC SERVANT

● Mr. BAUCUS. Mr. President, I deeply believe there is no measure of success greater than the measure of service to your fellow man and the public good. I invite the Senate's attention to a Montanan who has, indeed, achieved a fair measure of success over a very productive life.

At the beginning of last month, Riley Childers retired as executive vice president of the Montana Associated Utilities (MAU) and executive vice president of the Montana Telephone Association of Independent Co.

Riley had been working on behalf of Montana farmers and rural families long before he joined MAU in 1963. Indeed, I understand that even while he was still in high school, he spent long hours working to pull together an electric cooperative for his home town, Galata.

I doubt if all Members of the Senate understand just how important rural cooperatives have been to many areas of the country. These days we take for granted services that only a few years ago only a few people, mostly city people, were able to have. The rural electrification movement meant not just access to electricity for rural Americans, but, in truth, access to a whole new way of life.

It meant freeing housewives from washing the clothes by hand and freeing farm families from poverty and bare subsistence. The electricity that had been reserved for city-based industry was, with the rural cooperative movement, harnessed to pump the water that irrigates thousands of family farms.

Land that could produce little or nothing now produced much. This enriched the whole country and has helped feed the world. It is no exaggeration to compare this achievement to the great irrigation network of the Romans and the grain storage system of the Egyptians.

In all of these cases, a tremendous engineering feat accompanied a tremendous social change. The electric cooperative movement enabled the American family farms to succeed in the 20th century, and it has enabled millions of people throughout the world to avoid starvation.

So, when I say Riley Childers has succeeded in a life of public service, I mean it in the truest sense. Since his high school effort in 1938 he has worked to build today's complex network of family farms connected to one another and to the new power of the electric age. And it is this network that produces a living for these families and food for millions of families more.

Mr. President, Marty Erickson, editor of the Montana Rural Electric News, wrote an article in its August issue that eloquently expresses the dedication and joy of Riley's life and service. With gratitude to Riley for this service, I ask that this article be printed in the RECORD at the conclusion of my remarks as a small tribute of the Nation's gratitude for Riley's work and for the great service given our country by the builders of America's rural cooperative network.

The article follows:

FROM THE EDITOR'S NOTEBOOK . . .

I only wrote one speech for Riley Childers, and then he didn't use it. It was shortly after I came on board as editor of what was then the Montana Rural Electric News. I wrote the speech in my style which wasn't necessarily Riley's style.

Riley had his own unique style.

Coming back to Montana from the big city of Seattle and a job in corporate public relations, it took me a while to readjust to that good old Montana down home twang.

Riley never got away from it. It served him well.

His roots were in the Hi Line country not far from the Sweetgrass Hills. Windy, arid, rutted-road country. You could almost always count on the wind to dry up the promise of a wet spring. Next year country.

Galata is 10 miles south of the home place. Once a major cattle shipping point on the Great Northern Railroad, its glory dwindled down through the years to grandiose reminiscences of 50 years ago. The town dried up but not the spirit of the people. Stubborn, hard working, always taking one more rock out of the field people.

The graduating class of 1938 at Galata High School saw Riley Childers as valedicto-

rian. The purple velvet-covered graduation certificate listed the names of all four seniors that year. Riley was surprised when he looked at it a couple of weeks ago. He was sure there had been six or seven students in the class.

That was the year he began a life long involvement with cooperatives. While still a senior in high school, he began knocking on rural doors to gather support for organizing a rural electric cooperative.

He put in 20 years (1940-1960) on the Galata Union Elevator Board. In 1944 he was appointed to a rural electric cooperative feasibility study board. In 1945 he became a charter member of the board of directors of Marias River Electric Cooperative in Shelby and served on the board until 1950.

Another feasibility study and more organizational work—this time for the rural telephones—led to the organization of Northern Telephone Cooperative in Sunburst. He helped them obtain their charter in 1954 and served as board chairman until 1957.

And so it went—organizing, serving on the board of this cooperative and that cooperative—a lifetime involvement. Secretary-treasurer of the cooperative oil station in Devon, board member of the Galata Cooperative, helped organize and served as executive secretary of the Montana Council of Cooperatives, MAU. Most of it is in the books—on the record.

What is not on the record is Riley Childers the person.

Riley the music lover who played (and played well) the piano, organ, guitar and mouth harp. He sang with a passable baritone voice through the years when his group had a gig at a country dance. A couple of years ago we put together the Riley Childers' Song Book—the profit from the sales went to ACRE, the political action group for rural electric cooperatives.

Riley the father and grandfather whose grandchildren wrote and sang a song for his retirement party.

Riley the farmer-rancher who sang "The Green, Green Grass of Home" maybe because there were many years when the home place withered under the high plains sun, when the green, green grass was last year's memory.

Riley the spokesman for cooperatives who knew everybody and his brother in government, agriculture, education—uptown people, down home folks—and yet was surprised at the turnout of his friends at his retirement party.

And, last, but maybe most important from my viewpoint—Riley the boss who allowed me the freedom, the latitude to do this magazine my way. He sometimes questioned the miles I travel to interview people, but accepted that it just couldn't be done over the telephone. It is a matter of the human element—the land and the people—and Riley is a part of both. I grew because I was allowed to grow. Thank you, Riley.

Keep your guitar in tune.●

ANNIVERSARY OF NIGERIAN INDEPENDENCE

● Mr. KENNEDY. Mr. President, this year October 1, the 22d anniversary of Nigeria's independence from colonial rule, is a special day for that country and for its friends who recognize its achievements, its promise, and its continuing importance to the United States.

For the first time the Federal Government is holding its official celebrations in the new capital now being built in Abuja, in the center of the country. Honoring a commitment made in 1976 by its military predecessors, the present civilian democracy, under the leadership of President Shehu Sagari, has continued work on that capital.

Nigeria's decision to move its capital from Lagos on the coast to Abuja in the interior represents a deliberate step to strengthen the nation. Other new capitals as far back as Washington, D.C., were conceived with the same goal in mind. By moving the capital to the country's geographic center, the National Government will be brought within easy reach of greater numbers of Nigerians. For that reason—and because of the detailed research around the world which accompanied this decision—Nigerians hope to avoid the pitfalls that have beset other countries which have moved their capitals.

The same kind of systematic international study which led to Nigeria's decision on its capital, led also to its previous critical decision on the constitution of the Second Nigerian Republic. We Americans can take pride that Nigerians chose a constitution which bears strong resemblance to our own. That similarity reflects the Nigerians' belief that they share with the United States many of the same challenges of size, complexity, and diversity. However, in one of several differences, Nigeria's Constitution provides for 4-year terms for all its legislators, Federal and state, as well as for the President and state governors.

A year from today Nigeria will be inaugurating the victors chosen in the first elections held, since military rule, under totally civilian auspices. In a continent where skeptics point to the small number of states with free elections and more than one party, we cannot underestimate the importance of vibrant, multiparty democracy in Nigeria which governs over 80 million people, one-quarter of Africa's population.

Nigerians do not see their democracy as positioned on one side or the other of an East-West ideological struggle, just as they have never supported casting Africa's problems into an East-West mold. From our perspective, the United States has a far greater interest in Nigeria's commitment to freedom and democracy than in Nigeria's siding with us on a particular aspect of the East-West dispute. That commitment will remain important not only in its own right, but as an essential contribution to stability in Nigeria and throughout Africa. Nigeria is of great importance in that continent's struggle to gain independence for Namibia, an end to the abhorrent racist system of apartheid in South Africa, and sovereignty and liberty for all nations on the African continent.

We in the United States have much in common with Nigeria and can have more in common in the years ahead, developing a strong and close relationship founded on mutual respect. But the way to achieve that is neither to take Nigerians for granted nor to seek to enter them on "our" side of a polarized ledger. The attitude of the present administration reveals both of those characteristics, thus eroding the good will among Nigerians that is born of the wide range of attitudes and interests they share with the people of the United States.

As we congratulate our Nigerian friends on the 22d anniversary of their independence, let us resolve to work closely with them in pursuit of freedom, economic progress and social justice for all peoples in Africa and throughout the world.●

OIL AND GAS LEASING IN WILDERNESS

● Mr. KENNEDY. Mr. President, for more than a year, the integrity of our fragile and irreplaceable wilderness areas has been threatened by Secretary of the Interior James Watt's unprecedented policy of opening wilderness areas to oil and gas leasing and development. These areas contain less than 2 percent of the potentially recoverable oil and gas in the United States. Yet Secretary Watt says that is where we ought to drill.

Wilderness protection legislation, which would prevent the senseless destruction of wilderness encouraged by Secretary Watt, has passed the House of Representatives by an overwhelming margin. Similar legislation pending in the Senate has 52 cosponsors, including myself. The broad support for this legislation is further illustrated by the following editorials, which are but a handful of the endorsements which have appeared in newspapers across the country. I request that these editorials be printed in the CONGRESSIONAL RECORD, and urge my colleagues in the Senate to pass S. 2801, the Wilderness Protection Act of 1982, before the Congress adjourns in December.

The editorials follow:

[From the Houston Post, Aug. 18, 1982]

WILDERNESS SHIELD

The House has overwhelmingly approved a bill that puts designated wilderness areas off-limits to leasing for oil, natural gas and some minerals—except in a national emergency. Those last five words mark the difference between the House position and that of Interior Secretary James Watt. Watt took office with the expressed determination to explore and exploit wilderness acreage immediately and as rapidly as possible, whether or not the need was apparent.

The original Wilderness Act of 1964 allowed leasing until 1984. Watt acted on the

premise that Congress had mandated leasing by 1984. The original intent of the act was permission, not compulsion. But under his own compelling drive, Watt announced his plan to reverse the policy, despite the sharp protests of both Republican and Democratic congressmen.

Now the House had made its opposition specific. The bipartisan bill sent to the Senate on a 340-58 vote would eliminate the provision allowing continued lease applications until 1984. It would ban all further leasing for oil, natural gas, oil shale, coal, phosphate, potassium and sulfur and for geothermal facilities. The bill would not change the provision that hardrock prospecting and mining for gold, silver, copper, cobalt and lead may go on until 1984.

By a margin of more than 2 to 1, the House also defeated an amendment that would have allowed the use of explosives for seismic testing in the wilderness. The House measure, which would affect about 1,000 pending applications on 3 million acres of wilderness, is expected to clear the Senate. Congress is to be commended for making the wilderness sacrosanct except in "an urgent national emergency." This is a proper use of priorities.

[From the News & Observer, Raleigh, N.C., Aug. 24, 1982]

WATT LOST IN THE WILDERNESS

A poetic passage in the Bible refers to the mountains leaping about and clapping their hands for joy. Figuratively, the North Carolina mountains could well join environmentalists in rejoicing. The occasion: a resounding House defeat for Interior Secretary James G. Watt's proposal for oil and gas drilling in the nation's wilderness areas.

The recent 340-to-58 House vote has barred extensive exploratory drilling in 34.4 million acres unless Congress and the president agree to open these areas again. In this vote, the House responded to clear voter concern over Watt's development policies. It did not escape congressmen's attention, in an election year, that a recent Lou Harris poll found that 85 percent of Americans surveyed favor strong enforcement of environmental laws.

Among the estimated 1,000 applications from industry for oil, gas and mineral leases are several that would permit exploration and drilling in the wilderness of Linville Gorge, in the Shining Rock area in Haywood County and in the Joyce Kilmer-Slickrock forest areas in Western North Carolina and Eastern Tennessee. By sustaining the House vote, the Senate could protect these environmentally sensitive areas from everything except the non-destructive gathering of information on mineral deposits. It would be in the interest of their state for Senators Helms and East to vote to sustain the House position.

Watt saw this House train gathering speed and got off the track in the nick of time. He took no position officially on the merits of the bill. But it's clear that members saw through Watt's earlier maneuver to prevent leasing only until the year 2000. That would have opened all wilderness areas thereafter for exploitation. Many western congressmen who are regarded as Watt supporters deserted him on this issue.

This legislative victory offers impressive evidence that public concern for the environment remains high and that environmental groups have their lobbying act together. How can the White House now doubt that Watt is a growing political liability? The country will be better off when the administration gets out of the wilderness and Watt gets out of the administration.

[From Newsday, Long Island, N.Y. Aug. 21, 1982]

SAVING WILDERNESS FROM WATT

Wilderness . . . is hereby recognized as an area where the earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain.

When those words were written into the Wilderness Act 18 years ago, Congress intended to keep a part of the land "forever wild." In officially designated wilderness areas, which now make up about 1 per cent of the lower 48 states, human visitors aren't even allowed to travel by trail bike or snowmobile, so as not to disturb the permanent residents—animals and plants.

So it's hardly surprising that Congress got upset when Interior Secretary James Watt, was ready to let an oil exploration company set off 5,700 charges containing 270,000 pounds of explosives in a Montana wilderness last year. That application is one of more than 1,000 awaiting action before the "window" for prospecting closes on Dec. 31, 1983.

Even though the Wilderness Act allows the interior secretary to grant mineral leases, only a handful had been issued until Watt came along. Given the vehement opposition he faced, Watt agreed that Congress should have an opportunity to change the law. Last week the House did its part, by a 340-to-58 vote. Also included in the House's proposed ban on exploration and development are millions of acres either under consideration or recommended for wilderness designation. The president would be able to open wilderness lands to leasing, but only by declaring an overwhelming national need and only with the consent of Congress.

Banning wilderness exploitation may not be as popular in the Republican-controlled Senate, but prodevelopment members should take note that most House Republicans supported the ban. Of the Long Islanders, only Gregory Carman (R-Farmingdale) voted against it, and he's giving up his seat.

Keeping some lands in their natural state for future generations to enjoy is important even to millions of Americans who may never set foot in a wilderness area. The Senate would be prudent to recognize that and send the prospectors elsewhere.

[From the Great Falls Tribune, Great Falls, Mont., Aug. 27, 1982]

A GROWING CHORUS ON WATT

Idaho Republican James McClure may hold the key to allowing timely Senate consideration of wilderness leasing legislation, but Montana's Sen. John Melcher can play an important role in the matter, too.

First Melcher needs to declare his support for the bill, introduced by fellow Democrat and fellow member of the Senate Energy Commitee, Henry Jackson of Washington.

Then, Melcher can join the chorus of protest that threatens to hamper Interior Secretary James Watt in his effort to lease in the nation's wilderness areas.

Already at least 51 senators have joined Jackson as co-sponsors of his bill. That's more than half of a Republican-dominated Senate. An identical measure passed the House earlier this month by an impressive 340-58 vote. Clearly, the sentiment in Congress is that Watt needs to be reined in on his mineral leasing policies in wilderness and wilderness potential areas.

After pressure from the House last year, Watt agreed not to issue any more oil and gas leases in wilderness until the end of this year. But under the 1964 Wilderness Act, protected lands are open to leasing until the end of 1983. When his "moratorium" ends, Watt would have a year to issue leases; and there's every likelihood he would act with dispatch. There now are 1,000 lease applications pending on wilderness lands.

In past years only a handful of leases was issued under the Wilderness Act allowances; those cases were scrutinized closely. But Watt has insisted that federal agencies have no discretion in denying lease applications solely on the basis they involved wilderness.

As he does with many of his public lands policies, Watt insists he is acting in the nation's best energy-security interests. However, wilderness areas at most would contain between 1 and 4 percent of the total oil and gas reserves in the country. If the United States is ever reduced to dependency on that energy contribution, it will indeed be in severe straits—probably as a result of shortsighted energy policies that disregard the potential of non-traditional, renewable energy supplies. The bill does let the president open areas for leasing and exploration if he or she declares an overwhelming national need and Congress consents.

Idaho's McClure chairs the Senate Energy Committee and is known for not letting any wilderness measures through the current Congress. He would not have to work hard to bottle the wilderness leasing bill up in committee. Remaining congressional days are short this year.

Yet that's no excuse for Montana senators, who hail from a state with some of the premier wilderness areas in the country, to withhold support for the measure. Sen. Max Baucus is one of the 51 co-sponsors. Melcher, as a western Democrat who sits on the very committee that has jurisdiction over the wilderness bill, ought to join in and help send an important message to Watt.

[From the Great Falls Tribune, Great Falls, Mont., Aug. 18, 1982]

HOUSE WILDERNESS VOTE WAS NO SURPRISE

Some news reports called the recent House approval of a measure forbidding the sale of oil and gas leases in wilderness areas "surprisingly lopsided."

The vote, however was no surprise—if you remember that most Americans, as has been indicated steadily in nationwide polls, don't think the environment should be sacrificed unnecessarily and do support the wilderness system.

And it was no surprise if you recall the storm Secretary of Interior James Watt caused when he announced that federal agencies which control wilderness areas had no discretion in denying lease applications solely on the ground they involved wilderness.

Under the 1964 Wilderness Act, mining and mineral exploration are allowed in federally protected wilderness areas until 1984. After then, no new leases can be issued but claims filed before the deadline can be pursued.

In the years since the act was passed, only a handful of leases have been issued. Watt turned that policy a0 wilderness leases. As a result, a moratorium was placed on issuing new leases until the end of the current congressional session.

Finally, the House vote was no surprise when it is noted that the probable amount of oil and gas in wilderness areas in pitifully small—somewhere between 1 and 4 percent of the total oil and gas reserves in the country.

Even conservative columnist George Will has debunked the energy-national security argument that habitually is presented in favor of allowing exploration in wilderness areas. In a recent Newsweek column, he said: "There are 80 million acres of designated wilderness, 56 million of them in Alaska. Only 1.2 percent of the 'lower 48' states is wilderness; only 4 percent could ever be so designated. Surely the nation's vitality and security are not so marginal as to depend on that 4 percent . . . It would be a pity to damage an irreplaceable asset for a few weeks' worth of oil.

Indeed, last week's House vote was lopsided and it was bipartisan. Of the Republicans who voted on the measure, nearly half favored it in the 340-58 tally. While Montana's Pat Williams supported the bill eastern district Republican Ron Marlenee unfortunately opposed it. He said the bill would be a negative influence on further consideration of wilderness. And he argued the nation needed an inventory process to know what there is in wilderness areas, and planning and study areas.

Williams points out, with reason, that once certain areas are explored, the very qualities that make them candidates for wilderness have been destroyed.

Under the bill the House approved, the president can open wilderness areas for exploration, if there is a national emergency and additional mineral exploration is needed. But the president must declare an overwhelming national need; and he must get the consent of Congress.

Oil industry spokesmen said the bill's passage sent a clear signal to oil exporting countries that the United States is not serious about developing its own energy sources.

That's not quite the case. Under the Reagan administration, the energy message this country has sent the rest of the world is that we will continue to be dependent on nonrenewable energy sources like oil, rather than develop alternative, renewable sources.

Instead, House passage of the bill sent the president and Secretary Watt a clear signal that there are values in wilderness which are much greater than the dollars and cents that come from potential energy development.

[From the Chicago Sun-Times, Aug. 17, 1982]

SCORE ONE FOR WILDERNESS

Wilderness 1, Watt 0.

That's a bit of an overstatement, of course. The Senate has yet to act on the strong wilderness protection bill that passed the House so overwhelmingly last week.

Yet the House's action—approving the bill, unamended, by 340-58—is a powerful message to Interior Secretary James G. Watt that lawmakers won't swallow his deceptions about oil and gas development in protected federal lands. It further shows they won't hestitate to exercise their legal right to reaffirm what protection is all about.

Watt's record on wilderness is wretched. Though he refers to such lands as if they were locked up from energy exploration, the Wilderness Act of 1964 specifically allows prospecting and other activities to determine the extent of mineral and other resources—and orders Interior to conduct such surveys.

But the key lies in how they're done. Watt recommended last year that oil companies be allowed to lease wider areas for drilling, at a pace sharply faster than under previous administrations, and to set off research blasts in some. (In one case last year, an exploration company proposed detonating some 270,000 pounds of explosives in Montana's pristine Bob Marshall Wilderness Area.)

Those activities just aren't consistent with Congress' declaration that designated wilderness continue "as an area where the earth and its community of life are untrammeled by man." And, after strong congressional opposition, Watt said he's put off pending mineral lease applications until the end of this year, to let the lawmakers speak.

Speak they did, shouting no. Still, they showed they're not simple obstructionists. The measure they approved would let the President open lands for mineral exploration—if he declares an overwhelming national need and Congress concurs. Significantly, the bill protects land that is being considered for formal wilderness designation as well as already-protected lands.

The bill may face tougher going in the Republican-controlled Senate, where Watt has significant support on the key Energy and Natural Resources Committee. But the House has sent a reminder—to Watt, President Reagan and the Senate—that America's commitment to conservation must not weaken. We hope the recipients are listening.

[From the Chicago Sun-Times, Sept 13, 1982]

STAND FIRM ON WILDERNESS PROTECTION

Illinoisans can be proud that both their senators—Charles H. Percy (R) and Alan J. Dixon (D)—have signed on as co-sponsors of a strong wilderness-protection measure.

They and 52 other co-sponsors have given a strong signal to the Reagan administration that the development plans of Interior Secretary James G. Watt must be weighted carefully against environmental damage. They also seconded a strong vote in the House, where the measure passed 340-58 last month.

But all that will come to naught if the measure is amended to limit federal wilderness designations to areas selected by a specific deadline. The House wisely rejected such a measure—and that threatens an impasse if the Senate OKs the amendment.

That could be disastrous: Watt has promised to hold off on development plans only until Congress adjourns.

Percy, Dixon and their colleagues should stand firm for the unamended bill.

[From the Atlanta Constitution/Journal, Sept. 11, 1982]

SENATE MUST ACT TO STOP WATT

The U.S. Senate should act quickly to keep oil and natural-gas drillers out of America's beautiful national wilderness areas.

Secretary of the Interior James Watt wants to let exploratory drilling rigs spout in the national wildernesses, including Georgia's Cohutta Wilderness and three pending wilderness areas in the Chattahoochee National Forest. And he can do so beginning in January, if the Senate doesn't stop him.

A bill is in the offing—S. 2801, the Wilderness Protection Act of 1982. An identical measure was passed last month by the House, 340-58. The Senate bill was introduced by Sen. Henry Jackson, D-Wash., with 53 co-sponsors—but, despite the bill's majority support, its Senate passage faces major perils.

Opponents of the bill—those who, like Watt, want private industry to have a free hand in despoiling and polluting the nation's great treasure of public lands and wildernesses—are expected to try to stall it in committee, and to weaken it with amendments.

Foremost among amendments is an expected effort to attach a "hard release" amendment. "Hard release" is a perfect example of Watt's destructive tendencies. It would bar additions to the national wilderness systems. The wilderness areas we have now would be all we would ever have. No more, forever.

Even lands that currently are being studied would be released for private uses.

Time is working against the effort to block Watt. Congressional elections are Nov. 2, and Congress plans to adjourn no later than mid-October. If the Senate doesn't act before then, there would be no time for a second attempt at legislation. Watt would be free to start raping our wildernesses, come the first of the year.

An argument, which ought to be compelling enough in its own right, can be made against leasing wildernesses for oil and gas drilling simply on the grounds of natural preservation. But for those like Watt who only understand dollars, private and public studies show that only about 1 percent of our potential onshore oil and natural gas reserves are in wilderness areas, a trivial economic advantage—if any.

The Wilderness Protection Act of 1982 permits the president and Congress to open wilderness areas to exploration in the event of a national emergency. America's Wilderness areas—a precious heritage for the ages—should be the last lands, not the first, destroyed in search of oil and natural gas.

[From the Los Angeles Times, Aug. 16, 1982]

THE MESSAGE GOES OUT

The word is out Democrats and Republicans alike have joined to send an overwhelming message to the Administration in general and to the Department of the Interior in particular: The public lands deserve better.

By a margin of 340 to 58, with 128 Republicans among the majority, the House of Representatives voted to ban oil and gas leasing in federally protected wilderness areas in the lower 48. The vote flies in the face of the Administration's current drive to develop as much as possible as soon as possible—and never mind either conservation or economic logic. The bill itself is not radical. What it would do is shorten the 20-year period provided by the Wilderness Act of 1964 for the distribution of mineral leases by one year—not much, but enough to limit the substantial destructive abilities of Secretary of the Interior James G. Watt.

Although the measure passed by the House would cover 36.2 million acres, it was a compromise. As such, it would leave that same land open to hard-rock mining while neglecting additional wilderness areas in Alaska and land under study for wilderness designation in the lower 48 altogether. Until Dec. 31, 1983, when the Wilderness Act halts leasing on wilderness lands (but allows the development of claims already granted), Watt is free to lease to his heart's content on these unprotected lands.

Nonetheless, opponents of the bill raise the familiar cry that it would "lock up" resources. They ignore the bill's provision to allow the President, with the consent of Congress, to open the land to mineral exploration if there is "urgent national need."

And they ignore the 137 million acres currently under lease in the lower 48, the additional 100 million acres that are available for leasing, and the 1 billion acres that are to be opened to offshore drilling in the next five years.

Given these facts, the mild nature of the bill and this Administration's reckless plans for the exploitation of natural resources, the Senate must now follow the House's lead. Americans, of whatever political stripe, must show their concern for the little wilderness that is left.

[From the Lewiston Tribune, Aug. 10, 1982]

A STERN WARNING ON WILDERNESS

The U.S. House of Representatives has told Secretary of the Interior James Watt, in a loud voice, to leave the wilderness areas alone. By a vote of 340-58, the House Thursday disapproved Watt's move to open designated wilderness to mineral exploration. It was a victory for conservation and a rebuff to the administration's pell-mell rush to get the federal government out of the business of protecting the American heritage.

The president and Secretary Watt had better take this vote seriously. It means the American people want wilderness preserved. It also suggests that the administration had better rethink its policy of selling off the public lands and quickly leasing billions of acres for offshore drilling, as it is planning to do. If Thursday's House vote is a fair indicator of national sentiment, the administration will have little public support for those policies. The people evidently want their national forests and grasslands, as well as their wilderness areas, kept intact and they see no economic logic in selling oil and gas leases in such massive numbers that they depress the market.

An example of this reckless waste: Leases on the National Petroleum Reserve on Alaska's North Slope raised only $70 million this year instead of the half billion the leases were worth and would have brought into the treasury had they been sold prudently over a period of time. In Wyoming, the government is selling coal mining leases for almost nothing because there is no competition; the country is in the middle of a coal glut. Then why not wait until prices are better and the leases can be sold for what they are worth? Because the administration's policy has been to sell these public properties just to get rid of them.

The House has now told the administration, in effect, that it had better slow down, that the people are not willing to squander this patrimony. And if the administration doesn't listen, it will find itself in deep trouble.

[From the Idahonian, Aug. 25, 1982]

WILDERNESS OIL NOT NEEDED

Moscow and Pullman residents need look only as far as their nearest gas pump to realize that there's no gasoline shortage. That's why Secretary of the Interior James Watt's proposals to open U.S. wilderness areas up to oil and gas exploration and drilling make so little sense.

Gasoline prices have dropped as much as 10 cents a gallon at some stations on the Palouse in recent months, partly because of competition but mainly because of a worldwide petroleum glut. With OPEC in disarray over pricing policies and Mexico hoping the U.S. will buy more of its oil, a steady supply of foreign oil looks almost certain. At the same time, many experts say this country has ample mineral and gas reserves if it taps those areas already identified and leased by energy companies.

Why, then, the rush to drill in protected wilderness areas and wilderness study areas?

That's what a majority of members of Congress are asking, too. The House on Aug. 12 passed a bill 340-58 to remove that land—some 34 million acres—from mineral leasing.

The Senate is ready to consider the same bill, and despite its support from 51 of 100 senators, its passage isn't assured. That's because it must first get past the Senate Energy and Natural Resources Committee chaired by Idaho's James McClure, who in the past has been a strong supporter of Watt's polices who often shares Watt's philosophy on land and energy issues.

McClure, whose state contains some of the largest wilderness areas outside of Alaska, ought to be among the first to realize the folly of opening them up to oil exploration as long as supplies are adequate from elsewhere. He needs to be reminded that his constitutents don't agree with Watt's here today-gone tomorrow approach to resource exploitation.

[From the Boston Globe, July 9, 1982]

TREATING WILDERNESS WITH CIVILITY

Congress is moving slowly toward a rational program for fully indentifying and preserving the nation's remaining wilderness areas. It should avoid pitfalls that threaten to undercut a sensible program arrived at through careful compromise.

The compromise was sparked in part by a plan floated last winter by Interior Secretary James Watt that would have imposed a drilling and mining ban in wilderness for the balance of the century except in cases where the President perceived an overriding national interest in favor of development.

Efforts at compromise were worked out in the House Interior and Insular Affairs Committee, led by Rep. Manuel Lujan (R-N.M.) and Rep. John Seiberling (D-Ohio). It would permit, among other things, some "hard-rock" mineral leasing while protecting wilderness areas from the more damaging impacts of oil and gas development.

The bill does contain a provision allowing a President to reopen wilderness areas for oil and gas development in the case of "urgent national need," but avoids the looser language Watt proposed that would have given wider latitude to a President.

The compromise has won support from environmentalists like the Wilderness Society. The danger is that the bill will be amended either on the floor of the House or in the Senate in ways that would either make development easier or would freeze the amount of identified wilderness land.

The latter of these two dangers is a matter of some concern in New England, where several promising tracts in the White Mountains have not yet achieved wilderness status that would protect not only themselves but neighboring tracts as well.

The principal argument for devloping wilderness areas for their oil and gas potential is that the nation is still dependent on imports, and it makes no sense to exclude potential energy sources from development. Environmentalists counter with studies estimating the potential contribution of wilderness areas at no more than 2 percent of the nation's total energy supply. They suggest that the areas be opened only when all others have been exploited—by which time other sources may have become available or, at any event, new techniques for minimizing the impact of development might offer additional protection to wildernesses.

The Lujan-Seiberling bill is a rational plan for preserving irreplaceable national assests and protecting them from headlong development that would deprive the nation of unique natural treasures. Congress should resist the temptation to squander these assets in search of transitory and proportionally small mineral energy sources.●

SENATOR ROTH COSPONSORS S. 1342

● Mr. ROTH. Mr. President I wish to add my name as a cosponsor of S. 1342.

This legislation sponsored by Senator MELCHER will provide much needed relief to construction workers who currently are unable to deduct their transportation expenses at temporary job sites.

Under present law construction workers who are away from their permanent homes at a temporary job site for more than a year are not permitted a tax deduction for their every-day travel expenses to and from the job site.

To take a typical example: A construction worker has lived and worked in a particular community for many years. He has a home in that community; his children go to school there; he and his wife vote and pay taxes there. Solely because of the nature of the construction industry, construction work becomes temporarily unavailable in the local area. The worker has two choices—he can look for work at distant jobs until work becomes available closer to home, or he can remain unemployed. If he takes work at a distant job, he must either move his family to that job or he can drive to the job each day—often 50 or 60 miles each way—or he can rent a room near the job.

The first option—moving his family to the job—is simply not a realistic option.

Accordingly, the travel expenses are clearly necessary to the conduct of the taxpayer's business—since the worker must incur those expenses if he is to practice his trade. Nevertheless, the IRS has been automatically disallowing these expenses as deductions.

Under this legislation construction workers will be deemed to be temporarily away from home for their first 2 years of employment at any job site more than 15 miles from their home.●

SHIPYARD'S SUCCESS HOLDS OFF RECESSION IN BATH

● Mr. COHEN. Mr. President, perhaps no other defense contractor has as fine, and deserved, a reputation as Bath Iron Works.

The shipbuilding firm, located in Bath, Maine, is known for its record of delivering ships to the Navy "ahead of schedule and under budget." The people of Bath Iron Works can take

great pride in the quality of their workmanship and their record of achievement.

In today's Washington Post, an article discusses the success Bath has had in recent years. The piece, "Shipyard's Success Holds Off Recession in Bath," tells of Bath's strong record of saving taxpayer money and delivering ships to the fleet ahead of the scheduled delivery date.

The result of this excellent record is that the company is growing. It is Maine's largest employer, and its work force has grown from 5,500 to nearly 8,000 since April.

The article details how Bath has achieved success by hard work and pride in craftsmanship. The Navy dictum, "Bath-built is best-built," is one which is well deserved.

I commend the piece to the attention of my colleagues.

The article follows:

SHIPYARD'S SUCCESS HOLDS OFF RECESSION IN BATH

(By Robert M. Knight)

BATH, MAINE.—Hundreds cheered and clapped when USS Klakring slid into the blue water of the Kennebec estuary. For many at last month's launching the ship represented steady employment.

For the shipbuilder, Bath Iron Works, Klakring became the 15th guided missile frigate to be launched since the prototype, USS Oliver Hazard Perry, hit the water in 1977. Eight are still to be constructed before Bath converts from frigate production to what the company hopes will be an ambitious chunk of the U.S. Navy's sophisticated Aegis cruiser program.

Meanwhile, Bath keeps popping out frigates to the rhythm of the descriptive phrase "ahead of schedule and under budget." The 11th frigate, USS Aubrey Fitch, is to be delivered to the Navy Oct. 9, behind a dais that is to support Vice President Bush, among others, and Bath says it, too, will qualify for that testimonial.

"The Fitch will bring the total number of production weeks saved for the taxpayer to 142," Bath spokesman James McGregor says.

No one is providing dollar amounts because Bath's biggest customer, the Navy, doesn't want such numbers open to scrutiny. But before Bath stopped counting, the company was cutting production budgets an average of about $7 million per ship. To the skeptic who might ask if the budgets were too high to begin with, Bath officers say they won the frigate contracts because they bid low enough.

When Beverly Bohen of Napa, Calif., broke a champagne bottle across the bow of USS Klakring in honor of her uncle, World War II hero Thomas Klakring, on Sept. 21, she helped continue a tradition of productivity that Bath Iron Works people say began in the early days of the English colonies. Colonists built the first European ship in North America at Popham Beach, five miles from Bath on the Atlantic Coast. And it was a Bath built yacht that J. P. Morgan was referring to when he said, "if you want to know how much it costs you can't afford it."

John F. Sullivan chief executive officer and chairman of Bath, attributes the company's productivity to modular planning and Yankee pride. Planning takes shape in "preoutfitting" the 16 modules of a frigate on dry land before they are welded together to form a ship. Pride becomes part of the process in the energy and craftsmanship for which New Englanders are known, he says, referring to the Navy dictum, "Bath-built is best-built."

"Large manufacturers in New York or Philadelphia or even Seattle-Boeing devote such a small part of their overall efforts to shipbuilding that they don't get people's attention. Here people have made fortunes in shipbuilding back to the time of the sailing ships so they have a lot of pride. We're saying 'it's you, the people, who are making it work.' We're not saying 'what a great management team,'" says Sullivan, who was credited with making Bath profitable after being installed by the company's parent, Congoleum Corp., in 1975.

Frigate production has been most visible this year. Klakring was the fifth launched at Bath in 1982 and another is expected in December. BIW, Maine's largest private employer, says its employment has risen from 5,500 to nearly 8,000 since April. The company is anxious to finish the FFGs and get on with the cruisers, which are expected to increase employment even more.

In May, the company announced it has been designated, as the second source for the high-technology cruisers supporting RCA's battle-directing AEGIS systems. This so far has resulted in the award to BIW of a $300 million contract to build a single Ticonderoga-class cruiser by 1988.●

NOMINATION OF GARY JONES TO BE UNDERSECRETARY OF THE DEPARTMENT OF EDUCATION

● Mr. KENNEDY. Mr. Chairman, I am opposed to the nomination of Gary Jones to be Undersecretary of the Department of Education. Let me emphasize that I do not take this position easily nor do I base it on simple policy differences. There is no question that I strongly disagree with the policy of this administration toward education and seriously question its commitment to obtaining a quality education for our country's students.

My opposition to Mr. Jones' nomination is based on his proven inadequacy as a decisionmaker and administrator during his tenure as Deputy Undersecretary for Policy and Planning in the Department of Education. He has consistently flouted congressional intent. He has consistently distorted or undermined education legislation. He has consistently exhibited no understanding of the needs and problems of urban school systems.

Mr. Jones was instrumental in developing regulatory changes and enunciating policy differences that undermined legal provisions or violated congressional intent. For example, he helped originate the regulatory changes for the Handicapped Education Act, Public Law 94-142. These changes if they became effective would, in fact, gut the legislation. During the committee hearings, Mr. Jones said that—

In many instances the (handicapped education) law can stand on its own or with little elaboration within regulations.

But without adequate regulations to implement the act, its protections will not be effective.

Mr. Jones has publicly stated that the regulations implementing chapters 1 and 2 of the ECIA were transmitted to Congress as a "courtesy" and that the Department had "learned its lesson" and would not make that "mistake" again. I would say to Mr. Jones that the Department's submission was required by law under the General Education Provisions Act—it was not a "courtesy." The Congress had a legal right to veto the regulations. It exercised that right and must be allowed to do so in the future. Mr. Jones' statements and the attitude they represent are simply unacceptable.

Mr. Jones has made it absolutely clear that he does not understand the needs and problems of the urban school districts. It is equally clear that he does not particularly care about them. He makes the absurd statement—several times—that reducing the amount of money available for these programs will improve the quality of the programs. I cannot support a policymaker who expects local education programs to improve while they are starved for funds. Particularly where that policymaker has no trouble rejecting that same philosophy when it relates to private schools and tuition tax credits.

Put simply, Mr. Jones' view of urban education is one of benign neglect. His attitude to the laws of this land and to congressional intent is one of contempt. I do not believe that Mr. Jones is qualified to be the Undersecretary of Education. I believe our laws would suffer. But more important even than that—I believe our children would suffer because their education would suffer.●

EDUCATION OF THE HANDICAPPED

● Mr. BOSCHWITZ. Mr. President, I wish today to clarify and reiterate a provision in the Senate committee report on the continuing resolution pertaining to section 625 of the Education of the Handicapped Act for regional postsecondary programs for the deaf. The purpose of this provision is twofold: First, to insure that there continues to be four contract awards to programs serving the deaf; and second, that those contract awards receive the same portion of funding as in previous years.

The three initial grantees under the regional education program were the California State University at Northridge (CSUN), the Seattle Community College, and the St. Paul (Minnesota) Technical Vocational School. In 1975,

Delgado College in New Orleans was added. The four original programs: Delgado, CSUN, St. Paul TVI, and Seattle Community College cover the spectrum of types of postsecondary institutions. Delgado is a college, CSUN is a university, St. Paul TVI is a technical vocational institute and Seattle is a community college. These four regional education programs taken together serve a national constituency. Students have been served from every State, including Alaska and Hawaii, the District of Columbia and several territories.

As much as I would like to see that these four programs be guaranteed continued funding I understand the necessity of competition for these contract awards to help insure that the best possible programs are serving deaf students. I am confident that these programs will fare well in a competitive situation.

However, I am concerned that the funding for these contract awards could be diluted if many more awards are made under section 625 and that deaf students would not be as well served if the money is spread too thinly. Therefore, while postsecondary institutions will compete for the contract awards to serve deaf students under section 625 our intent is that four contract awards be made and those four awards receive the same portion of the available funds under section 625 as in fiscal year 1982.

I would like to thank Senators WEICKER and SCHMITT for their help in protecting postsecondary educational opportunities for deaf students. I also would like to ask them if what I have just said corresponds with their intention in including this provision in the committee report?

Mr. WEICKER. Mr. Chairman. As chairman of the Handicapped Subcommittee of the Labor and Human Resources Committee and as a member of the Labor and Human Resources Subcommittee of the Appropriations Committee, I want it made clear that we are seeking to insure that postsecondary educational programs for the deaf under section 625 receive four contract awards in fiscal year 1983 and that those awards for programs that serve the deaf be the same portion of the section 625 funding as in fiscal year 1982.

Mr. SCHMITT. The committee's intention was correctly outlined by my colleagues Senator WEICKER and Senator BOSCHWITZ. While allowing for competitive awards under section 625 of the Education of the Handicapped Act, we want to insure that there continue to be four contract awards to programs serving the deaf and that at least the same amount of money will be spent on the awards that are made.●

STRENGTHENING THE UNITED NATIONS

● Mr. KENNEDY. Mr. President, the 37th session of the United Nations General Assembly convened September 21 in New York. The world body should be playing an increasingly central role as the only forum where rich and poor, East and West, nuclear powers and neutral nations can come together to air their grievances, influence international opinion, and find ways to resolve disputes without resort to force.

This year's General Assembly has before it Secretary General Javier Perez de Cuellar's provocative first report on the United Nations work, which raises extremely important questions about the organization's capacity to keep the peace and serve as a forum for negotiations. The Secretary General believes that we now have potentially better means to solve the problems facing humanity than ever before, but he is concerned over our persistent failure to make adequate use of them. Instead, there is an increasing tendency to resort to confrontation, violence, and war in pursuit of what are perceived as vital interests. The Secretary General sees the world as perilously close to a new international anarchy.

Warning that there now exist enough nuclear weapons to destory life on this planet, the Secretary General calls on United Nations member states not to ignore nuclear protestors, who remind us of the standards and duties set out in the U.N. Charter. He believes we have strayed far from the charter in recent years, and points to serious erosion of the authority and status of world and regional institutions.

Recalling that the U.N. itself was born in the wake of world targedy, the Secretary General urges member governments to make a conscious recommitment to the charter and to work together to strengthen international institutions. He advocates adoption of new and imaginative approaches to the prevention and resolution of conflicts, the protection of human rights, and the promotion of social, and economic development.

Secretary General Perez de Cuellar concludes that our most urgent goal is to reconstruct the charter concept of collective action for peace and security, and to build a United Nations system in which governments can have real confidence.

Mr. President, the Secretary General's summons to all of us to rally once again around the standards of the United Nations Charter is a call which we ignore at our peril. The United Nations deserves America's continuing, wholehearted support. I ask that the full text of the Secretary General's historic report be printed at this point in the RECORD.

The text referred to follows:

REPORT OF THE SECRETARY-GENERAL ON THE WORK OF THE ORGANIZATION

The past year has seen an alarming succession of international crises as well as stalemates on a number of fundamental international issues. The United Nations itself has been unable to play as effective and decisive a role as the Charter certainly envisaged for it. Therefore, in this, my first annual report to the General Assembly, I shall depart from the usual practice of surveying the broad range of the work of the United Nations; instead I shall focus on the central problem of the Organization's capacity to keep the peace and to serve as a form for negotiations. I shall try to analyse its evident difficulties in doing so, difficulties related to conflicts between national aims and Charter goals and to the current tendency to resort to confrontation, violence and even war in pursuit of what are perceived as vital interests, claims or aspirations. The general international divisions and disorder which have characterized the past year have unquestionably made it even more difficult than usual for the Organization to be, as it was intended to be, a centre for harmonizing the actions of nations in the attatinment of common ends.

The problems faced by the United Nations in fulfilling its mission derive in large measure from the difficulties which Governments appear to have in coming to terms, both within and outside the Organization, with the harsh realities of the time in which we live. This question is, of course, highly relevant to the use, misuse or non-use of the United Nations as an instrument for peace and rational change.

I am of the view that we now have potentially better means to solve many of the major problems facing humanity than ever before. For this reason I retain, in the last analysis, a sense of optimism. This basic optimism, however, is tempered by our apparent inability to make adequate use of these means. Instead we sometimes appear still to be in the grip of the dead hand of a less fortunate past. As a result we often lack the vision to differentiate between short-term advantage and long-term progress, between politically expedient positions and the indispensable objective of creating a civilized and peaceful world order. While such attitudes do not affect the validity of the ideals of the Charter, they seriously impair the proper utilization of the machinery of the United Nations for the purposes for which it was set up.

We live today in the presence of a chilling and unprecedented phenomenon. At the peak of world power there exist enough nuclear weapons to destroy life on our planet. It seems evident that nothing worthwhile would survive such a holocaust, and this fact, above all else, contains the nuclear confrontation—for the time being at least.

In the middle level of world power there exist vast quantities of sophisticated, so-called conventional weapons. Indeed we have seen some of them in devastating action this very year. These weapons are, by comparison with those of former times, immensely destructive, and they are actually being used. They are also the objects of a highly profitable international trade.

At yet another level we have the poverty of a vast proportion of the world's population—a deprivation inexplicable in terms either of available resources or of the money and ingenuity spent on armaments and war. We have unsolved but soluble

problems of economic relations, trade, distribution of resources and technology. We have many ideas and plans as to how to meet the growing needs or the large mass of humanity, but somehow such human considerations seem to take second place to the technology and funding of violence and war in the name of national security.

It is for these reasons that our peoples, especially the young, take to the streets in their hundreds of thousands in many parts of the world to proclaim their peaceful protest against the existing situation and their deep fear of the consequences of the arms race and nuclear catastrophe. Who can say that these gentle protesters are wrong or misguided? On the contrary, they recall us to the standards and the duties which we set ourselves in the Charter of the United Nations. The States Members of this Organization should not ignore the significance of what they are trying to say.

What in reality is the role and the capacity of the United Nations in such a world? Our Charter was born of six years of global agony and destruction. I sometimes feel that we now take the Charter far less seriously than did its authors, living as they did in the wake of a world tragedy. I believe therefore that an important first step would be a conscious recommitment by Governments to the Charter.

Certainly we have strayed far from the Charter in recent years. Governments that believe they can win an international objective by force are often quite ready to do so, and domestic opinion not infrequently applauds such a course. The Security Council, the primary organ of the United Nations for the maintenance of international peace and security, all too often finds itself unable to take decisive action to resolve international conflicts and it resolutions are increasingly defied or ignored by those that feel themselves strong enough to do so. Too frequently the Council seems powerless to generate the support and influence to ensure that its decisions are respected, even when these are taken unanimously. Thus the process of peaceful settlement of disputes prescribed in the Charter is often brushed aside. Sterner measures for world peace were envisaged in Chapter VII of the Charter, which was conceived as a key element of the United Nations system of collective security, but the prospect of realizing such measures is now deemed almost impossible in our divided international community. We are perilously near to a new international anarchy.

I believe that we are at present embarked on an exceedingly dangerous course, one symptom of which is the crisis in the multilateral approach in international affairs and the concomitant erosion of the authority and status of world and regional intergovernmental institutions. Above all, this trend has adversely affected the United Nations, the instrument that was created specifically to prevent such a self-destructive course. Such a trend must be reversed before once again we bring upon ourselves a global catastrophe and find ourselves without institutions effective enough to prevent it.

While I do not propose here to review in detail specific situations and developments, it is, of course, my deep concern about them which leads me to examine the underlying deficiencies of our present system. The tragedy of Lebanon and the imperative need to resolve the problem of the Middle East in all its aspects, including the legitimate rights of the Palestinians and the security of all States in the region; the war between Iran and Iraq; the political situation relating to Afghanistan; the prevailing convulsion of Central America; questions relating to Kampuchea; the failure hitherto to reach a settlement in Cyprus; the situation in Western Sahara and in the Horn of Africa—these and other potential conflict situations, although often differing widely in their nature, should all be responsive to a respected international system for the peaceful settlement of disputes. Even in the sudden crisis over the Falkland/Malvinas Islands, despite the intensive negotiations which I conducted with the full support and encouragement of the Security Council and which endeavoured to narrow the differences between the parties, it nevertheless proved impossible in the end to stave off the major conflict.

Yet in all of these cases, all of the parties would have gained immeasurably in the long run from the effectiveness of a system for the peaceful settlement of disputes. In the case of Namibia we now see some signs of the possibility of a solution after many setbacks. Let us hope that this will prove a welcome exception to the general rule. But the lesson is clear—something must be done, and urgently, to strengthen our international institutions and to adopt new and imaginative approaches to the prevention and resolution of conflicts. Failure to do so will exacerbate precisely that sense of insecurity which, recently, cast its shadow over the second special session of the General Assembly devoted to disarmament. Despite present difficulties, it is imperative for the United Nations to dispel that sense of insecurity through joint and agreed action in the field of disarmament, especially nuclear disarmament.

I must mention here some of the other main sides of our work. There is the promotion and protection of human rights throughout the world, to which I intend to devote, as a matter of high priority, the attention that is called for by the Charter and made all the more imperative by the current state of world affairs. There are the great humanitarian challenges, often involving large numbers of refugees and displaced persons, whose plight in many parts of the world is the tragic reflection of political strife and economic distress. There is the grave and as yet unsolved problem of apartheid. There is, furthermore, the whole spectrum of issues related to social and economic development, which so vitally affect both present conditions and future prospects. My statement to the Economic and Social Council on 7 July of this year provided an opportunity to review the latter, to call for action and to express my concern on the stalemate in the North-South dialogue and the difficulties encountered in furthering global negotiations and measures to promote world economic recovery.

In our endeavour to carry out this extremely wide and demanding range of tasks, a fundamental requirement is the continued dedication, integrity and professionalism of the international civil service. I expect the highest standards from the staff of the Secretariat and, for my part, am determined to protect their independence and to ensure that performance and merit are the essential criteria for professional advancement. I have already defined as one of my first priorities the attainment of enhanced efficiency in the Secretariat, which must be worthy of the full confidence of Member States. I will continue to devote every effort towards an improved, unified and coherent administration.

It seems to me that our most urgent goal is to reconstruct the Charter concept of collective action for peace and security so as to render the United Nations more capable of carrying out its primary function. It was the lack of an effective system of collective security through the League of Nations that, among other factors, led to the Second World War. Although we now face a vastly changed world situation, Governments in fact need more than ever a workable system of collective security in which they can have real confidence. Without such a system, Governments will feel it necessary to arm themselves beyond their means for their own security, thereby increasing the general insecurity. Without such a system, the world community will remain powerless to deal with military adventures which threaten the very fabric of international peace, and the danger of the widening and escalation of local conflicts will be correspondingly greater. Without such a system there will be no reliable defence or shelter for the small and weak. And without such a system all of our efforts on the economic and social side, which also need their own collective impetus, may well falter.

There are many ways in which Governments could actively assist in strengthening the system prescribed in the Charter. More systematic, less last-minute use of the Security Council would be one means. If the Council were to keep an active watch on dangerous situations and, if necessary, initiate discussions with the parties before they reach the point of crisis, it might often be possible to defuse them at an early stage before they degenerate into violence.

Unfortunately there has been a tendency on the part of Member States to avoid bringing critical problems to the Security Council, or to do so too late for the Council to have any serious influence on their development. It is essential to reverse this trend if the Council is to play its role as the primary role authority for international peace and security. I do not believe that it is necessarily wise or responsible of the Council to leave such matters to the judgement of the conflicting parties to the point where the Council's irrelevance to some ongoing wars becomes a matter of comment by world public opinion.

In recent years the Security Council, has resorted increasingly to the valuable process of informal consultations. However there is sometimes a risk that this process may become a substitute for action by the Security Council or even an excuse for inaction. Along the same line of thought, it may be useful for the Council to give renewed consideration to reviewing and streamlining its practices and procedures with a view to acting swiftly and decisively in crises.

Adequate working relations between the permanent members of the Security Council are a sine qua non of the Council's effectiveness. Whatever their relations may be outside the United Nations, within the Council the permanent members which have special rights and special responsibilities under the Charter, share a sacred trust that should not go by default owing to their bilateral difficulties. When this happens, the Council and therefore the United Nations are the losers, since the system of collective security envisaged by the Charter presupposes, at the minimum, a working relationship among the permanent members. I appeal to the members of the Council, especially its permanent members, to reassess their obligations in that regard and to fulfil them at

the high level of responsibility indicated in the Charter.

There is a tendency in the United Nations for Governments to act as though the passage of a resolution absolved them from further responsibility for the subject in question. Nothing could be further from the intention of the Charter. In fact resolutions, particularly those unanimously adopted by the Security Council, should serve as a springboard for governmental support and determination and should motivate their policies outside the United Nations. This indeed is the essence of the treaty obligation which the Charter imposes on Member States. In other words the best resolution in the world will have little practical effect unless Governments of Member States follow it up with the appropriate support and action.

Very often the Secretary-General is allotted the function of following up on the implementation of a resolution. Without the continuing diplomatic and other support of Member States, the Secretary-General's efforts often have less chance of bearing fruit. Concerted diplomatic action is an essential complement to the implementation of resolutions. I believe that in reviewing one of the greatest problems of the United Nations—lack of respect for its decisions by those to whom they are addressed—new ways should be considered of bringing to bear the collective influence of the membership on the problem at hand.

The same consideration applies to good offices and negotiations of various kinds undertaken at the behest of the Security Council. Very often a Member State or group of Member States with a special relationship to those involved in such negotiations could play an extremely important reinforcing role in promoting understanding and a positive attitude.

In order to avoid the tendency of the Security Council to become involved too late in critical situations, it may well be that the Secretary-General should play a more forthright role in bringing potentially dangerous situations to the attention of the Council within the general framework of Article 99 of the Charter. My predecessors have done this on a number of occasions, but I wonder if the time has not come for a more systematic approach. Most potential conflict areas are well known. The Secretary-General has traditionally, if informally, tried to keep watch for problems likely to result in conflict and to do what he can to pre-empt them by quiet diplomacy. The Secretary-General's diplomatic means are, however, in themselves quite limited. In order to carry out effectively the preventive role foreseen for the Secretary-General under Article 99, I intend to develop a wider and more systematic capacity for fact-finding in potential conflict areas. Such efforts would naturally be undertaken in close coordination with the Council. Moreover, the Council itself could devise more swift and responsive procedures for sending good offices missions, military of civilian observers or a United Nations presence to areas of potential conflict. Such measures could inhibit the deterioration of conflict situations and might also be of real assistance to the parties in resolving incipient disputes by peaceful means.

Peace-keeping operations have generally been considered to be one of the most successful innovations of the United Nations, and certainly their record over the years is one of which to be proud. They have proved to be a most useful instrument of de-escalation and conflict control and have extended the influence of the Security Council into the field in a unique way. I may add that United Nations peace-keeping operations have traditionally shown an admirable degree of courage, objectivity and impartiality. This record, which is a great credit to the Organization, is sometimes overlooked in the heat of partisanship.

The limitations of peace-keeping operations are less well understood. Thus when, as happened recently, a peace-keeping operation is overrun or brushed aside, the credibility both of the United Nations and of peace-keeping operations as such is severely shaken.

It is not always realized that peace-keeping operations are the visible part of a complex framework of political and diplomatic efforts and of countervailing pressures designed to keep the peace-keeping efforts and related peace-making efforts effective. It is assumed that the Security Council itself and those Member States is a position to bring influence to bear will be able to act decisively to ensure respect for decisions of the Council. If this framework breaks down, as it did for example in Lebanon last June, there is little that a United Nations peace-keeping force can by itself do to rectify the situation. Indeed in such circumstances it tends to become the scapegoat for the developments that follow.

Peace-keeping operations can function properly only with the co-operation of the parties and on a clearly defined mandate from the Security Council. They are based on the assumption that the parties, in accepting a United Nations peace-keeping operation, commit themselves to co-operating with it. This commitment is also required by the Charter, under which all concerned have a clear obligation to abide by the decisions of the Council. United Nations peace-keeping operations are not equipped, authorized, or indeed made available, to take part in military activities other than peace-keeping. Their main strength is the will of the international community which they symbolize. Their weakness comes to light when the political assumptions on which they are based on ignored or overridden.

I recommend that Member States, especially the members of the Security Council, should again study urgently the means by which our peace-keeping operations could strengthened. An increase in their military capacity or authority is only one possibility—a possibility which may well give rise in some circumstances to serious political and other objections. Another possibility is to underpin the authority of peace-keeping operations by guarantees, including explicit guarantees for collective or individual supportive action.

In recent months, two multinational forces were set up outside the framework of the United Nations to perform peace-keeping tasks, because of opposition to United Nations involvement either within or outside the Security Council. While understanding the circumstances which led to the establishment of these forces, I find such trend disturbing because it demonstrates the difficulties the Security Council encounters in fulfilling its responsibilities as the primary organ for the maintenance of international peace and security in the prevailing political conditions.

We should examine with the utmost frankness the reasons for the reluctance of parties to some conflicts to resort to the Security Council or to use the machinery of the United Nations. The fact is that the Council too often finds itself on the sidelines at a time when, according to the Charter, its possibilities should be used to the maximum. Allegations of partisanship, indecisiveness or incapacity arising from divisions among Member States are sometimes invoked to justify this side-tracking of the Council. We should take such matters with the utmost seriousness and ask ourselves what justifications, if any, there are for them and what can be done to restore the Council to the position of influence it was given in the Charter.

This last problem also applies to other organs of the United Nations and brings me to the question of the validity and utility of the United Nations as a negotiating forum. We have seen, in the case of the law of the sea for example, what remarkable results can be achieved in well-organized negotiations within the United Nations framework, even on the most complex of issues and even though there was no unanimous agreement. On the peace and security side, the Security Council has shown and continues to show that it is often capable of negotiating important basic resolutions on difficult problems. The General Assembly also has to its credit historic documents negotiated in that organ and in its subsidiary organs, not only on the political but also on the economic and social side.

But in spite of all this I am concerned that the possibilities of the United Nations, especially of the Security Council, as a negotiating forum for urgent international problems are not being sufficiently realized or used. Let us consider what is perhaps our most formidable international problem—the Middle East. It is absolutely essential that serious negotiations on the various aspects of that problem involve all the parties concerned at the earliest possible time. Far too much time has already elapsed, far too many lives and far too many opportunities have been lost, and too many *faits accomplis* have been created.

I feel that the Security Council, the only place in the world where all of the parties concerned can sit at the same table, could become a most useful forum for this absolutely essential effort. But if this is to be done, careful consideration will have to be given to what procedures, new if necessary, should be used and what rules should govern the negotiations. I do not believe that a public debate, which could well become rhetorical and confrontational, will be enough. Other means will have to be used as well if negotiations on such a complex and deeply rooted problem are to have any useful outcome. The devising of such means is certainly well within the ingenuity and capacity of concerned Member States.

A related question to which we should give more consideration concerns what are productive and what are counter-productive approaches to the different aspects of our work. Obviously, a parliamentary debate may generate rhetoric, and sometimes even a touch of acrimony. But negotiations and the resolution of urgent problems require a different approach. Debate without effective action erodes the credibility of the Organization. I feel that in the United Nations, if we wish to achieve results, we must make a more careful study of the psychological and political aspects of problems and address ourselves to our work accordingly. It is insufficient to indulge in a course of action that merely tends to strengthen extreme positions.

The United Nations is now 37 years old. It has survived a period of unprecedented

change in almost all aspects of human life. The world of 1982 is vastly different from that of 1945, and that difference is reflected in the United Nations. In other words, the Organization has had to adapt to new circumstances to a quite unexpected extent. But it is not enough for the United Nations merely to reflect change or conflicts. The Organization was intended to present to the world the highest common denominator of international behaviour and, in doing so, to develop a binding sense of international community. It was to that end that Governments drafted and ratified the Charter. Amid the various perils that now threaten the orderly progress of humanity, I hope that we can rally once again to the standards of the Charter, beginning with the peaceful settlemant of disputes and steadily branching out towards the other objectives of that prophetic document.

Finally let me appeal to all Governments to make a serious effort to reinforce the protective and pre-emptive ring of collective security which should be our common shelter and the most important task of the United Nations. The will to use the machinery of the Charter needs to be consciously strengthened, and all Governments must try to look beyond short-term national intersts to the great possiblilities of a more stable system of collective international security, as well as to the very great perils of failing to develop such a system. For these reasons I would suggest that consideration be given to the usefulness of holding a meeting of the Security Council at the highest possible level, one object of which might be to discuss in depth some of the problems I have mentioned.

Member States will, I hope, understand if I end this report on a personal note. Last year I was appointed Secretary-General of this Organization, which embodies the noblest hopes and aspirations of the peoples of the world and whose functions and aims under the charter are certainly the highest and most important ever entrusted to an international institution. This year, time after time we have seen the Organization set aside or rebutted, for this reason or for that, in situations in which it should, and could, have played an important and constructive role. I think this tendency is dangerous for the world community and dangerous for the future. As one who has to play a highly public role in the Organization, I cannot disguise my deep anxiety at present trends, for I am absolutely convinced that the United Nations is indispensable in a world fraught with tension and peril. Institutions such as this are not built in a day. They require constant constructive work and fidelity to the principles on which they are based.

We take the United Nations seriously when we desperately need it. I would urge that we also seriously consider the practical ways in which it should develop its capacity and be used as an essential institution in a stormy and uncertain world.

RED CHINA—AN UNSTABLE "ALLY"

● Mr. GOLDWATER. Mr. President, it is well known that I feel the joint communique with Communist China is a terrible mistake. In previous statements in this Chamber, I have given the reasons why I believe there is a direct and serious conflict between the communique and the commitments to Taiwan that the United States has made in the Taiwan Relations Act.

Today I wish to discuss another aspect of the communique and that is the false reasoning used by the people in the State Department who have misled the President into issuing the communique. These people have fooled themselves into believing that Red China is a dependable and stable regime that would be on the side of the United States in a crisis involving the Soviet Union. I wonder if these pundants ever considered what will happen on mainland China after the death of Deng Hsiao Ping?

How long will any semblance of stability last after Deng is removed from the scene? Have the bright thinkers in the State Department ever considered that mainland China may well revert to warlordism?

Are the Soviets cleverly waiting for the day when they can see mainland China broke into different protectorates, some of them, such as the Sinkiang area and Manchuria, becoming Soviet puppets? Of how much value would Red China be to the United States in any contest with the Russians if this development occurs?

It is much in Russia's interest to carve up China and make parts of it into puppet areas, just as they have in Afghanistan, Poland, Hungary, and other satellites.

One may ask what value the State Department China card will be if the Soviets should succeed in establishing buffer areas of this nature in China.

Also, we should recognize it is not impossible Russia will achieve its goal. The fatal weakness of Red China rests in the great instability of a totalitarian society in which a cohesive unity depends on the dictator of the moment. The Chinese Communists themselves are not blind to their own weaknesses. It is the State Department who has been fooled.

Actually, Red China wants and needs U.S. technology as well as a quasi-defense alliance.

Yet, some group within the State Department is willing to sacrifice the word and honor of the United States and the survival of millions of free people on Taiwan for the sake of a transitory relationship with a tyrant regime, whose internal stability is much in doubt and who needs our support far more than we need theirs.●

THE CONSEQUENCES OF LEGISLATIVE HOLDS

Mr. STEVENS. Mr. President, I noticed that the Senator from Ohio early this afternoon released a press bulletin outlining his struggle to intercede and stop the Senate from taking action on a number of what he terms "special interest giveaways." Mr. President, I would like to outline, for the record, what the consequences of holding up some of this legislation are.

Holding up the Bankruptcy Act will:

One, cause White Motors in Cleveland to close its doors;

Two, cause farmers to lose control of grain stored in bankrupt elevators;

Three, allow drunk drivers to declare bankruptcy to escape the consequences of their actions; and

Four, raise prices for all consumers who must pay for the unpaid bills of their fellow citizens.

Holding up the reciprocity bill will:

One, cost over 300,000 jobs in Ohio alone dependent upon export trade which this bill enhances;

Two, jeopordize additional agriculture exports critical to the farmers of Ohio; and

Three, prevent effective actions against recalcitrant trading partners such as Japan. By the way, the Senator from Ohio is a cosponsor of this legislation.

Holding up the Shipping Act (S. 1593) further delays the revitalization of the American flag fleet. The Senator from Ohio objects to the limited antitrust exemption which allows carriers to collectively aggregate cargo for maximum efficiency. The act applies soley to international liner traffic. Domestic trade is not covered by the act. The bill will provide a basis for American competition in international trade.

Ohio is directly affected by the legislation. The port of Cleveland strongly supports the bill, as do the local maritime unions.

Holding up the omnibus rail bill (H.R. 6308) hurts more than the State of Alaska. A number of railroads are affected. The Alaska railroad is one of those railroads referred to in the Bill and it is important to my State.

The Alaska Railroad runs for almost 500 miles essentially between Seward on the Gulf of Alaska north through Anchorage to Fairbanks. It is the only major commercial railroad in our State and serves communities in which by far the majority of our citizens reside. It is a vital link in interstate commerce with the Lower 48, and provides at least some of the movement for most of the goods shipped into our State. It also serves, often by special branch lines, a number of major and strategically important military installations. As you can imagine, it is absolutely critical that a transportation facility of this import continue to operate. What is questionable is whether it should continue to do so under Federal auspices and at considerable Federal expense.

As many of my colleagues are aware, the Alaska Railroad, despite the critical role it plays in the economy of our State, remains a marginal proposition. Indeed, we have annually appropriated funds to provide for maintenance and other capital activities. At a time

when we are reevaluating the appropriateness of many Federal activities and, as well, we are particularly conscious of the need to reduce Federal spending, the possibility of providing for the continued operation of the Alaska Railroad through the State seems attractive. The State appears willing to assume this responsibility under the terms and conditions provided in Alaska Railroad transfer title. A cornerstone of the understanding reached during the last 2 years between the State and the FRA has been that the railroad would be transferred to the State without direct monetary compensation to the United States. Because questions have been raised about this aspect of the transfer, allow me to assure my colleagues that the transfer is hardly cost-free to the State.

The State is obligated to continue to operate the railroad. Unless it does so, it must either surrender unused property to the Federal Government or pay for it. It also must operate the railroad as a common carrier fully regulated by the Interstate Commerce Commission. As a Federal railroad, the Alaska Railroad has been subject to ICC oversight at the consent of the Government, but has not really been a fully-regulated carrier. This change is important to consumers, shippers and competitors alike, but will also entail every real compliance costs. The State-owned railroad also is obligated by the title to assume substantial Federal liabilities in addition to acquiring the railroad's assets. It also is obligated to provide extensive employee protections including maintenance of employment, salary and benefits.

To further elaborate, Mr. President, the State, in assuming the ownership and operation of the Alaska Railroad, will be inheriting a carrier which hardly has been gold-plated over the years, appropriations notwithstanding. Railroad records indicate that the State inherits some 58 million—in 1977 dollars—in deferred maintenance. This includes deferred rail replacement, tie renewal, roadbed and ballast work, and the rehabilitation of rolling stock and locomotives. Additionally, because capital expenditures must come either from appropriated funds or revenue—the Federal railroad has no capacity to finance through bonding or other means—a number of capital improvements which would reduce maintenance costs in the long run have not been undertaken. These projects include a new communication system, welded rail installation, realignments and rolling stock replacement. Conservative estimate for these improvements exceed $100 million. Another category of capital expenditures the State will have to make as the railroad emerges from its protected Federal status is those projects necessary to bring the railroad into compliance with the rail safety laws and the Occupational Safety and Health Act of 1970 (OSHA). Alaska Railroad records suggest that these liabilities could be as high as $70 to $90 million. The State is committed and will be bound to bring the railroad into compliance with OSHA and it will make a good faith effort to achieve compliance in all deliberate speed. It is expected, however, that responsible officials will be patient with the State and allow it a reasonable time to bring the railroad into compliance.

In addition to the capital requirements of the Alaska Railroad, the costs associated with the requirements that the State operate a fully regulated carrier, provide the employee protection prescribed in the title, and assume Federal liabilities must be considered in the context that the Alaska Railroad is actually a marginal operation. Its fortunes are totally dependent upon the State's economy, which is among the more volatile in the Nation. Neither its passenger nor freight operations have made money, historically. Indeed, the railroad has operated in the black during only three of the past dozen Federal fiscal years. Although recent balance sheets suggest a trend toward profitability, the railroad remains dependent upon appropriations. Even if mineral development or other activities were to generate increases in traffic for the railroad, the deteriorated condition of its physical plant would require immediate investment to support heavier usage.

In sum, Mr. President, the State is relieving the Federal Government of a costly responsibility in acquiring the Alaska Railroad. I believe the United States has driven a hard but fair bargain with the State, since we simply could not afford to lose this carrier or see it deteriorate further.

Mr. President, the title also provides guidance for the transition of the Alaska Railroad to a carrier fully and formally regulated by the Interstate Commerce Commission. It clearly is intended that the Alaska Railroad be regulated on the same basis as comparable carriers at the earliest possible date. It also is intended, however, that the FRA and the ICC take a problem-solving approach to achieving that objective. For instance, the ICC is obligated to establish an expedited proceeding to grant the State-owned railroad a certificate of public convenience and necessity similar to the summary proceeding utilized to facilitate the creation of other publicly-owned railroads formed as a result of the bankruptcies of the Rock Island and Milwaukee Railroads. The agencies also are required to conform the railroad's accounting and reporting systems to ICC standards. A 2-year period is provided prior to formal valuation which will form the basis for future rate review. In the meantime, it is intended that the railroad's rates be subject to review, but certainly without upsetting the current regime or tightening the regulatory environment in which the railroad currently functions.

One final subject deserves mention, Mr. President. It is the intent of the title that the State acquire a functioning railroad. The definition of the property to be transferred is broad and all-encompassing, except for funds or items specifically required to satisfy residual Federal obligations. These will be specifically identified in a closing report which will be submitted to the Congress within 6 months of enactment. This includes the Alaska Railroad revolving fund and its personal and real property, including property such as leased vehicles provided to the railroad for its use by other agencies. The title is comprehensive in this respect in order to insure that the State-owned railroad receives everything that is necessary to insure continued operation of the railroad. In this regard, special attention has been focused on insuring transfer of the right-of-way itself. The scope of the transfer notwithstanding, care also has been taken to respect existing Federal land laws, particularly with respect to possible expansion of the railroad and the granting of future rights-of-way across Federal lands.

Delaying passage of the timber bill (S. 2805) will cause over 100 small to medium sized companies to face potential bankruptcy. Bill allows for termination of contracts—bids were based upon good economic assumptions that have not come about. A 5-year adjustment period to allow for mixing high priced timber with their lower bids to reduce losses.

Ohio impact; No significant timber sales. Timber values are much below the current contracts—this crushes industry, an industry that provides the material which builds houses in Ohio. You may wonder why the housing industry is slumping, it may be in large part due to bankruptcy of timber suppliers.

This is unemployment due to bad Government policy—unlike the fake work legislation that Senator METZENBAUM has been supporting recently, this legislation supplies real jobs and lower cost timber for the housing industry.

Holding up passage of the oil shale legislation (S. 1484) demonstrates a severe myopia in natural resource planning and management, Ohio will be hurt because Ohio is one of the largest energy consuming States in the Union. Although there is no significant Federal leasing of oil shale in Ohio, that State stands to gain the most and lose the most from oil shale development. Senator METZENBAUM

supported direct Federal subsidy for the program through the Synfuels Corporation. He does not now seem willing to allow for floor debate on a measure that will allow for a reasonable leasing policy. The market has told us that before we have a synfuels program that is effective, we must have such a policy.

Delaying passage of the Community Sports Protection Act (S. 2784) hurts football fans across the country—including Ohio.

The bill allows the NFL to enforce its franchise and revenue-sharing rules without the fear of these rules being challenged by antitrust actions. Congress has granted a limited television revenue antitrust exemption in the past. This bill would greatly benefit many Ohio football fans because it will insure that professional teams can continue to exist in small market areas.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, Is there any further business to come before the Senate?

Mr. ROBERT C. BYRD. Will the acting majority leader yield to me?

Mr. STEVENS. I am happy to yield to my good friend.

EXPRESSION OF THANKS

Mr. ROBERT C. BYRD. Before the acting majority leader moves the adjournment resolution, I just want to express my appreciation to the majority leader (Mr. BAKER) and to the acting majority leader (Mr. STEVENS) for the courtesy and understanding that has been shown to the minority. It has been a pleasure to work with both of these gentlemen. I know that I share the feelings of my colleagues when I say that we could not have been treated with greater deference than we have been shown by these two gentlemen.

I also wish to say that without the very able and dedicated assistance of Abby Reed, Charles Kinney, and Marty Paone on this side of the aisle, Elizabeth Baldwin, John Tuck, and Howard Greene on the other side of the aisle, our work would have been made extremely difficult, if not impossible. As a matter of fact, I know that we could not have handled the business of today without the assistance of these very able, loyal, and dedicated people.

There are others whose names I will not mention at this time, but when we return on November 29 we will have an opportunity when we wrap up the work of the Senate for the session to acknowledge the assistance given the leadership on both sides by all of these wonderful people.

Mr. STEVENS. Mr. President, I thank the distinguished minority leader for his comments. I join him in thanking those who have worked with us. I note the presence of the Secretary of the Senate, who is here to the end with us. In addition, I would like to express my appreciation to those who have worked with us, including Howard Greene, John Tuck, and Elizabeth Baldwin. Abby, Charles and Marty have also done a commendable job on the other side of the isle. The majority leader and I are particularly grateful to my good friend, the minority leader, and to the Democratic whip, Senator CRANSTON. This is going to be a long recess. We will come back after Thanksgiving, So I wish the Senator a happy Thanksgiving.

Mr. President, there is no question that the 97th Congress has been a very interesting Congress. We will have a period of time from November 29 to December 17 which will be intensive. It is my understanding that the majority leader intends to start off upon our return on the first day with bills that are ready for consideration. We will have a full calendar, as has been demonstrated here tonight by the items that have been passed over and not enacted this evening.

But, I do believe that the Senate has done a substantial amount of work today. We have removed the roadblock from a considerable number of the bills that previously had been delayed, and I do believe that the items that we have moved to the House of Representatives will enable them to consider some Senate measures as we have considered so many of the House-passed bills here this evening.

Mr. ROBERT C. BYRD. Mr. President, let me add my words of commendation to those that have been spoken by the acting majority leader with respect to the Secretary of the Senate, the Sergeant at Arms, and all the people who work at the desk, the pages, the officers of the Senate, the security personnel, and everyone who has made it possible for the Senate to function as it should to serve the people.

HOUSE CONCURRENT RESOLUTION 421—ADJOURNMENT OF THE TWO HOUSES OF CONGRESS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate House Concurrent Resolution 421.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 421) providing for an adjournment of the two Houses from Friday, October 1, or Saturday, October 2, to Monday, November 29, 1982.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The concurrent resolution (H. Con. Res. 421) was considered and agreed to.

The concurrent resolution reads as follows:

S. CON. RES. 421

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Friday, October 1, 1982, or on Saturday, October 2, 1982, pursuant to motions made by their Majority Leaders, or their designees, in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, November 29, 1982.

ADJOURNMENT TO MONDAY, NOVEMBER 29, 1982

Mr. STEVENS. Mr. President, in accordance with the provisions of House Concurrent Resolution 421, I now move that the Senate stand in adjournment until the hour of 12 noon on Monday, November 29, 1982.

The motion was agreed to; and at 2:12 a.m., Saturday, October 2, 1982, the Senate adjourned until Monday, November 29, 1982, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate October 1, 1982:

THE JUDICIARY

Reginald W. Gibson, of Illinois, to be a Judge of the U.S. Claims Court for a term of 15 years, vice a new position created by Public Law 97-164.

DEPARTMENT OF JUSTICE

Edward M. Camacho, of Guam, presently U.S. Marshal for the district of Guam, to be also U.S. Marshal for the district of the Northern Mariana Islands for a term expiring September 14, 1986, vice Juan G. Blas.

Romolo J. Imundi, of New York, to be U.S. Marshal for the southern district of New York for the term of 4 years vice George V. Grant, term expired.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Crawford A. Easterling, xxx-... xxx-xx-x.../1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Henry C. Schrader, Jr., xxx-xx-x... xxx-.../1110, U.S. Navy.

UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

The following-named persons to be Members of the Board of Regents of the Uniformed Services University of the Health Sciences for the terms indicated:

For the term expiring May 1, 1983:

Francis Carter Coleman, of Florida, vice Philip O'Bryan Montgomery, Jr., term expired.

For a term expiring May 1, 1987:

Perry Albert Lambird, of Oklahoma, vice Lt. Gen. Leonard D. Heaton, U.S. Army, retired, term expired.

David I. Olch, of California, vice David Packard, term expired.

James F. X. O'Rourke, of New York, vice Francis D. Moore, term expired.

EXECUTIVE OFFICE OF THE PRESIDENT

William Poole VII, of Rhode Island, to be a Member of the Council of Economic Advisers, vice Jerry L. Jordan, resigned.

DEPARTMENT OF THE TREASURY

Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, vice Paul Craig Roberts, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate October 1, 1982:

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Jay F. Morris, of Maryland, to be Deputy Administrator of the Agency for International Development.

PEACE CORPS

Edward A. Curran, of Maryland, to be Deputy Director of the Peace Corps.

FEDERAL COMMUNICATIONS COMMISSION

Stephen A. Sharp, of Virginia, to be a Member of the Federal Communications Commission for a term of seven years from July 1, 1982.

DEPARTMENT OF EDUCATION

Gary L. Jones, of Virginia, to be Under Secretary of Education.

Harry M. Singleton, of the District of Columbia, to be Assistant Secretary for Civil Rights, Department of Education.

Elizabeth Helms Adams, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1984.

Alice Wright Algood, of Tennessee, to be a Member of the National Museum Services Board for a term expiring December 6, 1984.

Anne Carroll Badham, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1984.

Fucheng Richard Hsu, of New Jersey, to be a Member of the National Museum Services Board for a term expiring December 6, 1985.

Craig C. Black, of Pennsylvania, to be a Member of the National Museum Services Board for a term expiring December 6, 1986.

Ann Duncan Haffner, of Virginia, to be a Member of the National Museum Services Board for a term expiring December 6, 1986.

Dorothy J. Tyson, of California, to be a Member of the National Museum Services Board for a term expiring December 6, 1986.

Lawrence F. Davenport, of Virginia, to be Assistant Secretary for Elementary and Secondary Education, Department of Education.

Gary L. Bauer, of Virginia, to be Deputy Under Secretary for Planning and Budget, Department of Education.

Charles L. Heatherly, of Virginia, to be Deputy Under Secretary for Management, Department of Education.

NATIONAL COUNCIL ON THE HANDICAPPED

Robert V. Bush, of New Mexico, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982.

Joseph Dusenbury, of South Carolina, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982.

Hunt Hamill, of Illinois, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982.

Henry Viscardi, Jr., of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1982.

H. Lathem Breunig, of Virginia, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983.

Michael Marge, of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983.

Sandra Swift Parrino, of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983.

Alvis Kent Waldrep, Jr., of Texas, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983.

Marian North Koonce, of California, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984.

Justin W. Dart, Jr., of Texas, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984.

John S. Erthein, of California, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984.

Roxanne S. Vierra, of Colorado, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1984.

Robert V. Bush, of New Mexico, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985.

Joseph Dusenbury, of South Carolina, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985.

Hunt Hamill, of Illinois, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985.

Henry Viscardi, Jr., of New York, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1985.

Carmine R. Lavieri, of Connecticut, to be a Member of the National Council on the Handicapped for the remainder of the term expiring September 17, 1983.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

William Arthur Webb, of Pennsylvania, to be a Member of the Equal Employment Opportunity Commission for the term expiring July 1, 1987.

NATIONAL MEDIATION BOARD

Walter C. Wallace, of New York, to be a Member of the National Mediation Board for the term expiring July 1, 1984.

NATIONAL COMMISSION ON LIBRARIES AND INFORMATION SCIENCE

Elinor M. Hashim, of Connecticut, to be a Member of the National Commission on Libraries and Information Science for a term expiring July 19, 1986.

COMMODITY FUTURES TRADING COMMISSION

Fowler C. West, of Texas, to be Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1987.

NATIONAL COUNCIL ON THE HUMANITIES

Jeffrey Hart, of New Hampshire, to be a Member of the National Council on the Humanities for a term expiring January 26, 1988.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

George G. Fagg, of Iowa, to be U.S. circuit judge for the eighth circuit.

EXPORT-IMPORT BANK OF THE UNITED STATES

James Ernest Yonge, of Florida, to be a Member of the Board of Directors of the Export-Import Bank of the United States.

Rita M. Rodriguez, of Massachusetts, to be a Member of the Board of Directors of the Export-Import Bank of the United States.

NATIONAL CORPORATION FOR HOUSING PARTNERSHIPS

Alfred J. Fleischer, Sr., of Missouri, to be a Member of the Board of Directors of the National Corporation for Housing Partnerships for the term expiring October 27, 1982.

Alfred J. Fleischer, Sr., of Missouri, to be a Member of the Board of Directors of the National Corporation for Housing Partnerships for the term expiring October 27, 1985.

HOUSE OF REPRESENTATIVES—*Friday, October 1, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Give us, O God, the virtues that allow us to be the people You would have us be and give us the fortitude to act with honesty and earnestness for the good of all people. May we not only express our faith in words of prayer and praise, but may our actions testify to our faith. Help us to speak the truth in ways that honor Your name, let us practice respect in spite of differences, and let us act and speak with patience and grace, that justice will roll down as waters, and righteousness like an everflowing stream. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 331, nays 26, answered "present" 4, not voting 71, as follows:

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 3963. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated; and

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

89-059 O-86-15 (Pt. 20)

H.R. 6056. An act to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 3963) entitled "An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. THURMOND, Mr. MATHIAS, Mr. LAXALT, Mr. HATCH, Mr. DOLE, Mr. BIDEN, Mr. KENNEDY, and Mr. LEAHY to be the conferees on the part of the Senate.

□ 1020

REQUESTING SENATE TO RETURN S. 1210, ENVIRONMENTAL QUALITY IMPROVEMENT ACT OF 1970 AMENDMENTS

Mr. HUGHES. Mr. Speaker, I offer a privileged resolution (H. Res. 605) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 605

Resolved, That the Clerk of the House of Representatives request the Senate to return to the House the bill (S. 1210), an Act amending the Environmental Quality Improvement Act of 1970, together with accompanying papers.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROPOSING AN AMENDMENT TO THE CONSTITUTION ALTERING FEDERAL BUDGET PROCEDURES

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 604 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 604

Resolved, That upon the adoption of this resolution the House shall resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 350) proposing an amendment to the Constitution altering Federal budget procedures, and the first reading of the joint resolution shall be dispensed with. After general debate, which shall be confined to the joint resolution and to the amendments made in order by this resolution and shall continue not to exceed two hours, to be equally divided and controlled by a Member in favor of the joint resolution and a Member opposed, the joint resolution shall be considered as having been read for amendment under the five-minute rule. No amendment to the joint resolution shall be in order in the House or in the Committee of the Whole except the following amendments which shall be considered only in the following order and which shall not be subject to amendment but shall be debatable as provided herein:

(1) an amendment in the nature of a substitute printed in the Congressional Record of September 30, 1982, by, and if offered by, Representative Alexander of Arkansas, and said amendment shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Alexander and a Member opposed thereto; and

(2) an amendment in the nature of a substitute consisting only of the text of H.J. Res. 350 as introduced if offered by Representative Conable of New York, and said amendment shall be debatable for not to exceed one hour, to be equally divided and controlled by Representative Conable and a Member opposed thereto, and said amendment shall be in order even if the amendment designated (1) above has been adopted. At the conclusion of the consideration of the joint resolution for amendment, the Committee shall rise and report the joint resolution to the House, but only the last amendment adopted shall be considered as having been finally adopted and reported back to the House. The previous question shall be considered as ordered on the joint resolution and on the amendment if adopted to final passage without intervening motion except one motion to recommit.

SEC. 2. The resolution (H. Res. 450) providing for the consideration of the joint resolution (H.J. Res. 350) proposing an amendment to the Constitution altering Federal budget procedures is hereby laid on the tale.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield the usual 30 minutes to the gentleman from Ohio (Mr. LATTA), and pending that I yield myself 20 minutes.

Mr. Speaker, this is a very unusual situation for me. I am usually comfortable on the House floor and comfortable in the proceedings of the House, but I am not today. I am more upset about what is going on now than I have been since those sort of private times when I tried to influence policy decisions on the Korean war and the Vietnam war. Incidentally, I was virtually never successful.

I am terribly worried about this performance because I have, as the Members will see as I try to explain what I am saying, the deepest respect for two of the people who are heavily involved in this. First, I am very sad that this is happening this way, and I say this not with any lack of sympathy for the Republican Members of the House. I have witnessed the same kind of thing going on the Democratic side, particularly when Lyndon Johnson was the President, when the White House presumed to take over the whole process.

I do not mean to be unkind to anybody on the Republican side, but it is very clear that the timing, especially with regard to the great push to bring up this particular matter at this particular time, was masterminded by the White House, and perhaps some Members of the House that I do not know, but certainly not the leadership, in such a way that it would have an overwhelming political smell.

I am not sensitive about politics. You know, I know about it, and I have played legislative politics as well as substantive politics most of my career, but this is really an extraordinary example. It is an example of a party that had had a very strong program which went astray, and then the party had the good sense to modify it somewhat. That has happened in the last, roughly, 20 months, I guess it is.

I am not going to go into any detail, but it is very hard—it is very, very hard—to come to a conclusion, any other conclusion than that the timing on this is a diversion. I would not be worried about it if the principal actors in this were only the President and Jim Baker and Ed Meese and the other White House operators.

□ 1030

The only sad thing about it is that a man whom I admire enormously and think would make a quite good President—and I hope I am not hurting him when I say this—has apparently been the hit man on this: the Vice President. I hope that is not true. I hope it is the others, because I have come to expect that from them.

Even including Lyndon Johnson and Richard Nixon, this is the most political White House I have ever dealt with. It is so much a political White House that it sort of frightens me because it does remind me of a combination of Johnson and Nixon, and if that does not frighten people, we have a problem. That is why I am sad, and I am quite serious about this.

I have great admiration for the Republican Party and many of its members. I am also sad because one of my best friends on the Republican side of the aisle and one of the men I admire the most is the author of the base resolution. I have a strong feeling that I understand why he is in that position. He just got so fed up with the Democrats that he thought anything was better than what they were doing. And I do not even blame him; from his point of view it makes sense—not from my point of view. I have almost gotten in that situation a couple of times and never quite made it. But I do not belong to his party. I am not trying to be funny. I am telling you why I am concerned.

But the bottom line of why I am concerned is the substance. The gentleman from New York (Mr. CONABLE) crafted the best possible bad resolution, and the fundamental thing that is wrong with that resolution is that it demonstrates that he has truly given up on the essential democratic process. He puts certain things in his resolution—even though much more wisely drafted than most of the ones I have seen and many of those resolutions have been created by Democrats—which would require supermajorities

to decide that there will be an unbalanced budget. Some very estimable people on the Republican side, again whom I admire, have made the point that we already have a supermajority, that we have a supermajority in the two-thirds required to override a veto.

But, dear God, does not anybody understand that in a government, cleverly and carefully crafted to separate the powers so that no one power would become the tyrant, that the veto override process is the great clash in the American political process between a convinced Executive and a convinced Congress? That simple two-thirds requirement is the only one. And here we are not talking, thank God, and thank Mr. CONABLE, about anything quite as bad as a two-thirds supermajority.

I can bring this rule to the floor only because I am convinced that it is the best rule we could possibly have for a completely outrageous situation that should never come up at this time in the flow of Congress. There can be all kinds of arguments made that the Democrats prevented it from coming up any other time. That is simply not true. If the "Big Five" were going to put the heat on people, some of whom are directly opposed to this proposition, they could have done it earlier. If they had really wanted to generate the steam—and they did generate the steam—it could have been done practically anytime, even earlier this year.

Now, what is political about this? It is inescapable to me that it is a diversion. It is inescapable to me that the timing is a diversion. The substance is not, but the timing is a diversion.

Now, why is it upsetting me? Why am I worried? My worry is very minor. It has to do with me. I am worried that I will not present this as well as it could be presented. I am upset because I fear we are going to do grave damage to the Republic and its processes.

I have been one of the earliest people to recognize that we must have a responsible process, a budget process that gives us a rational approach. I have been defeated by my party on occasions, by both parties on occasion, in seeking that opportunity.

The bill that we have been operating under for a number of years I crafted to a large degree, and when I presented it to the House, which voted virtually unanimously for it, I tried to make it clear that it was not a very good bill, that it needed a lot of change, and that its future depended entirely on the will of the membership.

One of the tragedies of our time has been that in this institution we were unable to achieve what was achieved in the Senate. Until very recently the budget resolutions have been a totally partisan matter. I have no intention of trying to lay the blame for that.

There cannot be a partisan budget approach. Many of the Democrats have never understood this. What you do in your fight over a budget resolution is fight out the alternatives and come to a conclusion, and then, if you really believe in a budget process, you have some responsibility that it functions, and even if you do not win, you need to vote for the process.

That may be a strange idea to some of you who have never looked at process as being that complicated and that restrictive, but that is the way you are going to deal with these major problems, if you ever do.

There are a lot of Democrats who need to learn this lesson that we must have the process. If we do not have a process which deals with the macroeconomic situation in the United States, we will revert to the boom and bust of the period prior to World War II. Administrations of great variety for years gave us a relatively steady approach to macroeconomic problems. It is something that has to be done, and it has to be done by this institution along with others.

We are dealing with the greatest single issue that faces the society, the free world, and all the democratic countries, because none of them, even the parliamentary ones, have successfully dealt with it. In this approach to using the Constitution as the vehicle, we crush the proper approach, which is that we must have the will to pass legislation that will deal with economic problems and then we have the character, the courage, and the wisdom to deal with it in a bipartisan fashion.

I do not believe there is any future for this country literally if we think that one point of view by itself can prevail. I do not think the Democratic Party by itself can prevail with the policies that we must have. I do not believe that the Republican Party can prevail with its policies alone.

I am deeply committed to the notion that the only way we can function together and survive together is by coalitions of the unlike. I am convinced that the good things that were done in a period of political chaos in the late 1940's were done in that fashion by a great coalition of the country that put together the policies that made us live very well.

Mr. Speaker, I think this is exactly the wrong way to go, and I think we should defeat all the proposals for a constitutional amendment. I think then we should return to an effort to see to it that we have an adequate budget process, adequately supported by all of us and not in a narrow political way.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) has consumed 14 minutes.

The Chair recognizes the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. CONABLE).

□ 1040

Mr. CONABLE. Mr. Speaker and friends, I am touched by the expression of respect from my friend from Missouri (Mr. BOLLING) which I think applies mostly to other circumstances than the ones in which we find ourselves today, judging from the burden of his remarks.

Let me say that the respect is mutual. He has had a great career in the Congress and the Congress will be diminished by his impending retirement. We are proud of him as a constitutional and legislative scholar. We are proud of him in his role as one of the mentors of the House.

Mr. Speaker, the distinguished gentleman from Missouri said he feared that grave damage would be done to the Republic by what we are doing today. May I say as a person whose name is on this proposal that I come here with considerable reluctance but with some fear that we have already done irreparable damage to the Republic in 17 of the 18 years I have served here, and that it is time that we created a presumption in favor of greater fiscal discipline.

That is what this amendment is intended to do. It is not a straitjacket.

It is, as the gentleman says, carefully crafted in protracted negotiations.

As to the timing, it could have been brought out of the Judiciary Committee in this form or any other form the Judiciary Committee wished in the 4 years that it has been pending and bottled up in this Congress.

I hope we will have an earnest and substantive debate, that we will leave out the words of fear and we will deal with the issue as it is presented.

This debate is a historic opportunity for the country to focus on its fiscal procedures.

But remember that all that is intended is a presumption. Such a presumption is necessary if this Congress has not historically exercised the judgment that is required to keep the country in a sound condition.

Congress should be a place of judgment. When judgment is not wisely exercised it is appropriate that we put some limitations on that exercise of judgment and that is what the Constitution does in many cases.

Necessity is clear; necessity overcomes reluctance. It is time this issue should be elevated to a constitutional level.

Mr. LATTA. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, let me join the gentleman from New York (Mr. CONABLE) in bestowing accolades on our chairman

of the Rules Committee, not only for his service in this Congress but for his service in past Congresses. Certainly we are going to miss him.

We have had our disagreements in the past and we have them today. We have a difference of philosophy, but I have tremendous respect for him.

Let me address these differences quickly. First of all let me say thank God for the rules of the House, as the gentleman from New York has already pointed out, this legislation has been bottled up in the Judiciary Committee for months and months and months and the odds of its getting it out were nil.

So under the rules of the House, 218 Members from both sides of the aisle, while the House was in session, marched up here and signed a discharge petition to bring this matter to the floor.

What could be more democratic? What procedure could be more democratic than the procedure that we used to bring this matter to the floor?

I am saddened by the fact that the committee that had jurisdiction over this matter did not read the will of the House more clearly and the will of the country more clearly and respond by bringing this out under the normal procedure. It did not do so. And we are here today only because of the discharge procedure.

Let that discharge procedure remain in the rules. It is needed. It will be needed in the future as it was needed in this particular instance.

Let me also respond to a couple of other issues which have been raised.

We have heard about taxes, that for some unknown reason the tax bill that we passed last year has gotten us into the economic situation that we are in.

Let me examine that. Let me examine that because I noticed one of our Democratic friends this morning on nationwide TV trying to point out to the American people that because we reduced income taxes last year we had this dip in the economy and we have a larger deficit.

Now, look, who are we trying to fool with statements like that? It was not until October 1 last year that the first income tax reduction took place. That was a measly 5 percent which meant over the entire year a 1.25 percent reduction in the income taxes of the people of this country. This meant that the spenders in the Congress were not going to spend that little 1.25 percent but we were going to let the people spent it.

A 1¼-percent reduction in the tax burden made the deficit? No.

When did the next reduction in those income taxes take place? We got a 10 percent added to the 5 percent on July 1 of this year. So let us not try to blame the fact that we are letting the people spend a little bit more of their own money as the reason for the dip in the Treasury receipts and the cause of an increased deficit.

I notice that the big spenders say nothing about all of those programs that they enacted in years past which are suddenly exploding all over the place and costing billions that they never told the American people they were going to cost. That is the trouble, primarily. That is the trouble.

So let us not blame that measly little reduction that we have given the American people to date on their income taxes as the real culprit.

Oh, I know there are those Members that want to take the 10 percent that is due the taxpayers next July 1 away from them so Government can spend more of the taxpayers' money here in Washington. I do not think the American people are going to permit that and they will probably say so in this election.

Mr. Speaker, I am a cosponsor of this resolution. However, I am not a Johnny-come-lately in introducing such an amendment. As a matter of fact, I had the office go back and check the first time that I introduced a balanced budget constitutional amendment and it was back in 1972. I introduced H.R. 16306 calling for a balanced budget constitutional amendment 10 years ago.

So I believe in what we are doing here today and the reason I believe more strongly today than I did back then is because of the tremendous debt that we now have in this country—$1,300,000,000,000 is now the debt ceiling in this country.

□ 1050

And cranked into our budget for fiscal year 1983, is $113 billion just for interest on that debt in 1 single year. That is more than the total cost of Government was in the second year of President Kennedy's term of office.

This is what brings us here today. We have got to be able to discipline ourselves, and we have shown through our actions that we have not been able to do that, because the proclivity around this place to spend and spend and spend has not been dampended. We have people around here who take the well and argue for every single spending program that comes down the line so that they can run back home and say to this group, "Look what we have done for you," without saying what they have done to you. They say to another group, "Look what we have done for you." And to another group, "Look what we have done for you." Oh, I know that that makes good politics, but it does not make very good statemanship because we have our grandchildren and their grandchildren now burdened with this tremendous debt—and it keeps going up, up, and up, as do the interest rates as the Federal Government is out there borrowing money to finance that debt.

This is what brings us here today, along with something else that scares me considerably. Thirty-one States have now petitioned for a constitutional convention. Only three more need to petition. Then we are going to have a convention, and the door will be open. The door will be open to all sorts of amendments to that Constitution.

Oh, I know that the constitutional lawyers disagree as to the extent that you can amend the Constitution in a convention. But most of them say that the door will be open, and the Constitution can be amended beyond this one amendment should one be called. That scares me because all of the political groups and the power groups in this country will be in for their pound of flesh at such a constitutional convention. Unless this House takes action today and passes this resolution, I am predicting now that you are going to have those three States needed for that convention petitioning for a convention. And you are going to have a tremendous problem on your hands trying to resolve the turmoil which will come about as a result of attempts to amend our Constitution in ways that you and I certainly could not support.

So the potential for danger to our Constitution exists by turning down this resolution today.

Let me say that every Member takes an oath of office to adhere to and to support the Constitution. But they will be doing a tremendous disservice to the Constitution by voting against this resolution. I cannot urge too strongly, for that reason and that reason alone, that you support this resolution, which is a bipartisan resolution. All you have to do is take a look at the list of names of the Members who have signed the discharge petition to prove this.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to my friend, the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Speaker, persons have deplored the process under which we bring this issue to the floor today. Let me say that we have had 14 days of hearings in the Judiciary Committee, and I do not want the reflection on the Judiciary Committee to reflect on the minority. We have been trying to get a markup on this all-important issue, bring it here in an orderly fashion, under a rule with the Judiciary Committee in control, with opportunities to present the best possible proposal to this body.

Let me just say that I reluctantly signed the discharge petition, but it is the only opportunity that I had, and it is the only way, it is the final alternative, the final manner in which this important public issue on which the

people are demanding we act can come before this body.

Mr. LATTA. I thank the gentleman for his comments.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Missouri (Mr. TAYLOR).

Mr. TAYLOR. Mr. Speaker, House Resolution 604 is the rule under which the House will consider the bipartisan balanced budget and tax limitation amendment to the Constitution.

The vote allows for votes on two proposals. It is fair to both sides. I commend the distinguished chairman of the Committee on Rules for this. It gives those of us who support the Conable-Jenkins proposal a golden opportunity to say to the American people, "We are ready to restore fiscal responsibility here in the Congress if the American people are willing to amend the Constitution."

As a sponsor of House Joint Resolution 350, as a signator to the petition that discharged the consideration of this matter from the Committee on Rules, and as a member of the Committee on Rules, I come to the well today to talk for a moment about courage.

For too long the Congress has displayed a lack of will to actually balance the Federal budget. For too long we have seen spending grow and grow. For too long we have piled up larger and larger deficits. And for too long we have forced higher and higher taxes on the American public.

The Federal budget has been balanced only once since 1960. This fiscal year, the fiscal year that starts today, the taxpayers will pay over $100 billion in interest on the national debt alone. Our national debt, debt created by the Congress, reached the trillion dollar mark last fall—and it is still growing.

Mr. Speaker, we all know that the Congress has the power right now to balance the budget; but we have not done so. We have not done so in the past and there is substantial doubt that we will do so in the future—unless the Constitution is amended to require that fiscal responsibility and fiscal discipline be the rule here in Congress rather than the exception.

This amendment is fairly understandable. It limits the power of Congress in order to free the American people from higher and higher taxes. It places restraints on our ability to spend money in ways that have not been placed upon us before. It allows the American people to give us a new tool, because we have failed so miserably to use the tools that have been at our command.

Mr. Speaker, the proposed amendment to the Consititution made in order by this rule, the one to be offered by the gentleman from New York (Mr. CONABLE), is, I believe, absolutely necessary to restoring fiscal discipline to the Congress. It requires the Congress to adopt a statement of planned expenditures and receipts prior to each fiscal year. The planned spending could only exceed the expected receipts when a three-fifths majority of both the House and Senate approve the specific amount for such a deficit. It would limit the growth of future taxes by setting a ceiling on the level of receipts in proportion to the national economy no greater than the last calendar year. This means that taxes in 1986 would be limited to the calendar year of 1984 income. This ceiling could be overcome only by an absolute majority in both Houses of Congress.

Simply put, actual spending by the Congress could not exceed the statement of planned spending. The statement of planned spending could not exceed planned receipts. And planned receipts would not be allowed to grow at a rate faster than the economy itself.

Mr. Speaker, the proposal of the gentleman from New York would require the Congress to prepare its budget statement without the luxury of deficit spending unless we expressly vote by a three-fifths majority for more red ink.

Although the ratification process may not be as smooth a road in the various legislatures as some would think, I have no doubt that our passage today of this amendment will, in and of itself, be the quickest way for us to begin the journey toward financial responsibility.

The eyes of the American people are on this Chamber on this historic day. Let us not be afraid to begin that journey. Let us have the courage here today to take the first step.

□ 1100

Mr. BOLLING. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, I hesitate to take the floor at this time, after the most eloquent and I believe outstanding speech that the chairman of the Rules Committee delivered to this House. I think it will go down as one of the major speeches that he has made in his career, and one of the major speeches that has been made on the floor of this House at any time.

But, Mr. Speaker, I want to talk and direct myself to Democrats. Because frankly, the Republican side of the aisle in dealing with this matter has already sacrificed principle for political expedience. And I do not want to see the Democrats do the same thing.

We are dealing with several matters here today, Mr. Speaker, that would drastically affect the future of this country and the whole Democratic process.

One of the basic things is we are beginning to have the tendency in this administration, probably more than ever before, to use the Constitution as a vehicle, as though it were simply another amendment to some legislation that was coming to the floor. When there is a problem developing that the administration sees as a highly political one, they move for an amendment to the Constitution.

The administration has already suggested two, one on abortion and one on school prayer, both of them by a Republican Senate have been rejected. And now we are coming up with a constitutional amendment on the budget that in the future years would lock in the operation of this Congress and could absolutely devastate this country.

I wonder what the proponents would say on either side, Democrat or Republican, if today we were faced with a balanced budget by constitutional amendment. And here we have the President who has given us the biggest deficit this country has ever had, has the nerve to come to this Hill yesterday and say, what we need is a balanced budget.

My friend from Ohio said who do we think we are fooling. Well, I agree with him. We are not fooling the American people. The American people recognize this as nothing more than a political ploy at their expense and at the expense of this whole democracy. And it is not worth it, let me tell the Members.

I wish the President would be willing to come out among the people, even in my new district in Rockland, Westchester, Orange, and Sullivan Counties, and come out and let him try to give this kind of doubletalk and double meanings of what this is all about directly to the people. And I think he would find a reaction that amazed him. The people want the democratic process that has guided this country over the years to continue, and the only way it is going to continue is by defeating both the Democratic amendment and the Republican amendment, and defeating it decisively.

Mr. BOLLING. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, on November 14, 1980, I, as one of the original sponsors of a balanced budget amendment, wrote a letter to President-elect Reagan requesting his support.

I received a letter from one of his transition people about 4 weeks later saying I would receive a letter from the President himself as soon as he took office.

Three weeks after the President took office, I received a letter from one of his aides saying I would hear from the President within 10 days. I have not heard from the President yet. Although I did read in Newsweek

magazine about 5 weeks after that, that the President and the administration were opposed to a constitutional balanced budget amendment.

I fervently believe it is necessary to have one. I equally fervently believe that those of us who have labored so hard for this point of view did not do so to provide a figleaf for the administration that has proposed the highest budget deficit in the history of the country. "None is so chaste as those who have just sinned."

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, adopting this rule and the constitutional amendment it makes in order will now allow us to decide whether or not this Nation shall have the opportunity to achieve a real balanced budget; not a phony trumped-up balanced-budget bill but a real operative balanced-budget law.

This is not an issue held by the White House or the Republican Party for this moment for a political purpose. It was in fact held by the Democrats in committee so their party would not have to face up to this issue. They played politics with something the American people overwhelmingly want and now have the audacity to cry foul when their clever tactics did not work. Why? Because the leadership of the Democratic Party is opposed to balanced budgets, period.

Look at the record of this Congress. The Democrats have criticized deficits but regularly proposed deficits larger than those of the Republicans. When called upon to implement the law of the land now requiring a balanced budget the majority of Democrats have regularly voted against obeying that law. In fact, on one vote they even considered building a monument to Franklin Roosevelt as having a higher priority than a balanced budget.

I note with some sorrow the gentleman who I understand will offer the Democratic alternative here today voted precisely that way.

We have shown over a period of years that even in the best of times we are incapable of disciplining ourselves on spending.

That is why we must pass a constitutional amendment. That is why the American people have come to the commonsense judgment that we must do so.

That is why this House must do as the other body has done—put this Nation back on the track toward financial sanity.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Wyoming (Mr. CHENEY).

Mr. CHENEY. Mr. Speaker, I rise in strong support of House Joint Resolution 350, which would amend the U.S. Constitution to limit Federal taxes and require a balanced national budget.

Nearly 80 percent of the American people favor such an amendment according to recent polls. Thirty-one State legislatures have gone on record is support of the idea. The President of the United States strongly advocates such an approach. And the Senate has already passed their own balanced-budget amendment.

In the House, some 228 Members, a clear majority, representing both political parties—have cosponsored House Joint Resolution 350, which was introduced in the House by Representatives CONABLE and JENKINS. Until now, the House resolution has been languishing in the Judiciary Committee because the House Democratic leadership refused to bring this issue to the floor of the House for debate.

But the discharge petition which has been circulating these past few weeks has now obtained 218 signatures and we are going to have to debate it in full view of the American people.

If proof is needed that now is the time to discuss this issue, we should point to American's trillion-dollar national debt, a monument to decades of irresponsible spending and failure to equate expenditures with income.

Even in these times of economic hardship, when the overwhelming sentiment of the country is that spending and deficits must be reduced, Congress has demonstrated its continued unwillingness and inability to respond. After considering nine different budget proposals in the House, the best we could offer to the people for 1983 was a budget that will put the country more than another $100 billion in debt.

The Conable-Jenkins amendment would limit Government spending by requiring that the national budget be balanced, each and every year, unless three-fifths of Congress was willing to vote to the contrary, publicly and on the record.

The proposed amendment would also limit taxation by tying the rate of Federal spending to the rate of growth of the national economy. Federal spending could not continue to consume an ever-greater portion of the gross national product.

If enacted by Congress, the amendment would have to be ratified by three-fourths of the 50 States, and it is designed to take effect in time for Congress to get its house in order and prepare for the implementation of this amendment.

This is an issue whose time has come. The Conable-Jenkins amendment would result in the kind of accountability which the American people deserve from their elected representatives, and which our forefathers took for granted when they drafted the Constitution. Had they perceived that future leaders would jeopardize the economic health and security of the Nation by their fiscal irresponsibility, they most certainly could have included in the Constitution the kind of provision we are talking about today.

Mr. Speaker, I urge adoption of this amendment.

Mr. BOLLING. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Speaker, I rise in opposition to this rule. There is perhaps no one in the Chamber who I respect more in terms of his dedication to making the representative process work and this institution work than the chairman of the Rules Committee, the gentleman from Missouri (Mr. BOLLING). And so it is with great reluctance that I differ with the rule that is before us today.

But we are here to talk about amending our Constitution. Some of us think that is a very serious proposition, as does the gentleman from Missouri, and do some of the leaders who are proposing the amendment before us.

But the rule before us comes at a highly charged time in our electoral process, and it does not allow us to really consider alternatives or changes in the proposals before us. And I do not think that is in the highest tradition of dealing with our Constitution.

Mr. Speaker, I do not know what is going to happen today here on the House floor. But I do think the people of this country expect us to take this issue very seriously, and do more than just play politics with it. I think we should defeat this rule. I think as a bare minimum, we should come back next week, give it more time under an open rule, or at least a rule that allows for considerably more alternatives than we will have this afternoon.

□ 1110

Mr. HUGHES. Mr. Speaker, will the gentleman yield?

Mr. SHARP. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Speaker, I want to commend the gentleman from Indiana. I could not agree with him more. The rule does not provide sufficient time to consider this most important and profound issue. I am most distressed that the rule does not accord us an opportunity to vote upon a statutory approach to balancing the budget. That is what we should be doing—amending our own budget process to force fiscal restraints and responsibility.

I would like to associate myself with the gentleman's remarks, for I too intend to vote against the rule so this Congress might work its collective will.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gemtleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, I have listened with interest to the chairman of the Rules Committee about the process, he stated "we must have process."

I agree that procedure must be supported, but we must feel, Mr. Speaker, that we have been able to participate meaningfully in the process to feel we need to sustain it. Willingness to allow meaningful participation and interaction or sharing, if you will, in the process is what will sustain that process. When narrow political decisions define the arena in which that process unfolds, respect for that process necessarily diminishes. Frustration mounts and change such as that before us today is desired.

The responsibility for those narrow political decisions that define the arena that produced this frustration I lay at the feet of the Speaker and at the feet of the chairman. Process is important, but so is substance.

Mr. BOLLING. Mr. Speaker, I yield myself 1 minute, sort of reluctantly.

I find that a statement that—well, I will not use the word, but let us say an uninformed statement.

The major efforts that I have been involved in on process were a committee on committees some time ago which dealt with the organization of the committee structure. At my behest, it was composed of an equal number of Democrats and Republicans. With the approval of the leadership on both sides, there is a task force of the Rules Committee which is now dealing with the budget process, which is not totally bipartisan, but includes Members of Congress who are not members of the Rules Committee who are Republicans. It is much more close to bipartisanship than any other.

The gentleman is perfectly entitled to his point of view and he is perfectly entitled to have it, but I just think it is important that the gentleman has some awareness that my spirit might be a little different than the gentleman implies.

Mr. LATTA. Mr. Speaker, I yield 30 seconds to the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, I thank the gentleman from Ohio for yielding.

I appreciate the bipartisan spirit of the chairman of the Rules Committee, but if the gentleman will add up who can make the final decision, even on the committee, he uses as an example it is four Democrats and two Republicans. It is a 2-to-1 ratio.

When I talk about process, I talk about process broadly, in terms of the Budget Committee, the Ways and Means Committee, the Appropriations Committee, those key committees that make the decisions that shape the budget and the narrow political decisions defining the ratios between Democrats and Republicans on those committees which create that frustration.

Mr. BOLLING. Mr. Speaker, I yield myself another 30 seconds. I understand the gentleman's problem. I would like to share with him the notion that I have about as much frustration as he does.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Speaker, I want to take this 1 minute to try to diffuse some of the statements that have previously been made.

I want to make sure that the body understands, as I support this amendment and this rule, that the political aspects of it have nothing to do with Reagan.

This amendment was introduced by me and by the gentleman from New York (Mr. CONABLE) while Carter was the President in 1979, long before this President was ever even nominated.

Now, I too have a reluctance to amend the Constitution. I would prefer to do it in another way, but I am very honest and very sincere with you in that I truly believe that if we fail to act with this flexible approach, the most flexible that we could draft, but if we do not act, I truly and sincerly believe that the States are going to act. I think that in and of itself would be more detrimental to this Nation than anything we could do.

I would hope that we could pass this amendment today. I believe that it is workable. I believe that it is something that we as an institution can live with.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I rise in support of this rule rather reluctantly, because one of the arguments used against us discussing this important issue now is that we do not have enough time. That is why you have Members coming down here with snippets on 1, 2, 3, and 5 minutes. It makes it very difficult to bring forward a full argument dealing with the constitutional question.

I also rise reluctantly because I am a member of the Judiciary Committee and I wish we had had an opportunity for the full Judiciary Committee to discuss this. I have served on that committee for 4 years. This subject has never been brought on our agenda to the full committee, so we have not had that opportunity. The only opportunity we have is using the extraordinary proceedings that have taken place now.

It seems a little strange to criticize those of us who use the extraordinary proceedings, when that was all that was left to us.

The real question here is very much like the question facing the California Legislature about 6 years ago. Time and time again were trying to figure out what to do with the surplus they had because of the tax rates that went higher and higher, and they fiddled whole California burned.

Finally, the people of California decided to take it in their own hands and passed proposition 13 which started that prairie fire which has swept across this Nation and which has changed the face of this Nation.

The problem we face here is somewhat like that, but different in one major respect. If we do not act, the people can directly act, in a fundamentally different way. All we need is two or three more State legislatures to pass the legislation necessary to bring us to a constitutional convention. Those who are so sincerely concerned about the process, I would ask you, would you be more concerned about the process if we had a runaway constitutional convention?

I would mention that we have never had a constitutional convention other than the original one. We do not even have the rules by which such a constitutional convention would go forward. We do not know who would be selected. We do not know the extent and nature of such a convention. So I would say to those people who are concerned about the Constitution and about the process, this is within the bounds of the Constitution. We should act now or the people are going to act very, very soon.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. SHAW).

Mr. SHAW. Mr. Speaker, in a few moments we are going to take the first step of a most historic debate. During the debate, the word "political" and the word "principle" have been used repeatedly in opposition to the resolution at hand.

I, too, as the gentleman from Missouri, am somewhat uncomfortable with the issue before us, but after a year and a half of serving in this Congress I am convinced that this body does not have the self-discipline or the political honesty to come forward and say what we can afford, to come forward by a simple majority vote and decide what is best for this country in dealing with deficits.

What can be less responsible or less politically honest than spending the public's money and then mortgaging its future, leaving our bills for many programs that were ill conceived, to future generations?

There are many States, as the gentleman from California stated, who have constitutional provisions in their own State governments to live within their own means. These governments, as my own State of Florida, have not mortgaged their futures.

I think the gentleman from New York (Mr. CONABLE) adequately described this. This is not a straitjacket,

but it is a provision that we will be asked to put into the law by constitutional amendment process which will require greater than just a simple majority to mortgage the future of your children and my children.

Mr. Speaker, I urge adoption of the rule and the ultimate adoption of the resolution.

□ 1120

The SPEAKER. The gentleman from Ohio (Mr. LATTA) has 2½ minutes remaining.

Mr. BOLLING. Mr. Speaker, I yield 7 minutes to the gentleman from Wisconsin, (Mr. OBEY).

Mr. OBEY. Mr. Speaker, in pushing this proposal to the floor today, this administration is giving hypocrisy a bad name. This administration pretends that it is fighting for a balanced budget. If it is losing that battle, it is losing that battle to itself.

This administration, over the past 2 years, has sought and won total control over economic and budget policy. It won that control and used that control on the floor of this House to push through budgets with the highest deficits in the history of the Republic.

From World War II to 1980, some 33 years, the national debt has increased by about $700 billion. The administration's own budget recommendations will do that again in 4 years.

If the President really believes that we need a balanced budget, he has the constitutional obligation and a moral obligation to present that budget to the Congress every year, not just in the hereafter. This proposal does nothing that the President cannot do now except that with its 60-percent provision, it adopts the constitutionally repugnant idea that a minority ought to be able to govern policy on economics.

I have talked to at least 20 Members on that side of the aisle, and more Members on this side of the aisle. I have asked them how they could sign this discharge petition and how they can vote for this today, including members of the Judiciary Committee. They have hung their heads, and they have said, "Well, I know, I hate to do it, but I just cannot go home and explain it to my people."

I would suggest that it goes with the territory. I did not know that, when we took our oath to defend the Constitution, that we did it with our fingers crossed. I thought we really meant it. I thought this place, and virtually every Member in it, was really on the level.

If Members are not willing—and I say that to those of my colleagues who have a private opinion which will be different than the public vote they cast today—if Members are not willing to go home to their own districts and tell them what their honest beliefs are about something as crucial as this, then you do not belong here.

I would ask Members to do their duty, to defend that Constitution from election year gimmickry, from election year smoke shoveling. I would ask Members to explain to their constituencies that no set of words in a Constitution will ever be a substitute for political will.

Do not come in here and cut taxes by record amounts; do not come in here and increase military spending by record amounts and then pretend that you have a higher commitment to a balanced budget.

I ask Members to do what they know is right, do what they know is honest, defend that Constitution, vote no, and then get about the business of restoring financial responsibility to the actions of this Congress and this Government the only way it can be done, one day at a time, one year at a time, one budget at a time now, not in the hereafter.

The SPEAKER. The gentleman from Ohio (Mr. LATTA) has 2½ minutes remaining.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Speaker, you followed through; you promised that we would have an opportunity to vote on the amendment for a balanced budget if we got sufficient names on the discharge petition, and now we have that opportunity with this rule, and I rise in support of it.

The American people may be able to have enacted a sanction that they have wanted to place on the U.S. Congress for a very long time.

Oh, I know there are detractors for this remedy; they say it will not work, that it may be too rigid, that it may be ineffective.

Well, now, I ask you, Mr. Speaker, what else will keep the Congress from constantly spending more than it receives? What else will keep our Members from endowing their consituents with largesse beyond our means to pay for it? What alternative is there to the irresponsible policies of the last 22 years in which we balanced the budget in only one lone, single, brief year?

For the financial solvency of this Nation, this Conable-Jenkins amendment must be adopted. There is no alternative. We have no choice.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Speaker, I rise in favor of the rule and in favor of the amendment, House Joint Resolution 350.

There are other provisions in the U.S. Constitution which provide protection for the people against the Government or win a majority. This would not be the only one. There are many places in the Constitution where the majority is not going to win over the basic rights protected by the Constitution. There are basic rights involved here. This will just put in another such protection there, which I think is very important.

I do not approach this matter politically at all. Years ago, I think it was probably 10 years ago, I introduced the first constitutional amendment that I have introduced on this subject. We were frustrated by the legislative committee. We had to have an ad hoc committee. Mr. Ichord chaired the ad hoc committee of which I was a member. We had Burns and other people come before us and testify to the virtue of this approach.

States have had this procedure; it has worked. There is no reason it cannot work with our U.S. Constitution. It is consistent with what our forefathers did in the original Constitutional Convention when the Constitution was originally drafted.

There is here no great departure from the basic philosophy of our Government.

I very much support this and I hope that it will pass overwhelmingly.

The SPEAKER. The gentleman from Ohio (Mr. LATTA) has one-half minute remaining.

Mr. LATTA. Mr. Speaker, I yield myself that one-half minute.

Mr. Speaker, poll after poll shows that the American people support this effort.

Let me read from a Gallup poll of June 13 of this year:

> Nationally, 74 percent of the American people support a constitutional amendment to balance the budget.
>
> Only 17 percent stated that they opposed it, and 9 percent had no opinion.

So I think it is high time that this House does something in an area where the American people are demanding action and they are demanding it now.

So let us approve this rule and approve the resolution.

□ 1130

Mr. BOLLING. Mr. Chairman, despite my views on the constitutional amendment, I think this is the time to deal with it. Therefore, I am strongly in support of the rule, and I hope that virtually every Member will vote for it.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of House Resolution 604, the House resolves itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution (H.J. Res. 350) proposing an amendment to the Constitution altering Federal budget procedures.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution, House Joint Resolution 350, with Mr. BOLAND in the chair.

The Clerk read the title of the joint resolution.

The CHAIRMAN. Pursuant to the rule, the first reading of the joint resolution is dispensed with.

Is the gentleman from Illinois (Mr. McCLORY) in favor of the joint resolution?

Mr. McCLORY. Mr. Chairman, yes, I favor House Joint Resolution 350.

The CHAIRMAN. The gentleman qualifies.

Is the gentleman from New Jersey (Mr. RODINO) opposed to the joint resolution?

Mr. RODINO. I am opposed, Mr. Chairman.

The CHAIRMAN. The gentleman qualifies.

The gentleman from Illinois (Mr. McCLORY) will be recognized for 1 hour, and the gentleman from New Jersey (Mr. RODINO) will be recognized for 1 hour.

The Chair now recognizes the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased that at long last this House will have a chance to vote on a balanced budget-tax limitation amendment to the Constitution. After years of discussion and debate in the Judiciary Committee, we can now act to give the American people the kind of responsible government they want. My years of analysis of this issue have only strengthened my conviction that necessary fiscal restraint can only be achieved by amending the Constitution.

If there was any principle that proponents and opponents agreed upon in the 14 days of hearings, it was that the status quo presents a bias—a tilt—in favor of spending for special interests and against balancing the budget. Perhaps the most illuminating aspect of the hearings is that it made clear that the "big spenders" of the past do not support a balanced budget for the future. In my opinion, this bias must be corrected, yet cannot be corrected by statutory means. We all know that balanced budgets are already required by statute. But that means little. For one Congress by statute or by rule cannot bind the next. In fact, the same Congress cannot bind itself from one day to the next. The rule we just adopted set aside the discharge procedure established by House rule just as simply as our unbalanced budgets and excessive appropriations impliedly, but effectively, set aside the statutory rule that budgets must be balanced.

When all the rhetoric is scrutinized, the only constraint that we cannot ignore is that of the Constitution. I do not accept the notion that Congress will ignore the mandate of the Constitution if House Joint Resolution 350 is proposed and ratified. Congress has made good faith efforts to obey the Constitution throughout its history. While it may have been mistaken about the constitutionality of its legislation, I cannot accept that its errors were willful. I am confident that the Members of the Congress will obey the strictures of a constitutional mandate of fiscal discipline. In fact, it is my observation that Members would prefer to be so constrained than to be free to be unduly pressured by special interests.

In drafting a constitutional amendment, it is important to seek an appropriate balance between the rule of balancing the budget and limiting taxes and exceptions to the rule. House Joint Resolution 350 provides that balance. An unbalanced budget could be enacted only by three-fifths of both Houses. A tax increase which is greater than the rate of increase in national income can only be enacted by a special vote requiring 218 votes in the House and 51 votes in the Senate, regardless of the number voting.

In contrast, the Alexander substitute imposes no real constraint on the Congress. It basically constitutionalizes the current process. By declaring a "National Emergency" by a simple majority vote, Congress could do whatever it wishes. I do not know if capitalizing the term "National Emergency" has constitutional significance (I am quite doubtful); but, capitalized or not, the term hardly offsets the tilt toward excessive spending that most perceive in our present process.

It is clear to me that the Alexander substitute would not be proposed but for the present context. Its purpose is to give the big spenders a haven to hide, a chance to vote for a constitutional reform without institutional change, a cynical attempt to endorse a slogan but no more.

The Alexander substitute is clearly a political document. It requires, without any exception for any reason, the President—because today he is Republican—to submit a balanced budget while it allows the Congress—because today this House is Democratic—to do whatever the majority desires. Thus even during a declared and hostile war, the President is required to submit a balanced budget; yet during peacetime, the Congress could declare that a 4-percent unemployment rate is a tragedy and therefore a national emergency and adopt an unbalanced budget. The obviously uneven treatment of the President and the Congress should inform every Member of the political purpose of the Alexander substitute.

Yet so poorly is the Alexander substitute drafted that it is ineffective in limiting the President or the Congress. For whereas House Joint Resolution 350 expressly excludes from the concept of receipts those receipts derived from borrowing, the Alexander substitute does not. Thus the Alexander substitute would allow the budget to be balanced with borrowed money. It would only require that the Government pay its bills—as it does today in the face of huge deficits by borrowing money. We do not need a constitutional amendment to tell us to do that, do we?

In contrast House Joint Resolution 350 would create a mechanism of fiscal restraint. It would establish a norm of a balanced budget and tax limitation. It would also allow flexibility but not by simple majority vote. It is not a partisan proposal. It is not a proposal designed to hamstring the President while allowing the Congress to go on its merry way, spending and spending. It is not a meaningless proposal, one which would allow the books to be balanced with borrowed money. Rather, it is a bipartisan proposal. It recognizes that it is the Congress that enacts the laws and that it is the Congress that must balance the budget and limit taxes. It is a thoroughly considered proposal, which avoids the silly mistakes I have noted and which has stood the test of several months of careful scrutiny.

By no means am I suggesting that everybody loves House Joint Resolution 350. But the long list of opponents that Chairman RODINO found to testify against the proposal only caused me to appreciate it all the more. The fact that the big spenders—welfare groups, labor unions, liberal economists, and politicians—were so afraid that House Joint Resolution 350 would be enacted merely proved to me that House Joint Resolution 350 would be effective in its purpose of achieving fiscal discipline with a proper balance between restraint and flexibility.

House Joint Resolution 350, if proposed and ratified, would allow the American people to regain control of their government. Huge deficits cause inflation or unemployment depending on the monetary policy. But whether it be inflation or unemployment, we cannot afford either. We cannot proceed on the present course of mounting deficits, with Government out of control.

The Constitution's central purpose is to define the relationship between the people and their government. By adopting House Joint Resolution 350 we would be underscoring the unique contribution of the American experience to political science—that by restraining Government you set the people free.

As I have said before in this well, Mr. Chairman, the Founding Fathers,

the framers of the Constitution, felt that such a provision in the Constitution would be superfluous. They felt that the Congress would, of course, provide for balancing its budget by limiting its expenditures to the extent of the Federal revenues and thus make unnecessary an amendment to the Constitution. As a matter of fact, the principle of a balanced budget and reducing the Federal debt has been the policy of virtually every administration and an issue in every political campaign down to the 1930's.

So this is an issue whose time has come. The people are demanding it, and I am confident that the House today will by a two-thirds majority offer an opportunity to the American people to ratify a constitutional amendment to require a balanced Federal budget.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, this morning we are facing a very, very critical decision. I believe it is important for the Members of this body to recognize what the choices may be.

We have heard the gentleman from Missouri, Mr. BOLLING, a very respected Member of this Chamber, who is certainly known to us as a guardian of the Constitution and a fair-minded individual, tell of how disturbed he was this morning.

The gentleman from New York (Mr. CONABLE) who is the author of this amendment, spoke to us of his reluctance in bringing up this proposal. The ranking minority member of the Committee on the Judiciary, the gentleman from Illinois (Mr. MCCLORY), spoke of the many hours and the many months and indeed the number of years that we have spent in deliberating and carefully studying the possibilities of writing a constitutional amendment which would address this very complex issue.

And I might say that after all of the objective and overwhelming evidence was presented to the committee over a period of some 3 years—and as recent as August—whether they were scholars of the Constitution, whether they were economists, Nobel laureates, whether they had been advisers to Presidents, Republican or Democrat, all of them advised and warned against going this route. All of them advised against tampering with the Constitution of the United States and dealing with an economic policy in this fashion.

So, I now state my objection, and careful objection, to the proposition that is before us today.

Mr. Chairman, I rise to urge this body to reject House Joint Resolution 350, the so-called balanced budget amendment.

The objectives of this proposal may be sound and valid. The concern about the record-shattering deficits that loom from here to the horizon is genuine. But hearings conducted over 3 years by the Judiciary Subcommittee on Monopolies and Commercial Law have convinced me that the proposal is unwise and unworkable and that implanting this proposal in the Constitution would trivialize the document that guarantees fundamental rights and provides the framework for the orderly function of Government.

That, too, is the consensus of distinguished experts from across the political and economic spectrums.

Listen to Dr. Paul Samuelson, winner of the Nobel Prize for Economics:

> It is an act of arrogant folly to try to specify constitutional formulas applicable for the infinite future.

Hear the words of Paul A. Volcker, current Federal Reserve Board Chairman:

> The Constitution cannot, and should not, be changed lightly to meet considerations or situations that are transient in nature, nor to "lock in" a particular economic doctrine.

And, Dr. Alan Greenspan, Chairman of the Council of Economic Advisers under President Ford:

> Most economists, myself included, do not favor such an amendment. . . . The Congress cannot readily control the actual budget in the short run—say, a year.

And, Charles L. Schultze, Chairman of the Council of Economic Advisers under President Carter:

> In my view a constitutional amendment . . . runs counter to the basic structure of our Constitution, because it attempts to enshrine for all time, in the fundamental law of the land, a very particular economic policy that may happen to fit the needs of today.

And this was the plea of Murray Weidenbaum, until recently Chairman of the Council of Economic Advisers under President Reagan:

> The President's economic program would accomplish all of the objectives that are sought in the many proposals to balance the budget via Constitutional change. But it would do so without the many drawbacks, such as encumbering the Constitution with matters that more appropriately belong in the policy arena or attempting to rule on matters of technical fiscal administration.

That was the appeal of the now departed Mr. Weidenbaum a little more than a year ago. But now President Reagan has embarked on a public relations campaign to cajole the Congress into doing the very thing Mr. Weidenbaum told us the President's economic program would render unnecessary.

President Ford has said this proposal would raise false hopes. The conservative columnist George Will has called it a hoax. The Wall Street Journal has labled it a constitutional copout.

This crusade by the President for this constitutional amendment comes at the same time his economic programs are bringing us mammoth deficits that 2 years ago were truly unimaginable. This contradiction has not gone unnoticed. It has been the butt of a number of jokes and the cause of much political fingerpointing.

Amending the Constitution is not a joke. It is not to be taken lightly. Our Constitution is a magnificent legacy of generations past to all of us alive today. We should think and debate long and hard before we graft onto the Constitution a controversial theory that would bind generations unborn to an economic doctrine that is not valid for all times and all conditions. A proposal without precedent, in that its purported constitutional requirements can be waived by the Congress. If there is not cynical circumvention by the Congress, there could be Government paralysis and economic disaster. In the end, the courts would have to be the final arbiter—year after year—of tax and spending decisions that are properly the province of the political branches.

Is this proposal what we wish to bequeath to future generations?

Let us not take this historic step without full consideration of all that it implies. Let us not try to fool ourselves or our fellow citizens. Let us not fall for the selling of a constitutional amendment through a publicity campaign one might use for the selling of soap or home appliances.

House Joint Resolution 350 has two major provisions:

First, it would prevent Congress from adopting any budget with a planned deficit except by a three-fifths vote of the whole number of both Houses.

Second, it would limit revenue growth to the rate of growth of national income in the previous calendar year, except if an ordinary majority of the whole membership of both Houses votes to raise taxes beyond that rate.

Both provisions could be waived if war has been declared.

This amendment is a subversion of a basic principle of our Constitution—rule by the majority. A President and a "superminority" of Congress—41 percent of one House—in the exercise of the constitutional mandate to insure that outlays do not exceed receipts, might kill or maim any program they did not like—social security, environmental, defense—so long as the President could hold the support of 41 percent of the Members of one House of Congress.

This proposal is an attack on our commitment to majority rule. The Constitution now requires two-thirds majorities of those voting for a very limited number of decisions. Even declaration of war requires only a simple

majority. But, to sanctify a deficit, a three-fifths majority of the whole number of both Houses of Congress would be required. This would allow 41 Senators or 175 Members of this body to thwart the will of the majority.

House Joint Resolution 350 does not require a balanced budget. If a President could not command that superminority, a three-fifths vote would approve a deficit. And the Congress is required to do nothing if a deficit results from actual receipts falling short of those anticipated. The Congress could make very rosy economic assumptions and, when the numbers prove wrong, nothing would have to be done to balance the budget. In other words, a planned deficit would require a three-fifths majority, but a deficit resulting from forecasts that are unrealistic, devious, or just plain wrong can just happen. Even the most sincere economic projections are but guesses at what income and outlays will be a year from the time they are made. The Constitution, with this amendment, would require the Congress to do something it cannot: forecast accurately receipts and outlays.

This raises the question of what set of numbers the Congress would choose. We have already had three sets from OMB for the current fiscal year: A $93 billion deficit, a $104 billion deficit, and a $114 billion deficit. To make matters worse, the Congressional Budget Office sees a deficit from $140 to $160 billion.

House Joint Resolution 350 could hurt national security interests. It permits a deficit for defense by majority vote only in event of declared war. Formal declarations of war are rare in today's world. Incurring deficits to build and maintain our national security, however, is a necessity, even in time of peace. Under this proposal, such a deficit would require a three-fifths vote of approval. In addition, in economic crises, defense outlays could be a prime target for prehaps unwise reductions.

The exception in the event of a declaration of war has been of concern to the Reagan administration itself which has expressed a preference for the words "in time of national emergency." However, even that could prove to be a legal thicket. What is a national emergency? A recession? An inability of Government to meet its obligations? A breakdown of U.S. industry? A poor harvest? A bountiful harvest? A Mount St. Helens? A hurricane? A flood? A drought? An earthquake? All could be unforeseen; all could require greatly increased Federal outlays. The three-fifths requirement might be a dangerous roadblock to congressional enactment of emergency programs to deal with such situations.

House Joint Resolution 350 could lead to significant enforcement problems and confrontation among the branches of Government. The amendment gives no clue as to how the requirement to insure that outlays do not exceed receipts shall be enforced.

A host of questions will wind up with the courts. Terms and definitions will be challenged. What is meant by "outlay?" Does it include off-budget items? How do we define "national income?" What is meant by a three-fifths of the whole number of both Houses? Does this mean that a vote of 321 House Members to approve a deficit would make a Senate vote against a deficit worthless? Does the command that the President "shall insure" that outlays do not exceed receipts enable him to impound funds? The veracity of economic forecasts might also be challenged. These issues will come before the courts, because there is no other mechanism for enforcement. What do the courts do then? Write the budget? Appropriate the money? Order arrests? I think this prospect might give pause to those of us who have often expressed distaste for alleged judicial activism.

House Joint Resolution 350 would have absolutely no effect on our current economic problems or those that loom in the immediate years ahead. Ratification could take 7 years; implementation another 2. In the meantime, this amendment would not put one person to work, cut one point off interest or inflation, take $1 off the deficit, stop one bankruptcy, prevent one mortgage foreclosure. Only current congressional decisions can do anything about these problems.

Since the adoption of our Constitution, there have been 9,400 proposals to amend it. But it has been revised only infrequently. Twenty-four of the amendments were enacted to correct flaws in the original document or to protect and extend individual rights. Of the other two, one was the disastrous effort to outlaw alcoholic beverages. The other—the repeal of this error—came along 14 years later.

Let not this Congress, just for political expediency, make a second constitutional mistake and send forward for ratification an unwise and unenforceable amendment. The 18th amendment did not stem the flow of whisky; this amendment will not stem the flow of red ink. The latter responsibility lies with everyday policy decisions of the Congress and the executive branch. We will not solve these problems by tampering with the Constitution.

The Constitution should be our majestic, paramount law. It must not be treated, in the words of one Supreme Court Justice, "as if it were a rubber ball so that each succeeding child may play with it according to varying inclinations."

And Hamilton, in the Federalist Papers, arguing against constitutionally controlling legislative discretion on the issue of peacetime armies, cautioned against writing mere parchment provisions into the Constitution and warned that—

> Nations pay little regard to rules and maxims calculated in their very nature to run counter to the necessities of society.

He counseled:

> Wise politicians will be cautious about fettering the government with restrictions that cannot be observed, because they know that every breach of the fundamental laws, though dictated by necessity, impairs the sacred reverence which ought to be maintained in the breast of rulers towards the constitution of a country, and forms a precedent for other breaches where the same plea of necessity does not exist at all, or is less urgent and palpable.

I hope that we will keep that counsel in mind and not rush impetuously into amending the Constitution in these waning hours.

This proposal would demean the Constitution. The Constitution is a document that guarantees fundamental rights and freedoms and provides for the orderly operation of Government. This amendment is a constitutional guarantee of nothing. It provides for a balanced budget—except sometimes: When three-fifths of Congress says otherwise; when revenues fall below estimates; in time of declared war; when Congress cannot agree on cutting spending; when Congress cannot agree on raising taxes. It could be an invitation to fiscal gimmickry or a prescription for paralysis of Government, for confrontation among the branches, for economic chaos.

The Constitution is a stately document, beautiful in its simplicity and straightforwardness. It states clearly the goals and ideals of a free people. It provides the framework for reaching those goals. Let us not clutter it. Let us not trivialize it. Americans have fought and died to protect the sanctity of the greatest political document ever authored. All of us and each of us individually are responsible for the integrity of this document, and all of us and each of us must do what we can to preserve it. Let us leave the Constitution as unimpaired as it has been left to us.

Mr. Chairman, I strongly urge rejection of House Joint Resolution 350.

□ 1200

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Pennsylvania.

Mr. WALKER. The gentleman has made a very fine statement. But I wonder if the gentleman could tell us how he has voted during the course of this Congress on enforcing the balanced budget law that is now a part of this body of law of this land passed by the Congress.

Has the gentleman voted to enforce that particular law?

Mr. RODINO. The gentleman in the well has voted his good conscience in the interest of what he believed would best serve the Nation and its constituency. And it may differ from the way the gentleman from Pennsylvania votes, but I think the issue at hand is whether we now clutter the Constitution with some unworkable, unenforceable instrument.

Mr. WALKER. If the gentleman will yield further, it seems to me that one of the real questions here is whether or not we can exercise the kind of fiscal discipline that the Nation needs.

The gentleman for instance, if my records are correct—and the gentleman is free to correct me if I am wrong—voted, for example, that a higher priority in his mind was building a Franklin Roosevelt Memorial than balancing the budget. Now, that is exactly the kind of spending problem that we have in this country and the reason why we are forced to deal with the problem through a constitutional amendment.

Mr. RODINO. May I say to the gentleman that I believe what the gentleman has been saying and what those who have been the proponents of this proposal have been arguing, and with great emphasis, is that the Congress lacks discipline, that the Congress ought to forsake its constitutional responsibilities and use this instrument as a magic wand which it waves and then be able to say, "I am absolved and because of this instrument I will be guided by it."

I am saying that individuals who come here have a responsibility, each of us has a responsibility, and when that responsibility is met, if it is to meet a balanced budget or if it is to meet a national emergency, then such individuals must vote accordingly.

Mr. McCLORY. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. I thank the gentleman for yielding.

Mr. Chairman, we have two choices before us today, and they are about as clear as any two choices could be. Over 4 years ago, an effort started that produced House Joint Resolution 350. House Joint Resolution 350, a bipartisan resolution, has been debated in colleges and universities all over this country. It has been attacked, defended, discussed, dissected, and it has had the kind of analysis that is needed to produce a serious effort to amend the Constitution of the United States. It was written by legal scholars. It was written by a Nobel Prize-winning economist. That is the choice on the one hand.

The choice on the other hand is a makeshift amendment that was written last night in some office here in the Capitol. It is an amendment written by people who have consistently opposed every effort that we have made in the last 15 years to stop this spending spree. It was written by people who did everything in their power to prevent us from discharging this balanced budget amendment and bringing it to the floor for a vote today. It was written by people who continue to stand here on the floor and criticize Ronald Reagan for deficits but yet every day they vote to make those deficits bigger.

□ 1210

I think the choice could not be clearer.

The Alexander amendment is a sham, it is a politically motivated document with only one objective, and that is to derail the balanced budget amendment concept and effort and to give an escape to those who say at home they are for balancing the budget but do not want to vote to do it here in Washington.

I want to tell my colleagues I do not believe that escape is going to work, because I do not think the American people are going to be fooled.

The distinguished chairman of the Judiciary Committee has talked about discipline here. And I would like to address discipline.

We consistently vote to spend beyond the budget. Why? Because every time we vote, those who want something from the Federal Government are looking over our right shoulder, sending letters back home telling people whether PHIL GRAMM cares about the old, the sick, the tired, the bicycle rider.

In the last Congress, the average bill we voted on with amendments cost about $50 million. There are 100 million taxpayers. That is 50 cents a head. The average beneficiary got $500. You do not have to have studied economics at Texas A&M to know that somebody is willing to do more to get $500 than somebody is willing to do to prevent spending 50 cents.

In my 4 years in Congress, I have never seen a spending bill defeated because it cost too much money. I have seen them defeated because people opposed them but never on the dollar issue. The only time we ever pass an economy vote in this body is on a big issue like budget reconciliation where we can get the American people involved in the debate. The prospending interests dominate, and it does not matter whether you are talking about conservatives or liberals. When the American people are not involved and not informed on day-to-day votes, spending will always win out.

This is a perfect example of where a constitutional constraint on elected officials is required. It may be that the Congress would protect the first amendment rights without the first amendment having been written. But the American people have seen fit in their wisdom not to trust Congress with those powers. And I think we should remove the power of Congress except under extraordinary circumstances to spend more than we take in.

Those who oppose this amendment oppose it for one basic reason: They do not want to be forced to set priorities in the Federal budget and tell people no. They want to be given a freedom which no American has in his household, his business, or his church, and that is year after year to spend beyond his means.

We are going to take a historic vote here on the floor of the House. And the American people, thanks to the fact that we got 218 people to sign the discharge petition, will know who is and who is not serious about balancing the budget.

If the Members want to force on Congress a mandate that will force us to set priorities, that will force us to make hard decisions, that will force us to tell people no, that will force us to provide an economic environment in which we can have stable prices and economic growth, then the Members want to vote down the Alexander substitute and vote for the Conable-Jenkins resolution.

Finally, let me say that it has been charged here today that this is an attempt to divert attention away from the problem. Exactly the opposite is true. The problem is deficits, high interest rates, and unemployment, and nothing we could do today could do more to bring down long-term interest rates than to adopt a real balanced budget amendment to the Constitution. It would immediately change expectations about future inflation rates and future deficits and future interest rates, and would do for long-term rates what the budget tax passage 2 months ago did for short-term rates.

So if the Members want to get on with the job of producing jobs here at home, jobs now, let us change this psychology of a spending treadmill that we have been on and adopt a balanced budget amendment to the Constitution.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, we will shortly have the privilege of voting on two particular proposals for amending the Constitution to require a balanced Federal budget, the Alexander substitute and the Jenkins-Conable amendment.

The first one, if adopted, would amount to business as usual. With all due respect to the distinguished gentleman from Arkansas, this amendment represents a cruel hoax on the American people under the guise of imposing a control on runaway Federal spending, because of two crucial dis-

tinctions from the Jenkins-Conable proposal.

Under the Alexander proposal, we would be able to unbalance the budget by a simple majority vote declaring that a "national emergency" exists. Jenkins-Conable requires three-fifths—60 percent.

Second, Alexander has no limitation on estimated receipts from year to year whereas Jenkins-Conable stipulates that the rate of increase in receipts may not exceed the rate of increase in national income.

Quite simply, under the Alexander amendment, it would be much easier to raise taxes to cover spending rather than to live within our means.

There are compelling reasons why we should support House Joint Resolution 350 in its original form, the Jenkins-Conable amendment.

First, it will greatly assist both the housing and the auto industries, two mainstays of our economy which have been particularly hard hit by high interest rates. According to economist Irwin Kellner of the Manufacturers Hanover Bank, using Federal Reserve data, Federal borrowing consumed 78.8 percent of total savings in this country in 1981, a direct consequence of high deficits fueling high interest rates.

The importance of balancing the budget can be seen from a poll conducted by Oppenheimer & Co.—member, New York Stock Exchange—among institutional investors. Among the results:

(1) What effect would passage of a Balanced Budget Amendment have on interest rates?

[In percent]

	Long-term (rates)	Short-term
Significantly downward	49	43
Modestly downward	46	43
Total	95	86

Note: Remainder replied upward, no change, or no opinion.

(2) How quickly can we expect results?

[In percent]

	Long-term (rates)	short-term
1 to 2 mo	26	40
Within 6 mo	31	37
Within 1 yr	23	6
Total	80	83

Note: Remainder replied longer periods, no change, or no opinion.

Second, passage will secure for the American people a chance to force the Federal Government to live within its means, something it has been unable or unwilling to do on its own. And public sentiment is overwhelmingly in favor of pursuing this route.

A Market Opinion Research poll taken in June indicated 79 percent approval for a balanced budget amendment versus 15 percent in opposition. A Gallup survey in July revealed that, among those who were aware of the constitutional amendment, 74 percent were in favor of it. And a July Harris poll showed that 90 percent of Americans believe that the budget deficits which have been projected pose serious problems for our national economy.

Those who are languishing and lament having to traverse the constitutional route in order to shut off the magic money machine must realize that this would not be necessary had we shown the courage earlier in the year to reduce spending by more orthodox means. On May 25, this body turned thumbs down on the Rousselot amendment to the first concurrent resolution on the budget for fiscal year 1983. One hundred and eighty-two Members voted in favor, which although insufficient for passage, was second only to the Latta substitute in number of "yea" votes.

Both the vote on the Rousselot amendment and the signatures on the discharge petition which finally freed House Joint Resolution 350 for consideration before the House dramatize the clear juxtaposition of the major parties on this issue; 137 of 191 Republicans voted for the Rousselot balanced budget amendment—71.7 percent—but only 45 of 242 Democrats—18.6 percent. And 172 of 192 Republicans signed the discharge petition—89.6 percent—as opposed to 46 of 241 Democrats—19.1 percent. Should the final vote on House Joint Resolution 350 reflect the same disparity, it will certainly reveal to the American public—for once and for all—which party is more likely to practice what it preaches about fiscal responsibility.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. WHITE).

Mr. WHITE. Mr. Chairman, for at least three terms I have introduced a resolution for a balanced budget. The theory that Congress can and should totally shoulder the responsibility for balancing the budget is inspiring and high sounding. But the reality is 44 of the last 53 Federal budgets have been deficit budgets. Only one in the last 20 years had been balanced.

A balanced budget was the keystone of American economic thinking. After 142 budgets, the Federal deficit at the end of 1930 totaled $15.8 billion, and that was caused during the World War I era.

The fact is that Congress has become incapable of exercising the necessary budget restraint and discipline except under constitutional restrictions. Even statutory restraint is inadequate, since a simple majority can circumvent such restraints.

As our economy worsens, and the concern of budget deficits do not restrain Congress, the polls have demonstrated that Americans want a constitutional restraint. If this Congress does not submit a constitutional amendment to balance the budget for referendum to the States, then the people of this country will seize this issue.

Thirty-one States, as has been stated before on this floor, have called for a constitutional amendment convention. Only three more are needed. And then it is possible the entire Constitution would be up for review and revision. And that is how we have the present Constitution under which we operate now.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. MCCOLLUM).

Mr. McCOLLUM. Mr. Chairman, the public debt of the United States in 1946 was $269 billion. From 1946 to 1960, we added $17 billion to that debt. From 1960 to 1970, we added another $85 billion. From 1970 to 1980, in that short 10-year period, we added $460 billion to the public debt. And in the last 2½ years, we have gone to a public debt of $1,109,000,000,000.

Now, that is the kind of irresponsibility that this Congress and past Congresses of recent years have been adding to that public debt. That is the kind of deficit spending we have had.

I submit unless we defeat the Alexander amendment, which is nothing more than a farce as far as the balanced budget is concerned, and pass the Conable-Jenkins amendment to the Constitution, we will be doing a disservice to the taxpayers of this country.

Those who favor Conable-Jenkins favor a position for lower Government spending and lower taxes. And those who oppose Conable-Jenkins favor either increased taxes or continued irresponsible spending, higher inflation, higher interest rates, and recession after recession as we have had over the past.

Mr. Chairman, I suggest there is no need to go through the annual congressional and bureaucratic battling when the Federal budget for the following year is drawn up. A far better way to resolve our differences is to abide by a constitutional amendment that automatically determines the maximum level of taxing and spending in any given year.

Granted, Congress would not be Congress if its Members did not debate over how Federal money should be spent. But with a constitutional amendment in force, the ultimate decision of how much—the real time consumer of the whole budget process—would be determined automatically.

Stated briefly, House Joint Resolution 350 provides that:

Each year, outlays by the Federal Government—both budget and off-budget expenditures—will be limited to estimated receipts for that year. A super-majority vote would be required for expenditures to exceed estimated revenues.

Even if Congress does not estimate revenues accurately, receipts may not increase at a rate greater than the year-to-year increase in national income. Because outlays are tied to receipts, Federal spending is thereby restrained. If Congress wants to spend more, it must approve a specific tax increase, which is subject to Presidential veto.

The limits may be set aside in time of declared war. Nobel Laureate economist Milton Friedman, has remarked on the farsighted nature of the balanced budget amendment:

I have always said that the two places in the country where you have the shortest sight, where people look the shortest period ahead, are Wall Street and Washington. In Wall Street, you look to what is going to happen next week. But at least in Washington, you look to the next Congressional election, which is a little longer, but not much.

Dr. Friedman explained the need for a constitutional amendment, as opposed to every year passing budget resolutions, even with the best of intentions:

This is the year 1981. 1982 comes, 1983 comes, 1984 comes. The reason we . . . have been fighting for a Constitutional amendment is because we recognize how difficult it is to cut government spending through statutory means by taking one program after another. We recognize that for each individual program there is a big constituency that wants to cut government spending at someone's else's expense . . . It's a terrible thing to have to face this fight each year, year after year.

The most permanent fixture of the U.S. Government is its Constitution, and the Founding Fathers deliberately made it a document difficult to amend in order to preserve its integrity and to prevent it from falling prey to political expediency or passing political factionalism. But just as they did not foresee the problems of representation that later gave rise to the 14th and 23d amendments, so our forefathers would not have believed that taxation and Government spending would grow to such alarming levels.

Mr. Chairman, I believe it is time to end the annual budgetary brawl. It is time to pass House Joint Resolution 350, the Tax Limitation/Balanced Budget Amendment authored by Congressmen CONABLE and JENKINS.

□ 1220

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Chairman, in 1970 the budget deficit of this country was $382 billion. When I first ran for Congress some 4 years ago, it had risen to $750 billion, almost a 100-percent increase.

In the 5 short years between the time I first ran for Congress and the end of fiscal year 1983, the national debt will have gone up over half a trillion dollars, as much as the amount accumulated in the first 200 years of our history.

Because of the debt which runaway and out-of-control spending has created, we have had two disastrous choices. We either print paper money to account for the difference between what we spend and revenues, which causes inflation and debases our currency, or the Government borrows in the private capital markets, where it competes against every American who wants credit to buy the products—be it housing or automobiles—or otherwise whose manufacture would keep Americans employed.

We are at a crossroads in our history. Either we put our economic house in order, or we go over the cliff. A balanced budget is the single most important step we can take to economic recovery.

The Conable amendment will rekindle the American dream—a job for everyone who wants to work, the control of inflation which hurts all of our citizens but especially those on fixed incomes, and the restoration of the hope of homeownership for young adults.

Vote to rekindle the American dream.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Chairman, there are many reasons to support this constitutional amendment to balance the budget. I think two reasons stand out above all the rest.

First, despite all the talk and all the rhetoric and all the attempts to reform the budget process, none of us here can escape the reality that this body has failed in 18 of the last 19 years to do what we all say we need to do and that is match revenues with spending.

We have not exercised budget discipline, and without a constitutional amendment we probably never will exercise that discipline.

Like a drunken sailor in need of Alcholics Anonymous, Congress desperately needs a constitutional amendment to control its addiction to excessive spending.

I think the second reason is equally persuasive. Those who oppose this amendment on philosophical or other grounds presume that it is our decision and ours alone. But the Constitution says that the matter is finally to be determined, not by Congress, but by ratification of three-fourths of the States through their elected representatives.

In the final analysis, it is the people's choice and I think we clearly have an obligation to let the people express their will on this issue.

Mr. RODINO. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Chairman, I rise in opposition to House Joint Resolution 350 and the Conable substitute and in support of the Alexander substitute.

Nearly a year ago, I cosponsored the House Joint Resolution 350 because I agreed with its intent. I still do. Balancing the Federal budget is a goal to which we all should be committed. However, I cosponsored the resolution with the full expectation that it would be refined through the normal legislative process. The need for refinements and modifications became even more evident as the Senate debated this amendment. Unfortunately, the version of the amendment which they adopted did not rectify the problems which I felt their debate made clear.

House Joint Resolution 350 and the Senate-passed amendment leave open the possibility—in fact, the likelihood—that we could end up with the Federal budget being written by unelected Federal judges, not by the people's elected representatives and President. I do not want to be a party to creating that kind of scenario.

I say to my conservative colleagues, House Joint Resolution 350 and the Senate-passed amendment would require the Congress to approve balanced budgets. They leave the President free and clear to do whatever he or she might want. The budget-making process is supposed to be a cooperative one between the executive and legislative branches. We should not destroy that balance. These proposals would.

House Joint Resolution 350 would not allow a shifting of responsibilities to the States without providing them with payments to cover the costs. Since our Federal system was established, there has been an ongoing shifting of responsibilities between various levels of government. The President's proposed New Federalism program would make significant changes in those responsiblities. That could very well be stopped dead in its tracks if this amendment or the Senate language were added to the Constitution.

In sum, House Joint Resolution 350 and the Senate-adopted amendment are flawed, and we are talking about the Constitution of the United States here. Once it is amended, it is not a simple process to correct mistakes. Only once in our history has an amendment to the Constitution been exorcized, and that was a lengthy process.

We do a lot of things around here out of symbolism; in fact, more than I think we should. But we cannot let our desire to show our symbolic support

for a balanced budget tempt us into approving an amendment to the basic law of our land that we know full well is faulty. Fortunately, our colleague from Arkansas, BILL ALEXANDER, will be offering a much-improved amendment which will achieve the same important end but in a way that does not disrupt the checks and balances which the framers of our Constitution carefully crafted.

As far as I am concerned, if we were to pass House Joint Resolution 350 or the Conable substitute, then we have a solution that is worse than the problem. You do not use nuclear bombs to kill the roaches in your house; you do not use a sledgehammer to tack in a loose tack in a chair; you also do not amend the Constitution willy-nilly to correct our budget deficits.

Some have argued that if we do not pass House Joint Resolution 350, then a constitutional convention will be called by the States, which could conceivably open up the entire Constitution to review. While I do not want to see a constitutional convention come about, it is no justification to amend our Constitution under threat of such a convention being convened.

Mr. RODINO. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, I rise in support of the Alexander substitute and in opposition to the amendment offered by Mr. JENKINS and Mr. CONABLE.

Mr. Chairman, all of us here today support the notion of a balanced budget and greater fiscal restraint. Most of us, including me, believe we need improved control on Federal spending. It is a tragedy that neither the President nor the Congress has demonstrated the courage to make the tough decisions essential to getting Federal spending under control.

But the real issue before us today is whether or not we will approve a constitutional amendment that is workable. In this regard, the Alexander substitute is, in my opinion, far preferable to the measure sponsored by Messrs. JENKINS and CONABLE.

Mr. Chairman, it is important that we clarify the provisions of each measure. Both proposals are offered as amendments to the Constitution. Both would require the Congress to adopt a balanced budget, and each would allow for further tax increases if approved by a simple majority in the Congress. But they differ in key respects.

Under the Jenkins-Conable amendment, the balanced budget requirement could be waived in the event of a formal declaration of war; or the requirement could be circumvented with the approval of 60 percent of the Members of both the House and the Senate. The Alexander substitute provides for a waiver of the balanced budget requirement in the event of a "national emergency," such as a war—including an engagement such as the Korean or Vietnam conflicts—a severe recession, a major natural disaster, and so on.

The Alexander substitute—and only the Alexander substitute—would also require that the President submit a balanced budget to the Congress. And only the Alexander substitute would prohibit the President—any President—from exercising any authority to impound funds or veto even the smallest "line item" in appropriation bills. Clearly, the Jenkins-Conable amendment would give future Presidents this wholly discretionary, dictatorial authority. Such discretionary authority could be subject to the greatest abuse by any President, whether he be conservative or liberal.

Many have pointed to the fact that a number of States have a balanced-budget provision as a part of their Constitution, and that apparently these restrictions impose the necessary fiscal restraint on these States. What often is not mentioned is that each of these States also has a separate budget for capital improvements undertaken by those States. If the Federal Government had such a dual accounting system—if the Federal Government had a separate budget for funding roads, buildings, dams, land purchases, and so on—Federal deficits would not exist as we know them today.

I am a lifelong small businessman, and I came to the Congress with the pledge that I would do what I can to see that the Congress operates with the same efficiency and the same fiscal restraint followed by business. As a businessman, I did not pay cash for the buildings and large machinery purchased for my company; I did not charge, as a current expense, the full cost of these purchases in the year they were made. Like the vast majority of other businesses, I borrowed the money to expand, and I paid off the loan and recognized the value of these purchases over a number of years. But the indebtedness of my business did not prevent its very successful operation.

Mr. Chairman, I fully respect those of my constituents who desire that the Federal Government balance its checkbook, just as they must balance their household accounts. But I also ask them to recognize that, just as they do not view their household checkbook as out of balance because they owe several thousands of dollars on a home mortgage, so too do I hope that they recognize the current flaw in Government accounting that recognizes as immediate expenses those outlays for military installations, highways, sewers, flood control, national parks, prisons, courtrooms, and other expenditures which most people recognize as essential.

Mr. Chairman, I am not contending that a separate capital budget for Federal spending would solve our deficit problems or in itself impose the necessary spending restraint on the President and the Congress. We will still face the tough choices on spending for entitlement programs, defense, and Government operations—but we will have to continue to make these decisions regardless of which amendment is approved here today. Yet, it is my understanding, that only the Alexander substitute would allow for the Federal Government to adopt this separate capital budget.

Mr. Chairman, make no mistake about it, I view the current Federal deficit, and the horrendous deficits projected for future years, as the single greatest impediment to sustained economic recovery. There is no way that the Federal Government can continue this deficit financing, during this period of restrained growth in the money supply, without absorbing most of the available credit, thus crowding out private business and keeping interest rates high. But neither amendments before the House today offer the final solution for our tough decisions on spending, and they do not address, because of the leadtime necessary for their implementation, the immediate unemployment, high interest rate, and Federal deficit problems currently strangling our economy. A constitutional amendment that does not take effect for several years does little to solve our current problems.

Mr. Chairman, last year we were told—we were promised—that there were simple, immediate, and painless answers to the basic problems facing our country. As those promises are replaced with excuses, finger pointing, and requests for patience, I hope that the public will recognize that there are no immediate miracles available, and that the proposed amendments, with their various exemptions, still leave us with the hard choices for resolving our immediate problems.

Mr. Chairman, I urge adoption of the Alexander substitute, and I renew my pledge to make the continued, balanced reductions in Federal deficits necessary to put our country back on its feet.

Mr. SEIBERLING. Mr. Chairman, of course, everyone these days wants a balanced budget, in theory. One is certainly entitled to ask, however, if President Reagan is so supportive of a balanced budget, why has he not submitted one to the Congress? In fact, his two budgets have had the largest peacetime deficits in our history.

The Judiciary Committee, on which I serve, has, as the chairman himself

has pointed out, actually been holding hearings on this subject for years. We have heard from many of the Nation's most outstanding constitutional lawyers, economists, political scientists, and so forth, including conservative Republicans, I might add.

At the start, I thought the idea was worth pursuing, but as a result of the hearings, I concluded that despite its simple language, an amendment along the lines of the one that is the subject of the discharge petition would create more problems than it would solve and would be absolutely unworkable.

The amendment is being presented as a solution for the problems we are facing today, yet, because of the time required for ratifying and putting it into effect, which could be up to 9 years, the amendment will have no effect on our current budget problems, either today or for years to come.

Yet we should come to grips with those problems today. So it is obvious that the proposed amendment is a copout.

However, it is worse than a copout. Under the amendment, Congress would have to base the Federal budget on economists' estimates of inflation, unemployment, and interest rates, all of which could affect the anticipated spending and revenues. If there were another OPEC price rise, for example, or a business slow down, Government tax receipts could fall as a result or expenditures rise.

Congress would not even know if it had violated the law until the fiscal year was over and it was too late for Congress to do anything about it. At that point the courts would be injected into the budgeting process with unforeseeable, but undoubtedly chaotic consequences.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. Yes, I will yield.

Mr. WALKER. Well, I thank the gentleman for yielding.

Mr. Chairman, I wonder why the gentleman would not vote to enforce the balanced budget law of the land that is now there, given the gentleman's questioning of the President's motives?

Mr. SEIBERLING. Let me respond to that. I have voted to cut $89 billion out of spending in this Congress alone. I have voted against over $300 billion of spending bills, in this Congress alone. So my record is absolutely clear.

Mr. WALKER. Well, if the gentleman would yield further, that does not answer my question, because the gentleman voted, for instance, not to balance the budget, even on something like voting for the Franklin Roosevelt Memorial.

Mr. SEIBERLING. I voted against the Franklin Roosevelt Memorial bill.

Mr. WALKER. But the gentleman voted not to balance the budget to have it comply with Public Law 95-435, which is the balanced budget law of the land.

Mr. SEIBERLING. The gentlemans amendment's would accomplish nothing. There are only two legislative ways to cut spending either to vote for amendments that make specific cuts in spending bills or to vote against the passage of the bills themselves. If my votes had counted, we would have a balanced budget today, I say to the gentleman.

Mr. WALKER. Well, that would be true of this gentleman, too. I have voted in terms of spending for balanced budgets, but I also think when we pass a balanced budget law we should be willing to vote to enforce that law.

Mr. LAFALCE. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. Yes, I am happy to yield.

Mr. LAFALCE. Mr. Chairman, of what relevance is it how the gentleman from Ohio voted on the Franklin D. Roosevelt Memorial resolution to the issue of whether or not we should have a balanced budget as a part of our Constitution? Can we not deal with the relevance of this matter?

Mr. WALKER. Well, Mr. Chairman, will the gentleman yield further?

Mr. SEIBERLING. I am happy to yield.

Mr. WALKER. Mr. Chairman, I would say to the gentleman that one of the problems that we have here is that people are saying that we cannot have a constitutional amendment, but we should have a law. We have a law that is not being obeyed.

The CHAIRMAN pro tempore. The time of the gentleman from Ohio (Mr. SEIBERLING) has expired.

Mr. RODINO. Mr. Chairman, I yield 1 additional minute to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, even if an economic slump made deficit spending desirable, it would take a 60-percent super majority in Congress to authorize it. This requirement could actually produce greater deficits by giving special interests greater bargaining leverage.

The amendment would likewise restrict the ability of Congress to increase revenues by eliminating tax loopholes, thereby further stacking the deck in favor of wealthy and powerful special interests which benefit from these subsidies.

The sad thing is that there is a simpler way of accomplishing the objective than a constitutional amendment. During this year, several alternative budget resolutions were offered. One of them, offered by Congressman GEORGE MILLER of California, called the pay-as-you-go plan, would have realistically moved us toward a balanced budget within 3 years, not 9 years as the Conable amendment would do.

The fact is that those who will vote for the Conable amendment are ducking the painful decision of voting to balance the budget now. This amendment is going to separate the men from the boys and show whether you are for doing it now, or for forcing some other Congress to do it sometime in the vast, vague, unpredictable future.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Chairman, off and on since 1972 I have watched this Congress engage in an orgy or fiscal and monetary irresponsibility. During that time many Federal programs have been escalated beyond all reason. Food stamp program outlays have increased 20,000 percent. Subsidized housing outlays, for instance, have increased 1,500 percent.

The urge to appear to provide all good things for all of our citizens has proven to be irresistible to the Members of this House. We have simply lost control of the fiscal process.

I have heard it said in this Chamber today that if this resolution passes, we will bring down the Government. I agree that its adoption will bring down the perception held by a number of my Democrat liberal friends of what our Government ought to be. To that I say, it is just in time, just before this Nation careens over the brink of economic disaster in an irreversible exercise in self-destruction, with Members of this Congress leading the charge.

□ 1230

We must adopt some structure of fiscal constraint in this Congress in order to preserve the future of our Nation and of the free world.

I urge support for and adoption of this resolution.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Chairman, we have an opportunity in this House today to signal the end of ruinous spending practices that threaten to undermine our Nation. One would assume that reasonable men and women viewing the economic carnage of nations that refused to acknowledge simple economic truths would act responsibly in ordering our own activities—but that is not the case.

This year, we will spend $100 billion on interest for the accumulated national debt. With an amount that large, we could have avoided the recent tax increase, eliminated the Federal deficit for the year, and seen interest rates plummet, or devoted more to worthwhile Government activities to help the aged, the handicapped, and the needy. But instead, we spent that money for best service and then plunged into deeper debt.

There are those in this House who claim that this debt is meaningless. They claim that our needs today mandate these deficits and that to refuse to borrow $100 billion is evidence of a mean spirit that ignores suffering and need. But I would ask these people what about tomorrow. Those who come after us next year, in the next decade and even into the next century will have needs that have to be met, people they will want to help but to a large degree—their efforts will be restricted because they will be paying the bills for what we insisted had to be done today. There will be less available for them because we were unable to allocate our resources responsibly.

There will always be an infinite number of ways to spend money. No matter how great our resources, this world will present more places to utilize them than we can afford. The real question is whether the people's elected representatives have the wisdom, the maturity, and the far-sightedness to decide among priorities. To this point in history—they have not.

The American people have made clear their preference for this amendment. To a large degree, we are responsible for that preference because this Congress had made it very clear to them that it is incapable of handling their public finances without this amendment. I do not fear for a minute that it will unduly restrict this body just as it has not restricted the legislature in Nebraska—which has lived within its means for decades. What it will do is provide the American people with the prospect of a brighter future.

The makers of our Constitution realized that changing circumstances might require amendments and made the process amendable to change only when the urgency was great and the people overwhelmingly agreed to change. There can be no greater urgency than the economic stability our country and the amendment process demands that the people's consent be both broad and deeply based.

On a final note, I would like to respond to those who claim this is an effort to divert attention from our current economic difficulties. It is not but is instead a timely and essential response to those difficulties. Some who oppose this amendment have no motive other than a desire to enhance their reelections as they have in years past by spending billions on vote-buying schemes with contemptible disregard for the future of this Nation and the people whose labor must pay the bills.

I was proud to cosponsor this amendment, I was proud to sign the petition to bring it to the House floor so that the people's will could no longer be ignored by the leadership of the House, and it is today the vote I am most proud of in my first term in this House because I know I am representing my constituents both today and tomorrow.

In closing, I would like to quote Calvin Coolidge—who was known for his economy with words. Not only did Coolidge state the solution to the problem but the feelings that would accompany that solution. He said, "There is no dignity quite so impressive and no independence quite so important, as living within our means."

It is our obligation in Congress to react to the overwhelming will of the American people and to pass this amendment so that the States can have the opportunity to decide this important issue.

Mr. McCLORY. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. Mr. Chairman, this is a different moment for me because I rise in opposition to the constitutional amendment to balance the budget.

Mr. Chairman, the House of Representatives should reject the proposed constitutional amendment to balance the budget because it would not work, and there is a better way to restore fiscal order.

Conservatives, who generally believe Government should give natural forces a chance to work, ought to be leading the opposition. Those who regularly espouse the maxim "people should be free to choose" will man the ramparts when the free market is under attack or when Congress tries to enlarge the reach of a Government regulatory agency. When you couple that with the usual incantations about the sanctity of the Constitution, it is perplexing to find so many conservatives in the vanguard of a movement which will constrain political freedom. While the metamorphosis is not too hard to figure out, it helps to analyze the amendment beginning with the question of whether or not it would work.

A number of technical arguments have been raised against the proposal. Most of them contend it will not work because there are too many loopholes. For instance, it has been said: "Congress will finagle the definition of 'national income'," "the politicians will jigger the numbers," or Congress will "stretch the meaning of the declaration of war exception." The doubts continue to grow in number.

Against that backdrop, supporters of the constitutional amendment argue that they can make it work, but an indispensable element of their case rests on the fallacious assumption that budgeteers can accurately calculate one indispensable, exalted number—the deficit—which will tell us whether we are winning or losing the battle for a rational fiscal policy.

Nothing could be further from the truth. The congressional budget process does a reasonably good job of tracking taxing and spending, but it is far from accurate due to the unpredictable nature of our economy. The current recession, which almost no one expected, has nearly doubled the deficit as rising unemployment triggers more Government spending.

Moreover, the effort to keep up with runaway Federal lending activity is embryonic and untested. We may eventually learn how to control Government credit assistance programs, but for the moment they are growing faster than spending, and much of the activity results in off-budget deficits which were in the neighborhood of $20 billion for 1982.

Finally, and most significantly, the means for quantifying and controlling Federal regulatory activity is anemic.

In December 1981, creative politicians—ever eager to please applicants for Federal assistance—proved their ability to bestow favors which do not show up in the Federal budget. In record time Congress repealed a regulation which prohibited the Alaska natural gas pipeline companies from prebilling consumers for the cost of a pipeline before it was finished. The special interests who supported the pipeline showered Congress and key political party committees with campaign donations just before the vote. Congress willingness to curry favor shifted a contingent liability of up to $10 billion from the pipeline companies, the big banks, and the financiers who should have been taking the risk, to hard-pressed consumers. This sordid episode of proof positive that Congress can and will shift national resources from one group of people to another without reporting the transaction under the existing budget process. The pipeline deal was no different than passing a tax on consumers and handing it to the pipeline companies as a grant, and it was all done outside the budget.

The principal lesson is that the budget does not begin to reflect the many ways in which the Government can and does impact our Nation's economy. Surely the deficit calculation produced by such an incomplete process should not be used as the exclusive measure of national economic policy. This conclusion, strong enough on its own, is fortified by the fact that the predicted deficits for 1983, which are uncomfortably large, are not without precedent. In 1976, when interest rates and inflation were way down, the deficit was $66 billion. In today's money, or as a percentage of the budget, or as measured against gross national product, the 1976 deficit is in the range of the 1983 budget deficit.

The deficit, therefore, is an important number. But, under our rather elementary budget process, it should not be the sole determinant for evaluating fiscal policy. And, given its flaws, it

certainly should not have frightened Senators to the point where they were willing to bugger up a Constitution which has survived more than one economic crisis.

Most people who understand the congressional budget process know that the amendment is so complex and untested that it will create more problems than it will solve. In fact, proponents admit that the proposal may not work. The fiscal imbroglio which is sure to develop will not be resolved by the people or their elected representatives, but by the most insensitive, unresponsive branch of our Government: Federal judges.

We should realize that the offered panacea—a balanced-budget amendment to the U.S. Constitution—may turn out to be a placebo which dangerously diverts our attention from the broad, complicated fiscal and monetary problems which we must solve.

Besides that, there is a better way.

For most of our Nation's history we have had balanced budgets. American financial policy was predicated on the belief that an annually balanced budget was essential in time of peace. That notion produced an extraordinary budgetary record during the long period from 1789 to 1920. In that time, on the rare occasion when deficits were incurred, they were generally rather small. On the other hand, since 1920, peacetime deficits have been the rule rather than the exception. Since the Constitution has never required a balanced budget, it must be conceded that it did not give us the budgets that were in balance, nor did it cause the ones that were out of balance.

In support of the amendment, the Senate Judiciary Committee published a wordy finding that Congress is plagued with an institutional "spending bias." They concluded that politicians will not case "politically disadvantageous votes" to restrain spending, and that a constitutional amendment is the only way to overcome such a disease.

That may be so under the circumstances we can see today, but there is nothing new in the Senate findings. These same problems have plagued democratic governments since the origin of man. The strained analysis, however, basically comes down to a contention that the people at large are too stupid and indifferent to know how to correct the problem or that Senators and Representatives now in Congress are too weak to act responsibly.

The Senate analysis is half wrong. There is nothing wrong with the people. In the last election they demanded and have now received relief from an ever-increasing tax burden. They also demanded and have now received spending restraints which were heretofore regarded as impossible. The people seem to intuitively know that it is better to cut spending than to raise taxes, since the latter tends to stifle economic growth in the American enterprise system. Now, as we approach the 1982 elections, the paramount concern of voters is to reduce the Federal deficit.

So, things are changing. Thus, the politically disadvantageous vote in today's climate, contrary to the Senate's findings, is a vote for new spending or a vote which does nothing to restrain the growth of spending.

In addition, there is more evidence that the people intend to get what they want. In 1980, they ousted a sufficient number of Democrats from the U.S. Senate and gave control to the Republicans. They have pressured the House of Representatives to the extent that the Democrats, who enjoy a 241-to-192 vote margin, have been reduced to a nominal majority by an emerging conservative coalition. The people mean business, and they are not going to be dissuaded by gobbledegook arguments of guilty politicians that the problem can only be corrected by amending the U.S. Constitution.

If the Senate analysis was half wrong, it was also half right—the root cause of our problem is indeed a lack of political will by weak representatives.

But, the idea that timid representatives will be influenced or constrained to balance the budget out of respect for the spirit and force of constitutional mandate is highly suspect. Just 18 days after the proposed amendment passed the U.S. Senate, the House of Representatives demonstrated its total disregard for constitutional mandate. Article 1, section 7 of the Constitution clearly provides that all bills raising revenue must originate in the House of Representatives. This provision is based on the American tradition that there should be no taxation without representation—a tenet that would seem to be sacrosanct.

Nevertheless, the House of Representatives, in the alleged interest of efficiency and practicality bypassed the spirit and perhaps the letter of the Constitution by permitting the Senate to originate a $98 billion tax bill which was said to be the largest peacetime tax increase ever passed. The Congress simply ignored unmistakable language which has been enshrined in the Constitution since it was drafted and which is backed up by 200 years of custom. Given that display of insensitivity to the mandate of organic law, it must be concluded that Congress would not hesitate to dance around a newfangled contraptive device which is shot full of holes.

In short, if Congress does not have the will to balance the budget, the amendment will not work; and if Congress does have the will to balance the budget, you do not need the amendment.

Some people argue that they have tried changing Congressmen, and we are no closer to a balanced budget. There is some truth to that argument. But, modern politics is not a struggle of men; it is a struggle of forces. As already observed, things have changed dramatically in the last 2 years, and they are changing because the people are very interested, and strong new political forces are forming. The change that took place when control of the Senate shifted from one political party to another has not gone without notice. Committee chairmen were changed. The liberal mindset of the legislative body, perpetuated by ensconced staffers and lobbyists, was broken, making way for fresh faces and new ideas. But, this simple, fundamental technique for rectifying institutional bias was not well understood. Most Americans are simply too young to remember how it worked when it was last tried in 1954.

Now that the "forgotten remedy" has been remembered, the political parties are competing intensely on the basis that one is better equipped than the other to bring a balanced budget. This competition, which you can see here today, will, in time, prove to be an important factor.

Thus, the force for a balanced budget and reduced levels of Federal spending and taxing is just now redeveloping. It has yet to reach maturity. We must be patient. When it does reach full bloom, Congress—which responds more to pressure than logic or reason—will produce a balanced budget.

If we have not fooled ourselves in the meantime by substituting a palliative for the admittedly more difficult and painful cure, we will have a balanced budget before the laborious ratification process could be completed.

Some legislators, who oppose the amendment, have pushed for a statutory scheme. Their argument suggests that we can accomplish our goal by fashioning a set of rules which would be enacted by Congress but not be a part of the Constitution. They advance their idea by demeaning the constitutional amendment as "a figleaf for those who are feeling political guilt over the failure to produce a balanced budget." Unfortunately, their legislative scheme is nothing more than a small fig leaf for those who do not wish to wear the big one.

If the underlying problem is a lack of political will, and if an amendment would not work for the reasons that have been presented, then a fortiori, a mere statute would not work. The only positive thing that can be said for the legislative scheme is that when it failed, it would not be as damaging to the Republic since no one would have expected it to work in the first place.

Finally, we are in the throes of a wrenching political, social, and economic transition. Congress is only just now beginning to understand the inadequacy of its budget system. We need comprehensive budget reform to go beyond adding up the ins and outs, which is about all that is done at this time. The legislative and executive branches of our Government must move into the 20th century and develop the means to give an honest accounting of the many ways that the Federal Government is affecting our national economy. Only then will we begin to shape an economic policy that will produce the growth we must have if we are ever going to have prosperity and a balanced budget.

More than that, the people must elect a Congress with the discipline and political will essential to rational and responsible fiscal policy.

□ 1240

Mr. Chairman, the people out there really do not have much confidence in those of us who are in this Chamber today. We are privileged to be here, but the people do not have a lot of confidence in us. They do not have a lot of confidence in the Democratic Party, and they do not have a lot of confidence in the Republican Party. In fact, one might argue that they have no trust in political parties, period.

They do trust, however, in our system of Government. They believe in and they love the Constitution. They trust the Constitution.

If we pass an amendment which is destined to fail out of complexity, which is destined to cause more problems than it solves, we are going to set up a situation where we will shake the confidence that the people have in the one thing that they do trust in, and that is the U.S. Constitution.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Chairman, the issue before us today is clear: Will this Congress heed the will of the American people and pass the Conable-Jenkins amendment mandating a balanced budget and limiting tax increases or will we once again collapse in the face of pressure from the special interests who would have us continue the tax-and-spend policies of the last 30 years? That is the question, and that is the only question, regardless of the rhetoric we are hearing on the floor today. This House cannot constrain itself. We represent 435 voting districts and many Members vote parochial interests and rarely concern themselves with the Nation as a whole. Thus, we have excesses.

Now, the Constitution was created to protect people—and in large measure to protect them from the excesses of government. Nothing could be more appropriate, then, than to use a constitutional amendment as the vehicle to protect all Americans from the fiscal excesses that have become—for all practical purposes—institutionalized over the last decades—regardless of President, regardless of policy, and in spite of good intentions.

And if we are to take this action that the American people and the States are demanding, we must take it by passing Conable-Jenkins. It is the only option before us that the other body will accept and it is the only option that will do the job. By forcing a three-fifths vote on deficit spending and a majority vote on large tax increases, Conable-Jenkins forces each and every Member of Congress to be accountable—accountable to his or her constituents by open and recorded vote.

The Democratic alternative is no alternative at all. It is simply another scam, at attempt to fool the American people into thinking that Congress will finally clean up its fiscal house. Unlike Conable-Jenkins, however, this so-called alternative would allow Congress to waive its balanced-budget requirement by a simple majority vote, provides no definition of outlays or receipts, and would encourage Congress to balance the budget by increasing taxes.

Our distinguished majority leader is quoted today as terming Conable-Jenkins "a rabbit run across the trail of a fox to distract the dogs." Well, I submit that his party's alternative is nothing more than an attempt to collar a skunk and run it across the trail of the liberals, hoping the American people would not notice the skunk for the smell.

Mr. Chairman, my State of South Carolina has a balanced-budget constitutional amendment. As a former member of the State house and senate, I saw our legislature time and time again bring appropriations to the floor that exceeded the limit. But you know what? Time and again I also saw that constitutional requirement for a balanced budget force us to balance outlays with revenues.

It works in South Carolina, Mr. Chairman. It will work for our Nation. I urge adoption of the Conable-Jenkins amendment.

Mr. Chairman, the issue is clear: Are you for balancing the budget and having the Constitution make sure that it is done, or are you against it?

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. JENKINS).

Mr. JENKINS. Mr. Chairman, as one of the original sponsors of this resolution, I want to speak for just a few moments as to why I believe this amendment is necessary.

First of all, the simple fact is that despite continual efforts to limit spending, the Federal budget is simply out of control. The tremendous increases in Federal spending have outstripped the growth of both inflation and real output by a wide margin.

The simple facts are that this Nation cannot long survive in absence of either this action or something very similar. If this spending spree was a temporary aberration it might be concluded that the passage of time could cure the problem. But, unfortunately, a quick look at the situation tells us that a more reliable control mechanism is needed if we are truly to survive.

I know that there are people who are well intended, very sincere people, who oppose it and who do not want to touch the Constitution, and they say that the prohibition amendment is a good example of what we do wrong. Well, that analogy seems to me to say that we are drunk on Federal spending, and there is nothing we can do about it, so the best thing to do is to continue the drunk spending from now on. I do not believe that the Nation wants that to happen.

We talk about the Constitution and what other people have said or done about it. Thomas Jefferson first stated, "The public debt is the greatest of dangers to be feared by a Republican government."

Alexander Hamilton felt the same way. Harry Truman made similar statements. This is not a partisan issue. This was introduced long before this President became President. It is a bipartisan debt that has been created through the years.

There are conservatives who are pro-defense-minded in this House who will never vote against any defense expenditure, regardless of the amount. They are partially responsible for the tremendous deficits. One the other side, there are people who will never vote against any increase in social spending. They too are responsible. It is bipartisan.

Now is the time to act if we are going to, and I urge the Members to vote for the joint resolution.

Mr. Speaker, the concept of a balanced budget is as old as our Republic. Throughout our history, the goal of balancing the Federal budget under normal economic conditions has been part of our "unwritten constitution."

For example, Thomas Jefferson stated:

> The public debt is the greatest of dangers to be feared by a republican government.

Alexander Hamilton, who shaped early American economic policy more than any other individual, noted:

> As the vicissitudes of nations begat a perpetual tendency to the accumulation of debt, there ought to be a perpetual, anxious, and unceasing effort to reduce that which at any time exists, as fast we shall be practicable, consistent with integrity and good faith.

In his inaugural address, President John Adams state:

> The consequences arising from the continual accumulation of public debts in other countries ought to admonish us to be careful to prevent their growth in our own.

President James Madison asserted that one of the primary goals of his administration would be "to liberate the public resources by an honorable discharge of public debts."

President James Monroe held a similar position, saying that:

> After the elimination of the public debt, the Government would be left at liberty . . . to apply such portions of the revenue as may not be necessary for current expenses to such other objects as may be most conductive to the public security and welfare.

In the 20th century, President Wilson argued on behalf of balanced peacetime budgets, declaring that—

> Money being spent without new taxation and appropriation without accompanying taxation is as bad as taxation without representation.

In his 1948 budget message, President Truman observed:

> As long as business, employment, and national income continue high, we should maintain tax revenues at levels that will not only meet current expenditures but also leave a surplus for retirement of the public debt.

President Eisenhower went even further in his 1957 budget message, declaring:

> We strengthen our financial position by a balanced budget. We must make sure that we do not undermine our financial strength by laying the groundwork for future budget deficits.

However, in the past two decades, the Federal Government has run deficits in all but a single year. The deficits have occured in good times and bad. They have come from Presidents who pledged balanced budgets and those who did not. They have come from Presidents of both parties.

For the first 143 years of Federal budgetary history—from 1789 to 1932—balanced budgets or surplus budgets were the norm. During the second period, from 1932 to 1960, the rule of balanced budgets gave way to a policy in which balanced budgets remained an objective but in which deficit spending was viewed as a useful tool to achieve certain economic results. In the most recent period, from 1960 to the present, deficit spending has reigned supreme while balanced budgets have been ignored an almost forgotten.

It is time, Mr. Speaker, to reinstall the concept of balanced budgets and limited Federal spending. I do not say this out of any feelings of nostalgia for a dim and never-to-return past, but because the period of the last 20 years, when we did not seek to balance the budget and restrain spending, has been one of prolonged and severe economic difficulty for the people and institutions of this great Nation.

The simple fact is that despite continual efforts to limit spending, the Federal budget is out of control. The tremendous increases in Federal spending has outstripped the growth of both inflation and real output by a wide margin and the simple facts are that this Nation cannot long survive in the absence of action the kind we are considering today. If this spending spree were a temporary aberration, it might be concluded that the passage of time could cure this problem. But, unfortunately, a look at the situation tells us that a more reliable control mechanism is needed.

I believe that the Jenkins-Conable amendment addresses the problem.

Let me conclude by explaining the provisions of this proposal.

EXPLANATION OF SENATE JOINT RESOLUTION 58 AND HOUSE JOINT RESOLUTION 350

The key provisions are contained in sections 1 and 2. These sections must be read as provisions that operate in conjunction with one another.

Section 1 of the proposed amendment establishes, as a fiscal norm, that the Federal budget be balanced. It does so by requiring that Congress adopt a "statement" or budget of planned receipts and outlays prior to each fiscal year in which planned outlays do not exceed planned receipts. If, in its judgment, circumstances warrant, the Congress may adopt an amended statement of receipts and outlays for the fiscal year—provided that outlays do not exceed receipts—at any time during the fiscal year. By a recorded vote of three-fifths of the membership of each House of Congress, a statement may be adopted containing a specific level of deficit. Any amended statements containing a deficit would require a three-fifths vote only if such deficit was greater than the deficit in the previous statement.

Section 1 also mandates that actual Federal outlays not exceed the planned level of outlays set forth in the statement. Both Congress and the Executive would have continuing responsibilities to insure that this limit is not breached. Thus, actual outlays cannot exceed statement outlays which cannot exceed statement receipts which cannot grow faster than the economy. At the same time, actual receipts may fall below planned receipts without requiring congressional or Executive action as, for example, when an unanticipated recession caused revenues to decline below expectations during the course of a fiscal year.

Section 2 of the proposed amendment establishes, as a fiscal norm, that Federal receipts should grow no more rapidly than the growth of the economy from which they are derived. The balanced budget in section 1 should not be balanced at levels of receipts and outlays that consume an increasing proportion of the national economy. It achieves this by requiring that receipts reasonably expected to be received by the Government not increase by a percentage greater than the percentage increase in the national income during the last calendar year ending prior to the beginning of the fiscal year. If, in its judgment, circumstances warrant, the Congress may permit a more rapid growth in receipts only by a recorded vote of a majority of the membership of both Houses to modify existing statutes to generate additional tax receipts.

Under its system of taxation, Federal tax receipts grow more rapidly than national income during either periods of real growth or periods of nominal growth caused by inflation. Stabilizing the share of that income available to the Federal Government—As provided by section 2—would require Congress to enact annual tax cuts or to "index" the tax system, unless it was prepared to vote annually for tax increases that would increase the Federal Government's share of the economy.

Sections 1 and 2, in conjunction, establish a linkage between the growth of the economy and the growth of Federal outlays, as —. Since receipts cannot grow faster than the economy—section 2—and outlays cannot exceed receipts—section 1—Senate Joint Resolution 58 would also establish, as a fiscal norm, that Federal outlays cannot grow faster than the economy—sections 1 and 2.

The relationship between the growth of income during the prior calendar year and the growth of receipts during the following fiscal year provides the Congress with reasonably precise guideposts in its budgeting process, minimizing the necessity for estimations. Under current practices, reasonably precise estimates of the growth in national income are available by mid-July prior to the beginning of the fiscal year. Prior to that, reasonably good estimates are available as early as the January prior to the fiscal year. The mid-July estimates, therefore, should cause only marginal revisions in the "statement" or budget for the coming fiscal year. The Congress is free to choose any of a number of estimates of national income as a benchmark for growth; for example, gross national product, national income, and so forth.

The relationship between the growth of income during the prior calendar year and the growth of receipts also establishes the Federal budgetary process as a mildly "countercyclical" instrument of fiscal policy. The 21-month lag between the midpoint of the prior calendar year and the midpoint of the fiscal year leads to receipts being able to grow more rapidly than the fiscal year national income during periods of recession, thus mod-

erating downturns in the economy, and more slowly than the fiscal year national income during period of expansion, thus moderating the economy.

Section 3 would authorize Congress to waive any of the requirements imposed upon it by this amendment for a fiscal year in which a declaration of war is in effect.

Section 4 would insure that Congress could not circumvent the limitations imposed by this amendment upon its spending and taxing authority by passing on new, unreimbursed costs to the States. This section is generally consistent with present constitutional restrictions in this regard.

Section 5 is a definitional section that clarifies the intent of this amendment to define receipts and outlays in the broadest possible manner. The exceptions in the definitions for "receipt" and "outlays" are consistent with traditional budget and accounting procedures.

Section 6 establishes as the effective date of this amendment the second fiscal year beginning after its ratification. The requirement of this amendment would, in their entirety, be applicable to such fiscal year.

Mr. RODINO. Mr. Chairman, I yield 1 minute to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Chairman, large deficits are bad economics. When the Government spends more than it raises, it is forced to borrow in the capital market. By increasing demand for capital, the laws of supply and demand result in a higher price, in the form of higher interest rates. High interest rates retard investment and, as a result, reduce employment. So, continued deficit spending is a prescription for economic suicide.

Worst still is the effect of deficits on our freedom. When I am in debt, I know that my personal freedoms and options are reduced. Similarly, when a nation is in debt, it jeopardizes its own freedom. I cannot give up the battle to control Federal spending when the cost of not doing so is to mortgage our freedoms and liberty.

We need to balance the budget. The best way to do that is for the President of the United States and each Member of Congress to resist the temptations of increased spending. In every area of the budget, but most particularly in the defense function, there are low-priority programs which could, should, and must be eliminated. You do not eliminate those pockets of waste by amending the Constitution. You eliminate waste by having political courage. Over the years I have opposed bills because they wasted the taxpayers' money that were not always easy to oppose: some water projects in my own State, tax giveaways for the rich, the proposed consumer protection agency, the Department of Education, and the bailouts of New York City and Chrysler.

I have had the courage to vote to eliminate wasteful spending. According to the National Taxpayers Union 1981 congressional spending study, I voted against Federal spending more often than 81 percent of my colleagues. This is higher than the score achieved by the leadership of the Republican Party, Mr. MICHEL and Mr. LOTT. I have offered amendments to reduce our defense obligations by $30 billion this year. I asked that we reevaluate our commitment to NATO.

These efforts have not been enough. We are in a coin-operated Congress: all any interest group has to do is insert enough coins—although checks are acceptable—and we produce any goodie desired. We all campaign against Government spending but forget our own rhetoric when we insert our little plastic cards into the machine. We justify additional millions of spending by saying that we are already $160 billion in hock this year so what difference does a few million more make.

Put in context, House Joint Resolution 350 is like cottage cheese which a dieter orders with a fattening meal to create the impression that the diet is real. You do not lose weight by supplementing spaghetti with yogurt and you do not balance the budget by supplementing big defense spending today with a constitutional amendment which takes effect 4 or 6 years from now.

I agonize when I hear my colleagues say that a balanced budget requirement does not belong in the Constituion, because my view of how this Government should work tells me they are right. Yet, legislative exhortations have not worked. I have cosponsored the balanced budget constitutional amendments for 4 years because the danger of mortgaging our freedoms by deficit spending is great and the legislative process has been a bust in balancing the budget. I will vote for the Alexander proposal because it is a balanced budget amendment that steers clear of the pitfalls of the Conable-Jenkins proposal. It creates a presumption against deficit spending without radically changing the balance of power or handcuffing the Congress.

It has been pointed out that civilized people should not watch while either sausage or laws are made. We do pass a lot of poorly drafted laws around here. And, routinely, we pass "technical amendments" and "revisions" to correct our mistakes. Amending the Constitution of the United States, the fundamental covenant of our Nation, is a different matter. We have no opportunity for correction. That is why the Founders of the Nation made it so difficult to amend the Constitution. Two-thirds of each House of Congress and three-fourths of the States must approve exactly the same language. The presumption against constitutional amendments is strong and should be so.

I cosponsored House Joint Resolution 350 because I want to force the Congress and the President to balance the budget. Hearings in the Judiciary Committee and public debate has revealed numerous defects in the proposal, defects which are dealt with in the Alexander proposal. The intense discussion about House Joint Resolution 350 in the last few months have convinced me that adoption of this proposal will not make a balanced budget any more likely in the next 5 years. The Conable-Jenkins proposal suffers from the following flaws:

Government spending and revenue levels are limited by an arbitrary formula. Such a rigid formula could lead to economic chaos.

In a deceptive way, the proposal seems to grant the President the unilateral right to impound appropriated funds or withhold entitlements. This would alter, in an unprecedented way, the balance of power between the executive and the legislative branches of Government. Indeed, it might force the judicial branch to mediate spending disputes.

The proposal would essentially place rules of congressional procedure in the Constitution. Immutable, these rules could make it impossible for Congress to do its job.

I am as committed as ever to a balanced budget. Unfortunately, our Judiciary Committee deliberations on this amendment have revealed the fact that House Joint Resolution 350 in its current form will not help balance the budget and, as a result, I am voting for the Alexander proposal.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Chairman, I signed the discharge petition and rise in support of the constitutional amendment to require our Government to operate with a balanced budget.

For too long, the agencies and departments of the Federal Government have been enjoying a long and gaudy night on the town. Now in the cool, gray light of the morning after, it is time to assess the costs, pay our bills, and get our fiscal house back in order.

Just as every American family knows, you simply cannot forever spend more than you take in—and this applies to Government as well. For too many years, the Federal Government has been on a wild spree, spending money it just did not have. The result is multibillion-dollar budget deficits that have driven our economy into recession. People are hurt and not helped when the Federal Government is out of control.

The measure offered by the gentleman from New York (Mr. CONABLE) will bring a much-needed element of control that will force Congress to toe the line, and mandate that our expenditures match our revenues. If that means we have to be more prudent in defense spending, then so be it.

While it is true that unemployment is unacceptably high, our economic problems do not stem from shortcomings in the economic recovery plan now in place, but rather from years and years of following the bankrupt policies of the past. Decades of tax and tax and spend and spend and spend programs passed by Congress have driven our economy to its knees. And now, we are paying for those mistakes.

Today's doomsayers wring their hands and pound the table, but they offer no constructive alternatives, only the same tired old policies that put us here in the first place.

We have to make sure we do not fall into those old traps, and the way to do that is pass this balanced-budget amendment. Frankly, I wish we did not need a constitutional amendment to force Government to live within its means. Unfortunately, we do. There simply is not enough self-discipline in Congress, and, like many State governments, we need a balanced budget mandated by law.

This measure will not suddenly turn things around, but then, nothing will. There are no magic formulas or quick-fix solutions to our economic problems. They took years of mismanagement to develop, and they will not go away overnight. There is, however, a plan in place that, in time, will work. We are already seeing the beginnings of improvement, Earlier this year, we saw what a dramatic impact the tax equity bill had on the financial markets. We need to send a similar signal to the Nation to demonstrate long-term stability in our financial planning. This will stimulate the investment so essential to creating desperately needed jobs in all sectors of the economy.

This balanced budget amendment is an important factor in staying the course toward recovery, and in the long run, in keeping us there.

□ 1250

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. LOEFFLER).

Mr. LOEFFLER. Mr. Chairman, today we address the final and most critical challenge of the 97th Congress. Through the successful efforts of a bipartisan coalition in this body, we have ushered in a new era in American political history. With proper action today, we can favorably conclude our joint efforts.

Working together, Members on both sides of the aisle have reduced the growth of Federal spending, lowered taxes, pursued a policy of reduced regulatory intrusion, and supported a moderate but steady growth in the supply in money. The successes of the bipartisan coalition have not come easily. In fact, we have learned that it is absolutely essential that more rigorous fiscal discipline must be adhered to. Even this Congress, a Congress of restraint, not a Congress totally out of control, has demonstrated that even we cannot exercise essential self-restraint and stand up to economic reality.

I view these votes today as some of the most important votes I will ever cast. House Joint Resolution 350, the Conable-Jenkins amendment, can finally provide a responsible and adequate handle on fiscal policy.

Why am I concerned? Why should we act today? It is very simple. During the first 200 years of our Nation's existence we ran up a national debt of $500 billion, and in the subsequent 7 years alone we added yet another $500 billion to that total.

Mr. Chairman, this incredible drain on our Nation's financial resources must be stopped.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Tennessee (Mr. BEARD).

Mr. BEARD. Mr. Chairman, I cannot believe that we are sitting here and hearing this. I have heard people say that the constitutional amendment for a balanced budget would hamstring the Government. We have tried for 30 to 40 years to have bigger and bigger spending and bigger and bigger government, and what do we have to show for it?

I am not saying that this constitutional amendment will be the Utopia we are looking for, but I just say, let us look at what we have been doing. We have a $1 trillion debt. This year the third largest item in our budget is $120 billion just to pay the interest on the debt.

Just 20 years ago people were screaming under Lyndon Johnson because our total Federal budget was going to hit $100 billion. We have experienced a 700-percent growth, and I say it is time we stopped mortgaging the future of our children and our grandchildren. We have tried it the other way.

The people out in my district and in my State are saying, "Government, you start living within a budget like we have to do."

So I would only hope that this body would have the courage, whereas they have not had the courage in the past, to live within a budget and to look at all the entitlements and all the motherhood and apple pie programs and have the courage to establish priorities.

I would hope, finally, that we would have the courage, Mr. Chairman, to set some type of rules and regulations to help discipline this body.

Mr. RODINO. Mr. Chairman, I yield 30 seconds to the gentleman from Texas (Mr. SAM B. HALL, JR.).

Mr. SAM B. HALL, JR. Mr. Chairman, I would like to make one comment about this whole endeavor. Neither one of these amendments will be a Utopia to solve all the problems that we have in this country. I have only been here for 6 years, but during that period of time I have seen this Congress vote extended deficits and continue to spend more than we take in, and frankly, I believe that the American people are tired of it.

I represent the First District of Texas, and I was given this morning a constituent mail figure that has been sent to my office dealing with this House Joint Resolution 350. These are the people who have elected me. These are the people who believe, I think, as a majority of the American people believe.

Here is what they say: 1,218 people have written or contacted me stating that they are in favor of House Joint Resolution 350, and 12 people have said they are against House Joint Resolution 350.

Mr. Chairman, to me that means something. It indicates that the American people are not going to allow us as a body to set priorities; That do not take into consideration fiscal restraints. These restraints must come by reason of a constitutional amendment.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentlewoman from Nebraska (Mrs. SMITH).

Mrs. SMITH of Nebraska. Mr. Chairman, I am proud to rise today with so many of my distinguished colleagues to voice my support for the proposed balanced budget amendment. Since all our attempts at balancing the Federal budget have failed except once in the last 22 years, I cosponsored House Joint Resoluton 350, and I signed the discharge petition to bring it to the floor. This resolution before us today is the culmination of years of preparatory work, bipartisan cooperation, dedication, and represents the views and criticisms of a wide variety of legal and economic experts.

Most importantly, House Joint Resoluton 350 is an appropriate, although long overdue, response to the majority of American people who have expressed their support for a balanced budget and a constitutional amendment to insure it. Recent opinion polls show over 80 percent of the public in favor of a balanced budget amendment. From my own district, I receive more mail on this subject than anything else. We only have to look as far as the 50 State legislatures, 31 of which have now applied to Congress for a constitutional convention to pro-

pose a balanced budget amendment. There is no question that the public is demanding action from its servants in Congress.

For the last two decades, taxpayers have watched Congress spend and spend, tax and tax, and the deficit grow out of control. And while taxpayers watched a Federal budget more than triple in just 11 years, they listened to the rhetoric from the Halls of Congress about the need to regain control of the budget. They watched the resolve of fiscal conscious Members crumble under pressure from special interests. They watched one Congress after another put a statute in place requiring a balanced budget only to watch the next Congress break the law with an even bigger budget deficit.

President Reagan has put it so well, so often. We can no longer tolerate this business as usual. A vote today for the balanced budget amendment will communicate to the American people that we are ready to put in practice all our promises.

Amending our Constitution is a serious step, and I know that none of the cosponsors of House Joint Resolution 350 take the issue lightly. Nor do we see a balanced budget amendment as a panacea for the economic problems we face today. These must be solved by ultimately reducing and eliminating the huge deficits now confronting us. But, even if by some miracle we are successful, we will be faced with the same problems in future years. Only by taking the first step today toward a constitutional amendment requiring a balanced budget can we secure a political environment in which fiscally responsible policies are a day-to-day, year-to-year reality.

The resolution before us would finally put in writing the principle that has governed our budget decisions for three-fourths of the country's history—that we live within our means. It does not turn over the budget process to the Federal courts, it does not dictate the specifics of future spending and taxing, it merely incorporates into the Constitution broad, basic, and fundamental concepts of fiscal responsibility and open and accountable fiscal decisionmaking.

I urge my colleagues to put aside party differences, to bury the campaign hatchets, and to vote today for their constituents and for the future integrity of this body. I urge an "aye" vote on this resolution.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. BLILEY).

Mr. BLILEY. Mr. Chairman, the United States is now experiencing a state of crisis—a crisis of responsibility. The Congress has failed to live up to its responsibility to the American people by not balancing the Federal budget. Americans everywhere suffer because of the inability of the Congress to act appropriately.

It is time for decisive action to end this crisis. The words of that great Virginian and that great American, Thomas Jefferson are most fitting at this time. Jefferson said:

> I am not an advocate for frequent changes in laws and constitutions, but laws and institutions must go hand in hand with the progress of the human mind * * *. With the change of circumstances, institutions must advance also to keep pace with the times. We might as well require a man to wear still the coat which fitted him when a boy as civilized society to remain ever under the regimen of their barbarous ancestors.

Mr. Chairman, it is time for a change—a change to end the crisis of responsibility and amend the Constitution for the good of the American people.

Mr. RODINO. Mr. Chairman, I yield 2 minutes to the gentleman from South Carolina (Mr. HOLLAND).

Mr. HOLLAND. Mr. Chairman, somebody—I guess it was President Kennedy—said that, "we don't discharge our obligations by the expression of lofty intent." I have no quarrel with my friends on both sides of the aisle who are today attempting to pass a resolution of lofty intent to solve this Nation's economic problems.

I was kind of amused that my colleague, the gentleman from Georgia, mentioned the prohibition amendment. I think it is correct to say that that amendment was enacted and ratified in the year 1917, and you would have thought that the whole country was going to sober up and become clear eyed, never again to touch "Old Demon Rum."

But that was not the case, I say to my friends, if they will recall. For 17 years this Nation went on a drunken binge, drinking bathtub gin, the bootleggers and traders in illicit whiskey got rich, the politicians got rich, the country experienced a wave of lawlessness, and nobody sobered up.

That is exactly what this thing is here today. I look on the prohibition amendment as a concrete block set into the fine marbled mural of this Nation's constitutional history. As you recall, the 21st amendment repealed prohibition, and I guess today if we pass the 27th amendment, no later than the 30th, some other Congress will be back repealing what some people want to do here today.

I do not think it is the right approach. I think we are walking through the majestic, marbled, intellectual colonnades of this Nation's history, and we should tread lightly. We should not amend the Constitution in this manner.

I wish I could join my Democratic leadership and support the Alexander substitute, but I cannot. I would like to join my conservative friends on both sides of the aisle and politically pass this amendment today, but I am not running for reelection.

□ 1300

I understand the problems of those of you who are.

It is an easy answer, it is an expression of lofty intent.

It will solve nothing. It manifests this Congress only real problem that I have discovered in 8 years here. If you want to amend the Constitution, give yourself a 4-year term. Then the 2-year ordeal of running for reelection, the immediate commands to "spend, spend, spend," the immediate commands of "campaign, campaign" and shortsighted political rhetoric will be solved.

Otherwise, leave the Constitution alone today. Tread lightly because you are dealing with the fabric that has made this country great.

Mr. McCLORY. Mr. Chairman, I yield myself 30 seconds merely to say that this will be the final Congress in which I serve. I cannot think of any nobler or more important act than to cast a vote in support of a balanced budget constitutional amendment, the vote that I expect soon to cast in this body.

May I say that while we have endeavored to handle this subject by way of statutory amendment, we could say the same about other subjects that are dealt with in the Constitution. But who would suggest that freedom of speech or freedom of religion or freedom of the press are not important enough to embody in the Constitution, that we can deal with these subjects by statute.

Balancing the Federal budget is important, too, it seems to me, and may be dealt with appropriately in the Constitution.

Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. COURTER).

Mr. COURTER. Mr. Chairman, when I first came to the Congress 4 years ago, I, too, was against a constitutional amendment to balance the budget for many of the same reasons that have been articulated here:

First, that we would be inviting the Supreme Court to participate in the budget process;

Second, that Congress already had the power to balance the budget;

Third, that if Congress was unwilling or unable to do that, the people would, through the democratic process, elect representatives that would make the tough decisions necessary to act responsibly on spending measures; and

Fourth, that all amendments proposed were flawed in some respect and imperfect. But Mr. Chairman, I have changed my mind on this matter.

We live in an imperfect world and no proposed amendment would be with-

out flaw for the vast majority of this institution. I believe the better amendment would be the one that simply required deficit spending measures to be passed by two-thirds of this body. To require then, perfection in constitutional amendments as in all legislation is to guarantee that nothing is ever done, nothing is ever ventured, and nothing is ever gained.

To say that the elective process will result in a Congress different in makeup which will behave differently on spending measures is to hope for the impossible. Its not been done before and its not going to happen now. The pressures to spend more than we have now is too great for this institution. We regrettably cannot govern without some outside discipline and restraint in the form of a constitutional spending bundary. Indeed, as I look at the coming elections, it is those Members who want to spend more, as opposed to those that want to spend less, that have the greatest likelyhood of success at the polls.

And so now we must do something different, we must recognize our own limitations, we must descipline ourselves in this way if our children are ever going to be free from the bondage of an oppressive debt, if this Republic is going to survive.

Mr. Chairmman, I yield such time as he may consume to the gentleman from Virginia (Mr. TRIBLE).

Mr. TRIBLE. Mr. Chairman, I rise in support of the resolution.

To amend the Constitution of the United States is a step to be taken with the utmost seriousness. The problem we face is equally as serious.

Federal spending remains out of control, and the consequences for our economy are devastating. It has led to numerous interest rates, economic decline, and unemployment.

The rekindled interest in restraining Federal spending has underscored a number of significant facts.

Our Nation has had only one balanced budget in the last 20 years.

Since 1950, our national debt has quadrupled from $250 million to $1.1 trillion.

In the past 5 years, the national debt had jumped $259 billion. Almost one-half of the national debt has been increased in the last 5 years. Borrowing has been an important way to cover shortfalls. The result has been an accumulation of massive public debt and rising rates of inflation induced by rapid monetary growth.

For fiscal year 1982, the national debt will surpass $1 trillion. This sum is equal to $4,400 for every man, woman, and child in America, or $17,600 for a family of four. Interest on this debt alone is projected at $100 billion, or $440 per capita. Interest payments comprise the third largest item in the Federal budget, consuming about a dime of every budget dollar. A good deal of these budget deficits are financed the politically easy way by creating new money at the Fed, with the inevitable effect of more subsequent inflation.

Prof. Allan Meltzer, noted—

> The greater amount of money issued to finance the deficit, the higher the subsequent inflation. The principal reason deficits lead to inflation is that the deficits are often financed by printing money.

In short, Federal budget deficits have fueled inflationary increases in the money supply. Between 1947 and 1967, an era of modest budget deficits, the inflation rate averaged just 1.6 percent in contrast, the average rate from 1967 to 1977 was 7 percent, accelerating to 9 percent in 1978. In the last 2 calendar years, inflation has run at 13.3 and 12.4 percent, respectively, the first time in 60 years we have endured double-digit inflation in back-to-back years. An additional consequence of deficits is that borrowing by the Treasury to finance them to some extent usurps funds from private financial markets.

Thus, in the absence of an effective limitation on Government taxing and spending, we can say that our political processes contain a strong systematic bias to increase those amounts. It is relatively easier to accede to new demands for spending than to cut back on existing programs. Inflation coupled with progressive taxation has provided the revenues to finance more spending.

Until 1973, the growth in Government spending and taxing was accompanied by a steady rise in real, after-tax income. Since 1973, growth in real private income has fallen off dramatically. As a result, the public is increasingly concerned about its rising tax burden.

It is clear that a majority of the Congress cannot resist the pressure for greater Government spending no matter how disasterous the impact on the economy.

We cannot maintain a productive and growing economy while allowing uncontrolled spending and ballooning budget deficits.

It is for these reasons, that we must constitutionally require a balanced budget.

A balance between taxing and spending means that our Government must live within its means. We all know the consequences for a firm or a family that incurs continuing deficits. What we have discovered is the consequences for the Federal Government are similar.

To reverse these effects, we need a balanced budget amendment.

The effects of this amendment would be dramatic and enduring.

We would effectively frustrate the forces of Government expansion.

We would take the Government out of the credit markets, leaving the Nation's savings available for productive investment.

We would reduce the murderous pressure of Government borrowing on interest rates—and bring homebuilders, automakers, and durable goods producers back from the brink of catastrophe.

Finally, we would remove the pressure from the Federal Reserve to create too much money, reducing inflationary forces substantially, and drive down interest rates.

It is equally important that we achieve a balanced Federal budget by reducing spending—not by increasing taxes. The amendment provides that tax increases will go in effect only if explicitly approved by a three-fifths vote of the full membership of both Houses.

Automatic tax increases will be eliminated. Taxes will not be able to grow faster than the growth of national income. The continuing windfall that the Federal Government achieves from inflation will be abolished.

It is a truism that our taxes are not too low, the problem is that the Federal Government spends too much. This amendment will directly address this problem.

When the Constitution was framed some 200 years ago, it went without saying that our Nation should live within its means. That principle is as vital today as was for our Forefathers.

We have, for 30 years, denied this principle and we have paid a tremendous cost. It is time to act, to restore policies of fiscal responsibility required by our Nation.

I urge my colleagues to support this resolution.

Mr. McCLORY. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Chairman, as an original cosponsor I rise in support of House Joint Resolution 350 and against the Alexander substitute. I have long worked for a constitutional amendment requiring a balanced Federal budget. I have served for 12 years in the House of Representatives. For each of those 12 years, there have been Federal deficits, which in recent years have grown to horrendous proportions. As a result our national debt today stands at $1.3 trillion. The cost of interest is $113 billion—in excess of the total Federal budget during the second year of the Kennedy administration.

The cumulative effect of year after year of deficit spending is at the root of the economic problems we are attempting to solve today. These recurrent deficits have had an avalanche effect upon our economy that is truly frightening. That is why I am supporting the balanced budget requirement.

For the first time since we launched our fight for a constitutional amendment requiring a balanced budget, the full House of Representatives is being given a chance to vote on this issue. Our Nation desperately needs the fiscal responsibility this amendment would force upon the executive departments and upon us in the Congress. Most State governments now are required to conduct their operations with an annual balanced budget. New York is one such State. Such States have benefited from the discipline it imposes. Our Federal Government, with the biggest budget of all, a budget replete with waste and extravagance, would benefit most of all from such a discipline.

I call upon my colleagues to vote for this resolution, and join the U.S. Senate in sending the consitutional amendment to the States for ratification. Such action would be the strongest we could take to help our country out of the economic doldrums in which it is now languishing.

Mr. McCLORY. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Chairman, it is interesting to have viewed for 3 years the voting record of a substantial majority on the opposite side of the aisle and then listen today to the hypocrisy emanating from that same location.

At least you are consistent. You are big spenders, serving every special interest and new program in sight, and you are opposed to any method that has any possibility of preventing you from continuing to do more of the same in the future.

But ladies and gentlemen of the far left, you are the problem. The stagnation and unemployment we are suffering today you have caused. Not President Reagan. Not supply-side economics. Not tax cuts. You. You have voted year after year to spend more than our economy can produce to support your proflagacy. The Government, every year, has had to borrow the difference. So, increasingly it went to the money markets to borrow, crowding out private investment, destroying the productive base to pay for more spending, pushing up interest rates and the cost to everyone to buy a house or a car or anything on credit. And the Fed, in order to help cover this huge borrowing binge, created new money to buy the Government's bonds and notes, devaluing and debasing our currency and pushing up even further the cost of everything our people buy.

As more and more borrowing became necessary with more and more of your mindless spending, greater and greater portions of the Federal budget went to borrowing costs. Finally, with the Consumer Price Index in double digits, the prime rate at 21½ percent, our economy on a roller coaster of stagnation and funny-money induced false prosperity, the American people called a halt to all this stupidity.

The new administration—supported by the Fed—stopped spewing out worthless dollars and turned the screws on inflation. The President attempted to cut off business-as-usual—tax and spend—by attacking the huge increases in spending and, at the same time, cutting down the future tax flow on which this irresponsibility has been, together with borrowing, fueled.

Now, we are at the ramparts of throwing out all of the big spending hypocrites on whose doorstep can be directly laid the economic misery and unemployment we are experiencing and correcting 20 years of fiscal and monetary irresponsibility in Washington.

It can be argued that a balanced budget amendment should not be necessary in an educated nation such as ours. But the political experts tell us, unfortunately, that the spend-and-elect politicians are still likely to be elected and some say will be back in the House in even greater numbers next year.

If the Conable amendment is finally adopted, maybe the same hypocrisy that has led us to this low level will also under the intent and spirit of this measure. Perhaps the spenders will find ways around the will of the people and continue to perpetuate themselves in office. Perhaps we are doomed to economic failure and nothing can be done.

But, Mr. Chairman, I cannot sit on the sidelines and say there is no answer. I believe we should put before the people a standard by which the profligate can be judged and allow the people to discover who puts his own election ahead of the future of our country. Let us put the importance of fiscal responsibility at the high place it deserves in our national consciousness, before it is truly too late.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. Mr. Chairman, we are not here through an accident of circumstance. We are here because over a period of decades there has been an unwillingness on the part of this Congress to restrain the growth of the Federal budget and the demand on the American taxpayer.

We took steps in California in order to restrain the growth of our budget in our State through proposition 13. The identical situation happened there. We found that those people in the legislature who had been spending our money come up with a substitute amendment called proposition 8. That amendment was discredited in the voting process just as the Alexander substitute will be today.

Proposition 13, which was brought by the people to solve their problems because the legislative process has not done so, was passed overwhelmingly.

I hope the Members of this House will support the Conable substitute, a true balanced budget amendment; which is brought before us today as a result of the discharge petition and which will help us to solve the fiscal problems that this Congress has been unwilling to solve without it.

Mr. McCLORY. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Chairman, I rise in support of the Conable/Jenkins constitutional balanced budget amendment, House Joint Resolution 350. As an original cosponsor of this measure, who has since been joined by 230 Members of this House—more than a majority—as cosponsors, I am delighted that we are finally going to get a chance to vote on this measure on the House floor. It is unfortunate that it took a discharge petition to force the measure out of committee where it has languished for so long, particularly in view of the overwhelming support which it enjoys, both in Congress and elsewhere.

Mr. Chairman, I come from a State which has had a constitutional requirement for a balanced budget for over 100 years. In fact, in California, it takes a two-thirds majority to pass the budget, or for that matter any bill which costs money. California has prospered under that arrangement, and I dare say, it has been prevented on numerous occasions from going down into that bottomless pit of public debt—now exceeding $1 trillion at the national level—precisely because of that provision. As a member of the California State Senate for over 12 years, I can testify to the workability of such an arrangement, which insures that only programs and budgets which enjoy bipartisan majority support will be enacted.

There are those who will argue that the State government is not the Federal Government, and that the Federal Government has extraordinary needs and should not have its hands tied in this way. Well the Federal Government does have greater responsibilities that the State, and this amendment recognizes that, allowing for suspension of the requirement in time of war. For specific programs requiring immediate attention, Congress can exceed the budget under this amendment, but only by a three-fifths vote and only on that issue.

This amendment does not tie Congress hands—it merely requires us to raise them visibly when we vote to burden future generations and taxpayers with deficits.

Congress has shown that it is incapable of putting together a balanced budget unless it is required to. We

have even adopted laws requiring us to balance the budget, as we did 2 years ago—yet these laws go unenforced and ignored. We have had a deficit budget in 20 of the last 21 years. The only way to quarantee a balanced budget is through a constitutional amendment.

And a balanced, no-deficit budget is the only way we are ever going to finally keep down interest rates, keep down inflation, and create the new jobs this country will need in the future.

Mr. Chairman, I will make one further comment, and then sit down. I will simply point out to my colleagues that if we do not take this step today, the consequences could be more far-reaching than you can imagine. I am talking about the fact that we are only three States short of having a constitutional convention imposed upon us from without. If we shirk our duty today, the job will still be done, but it will be done by someone else.

I urge the House to follow the lead of the Senate, and vote to present this matter to the States for their consideration as a constitutional amendment. Your children will thank you for it, your grandchildren, and the voters.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, one way or another, today, we are going to make history; either we will respond to the voice of the American people and pass a constitutional amendment requiring the Congress to balance the budget, or we will reject the sound advice of the people, and, instead, for the first time in history, allow the Constitution to be pried open. For, with only three States needed to call for a constitutional convention, a balanced budget amendment—along with who knows what else—will come about through the convention process. The American people want a balanced budget amendment, and they will get it, one way or another.

The time to face reality is upon us—we have the opportunity today to craft an amendment which will serve this Nation and its people well, by building fiscal responsibility into the spending process.

Let us face facts. As a result of the profligate spending practices of Congress over the last two decades, we face a debt of over $1 trillion. If we were to pass a balanced budget for this year and every year hereafter, and somehow add an additional $10 billion to the Treasury each year we would still be paying off the debt.

You and I will not be here to endure this burden, but our children's children will. The youth of America are already keenly aware of this fact. They are questioning why, since they and their children did not make the decisions which amassed this debt, nor benefit from the unbridled spending sprees, they should be forced to shoulder the financial burden we have created for them. And why should they not question this? A future free from overburdening taxes is as much their right as free speech or the right to vote. There rises out of this issue the very distinct possibility that future generations just might decide to renege on the financial liabilities which were thrust upon them by our generation. I do not even have to describe to you the kind of economic chaos which would result if this did occur—it would be exactly the opportunity which the Communist forces which oppose freedom are looking for in order to subjugate our people and our land to their totalitarian regimes. If our children renege, it will destroy liberty and freedom in America, which we say we cherish. But do we.

That is why it is incumbent upon us today to take this step toward assuring fiscal responsibility. Americans are the most hardworking and determined people in the world—our history proves that. We know how to weather storms and hard times. If we pass this measure today, we provide hope that a standard of frugality will prevail in Congress, instead of an unbridled spend-thrift attitude. I urge my colleagues to join with me in supporting this crucial Jenkins-Conable measure which holds the promise of continued freedom and prosperity to future generations of Americans.

If we, in Congress had the moral courage we would have been operating on a balanced budget as our forefathers did. If we had the moral courage we could balance the budget in 2 years. We have demonstrated we are not able to achieve the discipline to operate under a balanced budget, hence the need for the Jenkins-Conable amendment.

Mr. McCLORY. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD. Mr. Chairman, today the simple truths of Adam Smith are coming back to haunt us. We have long known from his "Wealth of Nations" that financial health and stability hinges upon resourcefulness, productivity, self-reliance, and ingenuity. Prosperity does not come by fiat, by law, or by platitude. It is time then that Congress learn the economic facts of life. You do not get something for nothing. Somewhere, somehow, someone pays. But with 20 years of deficit spending Congress is none the wiser for it. We are staring at a trillion dollar deficit that would not go away. Next year we are likely to add more than $100 billion to that figure. I refuse to speculate on what it will be the year after that. Interest alone on the deficit could feed not a country but a continent.

Mr. Chairman, our profligate past has caught up with us. There is ony so much of our future that we can mortgage. We have sold out not only on this generation, but also the next two. Compassion is a fraud when you spend money you do not have. The economic and financial crossroads that we face today is a blessing in disguise. We have to be honest with ourselves and honest with our constituents. We have to let them know that we are prepared to balance the budget and make it the law of the land. By making fiscal responsibility part of the Constitution we give evey citizen the satisfaction and security of knowing that no matter how complicated, how obscure or how convoluted our budget process is, that in the end the debits match the credits.

This concept is so strong, so fundamental, and so appealing that more than 90 percent of the American public is on record as favoring the balanced-budget amendment. Failing this we file for bankruptcy.

I firmly believe that the American public is asking for the discipline, the hardship, and the rewards of a Government that comes to grips with reality. Mr. Chairman, we fought this battle several years ago in the State of California when the people of the State adopted proposition 13. The State has been living within its means for several years. It works and it has instilled a new respect for Government and I firmly believe that we can do the same.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. FIELDS).

Mr. FIELDS. Mr. Chairman, as a Member of this body for 22 months, I cannot believe what I am hearing from the Democratic side of the aisle in thie debate.

In fact, I am ashamed—because I hear Members on the Democratic side of the aisle saying that this constitutional amendment is a charade—a political gimmick—that the Constitution should not be amended, that we can solve our budgetary problems through legislation and debate in this August body.

Well, I say to the Speaker, to the chariman of the Judiciary Committee, and others of the like persuasion that they are the ones attempting to pull a charade—they are the ones who are deceptive and attempting to mislead the American people.

But, you know, I can understand why the Speaker, the chairman of the Judiciary Committee, and other liberal Members want this constitutional amendment defeated—if this amendment is not defeated, then their time-worn policies of spend and spend even if you do not have the revenues are ended—their grand scheme for a redistribution of wealth in this country

with all of its ivory tower connotations is over, forever.

Those big spenders have not realized that the American people are not dupes, not stooges—in fact, they are wise to your old policies. Policies that have given us a trillion dollar national debt, policies that force us to borrow from private financial markets over $100 billion a year to finance the interest on that national debt, policies that have increased Federal spending in the last 20 years 700 percent, policies that now have the Federal Government consuming 24 percent of all goods and services produced in this country.

So, to the big spenders in Congress, I say your time is come; your policies have failed regardless of all your rhetoric, today we either fundamentally alter our Government for the future and for the better or we continue the policies of the past.

And, if you think that the American people are not smart enough to discern what your true motives are—you are sadly mistaken, and I look forward to working with your replacement next year.

Mr. RODINO. Mr. Chairman, I yield such time as he may consume to the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Chairman, as the House of Representatives prepares to debate the administration's idea for a balanced budget constitutional amendment, it is important that we and all Americans understand the likely result of the proposal.

Supporters of the amendment believe that it is a reasonable response to the public's legitimate demand for restraint in Government spending and an end to Federal deficits. In the Congress I have frequently joined my colleagues in voting for legislation to produce budget surpluses, and place our Government back on a sound financial footing. My support for these balanced budget plans and other measures to reduce spending deficits, is based on judgments that they would help put Americans back to work, provide a fairer tax system, while retaining our commitments to the elderly and disadvantaged.

I find it ironic that this administration, which seeks to leave its successor with a balanced budget constitutional amendment, has 2 years in a row strongly opposed congressional legislation to balance the budget. Instead the administration persuaded the Congress, over my opposition, to enact a program which will add $700 billion to the national debt by 1984. By cutting taxes three times faster than spending, the administration has created record deficits and interest rates, destroying all incentives for economic expansion, and prolonging our national recession. The administration is now trying to disguise the failure of their economic program by seeking a constitutional barrier to future deficit spending.

If the balanced budget constitutional amendment gains speedy approval in the Congress and among the States, what effect would it have if enforced in 1985? Under present projections, the House Budget Office reports that it would require at least $215 billion of spending cuts to pass a balanced budget in 1985.

These cuts would have to come from either social security or national defense, which account for two-thirds of the budget, or from virtually eliminating most other functions of the Federal Government.

For example, in 1985 social security, national defense, and a rudimentary Federal Government will cost about $675 billion under current policies. If these programs were not reduced, the required $215 billion in cuts to balance the budget would have to come from the $262 billion that is left in the budget for all other areas. This means an 82 percent reduction in most Government programs, including law enforcement, housing, education, highways, aid to the handicapped, job training, research and development, small business aid, care for the poor, and disaster assistance.

If no programs were protected, an across-the-board cut of 23 percent in each Government program would be required to balance the budget. This would reduce national defense by $70 billion, social security and medicaid by $60 billion, $6 billion reduction in both unemployment compensation and veterans' programs, and sizable cuts in everything else.

I do not believe that my constituents, and our Nation, support these alternatives.

I am concerned that the administration's support for a balanced budget constitutional amendment is a thiny veiled threat to dismantle the social security system as we know it. Federal discretionary programs, which make up most of Government's structure, have already taken the majority of the enacted cuts, with $75 billion cut in the last 2 years. Furthermore, the administration is opposing all attempts to reduce its $1.6 trillion, 5-year defense buildup. If the administration will not support needed cuts in defense, and most other Government programs have been substantially reduced, social security is the only program large enough where cuts could approach satisfying a constitutional amendment to balance the budget.

Constantly the administration tells the American people that it will not cut social security. But it was only 1 year ago when the administration proposed cutting early retiree's benefits by 40 percent, disability benefits by 30 percent, and everybody else's pensions by 20 percent. This past spring the administration endorsed legislation to immediately reduce social security benefits by $40 billion. Fortunately, the Congress has succeeded in blocking these radical attacks on social security.

The passage of a balanced budget constitutional amendment, however, would create greater leverage to enact drastic social security benefit cuts and push millions of elderly into poverty. I urge my colleagues to consider this issue closely.

Mr. RODINO. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Chairman, no one can blame the American people—after decades of deficit spending, after electing consecutive Presidents who promised to balance the budget, and after enduring very poor economic conditions over these past few years—for demanding the strongest possible medicine to require balanced budgets.

The proposed amendments before us today holds out the hope that, at long last, the Congress and Executive will be forced to exercise the same prudence in planning the national budget as most people do in planning their family or business budgets.

As simple and forthright as that appeal may be, it will prove to be not only a false hope, but a grievously misplaced one.

First, none of the proposed constitutional amendments before us presents a guarantee that the budget will be balanced any time soon. Indeed, it may be 1985, 1987, 1989, or beyond before an amendment is ratified. In the meantime, under current budget projections, we will see one record deficit heaped upon another, year after year, meaning more Federal borrowing, more Federal debt, more high interest rates, and an even larger and more crushing burden of debt on our children and their children.

Second, there is no guarantee that a constitutional amendment will ever be ratified—especially when the legislatures of the States realize that the amendment will require more than $200 billion in spending cuts if it were in effect in 1985, and that programs that are important and helpful to the States are most likely to be the first to be eliminated to achieve that savings.

Indeed, that amendment would require an across-the-board cut of more than 20 percent in 1985. If we are more realistic, and assume that defense, social security, veterans, and other politically sensitive programs will not be cut, it will require cuts of over 80 percent—that means a reduction of over four-fifths—in the remaining areas, such as mass transportation, highways, wastewater treatment, health, low-income assistance, housing, education, and revenue sharing. When State legislators across the

Nation begin to study these numbers and consider their impact, we may very well see the balanced budget juggernaut come to a screeching halt.

Third, even if the amendment is ratified, it may prove to be either unworkable or unenforceable. In the words of columnist George Will, the amendment could prove to be "98 percent loophole," being the economic equivalent of requiring lobsters to grow on elm trees.

In a not entirely successful effort to be terse, the authors of the proposed constitutional amendment have created more questions than they have answered about how the process will work. Moreover, since the economy by its nature is highly fluid, difficult to forecast, and subject to unforseen emergencies, it would seem that any effort to render economic law—if indeed there is any such thing as economic law—with constitutional clarity is doomed to end in frustration. Many current scholars believe that a truly effective balanced budget amendment would be longer than the original Constitution, and would defy understanding by the average citizen of this country.

And if the language of the amendment proves faulty or inadequate, it can be cured only by retracing the long ratification process which requires a two-thirds vote of both Houses and subsequent approval by legislatures of three-fourths of the States. That could mean months or years of trying to make Government work under an unworkable process.

But last, and most importantly, adoption of a constitutional budget amendment creates the very real danger that the unelected judiciary will be forced to arbitrate the politics of revenue and spending. Do we really believe that judges—who are life tenured and removable from office only by impeachment—should be called upon to decide such purely political questions as levels of taxes, defense spending, food stamps, or social security benefits? Let there be no doubt in this chamber we are making a major restructuring of our system of government. We are realigning power among the three branches.

Should we abrogate to the judicial branch one of the Congress most fundamental responsibilities?

Certainly the framers of our Constitution—Benjamin Franklin, John Madison, George Washington, and others among our greatest political thinkers—would not have thought so. To the contrary, they developed a system of checks and balances among the three great departments of Government and reserved to the elected Congress the political decisions which the courts are ill-equipped to make. Nor did they ever intend for this great document—our Constitution—to become a vehicle for addressing transitory social or economic issues. This is especially true of issues such as balancing the budget where the Constitution itself does not present an obstacle to placing into statutory law the consensus of the American people.

That concensus of the American people is that the budget should be balanced, and that is something we can do now—not 4 or 7 or 10 years from now.

The American people want us to accept our responsibility to get the Nation's fiscal house in order—not pass the buck to some future Congress or administration.

I find it ironic that among the strongest supporters of this amendment are the very same people who have developed and supported the largest deficits in the history of our country. They are the same people who control the White House and ideological majorities in both Houses. I ask you, what is stopping us? What is stopping us from balancing the budget, here, today? It is certainly not the Constitution.

I will tell you what it is that is stopping us. It is reality that is stopping us. We have not been honest with the American people. The American people have been told that we can greatly increase defense spending and slash taxes—with absolutely no compromise on those issues—and still balance the budget. Deficits have been blamed on runaway spending on social programs, when in fact the elimination of all social spending outside of social security would not erase the types of deficits that are now projected for 1985 and beyond.

The balanced budget amendment is not old wine in a new bottle. It is not even new wine in an old bottle. To call it snake oil would be too kind. It is just an empty bottle—an empty promise, a fraud on the American people.

With the housing and automobile industries today in a virtual depression, other business troubled by near-record bankruptcies, 10-percent unemployment, and our Nation's farmers gasping in an economic dustbowl, this is no time for empty and ineffective remedies.

We have an alternative—even if we fear that Congress will never have the discipline to pass a balanced budget—we can enact an amendment to the Budget Act to require balanced budgets on the same terms set forth in the proposed constitutional amendment. I, along with my colleague from Illinois, Mr. HYDE, have proposed such a bill, as have others among our colleagues.

That legislation can be enacted far sooner, be far more comprehensive, and be far more effective, than an uncertain, vague, and possibly unenforceable constitutional amendment could ever be.

Unlike other transient efforts to legislatively require a balanced budget, our proposal has teeth. Because it is an amendment to the Budget Act, just one Member of the House and Senate with an objection would be sufficient to block consideration of an unbalanced budget.

I hope my colleagues will reject this deceptive, dishonest and potentially destructive constitutional amendment.

I know that it will take some courage, because the elections are just a few short weeks away, and the American people have been told that this amendment will solve the problems of our economy that all of us have been struggling with.

But you know better. In your heart, you know that even if this amendment is approved and works, we will still see years and years more of deficit spending—years that we could change if we have the courage.

Over 200 years ago, Edmund Burke described our role. he said:

> Your representative owes you, not his industry only, but his judgment; and betrays you instead of serving you if he sacrifices it to your opinion.

Let us not betray the American people. Let us vote this amendment down, and then get on with the tough decisions that are required here and now, not years from now.

□ 1310

Mr. RODINO. Mr. Chairman, I yield 30 seconds to the gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Chairman, I am firmly committed to reductions in in Government spending and have an established record of voting strongly in favor of fiscal responsibility. A balanced budget is desirable. However, I am not supporting the vehicle of a constitutional amendment.

Congress and the President presently have the full contitutional authority to balance the budget; and it is my strong belief that economic policies should be decided by the process which is already part of the constitution, where the majority consensus rules. History shows that the amendment process has almost always been used to correct discovered faults or to protect against Government infringement of fundamental rights. The only exception was the 18th amendment imposing prohibition which was later repealed by the 21st amendment. If the concern is with spendthrift Members of Congress, the appropriate remedy is not a change in the constitution but more self-disciplined elected officials.

Second, the proposals under consideration today ignores the fact that the Government does not know its "income" until all taxes are paid at the end of the year; yet "bills" must be regularly paid during the year.

Third, this proposal specifically allows for overriding the balanced

budget if a three-fifths percentage of the Congress agrees. In my judgment, a rule which requires such careful attention to its "exceptions" should not be made a part of our Constitution. Put another way, a minority of 174 will determine fiscal policy. If such a super majority were to be required, for example, the President's programs could not have been adopted. There are many circumstances where this same minority could paralyze the fiscal policymaking process.

In addition, such an amendment could shift budgetmaking authority from the legislative and executive branches to the judiciary. My colleague (Mr. HUGHES) has made this case most cogently. Judiciary now has virtually no role in raising taxes and allocating revenues. However, judiciary would invariably be pushed into the budgetary process to enforce an amendment in the event of congressional failure to comply. I maintain that not only is judiciary not equipped to intervene in this area, but it would serve to gravely undermine the congressional lawmaking process.

Finally, I am reluctant to support such an amendment because there is every possibility that the Congress would budget by regularly increasing taxes with simple majority.

Rudolph G. Penner of the American Enterprise Institute, a well-respected Conservative Research Institute, said it best when he testified before the Judiciary Subcommittee:

> If the political will to limit budget growth does not exist, constitutional limits will not do much good and they could do a great deal of harm. If the political will to limit budget growth does exist, constitutional amendments are not required.

Mr. RODINO. Mr. Chairman, I yield such time as he may consume to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. I thank the distinguished chairman of the Judiciary Committee for yielding me this time. Mr. Chairman, I rise in strong opposition to House Joint Resolution 350, the Conable-Jenkins constitutional amendment, and also in opposition to the Alexander substitute. A constitutional amendment is not the proper way to deal with the fiscal policy of the United States. We cannot lock certain economic assumptions and formulas—which may be popular today—into the basic governing document of our country. These kinds of decisions are properly made through strict enforcement of a budget process which, while it has demonstrated weaknesses, can be corrected to bring about greater discipline and responsibility from Congress and the President.

The Jenkins-Conable constitutional amendment is a totally irresponsible legislative vehicle which would not only fail in its basic intent of balancing the budget, but would create a drastic realinement in our basic constitutional system by letting the courts decide basic matters of economic policy and giving the President an item veto on legislation passed by the Congress. The Alexander constitutional amendment moves in a much more constructive direction, such as requiring the President to submit a balanced budget, and requiring Congress to enact one as well. But its provisions are much better suited to a balanced-budget statute which could be enacted promptly by the Congress and signed into law by the President, without the delays a constitutional amendment entails of waiting for ratification by three-fourths of the States. I regret that the gentleman from Arkansas felt it necessary to couch his proposal in its present form, which merely counters one misguided constitutional amendment with another.

I am a cosponsor of H.R. 7123, a balanced budget statute introduced by Budget Committee Chairman JIM JONES of Oklahoma, which I think is the kind of proposal Congress needs to take up quickly next year. It strengthens the Budget Act and uses the rules of the House and Senate to strengthen budget discipline by requiring a three-fifths vote to waive agreed-on spending and revenue levels. It allows the flexibility that Congress and the President need in responding to changing circumstances.

There are other constructive balanced budget statute proposals pending before the Congress. It is high time to reject the political posturing behind these phony constitutional amendments and enact a statute which will actually work to accomplish the goal we all want—better control of the Federal budget.

Mr. RODINO. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. REUSS).

Mr. REUSS. Mr. Chairman, ordinarily a Congress can do things on its last day which may be foolish, but which have no long-term ill-effect. They can always be repealed by the next Congress in a few months.

But that is not true of the balanced budget amendment now before us. If two-thirds of the House follows President Reagan and votes to pass it today, the Senate has indicated that it is geared in and will wave it through. It then goes to the 50 States for ratification by three-fourths of them. Perhaps ratification will be accomplished within a few months. Perhaps it will take 3 or 5 or 8 years. Perhaps never.

But one thing is clear. If we pass this amendment today, we are forging a "Sword of Damocles" which will hover over and threaten the United States all through the rest of the 1980's. From here on out, it will always be an imminent possibility through the decade that—an almost impossible 60-percent majority vote excepted—Congress can respond to a recession only by making it worse. The present deficit is caused in the main by a recession. Under the amendment, this recession, or a successive recession and its resulting superdeficit, could be met only by raising taxes and lowering expenditures, which would have the effect of increasing the recession and the deficit, requiring further tax raising and spending lowering, a worsened recession and a worsened deficit, and so on ad infinitum until this great democracy, by the free act of its elected representatives, finally sinks forever beneath the waves.

What will happen if we pass the balanced-budget amendment today? I will tell you.

After a weekend of champagne toasts and mutual congratulation by the proponents the sober businessmen and bankers who operate our Nation's economy will take a look at the unguided missile we have launched. Businessmen will reasonably enough observe that in a climate where at any moment Congress may be forced to turn a recession into a depression, expansion, and capital investment are futile, and retrenchment is the only course. Bankers will reasonably observe that long-term lending in such a climate is risky, and the Nation's credit should therefore concentrate on short-term credit to the speculators.

The recession, instead of improving, will deepen. The 7 years of euphoria to which proponents of the amendment confidently look, will turn into a lost weekend, followed by a splitting hangover which will begin, next Monday morning.

Do not say I did not warn you.

Mr. McCLORY. Mr. Chairman. I yield 1 munite to the gentleman from Florida (Mr. BAFALIS).

Mr. BAFALIS. Mr. Chairman, I have waited almost 10 years for this moment, because it was almost 10 years ago when I came to this body and was appalled to find that we had a national debt of some $457 billion. The very first legislative action that I took in this Chamber, the very first measure that I drafted, was a constitutional amendment to prohibit deficit spending. Since that time the national debt has gone from $457 billion to $1,100,000,000,000 on the 27th of September of this year. And it is an increasing debt that will continue unless we pass this resolution.

I have listened to my colleagues on the other side of the aisle talking about this Congress setting priorities. This Congress has failed to set priorities during the 10 years that I have been here because we are not required to restrict our overindulgence. We never have to say no to those people who come and petition this Congress. We say yes and yes and yes, and then we go home for election and we say,

"We supported your bill and your appropriation and the money that you wanted," and we get reelected time after time.

The time has come to tell America that we are really serious about bringing about sensible spending to this Nation. After all my years in the Congress, I am convinced this resolution is the only real hope for fiscal sanity in America.

□ 1320

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, the last time that our country had a balanced budget we were spending about $184 billion. That was about 12 years ago. But the interesting thing was that with a balanced budget the country only had 3½ percent unemployment.

Well, now we are spending $750 billion, and we have about 10 percent unemployment. And what happened is that as Congress puts more and more of the Nation's money into the Government operations, we have less and less capital money available for private enterprise to create jobs. What America needs today is to let more money go into private business, private enterprise, to create more jobs for America.

And the way you can do that is when America has a balanced budget. Balancing the budget is the most essential, the top priority that faces Congress today.
